Subsequent to the publication of our initiation notice, we received timely withdrawal requests for Eurocopter Deutschland GmbH (formerly Messerschmitt-Boelkow-Blohm (MBB)), Eurocopter France (formerly Aerospatiale Division Helicopteres (ADH)), and ITT Jabsco. Because there were no other requests for review of these companies from any other interested parties, we are terminating the reviews with respect to these companies, in accordance with 19 CFR 353.22(a)(5).

The Department allowed certain companies to submit abbreviated questionnaire responses if they sold exclusively from published price lists and were able to demonstrate that all price list prices, with rare exceptions, were adhered to. In lieu of a detailed sales listing, firms that qualified for the price list option were permitted to provide all applicable price lists and aggregate cost and adjustment data. In these reviews, Dassault and SNECMA qualified for, and opted to use, this price list option.

Best Information Available

In accordance with section 776(c) of the Tariff Act, we have preliminarily determined that the use of best information otherwise available (BIA) is appropriate for certain firms. The Department's regulations provide that we may take into account whether a party refuses to provide information (19 CFR 353.37(b)). For purposes of these reviews, we have used the most adverse BIA—generally the highest rate for any company for the same class or kind of merchandise from the less-than-fair-value (LTFV) investigation or prior administrative reviews—whenever a company refused to cooperate with the Department or otherwise significantly impeded the proceeding.

Because SNFA and Valeo failed to respond to the Department's questionnaire, we have used the highest rate ever found for each class or kind of merchandise.

Scope of Reviews

The products covered by these reviews are antifriction bearings (other than tapered roller bearings), mounted or unmounted, and parts thereof (AFBs), and constitute the following classes or kinds of merchandise:

1. Ball Bearings and Parts Thereof

These products include all antifriction bearings that employ balls as the rolling element. Imports of these products are classified under the following categories: Antifriction balls, ball bearings with integral shafts, ball bearings (including radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Imports of these products are classified under the following Harmonized Tariff Schedules (HTS) subheadings: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

2. Cylindrical Roller Bearings and Parts Thereof

These products include all AFBs that employ cylindrical rollers as the rolling element. Imports of these products are classified under the following categories: Antifriction rollers, all cylindrical roller bearings (including split cylindrical roller bearings) and parts thereof, and housed or mounted cylindrical roller bearing units and parts thereof.

Imports of these products are classified under the following HTS subheadings: 8482.50.00, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

3. Spherical Plain Bearings and Parts Thereof

These products include all spherical plain bearings that employ a spherically shaped sliding element. Imports of these products are classified under the following HTS subheadings: 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8485.90.00, 8708.99.50.

The size or precision grade of a bearing does not influence whether the bearing is covered by the order. The HTS item numbers are provided for convenience and Customs purposes. The written descriptions remain dispositive.

United States Price

In calculating United States price (USP), the Department used purchase price (PP) or exporter's sales price (ESP), as defined in section 772 of the Tariff Act, as appropriate.

Due to the extremely large number of transactions that occurred during the period of review (POR) and the resulting administrative burden involved in calculating individual margins for all of these transactions, we sampled sales to calculate USP, in accordance with section 777A of the Tariff Act. When a firm made more than 2000 ESP sales transactions to the United States for a particular class or kind of merchandise, we reviewed sales during sample weeks. We selected one week from each two-month period in the review period, for a total of six weeks, and analyzed each transaction made in those six weeks. The sample weeks included May 1–5, 1991; July 1–7, 1991; October 21–27, 1991; December 16–22, 1991; February 17–23, 1992, and March 2–8, 1992. We reviewed all PP sales transactions during the POR because there were few PP sales.

USP was based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in, or for exportation to, the United States. We made deductions, as appropriate, from PP and ESP for movement expenses, discounts, and rebates.

We made additional deductions from ESP for direct selling expenses, indirect selling expenses, and repacking in the United States.

We made an addition to USP for value-added taxes (VAT) in accordance with section 772(d)(1)(C) of the Tariff Act. However, as noted in the FMV section of this notice, we followed the instructions of the Court of Appeals for the Federal Circuit in *Zenith Electronics Corp.* v. *United States*, 92–1043 (Zenith) and did not make a circumstance of sale adjustment for VAT taxes. Furthermore, the Department is now examining the Zenith decision in detail and is considering the proper methodology for making this tax adjustment. Interested parties are invited to comment upon this issue.

With respect to subject merchandise to which value was added in the United

VOL 58 ISS 79 AP 27 1993 UMI

States, e.g., parts of bearings that were imported and further processed into finished bearings by U.S. affiliates of foreign exporters prior to sale to unrelated U.S. customers, we deducted any increased value in accordance with section 772(e)(3) of the Tariff Act.

We consider those bearings otherwise subject to the order that are incorporated into nonbearing products, which collectively comprise less than one percent of the value of the finished products sold to unrelated customers in the United States, to be outside the scope of the antidumping orders on AFBs and not subject to assessment of antidumping duties. In Roller Chain, Other Than Bicycle, From Japan (48 FR 51801; November 14, 1983), roller chain, which was subject to an antidumping duty order, was imported by a related party and incorporated into finished motorcycles. The finished motorcycles were the first articles of commerce sold by the subject producer to unrelated purchasers in the United States. Since the roller chain did not constitute a significant percentage of the value of the completed product, the Department found that a USP could not reasonably be determined for the roller chain, and the product was therefore excluded from the scope of the order in such circumstances. We have applied this principle to these reviews with respect to certain sales made by Dassault and Turbomeca.

Foreign Market Value

The home market was viable for all companies and all classes or kinds of merchandise except for Dassault. To calculate foreign market value (FMV) for SPBs from Dassault, we used sales to a third country, the United Kingdom. The Department used home market price, third country price, or constructed value (CV) as defined in section 773 of the Tariff Act, as appropriate, to calculate FMV.

Due to the extremely large number of transactions that occurred during the POR and the resulting administrative burden involved in examining all of these transactions, we sampled sales to calculate FMV, in accordance with section 777A of the Tariff Act. When a firm had more than 2000 home market or third country sales transactions for a particular class or kind of merchandise, we selected sales from sample months that corresponded to the sample weeks selected for U.S. sales sampling. The sample months included April, May, July, October, and December of 1991, and February, March, and June of 1992.

In general, the Department relies on monthly weighted-average prices in the calculation of FMV in administrative reviews. Because of the significant volume of home market sales involved in these reviews, we examined whether it was appropriate to average, in accordance with section 777A of the Tariff Act, all of respondents' home market sales data that we collected. In this case, the use of POR weighted-average prices results in significant time and resource savings for the Department. To determine whether a POR weighted-average price was representative of the transactions under consideration, we performed a three-step test.

We first compared the monthly weighted-average home market price for each model with the weighted-average POR price of that model. We calculated the proportion of each model's sales whose POR weighted-average price did not vary meaningfully (*i.e.*, within plus or minus 10 percent) from the monthly weighted-average prices. We did this for each model within each class or kind of merchandise. We then compared the volume of sales of all models within each class or kind of merchandise whose POR weighted-average price did not vary meaningfully from the monthly weighted-average price with the total volume of sales of that class or kind of merchandise. If the POR weighted-average price of at least 90 percent of sales in each class or kind of merchandise did not vary meaningfully from the monthly weighted-average price, we considered the POR weighted-average prices to be representative of the transactions under consideration. Finally, we tested whether there was any correlation between fluctuations in price and time for each model. Where the correlation coefficient was less than 0.05 (where a coefficient approaching 1.0 means a direct relation between price and time, *i.e.*, that prices consistently rise from month to month, and a coefficient approaching zero means no relation between prices and time), we concluded that there was no significant relation between price and time. We calculated a weighted-average POR FMV only for those classes or kinds that satisfied our three-step test for the factors of price, volume, and time.

We compared U.S. sales with sales of such or similar merchandise in the home market. We considered all non-identical products within a bearing family to be equally similar. As defined in the questionnaire, a bearing family consists of all bearings within a class or kind of merchandise that share the following physical characteristics: Load direction, bearing design, number of rows of rolling elements, precision rating, dynamic load rating, and physical dimensions.

Home market prices were based on the packed, ex-factory or delivered prices to related or unrelated purchasers in the home market. Where applicable, we made adjustments for movement expenses, differences in cost attributable to differences in physical characteristics of the merchandise and differences in packing. We also made adjustments for differences in circumstances of sale in accordance with 19 CFR 353.56. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. Due to the Court of Appeals' decision in *Zenith Electronics Corp.* v. *United States*, 92–1043, we made no adjustments for differences in the VAT taxes. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations and to offset U.S. indirect selling expenses deducted in ESP calculations, but not exceeding the amount of the indirect U.S. expenses.

Third country prices were based on the delivered prices to unrelated purchasers. Where applicable, we made adjustments for movement expenses, direct selling expenses, differences in cost attributable to differences in physical characteristics of the merchandise, and differences in packing. We also made adjustments, where applicable, for third country indirect selling expenses to offset U.S. indirect selling expenses deducted in ESP calculations, but not exceeding the amount of the indirect U.S. expenses.

We used sales to related customers only where we determined such sales were made at arm's length, *i.e.*, at prices comparable to prices at which the firm sold identical merchandise to unrelated customers.

Where we found home market sales below the cost of production in the previous administrative review period, as in the case of BBs from SKF, we initiated a cost investigation. In addition, based on allegations submitted by Federal-Mogul in this administrative review, we initiated a cost investigation with respect to BBs sold by SNR.

In accordance with section 773(b) of the Tariff Act, in determining whether to disregard home market sales made at prices below the cost of production, we examined whether such sales were made in substantial quantities over an extended period of time. When less than 10 percent of the home market sales of a particular model were at prices below the cost of production, we did not disregard any sales of that model. When 10 percent or more, but not more than 90 percent of the home market sales of a particular model were determined to be below cost, we excluded the below-cost home market sales from our calculation of FMV provided that these below cost sales were made over an extended period of time. When more than 90 percent of the home market sales of a particular model were made below cost over an extended period of time, we disregarded all home market sales of that model from our calculation of FMV.

To determine if sales below cost had been made over an extended period of time, we compared the number of months in which sales below cost had occurred for a particular model to the number of months in which the model was sold. If the model was sold in three or fewer months, we did not disregard below-cost sales unless there were sales below cost of that model in each month sold If the model was sold in more than three months, we did not disregard below-cost sales unless there were sales below cost in at least three of the months in which the model was sold.

Since none of the respondents has submitted information indicating that any of its sales below cost were at prices which would have permitted "recovery of all costs within a reasonable period of time in the normal course of trade," within the meaning of section 773(b)(2) of the Tariff Act, we were unable to conclude that the costs of production of such sales were recovered within a reasonable period. As a result, we disregarded below-cost sales of BBs made by SKF and SNR over an extended period of time.

Home market sales of obsolete merchandise and distress sales were not disregarded in our cost analysis unless there was documented information on the record demonstrating that such sales were outside the ordinary course of trade.

In accordance with section 773(a)(2) of the Tariff Act, we used constructed value as the basis for FMV when there were no sales of such or similar merchandise for comparison in the home market or third country.

We calculated constructed value in accordance with section 773(e) of the Tariff Act. We included the cost of materials, fabrication, general expenses, profit and packing. We also included: (1) actual general expenses, or the statutory minimum of 10 percent of materials and fabrication, whichever was greater; (2) actual profit or the statutory minimum of 8 percent of materials, fabrication costs and general expenses, whichever was greater; and (3) packing costs for merchandise exported to the United States. Where appropriate, we made adjustments to CV in accordance with 19 CFR 353.56, for differences in circumstances of sale. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations. For comparisons involving ESP transactions, we made further deductions to constructed value for indirect selling expenses in the home market, capped by the indirect selling expenses incurred on ESP sales in accordance with 19 CFR 353.56(b)(2).

Preliminary Results of Reviews

As a result of our reviews, we preliminarily determine the weighted-average dumping margins for the period May 1, 1991 through April 30, 1992 to be:

Company	BBs	CRBs	SPBs
Dassault	0.00	0.00	0.00
SKF	5.29	(1)	0.00
SNFA	66.42	18.37	(2)
SNR	2.98	0.00	(2)
SNECMA	23.82	10.98	(2)
Turbomeca	0.00	0.51	(1)
Valeo	66.42	18.37	(2)

[1] No U.S. sales during the review period.
[2] No review requested.

Parties to this proceeding may request disclosure within 5 days of the date of publication of this notice. Any interested party may request a hearing within 10 days of the date of publication of this notice. A general issues hearing, if requested, will be held on May 24, 1993, in HCHB Auditorium, at 9 a.m. Any hearing regarding issues related solely to France, if requested, will be held on May 27, 1993, in room 1617–M–4, at 2 p.m.

General issues briefs and/or written comments from interested parties may be submitted not later than May 12, 1993. General issues rebuttal briefs and rebuttals to written comments, limited to the issues raised in the initial briefs and comments, may be filed not later than May 19, 1993. Case briefs and comments and all rebuttal briefs regarding issues related solely to France are due no later than May 17 and May 24, 1993, respectively. The Department will subsequently publish the final results of these administrative reviews, including the results of its analysis of issues raised in any such written comments or hearings.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Because sampling prevents us from doing entry-by-entry assessments, we will calculate an importer-specific *ad valorem* appraisement rate for each class or kind of merchandise based on the ratio of the total value of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total value of antidumping duties, which are calculated by taking the difference between statutory FMV and statutory USP, by the total statutory USP value of the sales compared, and adjusting the result by the average difference between USP and customs value for all merchandise examined during the POR.) Where we do not have entered customs value to calculate an *ad valorem* rate, we will calculate an average per-unit dollar amount of antidumping duty based on all sales examined during the review period. We will instruct the Customs Service to assess this average amount on all units included in each entry made by the particular importer during the POR. The Department will issue appropriate appraisement instructions directly to the Customs Service upon completion of these reviews.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rates for the reviewed companies will be those rates established in the final results of these reviews; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other" rate established in the final results of these administrative reviews. This rate represents the highest rate for any firm with shipments in these administrative

VOL 58 ISS 79 AP 27 1993 UMI

reviews, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(5).

Dated: April 14, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From Germany; Preliminary Results of Antidumping Duty Administrative Reviews and Partial Termination of Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative reviews and partial termination of administrative reviews.

SUMMARY: In response to requests from interested parties, the Department of Commerce has conducted administrative reviews of the antidumping duty orders on antifriction bearings (other than tapered roller bearings) and parts thereof from Germany. The classes or kinds of merchandise covered by these orders are ball bearings (BBs), cylindrical roller bearings (CRBs), and spherical plain bearings (SPBs). The reviews cover six manufacturers/exporters and the period May 1, 1991 through April 30, 1992 (the POR). Although we initiated reviews for nine other manufacturers/exporters, we are terminating the reviews because the requests for review were timely withdrawn. As a result of these reviews, the Department has preliminarily determined the weighted-average dumping margins for the reviewed firms to ranging from 0.08 percent to 19.42 percent on BB, from 8.51 percent to 24.42 percent on CRBs from 7.57 percent to 8.71 percent on SPBs.

We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: April 21, 1993.

FOR FURTHER INFORMATION CONTACT: Carlo Cavagna (Fichtel & Sachs AG), Michael Diminich (FAG Kugelfischer George Schaefer KgaA), J. David Dirstine (SKF GmbH, George Mueller Nurnberg, AG), David Levy (NTN Kugellagerfabrik (Deutschland) GmbH), Maureen McPhillips (INA Walzlager Schaeffler KG), or Richard Rimlinger; Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-4733.

SUPPLEMENTARY INFORMATION:

Background

On May 15, 1989, the Department of Commerce (the Department) published in the **Federal Register** (54 FR 20900) the antidumping duty orders on ball bearings (BBs), cylindrical roller bearings (CRBs) and spherical plain bearings (SPBs) and parts thereof from Germany. On July 6, 1992, in accordance with 19 CFR 353.22(c), we initiated administrative reviews of those orders for the period May 1, 1991 through April 30, 1992 (57 FR 29700). The Department is now conducting these administrative reviews in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act). These reviews cover the following firms and classes or kinds of merchandise:

Name of firm	Class or kind
FAG Kugelfischer George Schaefer KGaA (FAG).	BBs, CRBs, SPBs
Fichtel & Sachs AG	BBs
Georg Mueller Nurnberg, AG (GMN).	BBs
INA Walzlager Schaeffler KG (INA).	BBs, CRBs, SPBs
NTN Kugellagerfabrik (Deutschland) GmbH (NTN).	BBs, CRBs, SPBs
SKF GmbH (including all relevant affiliates).	BBs, CRBs, SPBs

Subsequent to the publication of our initiation notice, we received timely withdrawal requests for Durbal GmbH & Co., Eurocopter Deutschland GmbH (formerly Messerschmitt-Boelkow-Blohm (MBB)), Eurocopter France (formerly Aerospatiale Division Helicopteres (ADH)), ITT Jabsco, Kugelfabrik Schute GmbH & Co., Neuweg Fertigung GmbH (NWG), Societe Nouvelle de Roulements (SNR), Universal-Kugellager-Fabrik GmbH, and Volkswagen AG. Because there were no other requests for review of these companies from any other interested parties, we are terminating the reviews with respect to these companies, in accordance with 19 CFR 353.22(a)(5).

Scope of Reviews

The products covered by these reviews are antifriction bearings (other than tapered roller bearings), and parts thereof (AFBs), and constitute the following "class or kinds" of merchandise:

1. Ball Bearings and Parts Thereof

These products include all antifriction bearings that employ balls as the rolling element.

Imports of these products are classified under the following categories: Antifriction balls, ball bearings with integral shafts, ball bearings (including radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Imports of these products are classified under the following Harmonized Tariff Schedules (HTS) subheadings: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

2. Cylindrical Roller Bearings and Parts Thereof

These products include all AFBs that employ cylindrical rollers as the rolling element. Imports of these products are classified under the following categories: antifriction rollers, all cylindrical roller bearings (including split cylindrical roller bearings) and parts thereof, and housed or mounted cylindrical roller bearing units and parts thereof.

Imports of these products are classified under the following HTS subheadings: 8482.50.00, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

3. Spherical Plain Bearings and Parts Thereof

These products include all spherical plain bearings that employ a spherically shaped sliding element.

Imports of these products are classified under the following HTS subheadings: 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8485.90.00, 8708.99.50.

The size or precision grade of a bearing does not influence whether the bearing is covered by the order. The HTS item numbers are provided for convenience and Customs purposes. The written descriptions remain dispositive.

United States Price

In calculating United States price (USP), the Department used purchase price (PP) or exporter's sales price (ESP), as defined in section 772 of the Tariff Act, as appropriate.

Due to the extremely large number of transactions that occurred during the POR and the resulting administrative burden involved in calculating individual margins for all of these transactions, we sampled sales to calculate USP, in accordance with section 777A of the Tariff Act. When a firm made more than 2000 ESP sales transactions to the United States for a particular class or kind of merchandise, we reviewed sales in sample weeks. We selected one week from each two-month period in the review period, for a total of six weeks, and analyzed each transaction made in those six weeks. The sample weeks included May 1–5, 1991; July 1–7, 1991; October 21–27, 1991; December 16–22, 1991; February 17–23, 1992, and March 2–8, 1992. We reviewed all PP sales transactions during the POR because there were few PP sales.

United States price was based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in, or for exportation to, the United States. We made deductions, as appropriate, from PP and ESP for movement expenses, discounts and rebates.

We made additional deductions from ESP for direct selling expenses, indirect selling expenses, and repacking in the United States.

We made an addition to USP for value-added taxes (VAT) in accordance with section 772(d)(1)(C) of the Tariff Act. However, as noted in the FMV section of this notice, we followed the instructions of the Court of Appeals for the Federal Circuit in *Zenith Electronics Corp.* v. *United States*, 92-1043 (Zenith) and did not make a circumstance of sale adjustment for VAT taxes. Furthermore, the Department is now examining the Zenith decision in detail and is considering the proper methodology for making this tax adjustment. Interested parties are invited to comment upon this issue.

With respect to subject merchandise to which value was added in the United States, *e.g.*, parts of bearings that were imported and further processed into finished bearings by U.S. affiliates of foreign exporters, prior to sale to unrelated U.S. customers, we deducted any increased value in accordance with section 772(e)(3) of the Tariff Act.

We consider those bearings otherwise subject to the order that are incorporated into nonbearing products, which collectively comprise less than one percent of the value of the finished products sold to unrelated customers in the United States, to be outside the scope of the antidumping orders on AFBs and not subject to the assessment of antidumping duties. In Roller Chain, Other Than Bicycle, from Japan (48 FR 51801; November 14, 1983), roller chain, which was subject to an antidumping duty order, was imported by a related party and incorporated into finished motorcycles. The finished motorcycles were the first articles of commerce sold by the subject producer to unrelated purchasers in the United States. Since the roller chain did not constitute a significant percentage of the value of the completed product, the Department found that a USP could not reasonably be determined for the roller chain, and the product was therefore excluded from the scope of the order in such circumstances. We have applied this same principle to these reviews.

Foreign Market Value

The home market was viable for all companies and all classes or kinds of merchandise. The Department used home market prices or constructed value (CV) as defined in section 773 of the Tariff Act, as appropriate, to calculate foreign market value (FMV).

Due to the extremely large number of transactions that occurred during the POR and the resulting administrative burden involved in examining all of these transactions, we sampled sales to calculate FMV, in accordance with section 777A of the Tariff Act. When a firm had more than 2000 home market or third-country sales transactions for a particular class or kind of merchandise, we reviewed sales from sample months that corresponded to the sample weeks selected for U.S. sales sampling. The sample months included April, May, July, October, and December of 1991, and February, March, and June of 1992.

In general, the Department relies on monthly weighted-average prices in the calculation of FMV in administrative reviews. Because of the significant volume of home market sales involved in these reviews, we examined whether it was appropriate to average, in accordance with section 777A of the Tariff Act, all of respondents' home market sales data that we collected. In this case, the use of POR weighted-average prices results in significant time and resource savings for the Department. To determine whether a POR weighted-average price was representative of the transactions under consideration, we performed a three-step test.

We first compared the monthly weighted-average home market price for each model with the weighted-average POR price of that model. We calculated the proportion of each model's sales whose POR weighted-average price did not vary meaningfully (*i.e.*, within plus or minus 10 percent) from the monthly weighted-average prices. We did this for each model within each class or kind of merchandise. We then compared the volume of sales of all models within each class or kind of merchandise whose POR weighted-average price did not vary meaningfully from the monthly weighted-average price with the total volume of sales of that class or kind of merchandise. If the POR weighted-average price of at least 90 percent of sales in each class or kind of merchandise did not vary meaningfully from the monthly weighted-average price, we considered the POR weighted-average prices to be representative of the transactions under consideration. Finally, we tested whether there was any correlation between fluctuations in price and time for each model. Where the correlation coefficient was less than 0.05 (where a coefficient approaching 1.0 means a direct relation between price and time, *i.e.*, that prices consistently rise from month to month, and a coefficient approaching zero means no relation between prices and time), we concluded that there was no significant relation between price and time. We calculated a weighted-average POR FMV only for those classes or kinds that satisfied our three-step test for the factors of price, volume, and time.

We compared U.S. sales with sales of such or similar merchandise in the home market. We considered all non-identical products within a bearing family to be equally similar. As defined in the questionnaire, a bearing family consists of all bearings within a class or kind of merchandise that share the following physical characteristics: Load direction, bearing design, number of rows of rolling elements, precision rating, dynamic load rating, and physical dimensions.

Home market prices were based on the packed, ex-factory or delivered prices to related or unrelated purchasers in the home market. Where applicable, we made adjustments for movement expenses, differences in cost attributable

VOL 58 ISS 79 AP 27 1993 UMI

to differences in physical characteristics of the merchandise and differences in packing. We also made adjustments for differences in circumstances of sale in accordance with 19 CFR 353.56. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. Due to the Court of Appeals' decision in *Zenith Electronics Corp.* v. *United States*, 92–1043, we made no adjustments for differences in the VAT taxes. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations and to offset U.S. indirect selling expenses deducted in ESP calculations, but not exceeding the amount of the indirect U.S. expenses.

We used sales to related customers only where we determined such sales were made at arm's length, *i.e.*, at prices comparable to prices at which the firm sold identical merchandise to unrelated customers.

Where we found home market sales below the cost of production in the previous administrative review period, we initiated cost investigations. We conducted cost investigations with respect to BBs, CRBs, and SPBs for SKF, BBs for GMN, BBs and CRBs for FAG, and BBs and CRBs for INA.

In accordance with section 773(b) of the Tariff Act, in determining whether to disregard home market sales made at prices below the cost of production, we examined whether such sales were made in substantial quantities over an extended period of time. When less than 10 percent of the home market sales of a particular model were at prices below the cost of production, we did not disregard any sales of that model. When 10 percent or more, but not more than 90 percent of the home market sales of a particular model were determined to be below cost, we excluded the below-cost home market sales from our calculation of FMV provided that these below-cost sales were made over an extended period of time. When more than 90 percent of the home market sales of a particular model were made below cost over an extended period of time, we disregarded all home market sales of that model from our calculation of FMV.

To determine if sales below cost had been made over an extended period of time, we compared the number of months in which sales below cost had occurred for a particular model to the number of months in which the model was sold. If the model was sold in three or fewer months, we did not disregard below-cost sales unless there were sales below cost of that model in each month sold. If a model was sold in more than three months, we did not disregard below-cost sales unless there were sales below cost in at least three of the months in which the model was sold.

Since none of the respondents has submitted information indicating that any of its sales below cost were at prices which would have permitted "recovery of all costs within a reasonable period of time in the normal course of trade," within the meaning of section 773(b)(2) of the Tariff Act, we were unable to conclude that the costs of production of such sales were recovered within a reasonable period. As a result, we disregarded below-cost sales over an extended period of time for FAG (BBs and CRBs), GMN (BBs), INA (BBs and CRBs), and SKF (BBs, CRBs, and SPBs).

Home market sales of obsolete merchandise and distress sales were not disregarded from our cost analysis unless there was documented information on the record demonstrating that such sales were outside the ordinary course of trade.

In accordance with section 773(a)(2) of the Tariff Act, we used constructed value as the basis for FMV when there were no usable sales of such or similar merchandise for comparison.

We calculated constructed value in accordance with section 773(e) of the Tariff Act. We included the cost of materials, fabrication, general expenses, profit and packing. We also included: (1) Actual general expenses, or the statutory minimum of 10 percent of materials and fabrication, whichever was greater; (2) actual profit or the statutory minimum of 8 percent of materials, fabrication costs and general expenses, whichever was greater; and (3) packing costs for merchandise exported to the United States. Where appropriate, we made adjustments to CV in accordance with 19 CFR 353.56, for differences in circumstances of sale. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations. For comparisons involving ESP transactions, we made further deductions to constructed value for indirect selling expenses in the home market, capped by the indirect selling expenses incurred on ESP sales in accordance with 19 CFR 353.56(b)(2).

Effective November 20, 1990, FAG acquired a group of bearings manufacturers located in the former German Democratic Republic (GDR). For purposes of these reviews, the Department followed the decision made in the last administrative reviews and did not require FAG to include in its response the home market sales or cost data of these former GDR manufacturers. The former GDR manufacturers made no U.S. sales during the POR. Given the extraordinary circumstances of the merger of the two countries, one market-oriented and the other a nonmarket economy, a reasonable administration of the Tariff Act calls for a reasonable period of time to convert the records and business practices of the former GDR manufacturers to reflect the new economic environment. The Department's position is outlined in a proprietary decision memorandum dated September 23, 1992, from Joseph A. Spetrini, Deputy Assistant Secretary for Compliance, to Alan M. Dunn, Assistant Secretary for Import Administration.

Preliminary Results of Reviews

As a result of our reviews, we preliminarily determine the weighted-average dumping margins for the period May 1, 1991 through April 30, 1992 to be:

Company	BBs	CRBs	SPBs
FAG	19.42	24.42	8.71
Fichtel & Sachs	6.21	(2)	(2)
GMN	0.08	(2)	(2)
INA	17.67	13.20	(2)
NTN	0.29	(1)	(1)
SKF	16.82	8.51	7.57

[1] No U.S. sales during the review period.
[2] No review requested.

Parties to this proceeding may request disclosure within 5 days of the date of publication of this notice. Any interested party may request a hearing within 10 days of the date of publication of this notice. A general issues hearing, if requested, will be held on May 24, 1993, in the Main Auditorium, at 9 a.m. Any hearing regarding issues related solely to Germany, if requested, will be held on May 27, 1993, in room 1617–M–4 at 9 a.m.

General issues briefs and/or written comments from interested parties may be submitted not later than May 12, 1993. General issues rebuttal briefs and rebuttals to written comments, limited to the issues raised in the case briefs and comments, may be filed not later than May 19, 1993. Case briefs and comments and all rebuttal briefs regarding issues related solely to Germany are due no later than May 17 and May 24, 1993, respectively. The Department will subsequently publish the final results of these administrative reviews, including the results of its analysis of issues raised in any such written comments or a hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Because sampling prevents calculation of duties on an entry-by-entry basis, we will calculate an importer-specific *ad valorem* appraisement rate for each class or kind of merchandise based on the ratio of the total value of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total value of antidumping duties, which are calculated by taking the difference between statutory FMV and statutory USP, by the total statutory USP value of the sales compared, and adjusting the result by the average difference between USP and customs value for all merchandise examined during the POR.) Where we do not have entered customs value to calculate an *ad valorem* rate, we will calculate an average per-unit dollar amount of antidumping duty based on all sales examined during the POR. We will instruct the Customs Service to assess this average amount on all units included in each entry made by the particular importer during the POR. The Department will issue appropriate appraisement instructions directly to the Customs Service upon completion of these reviews.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rates for the reviewed companies will be those rates established in the final results of these reviews; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other" rate established in the final results of these administrative reviews. This rate represents the highest rate for any firm with shipments in these administrative reviews, other than those firms receiving a rate based entirely on best information available. These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(5).

Dated: April 19, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From Italy; Preliminary Results of Antidumping Duty Administrative Reviews and Partial Termination of Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative reviews and partial termination of administrative reviews.

SUMMARY: In response to requests from interested parties, the Department of Commerce has conducted administrative reviews of the antidumping duty orders on antifriction bearings (other than tapered roller bearings) and parts thereof from Italy. The classes or kinds of merchandise covered by these orders are ball bearings (BBs) and cylindrical roller bearings (CRBs). The reviews cover four manufacturers/exporters and the period May 1, 1991 through April 30, 1992. Although we initiated reviews for three other manufacturers/exporters, we are terminating the reviews because their requests for review were timely withdrawn. As a result of these reviews, the Department has preliminarily determined the weighted-average dumping margins for the reviewed firms to range from 1.26 to 28.25 percent for BBs, and from 0.00 to 29.92 percent for CRBs.

We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: April 27, 1993.

FOR FURTHER INFORMATION CONTACT: Carlo Cavagna (Meter S.p.A.), Michael Diminich (SKF Industrie S.p.A.), Joe Fargo (SNECMA), Anna Snider (FAG Italia S.p.A.), or Richard Rimlinger; Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482–4733.

SUPPLEMENTARY INFORMATION:

Background

On May 15, 1989, the Department of Commerce (the Department) published in the **Federal Register** (54 FR 20903) the antidumping duty orders on ball bearings (BBs) and cylindrical roller bearings (CRBs) and parts thereof from Italy. On July 6, 1992 in accordance with 19 CFR 353.22(c), we initiated administrative reviews of those orders for the period May 1, 1991 through April 30, 1992 (57 FR 29700).

The Department is now conducting these administrative reviews in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act). These reviews cover the following firms and classes or kinds of merchandise:

Name of firm	Class or kind
FAG Italia S.p.A. (FAG-Italy)	BBs, CRBs
Meter S.p.A. (Meter)	BBs
SKF—Industrie S.p.A. (including all relevant affiliates) (SKF-Italy).	BBs, CRBs
Societé Nationale d'Etude et de Construction de Moteurs d'Aviation (SNECMA).	BBs, CRBs

Subsequent to the publication of our initiation notice, we received timely withdrawal requests for Eurocopter France (formerly Aerospatiale Division Helicopteres (ADH)), ITT Jabsco, and OMCG, s.r.l. Because there were no other requests for review of these companies from any other interested parties, we are terminating the reviews with respect to these companies, in accordance with 19 CFR 353.22(a)(5).

The Department allowed certain companies to submit abbreviated questionnaire responses if they sold

VOL 58 ISS 79 AP 27 1993 UMI

exclusively from published price lists and were able to demonstrate that all price list prices, with rare exceptions, were adhered to. In lieu of a detailed sales listing, firms that qualified for the price list option were permitted to provide all applicable price lists and aggregate cost and adjustment data. In these reviews, SNECMA qualified for, and opted to use, this price list option.

Scope of Reviews

The products covered by these reviews are antifriction bearings (other than tapered roller bearings), mounted or unmounted, and parts thereof (AFBs), and constitute the following classes or kinds of merchandise:

1. Ball Bearings and Parts Thereof

These products include all AFBs which employ balls as the roller element. Imports of these products are classified under the following categories: Antifriction balls, ball bearings with integral shafts, ball bearings (including radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Imports of these products are classified under the following Harmonized Tariff Schedule (HTS) subheadings: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

2. Cylindrical Roller Bearings and Parts Thereof

These products include all AFBs which employ cylindrical rollers as the rolling element. Imports of these products are classified under the following categories: Antifriction rollers, all cylindrical roller bearings (including split cylindrical roller bearings) and parts thereof, and housed or mounted cylindrical roller bearing units and parts thereof.

Imports of these products are classified under the following HTS subheadings: 8482.50.00, 8482.80.00, 8482.91.00, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

Size or precision grade of a bearing does not influence whether the bearing is covered by the orders. The HTS item numbers are provided for convenience and Customs purposes. They are not determinative of the products subject to the orders. The written description remains dispositive.

United States Price

In calculating United States price (USP), the Department used purchase price (PP) or exporter's sales price (ESP), as defined in section 772 of the Tariff Act, as appropriate.

Due to the extremely large number of transactions that occurred during the period of review (POR) and the resulting administrative burden involved in calculating individual margins for all of these transactions, we sampled ESP sales to calculate USP, in accordance with section 777A of the Tariff Act. When a firm made more than 2000 ESP sales transactions to the United States for a particular class or kind of merchandise, we reviewed sales in sample weeks. We selected one week from each two-month period in the review period, for a total of six weeks, and analyzed each transaction made in those six weeks. The sample weeks included May 1–5, 1991; July 1–7, 1991; October 21–27, 1991; December 16–22, 1991; February 17–23, 1992, and March 2–8, 1992. We reviewed all PP sales transactions during the POR because there were relatively few PP sales.

United States price was based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in, or for exportation to, the United States. We made deductions, as appropriate, from PP and ESP for movement expenses, discounts and rebates.

We made additional deductions from ESP for direct selling expenses, indirect selling expenses, and repacking in the United States.

We made an addition to USP for value-added taxes (VAT) in accordance with section 772(d)(1)(C) of the Tariff Act. However, as noted in the FMV section of this notice, we followed the instructions of the Court of Appeals for the Federal Circuit in *Zenith Electronics Corp.* v. *United States*, 92–1043 (Zenith) and did not make a circumstance of sale adjustment for consumption taxes. Furthermore, the Department is now examining the Zenith decision in detail and is considering the proper methodology for making this tax adjustment. Interested parties are invited to comment upon this issue.

With respect to subject merchandise to which value was added in the United States, e.g., parts of bearings that were imported and further processed into finished bearings by U.S. affiliates of foreign exporters prior to sale to unrelated U.S. customers, we deducted any increased value in accordance with section 772(e)(3) of the Tariff Act.

We consider those bearings otherwise subject to the order that are incorporated into nonbearing products, which collectively comprise less than one percent of the value of the finished products sold to unrelated customers in the United States, to be outside the scope of the antidumping orders on AFBs and not subject to the assessment of antidumping duties. In Roller Chain, Other Than Bicycle, from Japan (48 FR 51801; November 14, 1983), roller chain, which was subject to an antidumping duty order, was imported by a related party and incorporated into finished motorcycles. The finished motorcycles were the first articles of commerce sold by the subject producer to unrelated purchasers in the United States. Since the roller chain did not constitute a significant percentage of the value of the completed product, the Department found that a USP could not reasonably be determined for the roller chain, and the product was therefore excluded from the scope of the order in such circumstances. We have applied this same principle to these reviews.

Foreign Market Value

The home market was viable for all companies and all classes or kinds of merchandise. The Department used home market price or constructed value (CV) as defined in section 773 of the Tariff Act, as appropriate, to calculate foreign market value (FMV). In the case of SNECMA, which sells Italian-origin bearings to the United States from France, we applied the four criteria set forth in 19 CFR 353.47 regarding exportation from an intermediate country. This section provides that if (1) a reseller in an intermediate country purchases the merchandise from a producer in a covered country, (2) the producer (at the time of the sale to that reseller) does not know where the reseller will export the merchandise, (3) the merchandise enters the commerce of the intermediate country but is not substantially transformed in that country, and (4) the merchandise is subsequently exported to the United States, the intermediate country will be considered the home market for purposes of establishing FMV. Using these criteria, we determined that France is the appropriate home market for sales of Italian-origin AFBs by SNECMA.

Due to the extremely large number of transactions that occurred during the POR and the resulting administrative burden involved in examining all of these transactions, we sampled sales to calculate FMV, in accordance with section 777A of the Tariff Act. When a firm had more than 2000 home market or third country sales transactions for a particular class or kind of merchandise, we reviewed sales from eight sample

months that corresponded to the sample weeks selected for U.S. sales sampling. The sample months included April, May, July, October, and December of 1991, and February, March, and June of 1992.

In general, the Department relies on monthly weighted-average prices in the calculation of FMV in administrative reviews. Because of the significant volume of home market sales involved in these reviews, we examined whether it was appropriate to average, in accordance with section 777A of the Tariff Act, all of respondents' home market sales data that we collected. In this case, the use of POR weighted-average prices results in significant time and resource savings for the Department. To determine whether a POR weighted-average was representative of the transactions under consideration, we performed a three-step test.

We first compared the monthly weighted-average home market price for each model with the weighted-average POR price of that model. We calculated the proportion of each model's sales whose POR weighted-average price did not vary meaningfully (*i.e.*, within plus or minus 10 percent) from the monthly weighted-average prices. We did this for each model within each class or kind of merchandise. We then compared the volume of sales of all models within each class or kind of merchandise whose POR weighted-average price did not vary meaningfully from the monthly weighted-average price with the total volume of sales of that class or kind of merchandise. If the POR weighted-average price of at least 90 percent of sales in each class or kind of merchandise did not vary meaningfully from the monthly weighted-average price, we considered the POR weighted-average prices to be representative of the transactions under consideration. Finally, we tested whether there was any correlation between fluctuations in price and time for each model. Where the correlation coefficient was less than 0.05 (where a coefficient approaching 1.0 means a direct relation between price and time, *i.e.*, that prices consistently rise from month to month, and a coefficient approaching zero means no relation between prices and time), we concluded that there was no significant relation between price and time. We calculated a weighted-average POR FMV only for those classes or kinds that satisfied our three-step test for the factors of price, volume, and time.

We compared U.S. sales with sales of such or similar merchandise in the home market. We considered all non-identical products within a bearing family to be equally similar. As defined in the questionnaire, a bearing family consists of all bearings within a class or kind of merchandise that share the following physical characteristics: Load direction, bearing design, number of rows of rolling elements, precision rating, dynamic load rating, and physical dimensions.

Home market prices were based on the packed, ex-factory or delivered prices to related or unrelated purchasers in the home market. Where applicable, we made adjustments for movement expenses, differences in cost attributable to differences in physical characteristics of the merchandise and differences in packing. We also made adjustments for differences in circumstances of sale in accordance with 19 CFR 353.56. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. Due to the Court of Appeals' decision in *Zenith Electronics Corp.* v. *United States*, 92–1043, we made no adjustments for differences in the VAT taxes. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations and to offset U.S. indirect selling expenses deducted in ESP calculations, but not exceeding the amount of the indirect U.S. expenses.

We used sales to related customers only where we determined such sales were made at arm's length (*i.e.*, at prices comparable to prices at which the firm sold identical merchandise to unrelated customers).

Where we disregarded sales below the cost of production in the previous administrative review period, or where we received adequate allegations of sales below cost in this review, we initiated cost investigations. We conducted cost investigations with respect to BBs and CRBs from SKF-Italy and from FAG-Italy.

In accordance with section 773(b) of the Tariff Act, in determining whether to disregard home market sales made at prices below the cost of production, we examined whether such sales were made in substantial quantities over an extended period of time. When less than 10 percent of the home market sales of a particular model were at prices below the cost of production, we did not disregard any sales of that model. When 10 percent or more, but not more than 90 percent of the home market sales of a particular model were determined to be below cost, we excluded the below-cost home market sales from our calculation of FMV provided that these below cost sales were made over an extended period of time. When more than 90 percent of the home market sales of a particular model were made below cost over an extended period of time, we disregarded all home market sales of that model from our calculation of FMV.

To determine if sales below cost had been made over an extended period of time, we compared the number of months in which sales below cost had occurred for particular models to the number of months in which the model was sold. If the model was sold in three or fewer months, we did not disregard below cost sales unless there were sales below cost of that model in each month sold. If a model was sold in more than three months, we did not disregard below cost sales unless there were sales below cost in at least three of the months in which the model was sold.

Since none of the respondents has submitted information indicating that any of its sales below cost were at prices which would have permitted "recovery of all costs within a reasonable period of time in the normal course of trade," we were unable to conclude that the costs of production of such sales were recovered within a reasonable period. As a result, we disregarded below-cost sales made by SKF-Italy and FAG-Italy over an extended period of time.

Home market sales of obsolete merchandise and distress sales were not disregarded in our cost analysis unless there was documented information on the record demonstrating that such sales were outside the ordinary course of trade.

In accordance with section 773(a)(2) of the Tariff Act, we used constructed value as the basis for FMV when there were no usable sales of such or similar merchandise for comparison.

We calculated constructed value in accordance with section 773(e) of the Tariff Act. We included the cost of materials, fabrication, general expenses, profit and packing. We also included: (1) Actual general expenses, or the statutory minimum of 10 percent of materials and fabrication, whichever was greater; (2) actual profit or the statutory minimum of 8 percent of materials, fabrication costs and general expenses, whichever was greater; and (3) packing costs for merchandise exported to the United States. Where appropriate, we made adjustments to CV in accordance with 19 CFR 353.56, for differences in circumstances of sale. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we

VOL 58 ISS 79 AP 27 1993 UMI

deducted home market direct selling expenses. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations. For comparisons involving ESP transactions, we made further deductions to constructed value for indirect selling expenses in the home market, capped by the indirect selling expenses incurred on ESP sales in accordance with 19 CFR 353.56(b)(2).

Preliminary Results of Reviews

As a result of our reviews, we preliminarily determine the weighted-average dumping margins for the period May 1, 1991 through April 30, 1992 to be:

Company	BBs	CRBs
FAG-Italy	9.64	29.92
Meter	1.26	(1)
SKF-Italy	5.90	0.00
SNECMA	28.25	10.32

[1] No U.S. sales during the review period.

Parties to this proceeding may request disclosure and interested parties may request a hearing within 10 days of the date of publication of this notice. A general issues hearing, if requested, will be held on May 24, 1993, in the Main Auditorium, at 9 a.m. Any hearing regarding issues related solely to Italy, if requested, will be held on May 26, 1993, in room 3708, at 2 p.m.

General issues briefs and/or written comments from interested parties may be submitted not later than May 12, 1993. General issues rebuttal briefs and rebuttals to written comments, limited to the issues raised in the case briefs and comments, may be filed not later than May 19, 1993. Case briefs and comments and all rebuttal briefs regarding issues related solely to Italy are due no later than May 14, 1993, and May 21, 1993, respectively. The Department will subsequently publish the final results of these administrative reviews, including the results of its analysis of issues raised in any such written comments.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Because sampling prevents us from doing entry-by-entry assessments, we will calculate an importer-specific *ad valorem* appraisement rate for each class or kind of merchandise based on the ratio of the total value of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total value of antidumping duties, which are calculated by taking the difference between statutory FMV and statutory USP, by the total statutory USP value of the sales compared, and adjusting the result by the average difference between USP and customs value for all merchandise examined during the POR.) Where we do not have entered customs value to calculate an *ad valorem* rate, we will calculate an average per-unit dollar amount of antidumping duty based on all sales examined during the POR. We will instruct the Customs Service to assess this average amount on all units included in each entry made by the particular importer during the POR. The Department will issue appropriate appraisement instructions directly to the Customs Service upon completion of these reviews.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rates for the reviewed companies will be those rates established in the final results of these reviews; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other" rate established in the final results of these administrative reviews. This rate represents the highest rate for any firm with shipments in these administrative reviews, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(5).

Dated: April 19, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From Japan; Preliminary Results of Antidumping Duty, Administrative Reviews and Partial Termination of Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative reviews and partial termination of administrative reviews.

SUMMARY: In response to requests from interested parties, the Department of Commerce has conducted administrative reviews of the antidumping duty orders on antifriction bearings (other than tapered roller bearings) and parts thereof from Japan. The classes or kinds of merchandise covered by these orders are ball bearings (BBs), cylindrical roller bearings (CRBs), and spherical plain bearings (SPBs). The reviews cover sixteen manufacturers/exporters and the period May 1, 1991 through April 30, 1992. Although we initiated reviews for one other manufacturer/ exporter, we are terminating these reviews because the request for reviews for this firm was withdrawn. As a result of the remaining reviews, the Department has preliminarily determined the weighted-average dumping margins for the reviewed firms to range from 0.54 to 14.73 percent for BBs, from 0.00 to 11.57 percent for CRBs, and from 0.00 to 1.47 percent for SPBs.

We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: April 27, 1993.

FOR FURTHER INFORMATION CONTACT: Jacqueline Arrowsmith (Honda Motor Co. Ltd., Nachi-Fujikoshi Corp., Showa Pillow Block Mfg., Ltd., Takeshita Seiko Co.), Kris Campbell (Izumoto Seiko Co. Ltd., Tottori Yamakei Bearing Seisakusho Ltd.), David Levy (Nippon Seiko K.K., NTN Corp.), Philip Marchal (Fujino Iron Works Co., Ltd., Nakai Bearing Co., Ltd., Nankai Seiko Bearing Co., Ltd., Nippon Pillow Block Sales Co., Ltd., Osaka Pump Co., Ltd.), Joseph Hanley (Asahi Seiko Co., Ltd., Inoue Jikuuke Kogyo Co., Koyo Seiko Co., Ltd.), or Michael Rill, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-4733.

SUPPLEMENTARY INFORMATION:

Background

On May 15, 1989, the Department of Commerce (the Department) published in the **Federal Register** (54 FR 20904) the antidumping duty orders on BBs, CRBs, and SPBs and parts thereof from Japan. On July 6, 1992, in accordance with 19 CFR 353.22(c), we initiated administrative reviews of those orders for the period May 1, 1991, through April 30, 1992 (57 FR 29700). The Department is now conducting these administrative reviews in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act). These reviews cover the following firms and classes or kinds of merchandise:

Name of firm	Class or kind
Asahi Seiko Co., Ltd. (Asahi)	BBs.
Fujino Iron Works Co., Ltd. (Fujino).	BBs.
Honda Motor Co., Ltd. (Honda)	BBs, CRBs, SPBs.
Inoue Jikuuke Kogyo Co., Ltd., (IJK).	BBs, CRBs.
Izumoto Seiko Co. Ltd., (Izumoto).	BBs.
Koyo Seiko Co., Ltd., (Koyo)	BBs, CRBs, SPBs.
Nachi-Fujikoshi Corp. (Nachi)	BBs, CRBs.
Nakai Bearing Co., Ltd. (Nakai)	BBs.
Nankai Seiko Co., Ltd. (Nankai).	BBs.
Nippon Pillow Block Sales Co. Ltd.(NPB).	BBs.
Nippon Seiko K.K. (NSK)	BBs, CRBs, SPBs.
NTN Corp. (NTN)	BBs, CRBs, SPBs.
Osaka Pump Co., Ltd. (Osaka Pump).	BBs.
Showa Pillow Block Mfg., Ltd. (Showa).	BBs.
Takeshita Seiko Co. (Takeshita).	BBs.
Tottori Yamakai Bearing Seisakusho (Tottori).	BBs.

Subsequent to the publication of our initiation notice, we received a timely withdrawal request for Eurocopter Deutschland GmbH. Because there were no other requests for review for this company from any other interested parties, we are terminating the reviews with respect to Eurocopter Deutschland in accordance with 19 CFR 353.22(a)(5).

The Department allowed certain companies to submit abbreviated questionnaire responses if they sold exclusively from published price lists and were able to demonstrate that all price list prices, with rare exceptions, were adhered to. In lieu of a detailed sales listing, firms that qualified for the price list option were permitted to provide all applicable price lists and aggregate cost and adjustment data. In these reviews, Honda qualified for and opted to use this price list option.

Scope of Reviews

The products covered by these reviews are antifriction bearings (other than tapered roller bearings), mounted or unmounted, and parts thereof (AFBs), and constitute the following "classes or kinds" of merchandise:

1. Ball Bearings and Parts Thereof

These products include all antifriction bearings that employ balls as the rolling element. Imports of these products are classified under the following categories: antifriction balls, ball bearings with integral shafts, ball bearings (including radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Imports of these products are classified under the following Harmonized Tariff Schedules (HTS) subheadings: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

2. Cylindrical Roller Bearings and Parts Thereof

These products include all AFBs that employ cylindrical rollers as the rolling element. Imports of these products are classified under the following categories: antifriction rollers, all cylindrical roller bearings (including split cylindrical roller bearings) and parts thereof, and housed or mounted cylindrical roller bearing units and parts thereof.

Imports of these products are classified under the following HTS subheadings: 8482.50.00, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

3. Spherical Plain Bearings and Parts Thereof

These products include all spherical plain bearings that employ a spherically shaped sliding element, and parts thereof, and include spherical plain rod ends.

Imports of these products are classified under the following HTS subheadings: 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8485.90.00, 8708.99.50.

The size or precision grade of a bearing does not influence whether the bearing is covered by the order. The HTS item numbers are provided for convenience and Customs purposes. The written descriptions remain dispositive.

United States Price

In calculating United States price (USP), the Department used purchase price (PP) or exporter's sales price (ESP), both as defined in section 772 of the Tariff Act, as appropriate.

Due to the extremely large number of transactions that occurred during the period of review (POR) and the resulting administrative burden involved in calculating individual margins for all of these transactions, we sampled sales to calculate USP, in accordance with section 777A of the Tariff Act. When a firm made more than 2000 ESP sales transactions to the United States for a particular class or kind of merchandise, we reviewed sales during sample weeks. We selected one week from each two-month period in the review period, for a total of six weeks, and analyzed each transaction made in those six weeks. The sample weeks included May 1-5, 1991; July 1-7, 1991; October 21-27, 1991; December 16-22, 1991; February 17-23, 1992; and March 2-8, 1992. We reviewed all PP sales transactions during the POR because there were few PP sales.

USP was based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in, or for exportation to, the United States. We made deductions, as appropriate, from PP and ESP for movement expenses, discounts and rebates.

We made additional deductions from ESP for direct selling expenses, indirect selling expenses, and repacking in the United States.

We made an addition to USP for consumption taxes in accordance with section 772(d)(1)(C) of the Tariff Act. However, as noted in the FMV section of this notice, we followed the instructions of the Court of Appeals for the Federal Circuit in *Zenith Electronics Corp. v. United States*, 92-1043 (Zenith)

VOL 58 ISS 79 AP 27 1993 UMI

and did not make a circumstance of sale adjustment for consumption taxes. Furthermore, the Department is now examining the Zenith decision in detail and is considering the proper methodology for making this tax adjustment. Interested parties are invited to comment upon this issue.

With respect to subject merchandise to which value was added in the United States, e.g., parts of bearings that were imported and further processed into finished bearings by U.S. affiliates of foreign exporters prior to sale to unrelated U.S. customers, we deducted any increased value in accordance with section 772(e)(3) of the Tariff Act.

We consider those bearings otherwise subject to the order that are incorporated into nonbearing products, which collectively comprise less than one percent of the value of the finished products sold to unrelated customers in the United States, to be outside the scope of the antidumping orders on AFBs and not subject to the assessment of antidumping duties. In Roller Chain, Other Than Bicycle, from Japan (48 FR 51801; November 14, 1983), roller chain, which was subject to an antidumping finding, was imported by a related party and incorporated into finished motorcycles. The finished motorcycles were the first articles of commerce sold by the subject producer to unrelated purchasers in the United States. Since the roller chain did not constitute a significant percentage of the value of the completed product, the Department found that a USP could not reasonably be determined for the roller chain, and the product was therefore excluded from the scope of the finding in such circumstances. We have applied this same principle to these reviews.

Foreign Market Value

The home market was viable for all companies and all classes or kinds of merchandise except for Showa Pillow Block Mfg., Co. The Department used home market price or constructed value (CV) as defined in section 773 of the Tariff Act, as appropriate, to calculate foreign market value (FMV). With respect to Showa Pillow Block, the Department used sales to a third country or CV as defined in section 773 of the Tariff Act, as appropriate, to calculate FMV.

Due to the extremely large number of transactions that occurred during the POR and the resulting administrative burden involved in examining all of these transactions, we sampled sales to calculate FMV, in accordance with section 777A of the Tariff Act. When a firm had more than 2000 home market or third country sales transactions for a particular class or kind of merchandise, we reviewed sales from eight sample months that corresponded to the sample weeks selected for U.S. sales. The sample months included April, May, July, October, and December of 1991, and February, March, and June of 1992.

In general, the Department relies on monthly weighted-average prices in the calculation of FMV. Because of the significant volume of home market sales involved in these reviews, we examined whether it was appropriate to average, in accordance with section 777A of the Tariff Act, all of respondents' home market sales data that we collected. In this case, the use of POR weighted-average prices results in significant time and resource savings for the Department. To determine whether a POR weighted-average price was representative of the transactions under consideration, we performed a three-step test.

We first compared the monthly weighted-average home market price for each model with the weighted-average POR price of that model. We calculated the proportion of each model's sales whose POR weighted-average price did not vary meaningfully (i.e., within plus or minus 10 percent) from the monthly weighted-average prices. We did this for each model within each class or kind of merchandise. We then compared the volume of sales of all models within each class or kind of merchandise whose POR weighted-average price did not vary meaningfully from the monthly weighted-average price with the total volume of sales of that class or kind of merchandise. If the POR weighted-average price of at least 90 percent of sales in each class or kind of merchandise did not vary meaningfully from the monthly weighted-average price, we considered the POR weighted-average prices to be representative of the transactions under consideration. Finally, we tested whether there was any correlation between fluctuations in price and time for each model. Where the correlation coefficient was less than 0.05 (where a coefficient approaching 1.0 means a direct relation between price and time, *i.e.*, that prices consistently rise from month to month, and a coefficient approaching zero means no relation between prices and time), we concluded that there was no significant relation between price and time. We calculated a weighted-average POR FMV only for those classes or kind that satisfied our three-step test for the factors of price, volume, and time.

We compared U.S. sales with sales of such or similar merchandise in the home market. We considered all non-identical products within a bearing family to be equally similar. As defined in the questionnaire, a bearing family consists of all bearings within a class or kind of merchandise that share the following physical characteristics: Load direction, bearing design, number of rows of rolling elements, precision rating, dynamic load rating, and physical dimensions.

Home market prices were based on the packed, ex-factory or delivered prices to related or unrelated purchasers in the home market. Where applicable, we made adjustments for movement expenses, differences in cost attributable to differences in physical characteristics of the merchandise and differences in packing. We also made adjustments for differences in circumstances of sale in accordance with 19 CFR 353.56. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. Due to the Court of Appeals' decision in *Zenith Electronics Corp.* v. *United States*, 92–1043, we made no adjustments for differences in the consumption taxes. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations and to offset U.S. indirect selling expenses deducted in ESP calculations, but not exceeding the amount of the indirect U.S. expenses.

Where we disregarded sales below cost in the previous administrative review period, or where we received adequate allegations of sales below cost in this review period, we initiated cost investigations. We conducted cost investigations with respect to BBs, CRBs, and SPBs from NTN; BBs and CRBs from Koyo, Nachi, and NSK; and BBs from Asahi Seiko, Fujino Iron Works, and Nankai Seiko.

In accordance with section 773(b) of the Tariff Act, in determining whether to disregard home market sales made at prices below the cost of production, we examined whether such sales have been made in substantial quantities over an extended period of time. When less then 10 percent of the home market sales of a particular model were at prices below the cost of production, we did not disregard any sales of that model. When 10 percent or more, but not more than 90 percent of the home market sales of a particular model were determined to be below cost, we excluded the below-cost home market sales from our calculation of FMV provided that these below cost sales were made over an extended period of time. When more than 90 percent of the home market sales of a particular model were made below cost over an extended period of time, we disregarded all home market sales of that model from our calculation of FMV.

To determine whether sales below cost had been made over an extended period of time, we compared the number of months in which sales below cost occurred for a particular model to the number of months in which that model was sold. If the model was sold in three or fewer months, we did not disregard below-cost sales unless there were below-cost sales of that model in each month sold. If a model was sold in more than three months, we did not disregard below-cost sales unless there were sales below cost in at least three of the months in which the model was sold.

Since none of the respondents has submitted information indicating that any of its sales below cost were at prices which would have permitted "recovery of all costs within a reasonable period of time in the normal course of trade," we are unable to conclude that the costs of production of such sales have been recovered within a reasonable period. As a result of our investigation, we disregarded below-cost sales over an extended period of time for BBs, CRBs, and SPBs from NTN; BBs and CRBs from Koyo, Nachi, and NSK; and BBs from Asahi Seiko, Fujino Iron Works, and Nankai Seiko.

Home market sales of obsolete merchandise and distress sales were not disregarded from our cost analysis unless there was documented information on the record demonstrating that such sales were outside the ordinary course of trade.

In accordance with section 773(a)(2) of the Tariff Act, we used constructed value as the basis for FMV when there were no usable sales of such or similar merchandise for comparison.

We calculated constructed value in accordance with section 773(e) of the Tariff Act. We included the cost of materials, fabrication, general expenses, profit and packing. We also included: (1) Actual general expenses, or the statutory minimum of 10 percent of materials and fabrication, whichever was greater; (2) actual profit or the statutory minimum of 8 percent of materials, fabrication costs and general expenses, whichever was greater; and (3) packing costs for merchandise exported to the United States. Where appropriate, we made adjustments to CV in accordance with 19 CFR 353.56, for differences in circumstances of sale. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations. For comparisons involving ESP transactions, we made further deductions to constructed value for indirect selling expenses in the home market, capped by the indirect selling expenses incurred on ESP sales in accordance with 19 CFR 353.56(b)(1).

Preliminary Results of Reviews

As a result of our reviews, we preliminarily determine the weighted-average dumping margins for the period May 1, 1991 through April 30, 1992 to be:

Company	BBs	CRBs	SPBs
Asahi	0.54	(2)	(2)
Fujino	1.58	(2)	(2)
Honda	0.81	1.30	1.47
IJK	2.33	0.00	(2)
Izumoto	8.21	(2)	(2)
Koyo	9.81	11.57	0.00
Nachi	11.89	2.55	(2)
Nakai	6.19	(2)	(2)
Nankai	13.17	(2)	(2)
NPB	7.47	(2)	(2)
NSK	1.98	8.28	(1)
NTN	2.01	0.75	0.25
Osaka Pump	1.06	(2)	(2)
Showa	14.73	(2)	(2)
Takeshita	5.00	(2)	(2)
Tottori	1.05	(2)	(2)

[1] No U.S. sales during the review period.
[2] No review requested.

Parties to this proceeding may request disclosure within 5 days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. A general issues hearing, if requested, will be held on Monday, May 24, 1993, in the Department's auditorium, at 9:00 am. Any hearing regarding issues related solely to Japan, if requested, will be held on Friday, May 28, 1993, in room 3708, at 9:00 am.

General issues briefs and/or written comments from interested parties may be submitted not later than May 12, 1993. General issues rebuttal briefs and rebuttals to written comments, limited to the issues raised in the case briefs and comments, may be filed not later than May 19, 1993. Case briefs and comments and all rebuttal briefs regarding issues related solely to Japan are due no later than May 18, 1993, and May 25, 1993, respectively. The Department will subsequently publish the final results of these administrative reviews, including the results of its analysis of issues raised in any such written comments or hearings.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Because sampling prevents us from doing entry-by-entry assessments, we will calculate an importer-specific *ad valorem* appraisement rate for each class or kind of AFBs based on the ratio of the total value of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total value of antidumping duties, which are calculated by taking the difference between statutory FMV and statutory USP, by the total statutory USP value of the sales compared, and adjusting the result by the average difference between USP and customs value for all merchandise examined during the POR.) Where we do not have entered customs value to calculate an *ad valorem* rate, we will calculate an average per-unit dollar amount of antidumping duty based on all sales examined during the POR. We will instruct the Customs Service to assess this average amount on all units included in each entry made by the particular importer during the POR. The Department will issue appropriate appraisement instructions directly to the Customs Service upon completion of these reviews.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rates for the reviewed companies will be those rates established in the final results of these reviews; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other" rate established in the final results of these administrative reviews. This rate represents the highest rate for any firm with shipments in these administrative

VOL 58 ISS 79 AP 27 1993 UMI

reviews, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.22 of the Department's regulations (19 CFR 353.22(c)(5)).

Dated: April 19, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From Singapore; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to requests from interested parties, the Department of Commerce has conducted an administrative review of the antidumping duty order on antifriction bearings (other than tapered roller bearings) and parts thereof from Singapore. The class or kind of merchandise covered by this order is ball bearings (BBs). The review covers one manufacturer/exporter and the period May 1, 1991, through April 30, 1992. As a result of this review, the Department has preliminarily determined the weighted-average dumping margin for the reviewed firm to be 4.50 percent.

We invite interested parties to comment on this preliminary result.

EFFECTIVE DATE: April 27, 1993.

FOR FURTHER INFORMATION CONTACT: David S. Levy or Michael R. Rill, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-4733.

SUPPLEMENTARY INFORMATION:

Background

On May 15, 1989, the Department of Commerce (the Department) published in the **Federal Register** (54 FR 20907) the antidumping duty order on ball bearings (BBs) and parts thereof from Singapore. On July 6, 1992, in accordance with 19 CFR 353.22(c), we initiated an administrative review of this order for the period May 1, 1991, through April 30, 1992 (57 FR 29700). The Department is now conducting this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act). This review covers sales of BBs manufactured by NMB Singapore Ltd. (NMB) and Pelmec Industries (Pte.) Ltd. (Pelmec). Since NMB and Pelmec are related companies we are treating them as one entity (hereinafter referred to as NMB) for purposes of this review.

Scope of Review

The products covered by this review are antifriction bearings (other than tapered roller bearings), mounted or unmounted, and parts thereof (AFBs), and constitute the following "class or kind" of merchandise:

1. Ball Bearings and Parts Thereof

These products include all antifriction bearings that employ balls as the rolling element. Imports of these products are classified under the following categories: Antifriction balls, ball bearings with integral shafts, ball bearings (including radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Imports of these products are classified under the following Harmonized Tariff Schedules (HTS) subheadings: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

The size or precision grade of a bearing does not influence whether the bearing is covered by the order. The HTS item numbers are provided for convenience and Customs purposes. The written descriptions remain dispositive.

United States Price

In calculating United States price (USP), the Department used exporter's sales price (ESP), as defined in section 772 of the Tariff Act.

Due to the extremely large number of transactions that occurred during the period of review (POR) and the resulting administrative burden involved in calculating individual margins for all of these transactions, we sampled sales to calculate USP, in accordance with section 777A of the Tariff Act. When a firm made more than 2000 ESP sales transactions to the United States for a particular class or kind of merchandise, we reviewed sales during sample weeks. We selected one week from each two-month period in the review period, for a total of six weeks, and analyzed each transaction made in those six weeks. The sample weeks included May 1–5, 1991; July 1–7, 1991; October 21–27, 1991; December 16–22, 1991; February 17–23, 1992; and March 2–8, 1992.

USP was based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in the United States. We made deductions, as appropriate, from ESP for billing adjustments, discounts, movement expenses, direct selling expenses, indirect selling expenses, and repacking in the United States.

Foreign Market Value

The home market was viable for NMB with respect to its sales of BBs. As a result, the Department used home market price or constructed value (CV) as defined in section 773 of the Tariff Act, as appropriate, to calculate foreign market value (FMV).

In general, the Department relies on monthly weighted-average prices in the calculation of FMV. Because of the significant volume of home market sales involved in these reviews, we examined whether it was appropriate to average, in accordance with section 777A of the Tariff Act, all of respondents' home market sales data that we collected. In this case, the use of POR weighted-average prices results in significant time and resource savings for the Department. To determine whether a POR weighted-average price was representative of the transactions under consideration, we performed a three-step test.

We first compared the monthly weighted-average home market price for each model with the weighted-average POR price of that model. We calculated the proportion of each model's sales whose POR weighted-average price did not vary meaningfully (*i.e.*, within plus or minus 10 percent) from the monthly weighted-average prices. We did this for

each model within each class or kind of merchandise. We then compared the volume of sales of all models within each class or kind of merchandise whose POR weighted-average price did not vary meaningfully from the monthly weighted-average price with the total volume of sales of that class or kind of merchandise. If the POR weighted-average price of at least 90 percent of sales in each class or kind of merchandise did not vary meaningfully from the monthly weighted-average price, we considered the POR weighted-average prices to be representative of the transactions under consideration. Finally, we tested whether there was any correlation between fluctuations in price and time for each model. Where the correlation coefficient was less than 0.05 (where a coefficient approaching 1.0 means a direct relation between price and time, *i.e.*, that prices consistently rise from month to month, and a coefficient approaching zero means no relation between prices and time), we concluded that there was no significant relation between price and time. We calculated a weighted-average POR FMV only for those classes or kinds that satisfied our three-step test for the factors of price, volume, and time.

We compared U.S. sales with sales of such or similar merchandise in the home market. We considered all non-identical products within a bearing family to be equally similar. As defined in the questionnaire, a bearing family consists of all bearings within a class or kind of merchandise that share the following physical characteristics: load direction, bearing design, number of rows of rolling elements, precision rating, dynamic load rating, and physical dimensions.

Home market prices were based on the packed, ex-factory or delivered prices to unrelated purchasers in the home market. Where applicable, we made adjustments for billing adjustments, movement expenses, direct selling expenses, differences in cost attributable to differences in physical characteristics of the merchandise, and differences in packing. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions and to offset U.S. indirect selling expenses deducted in ESP calculations but not exceeding the amount of those U.S. expenses.

Because we disregarded sales below cost in the previous administrative review period, we initiated a cost investigation with respect to BBs for NMB.

In accordance with section 773(b) of the Tariff Act, in determining whether to disregard home market sales made at prices below the cost of production, we examined whether such sales have been made in substantial quantities over an extended period of time. When less than 10 percent of the home market sales of a particular model were at prices below the cost of production, we did not disregard any sales of that model. When 10 percent or more, but not more than 90 percent of the home market sales of a particular model were determined to be below cost, we excluded the below-cost home market sales from our calculation of FMV provided that these below cost sales were made over an extended period of time. When more than 90 percent of the home market sales of a particular model were made below cost over an extended period of time, we disregarded all home market sales of that model from our calculation of FMV.

To determine whether sales below cost had been made over an extended period of time, we compared the number of months in which sales below cost occurred for a particular model to the number of months in which that model was sold. If the model was sold in three or fewer months, we did not disregard below-cost sales unless there were below-cost sales of that model in each month sold. If a model was sold in more than three months, we did not disregard below-cost sales unless there were sales below cost in at least three of the months in which the model was sold.

Since NMB did not submit information indicating that any of its sales below cost were at prices which would have permitted "recovery of all costs within a reasonable period of time in the normal course of trade," we are unable to conclude that the costs of production of such sales have been recovered within a reasonable period. As a result of our investigation, we disregarded below-cost sales made by NMB over an extended period of time.

In accordance with section 773(a)(2) of the Tariff Act, we used constructed value as the basis for FMV when there were no usable sales of such or similar merchandise for comparison.

We calculated constructed value in accordance with section 773(e) of the Tariff Act. We included the cost of materials, fabrication, general expenses, profit and packing. We included: (1) Actual general expenses or the statutory minimum of 10 percent of materials and fabrication, whichever was greater; (2) actual profit or the statutory minimum of 8 percent of materials, fabrication costs and general expenses, whichever was greater; and (3) packing costs for merchandise exported to the United States. Where appropriate, we made adjustments to constructed value in accordance with 19 CFR 353.56, for differences in circumstances of sale. For comparisons to U.S. sales, we deducted home market direct selling expenses and made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions. We made further deductions to constructed value for indirect selling expenses in the home market, capped by the indirect selling expenses incurred on ESP sales in accordance with 19 CFR 353.56(b)(2).

Preliminary Results of Reviews

As a result of our review, we preliminarily determine the weighted-average dumping margins for the period May 1, 1991, through April 30, 1992 to be:

Company and BBs

NMB—4.50

Parties to this proceeding may request disclosure within 5 days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. A general issues hearing, if requested, will be held on May 24, 1993, in the Commerce auditorium at 9 a.m. Any hearing regarding issues related solely to Singapore, if requested, will be held on May 24, 1992, in room 3708, at 2 p.m.

General issues briefs and/or written comments from interested parties may be submitted not later than May 12, 1993. General issues rebuttal briefs and rebuttals to written comments, limited to the issues raised in the case briefs and comments, may be filed not later than May 19, 1993. Case briefs and comments and all rebuttal briefs regarding issues related solely to Singapore are also due no later than May 12, and May 19, 1993, respectively. The Department subsequently will publish the final results of these administrative reviews, including the results of its analysis of issues raised in any such written comments or hearings.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Because sampling prevents us from doing entry-by-entry assessments, we will calculate an importer-specific *ad valorem* appraisement rate for each class or kind of AFBs based on the ratio of the total value of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer made during the

VOL 58 ISS 79 AP 27 1993 UMI

POR. (This is equivalent to dividing the total value of antidumping duties, which are calculated by taking the difference between statutory FMV and statutory USP, by the total statutory USP value of the sales compared, and adjusting the result by the average difference between USP and customs value for all merchandise examined during the POR.) Where we do not have entered customs value to calculate an *ad valorem* rate, we will calculate an average per-unit dollar amount of antidumping duty based on all sales examined during the POR. We will instruct the Customs Service to assess this average amount on all units included in each entry made by the particular importer during the POR. The Department will issue appropriate appraisement instructions directly to the Customs Service upon completion of these reviews.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for the reviewed company will be that rate established in the final results of this review; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other" rate established in the final results of this administrative review. This rate represents the highest rate for any firm with shipments in this administrative review, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.22 of the Department's regulations (19 CFR 353.22(c)(5)).

Dated: April 19, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From Sweden; Preliminary Results of Antidumping Duty Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative reviews.

SUMMARY: In response to requests from interested parties, the Department of Commerce has conducted administrative reviews of the antidumping duty orders on antifriction bearings (other than tapered roller bearings) and parts thereof from Sweden. The classes or kinds of merchandise covered by these orders are ball bearings (BBs), and cylindrical roller bearings (CRBs). The reviews cover one manufacturer/exporter and the period May 1, 1991 through April 30, 1992 (the POR). As a result of these reviews, the Department has preliminarily determined the weighted-average dumping margins for the reviewed firm to be 4.97 percent for BBs, and 5.65 percent for CRBs.

We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: April 27, 1993.

FOR FURTHER INFORMATION CONTACT: Joseph A. Fargo, Michael Diminich, or Richard Rimlinger; Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-4733.

SUPPLEMENTARY INFORMATION:

Background

On May 15, 1989, the Department of Commerce (the Department) published in the **Federal Register** (54 FR 20900) the antidumping duty orders on ball bearings (BBs) and cylindrical roller bearings (CRBs) and parts thereof from Sweden. On July 6, 1992, in accordance with 19 CFR 353.22(c), we initiated administrative reviews of those orders for the period May 1, 1991 through April 30, 1992 (57 FR 29791). The Department is now conducting these administrative reviews in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act). These reviews cover SKF Sverige and its sales of BBs and CRBs.

Scope of Reviews

The products covered by these reviews are antifriction bearings (other than tapered roller bearings), and parts thereof (AFBs), and constitute the following "classes or kinds" of merchandise:

1. Ball Bearings and Parts Thereof

These products include all antifriction bearings that employ balls as the rolling element. Imports of these products are classified under the following categories: Antifriction balls, ball bearings with integral shafts, ball bearings (including radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Imports of these products are classified under the following Harmonized Tariff Schedules (HTS) subheadings: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

2. Cylindrical Roller Bearings and Parts Thereof

These products include all AFBs that employ cylindrical rollers as the rolling element. Imports of these products are classified under the following categories: Antifriction rollers, all cylindrical roller bearings (including split cylindrical roller bearings) and parts thereof, and housed or mounted cylindrical roller bearing units and parts thereof.

Imports of these products are classified under the following HTS subheadings: 8482.50.00, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

The size or precision grade of a bearing does not influence whether the bearing is covered by the order. The HTS item numbers are provided for convenience and Customs purposes. The written descriptions remain dispositive.

United States Price

In calculating United States price (USP), the Department used exporter's sales price (ESP), as defined in section 772 of the Tariff Act.

Due to the extremely large number of transactions that occurred during the period of review (POR) and the resulting administrative burden involved in calculating individual margins for all of these transactions, we sampled sales to calculate USP, in accordance with section 777A of the Tariff Act. When a firm made more than 2000 ESP sales transactions to the United States for a particular class or kind of merchandise, we reviewed sales in sample weeks. We selected one week from each two-month period in the review period, for a total of six weeks, and analyzed each transaction made in those six weeks. The sample weeks included May 1-5, 1991; July 1-7, 1991; October 21-27, 1991; December 16-22, 1991; February 17-23, 1992, and March 2-8, 1992.

USP was based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in the United States. We made deductions, as appropriate, from ESP for movement expenses, discounts and rebates. We made additional deductions from ESP for direct selling expenses, indirect selling expenses, and repacking in the United States.

We made an addition to USP for value-added taxes (VAT) in accordance with section 772(d)(1)(C) of the Tariff Act. However, as noted in the FMV section of this notice, we followed the instructions of the Court of Appeals for the Federal Circuit in *Zenith Electronics Corp.* v. *United States*, 92-1043 (Zenith) and did not make a circumstance of sale adjustment for VAT taxes. Furthermore, the Department is now examining the Zenith decision in detail and is considering the proper methodology for making this tax adjustment. Interested parties are invited to comment upon this issue.

Foreign Market Value

The home market was viable for SKF with respect to its sales of BBs. However, with respect to its sales of CRBs, there was no viable home market.

The Department used home market price or constructed value (CV) as define in section 773 of the Tariff Act, as appropriate, to calculate foreign market value (FMV) for BBs. With respect to CRBs, the Department used sales to Germany or CV, as appropriate, to calculate FMV.

Due to the extremely large number of transactions that occurred during the POR and the resulting administrative burden involved in examining all of these transactions, we sampled sales to calculate FMV, in accordance with section 777A of the Tariff Act. When a firm had more than 2000 home market or third country sales transactions for a particular class or kind of merchandise, we selected sales from sample months that corresponded to the sample weeks selected for U.S. sales sampling. The sample months included April, May, July, October, and December of 1991, and February, March, and June of 1992.

In general, the Department relies on monthly weighted-average prices in the calculation of FMV in administrative reviews. Because of the significant volume of home market sales involved in these reviews, we examined whether it was appropriate to average, in accordance with section 777A of the Tariff Act, all of respondent's home market sales data that we collected. In this case, the use of POR weighted-average prices results in significant time and resource savings for the Department. To determine whether a POR weighted-average price was representative of the transactions under consideration, we performed a three-step test.

We first compared the monthly weighted-average home market price for each model with the weighted-average POR price of that model. We calculated the proportion of each model's sales whose POR weighted-average price did not vary meaningfully (*i.e.*, within plus or minus 10 percent) from the monthly weighted-average prices. We did this for each model within each class or kind of merchandise. We then compared the volume of sales of all models within each class or kind of merchandise whose POR weighted-average price did not vary meaningfully from the monthly weighted-average price with the total volume of sales of that class or kind of merchandise. If the POR weighted-average price of at least 90 percent of sales in each class or kind of merchandise did not vary meaningfully from the monthly weighted-average price, we considered the POR weighted-average prices to be representative of the transactions under consideration. Finally, we tested whether there was any correlation between fluctuations in price and time for each model. Where the correlation coefficient was less than 0.05 (where a coefficient approaching 1.0 means a direct relation between price and time, *i.e.*, that prices consistently rise from month to month, and a coefficient approaching zero means no relation between prices and time), we concluded that there was no significant relation between price and time. We calculated a weighted-average POR FMV only for those classes or kinds that satisfied our three-step test for the factors of price, volume, and time.

We compared U.S. sales with sales of such or similar merchandise in the home market. We considered all non-identical products within a bearing family to be equally similar. As defined in the questionnaire, a bearing family consists of all bearings within a class or kind of merchandise that share the following physical characteristics: Load direction, bearing design, number of rows of rolling elements, precision rating, dynamic load rating, and physical dimensions.

Home market prices were based on the packed, ex-factory or delivered prices to related or unrelated purchasers in the home market. Where applicable, we made adjustments for movement expenses, differences in cost attributable to differences in physical characteristics of the merchandise and differences in packing. We also made adjustments for differences in circumstances of sale in accordance with 19 CFR 353.56. For comparisons to ESP sales, we deducted home market direct selling expenses. Due to the Court of Appeals' decision in *Zenith Electronics Corp* v. *United States*, 92-1043, we made no adjustments for differences in the VAT taxes. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions and to offset U.S. indirect selling expenses deducted in ESP calculations, but not exceeding the amount of the indirect U.S. expenses.

Third country price was based on the delivered prices to unrelated purchasers in Germany. Where applicable, we made adjustments for movement expenses, direct selling expenses, differences in cost attributable to differences in physical characteristics of the merchandise, and differences in packing. We also made adjustments, where applicable, for third country indirect selling expenses to offset U.S. indirect selling expenses deducted in ESP calculations but not exceeding the amount of those U.S. expenses.

We used sales to related customers only where we determined such sales were made at arm's length, *i.e.*, at prices comparable to prices at which the firm sold identical merchandise to unrelated customers.

Because we found home market sales below the cost of production for both classes or kinds of merchandise in the previous administrative review period, we initiated cost investigations with respect to BBs and CRBs for SKF.

In accordance with section 773(b) of the Tariff Act, in determining whether to disregard home market sales made at

VOL
58
ISS
79
AP
27
1993
UMI

prices below the cost of production, we examined whether such sales were made in substantial quantities over an extended period of time. When less than 10 percent of the home market sales of a particular model were at prices below the cost of production, we did not disregard any sales of that model. When 10 percent or more, but not more than 90 percent of the home market sales of a particular model were determined to be below cost, we excluded the below-cost home market sales from our calculation of FMV provided that these below cost sales were made over an extended period of time. When more than 90 percent of the home market sales of a particular model were made below cost over an extended period of time, we disregarded all home market sales of that model from our calculation of FMV.

To determine if sales below cost had been made over an extended period of time, we compared the number of months in which sales below cost had occurred for a particular model to the number of months in which the model was sold. If the model was sold in three or fewer months, we did not disregard below-cost sales unless there were sales below cost of that model in each month sold. If a model was sold in more than three months, we did not disregard below-cost sales unless there were sales below cost in at least three of the months in which the model was sold.

Since SKF did not submit information that any of its sales below cost were at prices which would have permitted "recovery of all costs within a reasonable period of time in the normal course of trade," within the meaning of section 773(b)(2) of the Tariff Act, we are unable to conclude that the costs of production of such sales have been recovered within a reasonable period. As a result, we disregarded below-cost sales made by SKF over an extended period of time.

Home market sales of obsolete merchandise and distress sales were not disregarded from our cost analysis because SKF failed to provide documented information on the record demonstrating that such sales were outside the ordinary course of trade.

In accordance with section 773(a)(2) of the Tariff Act, we used constructed value as the basis for FMV when there were no usable sales of such or similar merchandise for comparison.

We calculated CV in accordance with section 773(e) of the Tariff Act. We included the cost of materials, fabrication, general expenses, profit and packing. We included: (1) Actual general expenses, or the statutory minimum of 10 percent of materials and fabrication, whichever was greater; (2) actual profit or the statutory minimum of 8 percent of materials, fabrication costs and general expenses, whichever was greater; and (3) packing costs for merchandise exported to the United States. Where appropriate, we made adjustments to CV in accordance with 19 CFR 353.56, for differences in circumstances of sale. For comparisons to U.S. sales, we deducted home market direct selling expenses and made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions. We made further deductions to CV for indirect selling expenses in the home market, capped by the indirect selling expenses incurred on U.S. sales in accordance with 19 CFR 353.56(b)(2).

Preliminary Results of Reviews

As a result of our reviews, we preliminarily determine the weighted-average dumping margins for the period May 1, 1991 through April 30, 1992 to be:

Company	BBS	CRBs
SKF	4.97	5.65

Parties to this proceeding may request disclosure within 5 days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. Any general issues hearing, if requested, will be held on May 24, 1993, in the Department auditorium, at 9 a.m. Any hearing regarding issues related solely to Sweden, if requested, will be held on May 25, 1993, in room 3708, at 2 p.m.

General issues briefs and/or written comments from interested parties may be submitted not later than May 12, 1993. General issues rebuttal briefs and rebuttals to written comments, limited to the issues raised in the case briefs and comments, may be filed not later than May 19, 1993. Case briefs and comments and all rebuttal briefs regarding issues related solely to Sweden are due no later than May 13, and May 20, 1993, respectively. The Department will subsequently publish the final results of these administrative reviews, including the results of its analysis of issues raised in any such written comments or hearings.

The Department shall determine, and the Customs shall assess, antidumping duties on all appropriate entries. Because sampling prevents us from doing entry-by-entry assessments, we will calculate an importer-specific *ad valorem* appraisement rate for each class or kind of merchandise based on the ratio of the total value of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total value of antidumping duties, which are calculated by taking the difference between statutory FMV and statutory USP, by the total statutory USP value of the sales compared, and adjusting the result by the average difference between USP and customs value for all merchandise examined during the POR.) Where we do not have entered customs value to calculate an *ad valorem* rate, we will calculate an average per-unit dollar amount of antidumping duty based on all sales examined during the POR. We will instruct the Customs Service to assess this average amount on all units included in each entry made by the particular importer during the POR. The Department will issue appropriate appraisement instructions directly to the Customs Service upon completion of these reviews.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rates for the reviewed companies will be those rates established in the final results of these reviews; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other rate" established in the final results of these administrative reviews. This rate represents the highest rate for any firm with shipments in these administrative reviews, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the next administrative reviews.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(5).

Dated: April 19, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From Thailand; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty Administrative Review.

SUMMARY: In response to requests from interested parties, the Department of Commerce is conducting an administrative review of the antidumping duty order on antifriction bearings (other than tapered roller bearings) and parts thereof from Thailand. The class or kind of merchandise covered by this order is ball bearings (BBs). The review covers one manufacturer/exporter and the period May 1, 1991, through April 30, 1992. As a result of this review, the Department has preliminarily determined the weighted-average dumping margin for the reviewed firm to be 0.13 percent.

DATES: We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: April 27, 1993.

FOR FURTHER INFORMATION CONTACT: David S. Levy or Michael R. Rill, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-4733.

SUPPLEMENTARY INFORMATION:

Background

On May 15, 1989, the Department of Commerce (the Department) published in the **Federal Register** (54 FR 20909) the antidumping duty order on ball bearings (BBs) and parts thereof from Thailand. On July 6, 1992, in accordance with 19 CFR 353.22(c), we initiated an administrative review of this order for the period May 1, 1991, through April 30, 1992 (57 FR 29700). The Department is now conducting this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act). This review covers NMB Thai Ltd. and Pelmec Thai Ltd. (Pelmec) and its sales of BBs. Since NMB and Pelmec are related companies, we are treating them as one entity (hereinafter referred to as NMB) for purposes of this review.

Scope of Review

The products covered by this review are antifriction bearings (other than tapered roller bearings), mounted or unmounted, and parts thereof (AFBs), and constitute the following "class or kind" of merchandise:

1. Ball Bearings and Parts Thereof

These products include all antifriction bearings that employ balls as the rolling element. Imports of these products are classified under the following categories: Antifriction balls, ball bearings with integral shafts, ball bearings (including radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Imports of these products are classified under the following Harmonized Tariff Schedules (HTS) subheadings: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

The size or precision grade of a bearing does not influence whether the bearing is covered by the order. The HTS item numbers are provided for convenience and Customs purposes. The written descriptions remain dispositive.

United States Price

In calculating United States price (USP), the Department used purchase price (PP) or exporter's sales price (ESP), as defined in section 772 of the Tariff Act, as appropriate.

USP was based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in, or for exportation to, the United States. We made deductions, as appropriate, from PP and ESP for movement expenses, discounts, and billing adjustments.

We made additional deductions from ESP for direct selling expenses, indirect selling expenses, and repacking in the United States.

We made an addition to USP for value-added taxes (VAT) in accordance with section 772(d)(1)(C) of the Tariff Act. However, as noted in the FMV section of this notice, we followed the instructions of the Court of Appeals for the Federal Circuit in *Zenith Electronics Corp.* versus *United States*, 91-1043 (Zenith) and did not make a circumstance of sale adjustment for VAT taxes. Furthermore, the Department is now examining the Zenith decision in detail and is considering the proper methodology for making this tax adjustment. Interested parties are invited to comment upon this issue.

Foreign Market Value

The home market was viable for NMB with respect to its sales of BBs. As a result, the Department used home market price or constructed value (CV) as defined in section 773 of the Tariff Act, as appropriate, to calculate foreign market value (FMV).

In general, the Department relies on monthly weighted-average prices in the calculation of FMV. Because of the significant volume of home market sales involved in these reviews, we examined whether it was appropriate to average, in accordance with section 777A of the Tariff Act, all of respondents' home market sales data that we collected. In this case, the use of POR weighted-average prices results in significant time and resource savings for the Department. To determine whether a POR weighted-average price was representative of the transactions under consideration, we performed a three-step test.

We first compared the monthly weighted-average home market price for each model with the weighted-average POR price of that model. We calculated the proportion of each model's sales whose POR weighted-average price did not vary meaningfully (*i.e.*, within plus or minus 10 percent) from the monthly weighted-average prices. We did this for each model within each class or kind of merchandise. We then compared the volume of sales of all models within each class or kind of merchandise whose POR weighted-average price did not vary meaningfully from the monthly weighted-average price with the total volume of sales of that class or kind of merchandise. If the POR weighted-average price of at least 90 percent of sales in each class or kind of merchandise did not vary meaningfully from the monthly weighted-average

VOL
58
ISS
79
AP
27
19 93
UMI

price, we considered the POR weighted-average prices to be representative of the transactions under consideration. Finally, we tested whether there was any correlation between fluctuations in price and time for each model. Where the correlation coefficient was less than 0.05 (where a coefficient approaching 1.0 means a direct relation between price and time, *i.e.*, that prices consistently rise from month to month, and a coefficient approaching zero means no relation between prices and time), we concluded that there was no significant relation between price and time. We calculated a weighted-average FOR FMV only for those classes or kinds that satisfied our three-step test for the factors of price, volume, and time.

We compared U.S. sales with sales of such or similar merchandise in the home market. We considered all non-identical products within a bearing family to be equally similar. As defined in the questionnaire, a bearing family consists of all bearings within a class or kind or merchandise that share the following physical characteristics: Load direction, bearing design, number of rows of rolling elements, precision rating, dynamic load rating, and physical dimensions.

Home market prices were based on the packed, ex-factory or delivered prices to related or unrelated purchasers in the home market. Where applicable, we made adjustments for movement expenses, differences in cost attributable to differences in physical characteristics of the merchandise and differences in packing. We also made adjustments for differences in circumstances of sale in accordance with 19 CFR 353.56. For comparisons to PF sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. Due to the Court of Appeals' decision in *Zenith Electronics Corp. v. United States*, 92–1043, we made no adjustments for differences in the VAT taxes. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations and to offset U.S. indirect selling expenses deducted in ESP calculations, but not exceeding the amount of the indirect U.S. expenses.

We disregarded sales to related customers. We could not determine that such sales were made at arm's length, *i.e.*, at prices comparable to prices at which the firm sold such merchandise to unrelated customers, because no products were sold to both related and unrelated customers.

In accordance with section 773(a)(2) of the Tariff Act, we used constructed value as the basis for FMV when there were no usable sales of such or similar merchandise for comparison.

We calculated constructed value in accordance with section 773(e) of the Tariff Act. We included the cost of materials, fabrication, general expenses, profit and packing. We also included: (1) Actual general expenses, or the statutory minimum of 10 percent of materials and fabrication, whichever was greater; (2) actual profit or the statutory minimum of 8 percent of materials, fabrication costs and general expenses, whichever was greater; and (3) packing costs for merchandise exported to the United States. Where appropriate, we made adjustments to CV in accordance with 19 CFR 353.56, for differences in circumstances of sale. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations. For comparisons involving ESP transactions, we made further deductions to constructed value for indirect selling expenses in the home market, capped by the indirect selling expenses incurred on ESP sales in accordance with 19 CFR 353.56(b)(2).

Preliminary Results of Review

As a result of our review, we preliminarily determine the weighted-average dumping margin for the period May 1, 1991, through April 30, 1992, to be:

Company and BBs
NMB—0.13

Parties to this proceeding may request disclosure within 5 days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. A general issue hearing, if requested, will be held on May 24, 1993, in the Commerce auditorium, at 9 a.m. Any hearing regarding issues related solely to Thailand, if requested, will be held on May 25, 1993, in room 1617–M–4, at 10 a.m.

General issues briefs and/or written comments from interested parties may be submitted not later than May 12, 1993. General issues rebuttal briefs and rebuttals to written comments, limited to the issues raised in the case briefs and comments, may be filed not later than May 19, 1993. Case briefs and comments and all rebuttal briefs regarding issues related solely to Thailand are due no later than May 13, and May 20, 1993, respectively. The Department will subsequently publish the final results of these administrative reviews, including the results of its analysis of issues raised in any such written comments or hearings.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Because sampling prevents us from doing entry-by-entry assessments, we will calculate an importer-specific *ad valorem* appraisement rate for each class or kind of AFBs based on the ratio of the total value of antidumping duties calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total value of antidumping duties, which are calculated by taking the difference between statutory FMV and statutory USP, by the total statutory USP value of the sales compared, and adjusting the result by the average difference between USP and customs value for all merchandise examined during the POR.) Where we do not have entered customs value to calculate an *ad valorem* rate, we will calculate an average per-unit dollar amount of antidumping duty based on all sales examined during the POR. We will instruct the Customs Service to assess this average amount on all units included in each entry made by the particular importer during the POR. The Department will issue appropriate appraisement instructions directly to the Customs Service upon completion of these reviews.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for the reviewed company will be that rate established in the final results of this review; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other" rate established in the final results of this administrative review. This rate represents the highest rate for any firm with shipments in this administrative review, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and section 353.22 of the Department's regulations (19 CFR 353.22(c)(5)).

Dated: April 16, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

[A–412–801]

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From the United Kingdom; Preliminary Results of Antidumping Duty Administrative Reviews, Partial Termination of Administrative Reviews, and Notice of Intent To Revoke Order (In Part)

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative reviews, partial termination of administrative reviews, and notice of intent to revoke order (in part).

SUMMARY: In response to requests from interested parties, the Department of Commerce has conducted administrative reviews of the antidumping duty orders on antifriction bearings (other than tapered roller bearings) and parts thereof from the United Kingdom. The classes or kinds of merchandise covered by these orders are ball bearings (BBs) and cylindrical roller bearings (CRBs). The reviews cover four manufacturers/exporters for the period May 1, 1991 through April 30, 1992.

We initiated reviews for two other manufacturers/exporters, ITT Jabsco and SKF (U.K.), but are terminating them because the requests for review were timely withdrawn. Additionally, Societe Nouvelle de Roulements (SNR) withdrew its request for a review of its BB sales. Therefore, we are reviewing SNR's sales only.

We are also announcing our intent to revoke the order covering CRBs from the United Kingdom with respect to Cooper Bearings Ltd. As a result of these reviews, the Department has preliminarily determined that the weighted-average dumping margins for the reviewed firms range from 9.50 to 55.79 percent for BBs, and from 0.00 to 48.97 percent for CRBs.

We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: April 27, 1993.

FOR FURTHER INFORMATION CONTACT: Amy Beargie (The Barden Corporation (U.K.) Ltd.), Carlo Cavagna (RHP Bearings Ltd.), Maureen McPhillips (Societe Nouvelle de Roulements), Joanna Schlesinger (Cooper Bearings Ltd.), Anna Snider (FAG (U.K.) Ltd.), or Richard Rimlinger; Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482–4733.

SUPPLEMENTARY INFORMATION:

Background

On May 15, 1989, the Department of Commerce (the Department) published in the **Federal Register** (54 FR 20910) the antidumping duty orders on BBs and CRBs and parts thereof from the United Kingdom. On July 6, 1992, in accordance with 19 CFR 353.22(c), we initiated administrative reviews of those orders for the period May 1, 1991 through April 30, 1992 (57 FR 29700).

The Department is now conducting these administrative reviews in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act). These reviews cover the following firms and classes or kinds of merchandise:

Name of firm	Class or kind
Barden Corporation (Barden) ...	BBs, CRBs
Cooper Bearings Ltd. (Cooper)	CRBs
FAG (U.K.) Ltd. (FAG-U.K.)	BBs, CRBs
RHP Bearings (RHP)	BBs, CRBs
Societe Nouvelle de Roulements (SNR).	CRBs

Since Barden and FAG-U.K. are related companies, we are treating them as one entity (hereinafter referred to as Barden/FAG) for purposes of this review.

Subsequent to the publication of our initiation notice, we received timely withdrawal requests for ITT Jabsco and SKF (UK) Ltd. We also received a partial withdrawal request with respect to ball bearings sold by SNR. Because there were no other requests for reviews of these companies from any other interested parties, we are terminating the reviews with respect to these requests, in accordance with 19 CFR 353.22(a)(5).

Cooper Bearings Ltd. submitted a request, in accordance with 19 CFR 353.25(b), to revoke the order covering its CRBs from the United Kingdom. The request was accompanied by Cooper's certification that it has not sold CRBs at less than fair value during the period from the date of the original investigation through the present and will not do so in the future. Since we preliminarily determine that Cooper has not sold at less than fair value in this review, and has never sold the subject merchandise at less than fair value, we intend to revoke the order with respect to Cooper's sales of CRBs.

Scope of Reviews

The products covered by these reviews are antifriction bearings (other than tapered roller bearings), mounted or unmounted, and parts thereof (AFBs), which constitute the following "classes or kinds" or merchandise:

1. Ball Bearings and Parts Thereof

These products include all AFBs that employ balls as the rolling element. Imports of these products are classified under the following categories: antifriction balls, ball bearings with integral shafts, ball bearings (including radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Imports of these products are classified under the following Harmonized Tariff Schedules (HTS) subheadings: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70 8708.50.50, 8708.60.50, 8708.99.50.

2. Cylindrical Roller Bearings and Parts Thereof

These products include all AFBs that employ cylindrical rollers as the rolling element. Imports of these products are classified under the following categories: antifriction rollers, all

VOL 58 ISS 79 AP 27 1993 UMI

cylindrical roller bearings (including split cylindrical roller bearings) and parts thereof, and housed or mounted cylindrical roller bearing units and parts thereof.

Imports of these products are classified under the following HTS subheadings: 8482.50.00, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

The size or precision grade of a bearing does not influence whether the bearing is covered by the order. The HTS item numbers are provided for convenience and Customs purposes. The written descriptions remain dispositive.

United States Price

In calculating United States price (USP), the Department used purchase price (PP) or exporter's sales price (ESP), as defined in section 772 of the Tariff Act, as appropriate.

Due to the extremely large number of ESP transactions that occurred during the period of review (POR) and the resulting administrative burden involved in calculating individual margins for all of these transactions, we sampled ESP sales to calculate USP, in accordance with section 777A of the Tariff Act. When a firm made more than 2000 ESP sales transactions to the United States for a particular class or kind of merchandise, we reviewed sales in sample weeks. We selected one week from each two-month period in the review period, for a total of six weeks, and analyzed each transaction made in those six weeks. The sample weeks included May 1–5, 1991; July 1–7, 1991; October 21–27, 1991; December 16–22, 1991; February 17–23, 1992, and March 2–8, 1992. We reviewed all PP sales transactions during the POR because there were relatively few PP sales.

USP was based on the packed f.o.b., c.i.f., or delivered price to unrelated purchasers in, or for exportation to, the United States. We made deductions, as appropriate, from PP and ESP for movement expenses, discounts and rebates.

We made additional deductions from ESP, where applicable, for direct selling expenses, indirect selling expenses, commissions, and repacking in the United States.

We made an addition to USP for value-added taxes (VAT) in accordance with section 772(d)(1)(C) of the Tariff Act. However, as noted in the FMV section of this notice, we followed the instructions of the Court of Appeals for the Federal Circuit in *Zenith Electronics Corp.* v. *United States*, 92–1043 (Zenith) and did not make a circumstance of sale adjustment for VAT taxes. Furthermore, the Department is now examining the Zenith decision in detail and is considering the proper methodology for making this tax adjustment. Interested parties are invited to comment upon this issue.

With respect to subject merchandise to which value was added in the United States, *e.g.*, parts of bearings that were imported and further processed into finished bearings by U.S. affiliates of foreign exporters prior to sale to unrelated U.S. customers, we deducted any increased value in accordance with section 772(e)(3) of the Tariff Act.

We consider those bearings otherwise subject to the order that are incorporated into nonbearing products, which collectively comprise less than one percent of the value of the finished products sold to unrelated customers in the United States, to be outside the scope of the antidumping orders on AFBs and not subject to the assessment of antidumping duties. In Roller Chain, Other Than Bicycle, from Japan (48 FR 51801; November 14, 1983), roller chain, which was subject to an antidumping duty order, was imported by a related party and incorporated into finished motorcycles. The finished motorcycles were the first articles of commerce sold by the subject producer to unrelated purchasers in the United States. Since the roller chain did not constitute a significant percentage of the value of the completed product, the Department found that a USP could not reasonably be determined for the roller chain, and the product was therefore excluded from the scope of the order in such circumstances. We have applied this same principle to these reviews.

Foreign Market Value

The home market was viable for all companies and all classes or kinds of merchandise. The Department used home market prices or constructed value (CV), as defined in section 773 of the Tariff Act, as appropriate, to calculate foreign market value (FMV).

Due to the extremely large number of transactions that occurred during the POR and the resulting administrative burden involved in examining all of these transactions, we sampled sales to calculate FMV, in accordance with section 777A of the Tariff Act. When a firm had more than 2000 home market sales transactions for a particular class or kind of merchandise, we reviewed sales from eight sample months that corresponded to the sample weeks selected for U.S. sales sampling, and analyzed each transaction made in those months. The sample months included April, May, July, October, and December of 1991, and February, March, and June of 1992.

In general, the Department relies on monthly weighted-average prices in the calculation of FMV. Because of the significant volume of home market sales involved in these reviews, we examined whether it was appropriate to average, in accordance with section 777A of the Tariff Act, all of respondents' home market sales data that we collected. In this case, the use of POR weighted-average prices results in significant time and resource savings for the Department. To determine whether a POR weighted-average price was representative of the transactions under consideration, we performed a three-step test.

We first compared the monthly weighted-average home market price for each model with the weighted-average POR price of that model. We calculated the proportion of each model's sales whose POR weighted-average price did not vary meaningfully (*i.e.*, within plus or minus 10 percent) from the monthly weighted-average prices. We did this for each model within each class or kind of merchandise. We then compared the volume of sales of all models within each class or kind of merchandise whose POR weighted-average price did not vary meaningfully from the monthly weighted-average price with the total volume of sales of that class or kind of merchandise. If the POR weighted-average price of at least 90 percent of sales in each class or kind of merchandise did not vary meaningfully from the monthly weighted-average price, we considered the POR weighted-average prices to be representative of the transactions under consideration. Finally, we tested whether there was any correlation between fluctuations in price and time for each model. Where the correlation coefficient was less than 0.05 (where a coefficient approaching 1.0 means a direct relation between price and time, *i.e.*, that prices consistently rise from month to month, and a coefficient approaching zero means no relation between prices and time), we concluded that there was no significant relation between price and time. We calculated a weighted-average POR FMV only for those classes or kinds that satisfied our three-step test for the factors of price, volume, and time.

We compared U.S. sales with sales of such or similar merchandise in the home market. We considered all non-identical products within a bearing family to be equally similar. As defined in the questionnaire, a bearing family consists of all bearings within a class or kind of merchandise that share the following physical characteristics: Load direction, bearing design, number of rows of rolling elements, precision rating, dynamic load rating, and physical dimensions.

Home market prices were based on the packed, ex-factory or delivered prices to related or unrelated purchasers in the home market. Where applicable, we made adjustments for movement expenses, differences in cost attributable to differences in physical characteristics of the merchandise and differences in packing. We also made adjustments for differences in circumstances of sale in accordance with 19 CFR 353.56. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. Due to the Court of Appeals' decision in *Zenith Electronics Corp.* v. *United States*, 82–1043, we made no adjustments for differences in the VAT taxes. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations and to offset U.S. indirect selling expenses deducted in ESP calculations, but not exceeding the amount of the indirect U.S. expenses.

We used sales to related customers only where we determined such sales were made at arm's length (*i.e.*, at prices comparable to prices at which the firm sold identical merchandise to unrelated customers).

We initiated a cost investigation with respect to BBs and CRBs sold by RHP because we found home market sales below the cost of production for this company and these classes or kinds of merchandise in the previous administrative review period. In addition, based on allegations submitted by Federal-Mogul in this administrative review, we initiated a cost investigation with respect to BBs sold by Barden/FAG.

In accordance with section 773(b) of the Tariff Act, in determining whether to disregard home market sales made at prices below the cost of production, we examined whether such sales were made in substantial quantities over an extended period of time. When less than 10 percent of the home market sales of a particular model were at prices below the cost of production, we did not disregard any sales of that model. When 10 percent or more, but not more than 90 percent of the home market sales of a particular model were determined to be below cost, we excluded the below-cost home market sales from our calculation of FMV provided that these below cost sales were made over an extended period of time. When more than 90 percent of the home market sales of a particular model were made below cost over an extended period of time, we disregarded all home market sales of that model from our calculation of FMV.

To determine if sales below cost had been made over an extended period of time, we compared the number of months in which sales below cost had occurred for a particular model to the number of months in which the model was sold. If the model was sold in three or fewer months, we did not disregard below-cost sales unless there were sales below cost of that model in each month sold. If a model was sold in more than three months, we did not disregard below-cost sales unless there were sales below cost in at least three of the months in which the model was sold.

Since neither RHP nor Barden/FAG has submitted information indicating that any of its sales below cost were at prices which would have permitted "recovery of all costs within a reasonable period of time in the normal course of trade," we were unable to conclude that the costs of production of such sales were recovered within a reasonable period. As a result, we disregarded below-cost sales made by RHP (BBs and CRBs) and Barden/FAG (BBs) over an extended period of time.

Home market sales of obsolete merchandise and distress sales were not disregarded from our cost analysis unless there was documented information on the record demonstrating that such sales were outside the ordinary course of trade.

In accordance with section 773(a)(2) of the Tariff Act, we used CV as the basis for FMV when there were no usable sales of such or similar merchandise for comparison.

We calculated constructed value in accordance with section 773(e) of the Tariff Act. We included the cost of materials, fabrication, general expenses, profit and packing. we also included: (1) Actual general expenses, or the statutory minimum of 10 percent of materials and fabrication, whichever was greater; (2) actual profit or the statutory minimum of 8 percent of materials, fabrication costs and general expenses, whichever was greater; and (3) packing costs for merchandise exported to the United States. Where appropriate, we made adjustments to CV in accordance with 19 CFR 353.56, for differences in circumstances of sale. For comparisons to PP sales, we deducted home market direct selling expenses and added U.S. direct selling expenses. For comparisons to ESP sales, we deducted home market direct selling expenses. We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in PP and ESP calculations. For comparisons involving ESP transactions, we made further deductions to constructed value for indirect selling expenses in the home market, capped by the indirect selling expenses incurred on ESP sales in accordance with 19 CFR 353.56(b)(2).

Preliminary Results of Reviews

As a result of our reviews, we preliminarily determine the weighted-average dumping margins for the period May 1, 1991 through April 30, 1992 to be:

Company	BBs	CRBs
Barden/FAG	9.50	0.00
Cooper Bearings	(2)	0.00
RHP Bearings	55.59	48.97
SNR	(3)	0.00

[1] No. U.S. sales during the review period.
[2] No. review requested.
[3] Request for review withdrawn.

Parties to this proceeding may request disclosure within 5 days and interested parties may request a hearing within 10 days of the date of publication of this notice. A general issues hearing, if requested, will be held on May 24, 1993, in the Main Auditorium, at 9 a.m. Any hearing regarding issues related solely to the United Kingdom, if requested, will be held on May 28, 1993, in room 3708, at 2 p.m.

General issues briefs and/or written comments from interested parties may be submitted not later than May 12, 1993. General issues rebuttal briefs and rebuttals to written comments, limited to the issues raised in the case briefs and comments, may be filed not later than May 19, 1993. Case briefs, comments and rebuttal briefs regarding issues relating solely to the United Kingdom are due not later than May 18, 1993, and May 25, 1992, respectively. The Department will subsequently publish the final results of these administrative reviews, including the results of its analysis of the issues raised in any such written comments or a hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Because sampling prevents us from doing entry-by-entry assessments, we will calculate an importer-specific *ad valorem* appraisement rate for each class or kind of merchandise based on the ratio of the total value of antidumping duties calculated for the examined sales made during the POR to

VOL
58
ISS
79
AP
27
19 93
UMI

the total customs value of the sales used to calculate those duties. This rate will be assessed uniformly on all entries of that particular importer made during the POR. (This is equivalent to dividing the total value of antidumping duties, which are calculated by taking the difference between statutory FMV and statutory USP, by the total statutory USP value of the sales compared, and adjusting the result by the average difference between USP and customs value for all merchandise examined during the review period.) Where we do not have entered customs value to calculate an *ad valorem* rate, we will calculate an average per-unit dollar amount of antidumping duty based on all sales examined during the POR. We will instruct the Customs Service to assess this average amount on all units included in each entry made by the particular importer during the POR. The Department will issue appropriate appraisement instructions directly to the Customs Service upon completion of these reviews.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rates for the reviewed companies will be those rates established in the final results of these reviews; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other" rate established in the final results of these administrative reviews. This rate represents the highest rate for any firm with shipments in these administrative reviews, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)) and 19 CFR 353.22(c)(5).

Dated: April 19, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Ball Bearings and Parts Thereof From Romania; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to requests from interested parties, the Department of Commerce has conducted an administrative review of the antidumping duty order on ball bearings and parts thereof from Romania. The review covers Tehnoimportexport (TIE), and the period May 1, 1991 through April 30, 1992. We have preliminarily determined that there were no shipments of the subject merchandise by TIE to the United States during the period of review.

We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: April 27, 1993.

FOR FURTHER INFORMATION CONTACT: Michael Diminich or Richard Rimlinger, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-4733.

SUPPLEMENTARY INFORMATION:

Background

On May 15, 1989, the Department of Commerce (the Department) published in the **Federal Register** (54 FR 20906) an antidumping duty order on ball bearings and parts thereof from Romania. On July 6, 1992, in accordance with section 353.22(c) of the Department's regulations, we initiated an administrative review of that order for the period May 1, 1991 through April 30, 1992 (57 FR 29700). The Department is now conducting this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act).

This review covers ball bearings and parts thereof exported by TIE.

Scope of Review

The products covered by this review are ball bearings, mounted or unmounted, and parts thereof. These products include all antifriction bearings that employ balls as the rolling element. Imports of these products are classified under the following categories: antifriction balls, ball bearings with integral shafts, ball bearings (including radial ball bearings) and parts thereof, and housed or mounted ball bearing units and parts thereof.

Imports of these products are classified under the following Harmonized Tariff Schedules (HTS) subheadings: 8482.10.10, 8482.10.50, 8482.80.00, 8482.91.00, 8482.99.10, 8482.99.70, 8483.20.40, 8483.20.80, 8483.30.40, 8483.30.80, 8483.90.20, 8483.90.30, 8483.90.70, 8708.50.50, 8708.60.50, 8708.99.50.

The size or precision grade of a bearing does not influence whether the bearing is covered by the order. The HTS item numbers are provided for convenience and Customs purposes. The written descriptions remain dispositive.

Preliminary Results of the Review

Because TIE made no shipments during the review period May 1, 1991 through April 30, 1992, we based the cash deposit rate on the last margin found for ball bearings and parts thereof from Romania. We preliminary determine that the cash deposit rate shall continue to be 0.0 percent.

Parties to this proceeding may request disclosure within five days of the date of publication of this notice. Any interested party may request a hearing within 10 days of the date of publication of this notice. A general issues hearing, if requested, will be held on May 24, 1993, in the Main Auditorium, at 9 a.m. Any hearing regarding issues related solely to Romania, if requested, will be held on May 26, 1993, in room 1617-M-4, at 10 a.m.

General issues briefs and/or written comments from interested parties may be submitted not later than May 12, 1993. General issues rebuttal briefs and rebuttals to written comments, limited to the issues raised in the case briefs and comments, may be filed not later than May 19, 1993. Case briefs and comments and all rebuttal briefs regarding issues related solely to Romania are due no later than May 14 and May 21, 1993, respectively. The Department will subsequently publish the final results of this administrative review, including the results of its analysis of issues raised in any such written comments or hearings.

The following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for the reviewed company will be that rate established in the final results of this review; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other" rate established in the final results of this administrative review. This rate represents the rate for TIE in this administrative review. These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(5).

Dated: April 16, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

Sanctions for Violation of Administrative Protective Order

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: This is a notice of the status of an investigation into charges of the violation of an administrative protective order in an antidumping duty proceeding.

EFFECTIVE DATE: April 27, 1993.

FOR FURTHER INFORMATION CONTACT: Stephen J. Powell, Chief Counsel for Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482-8916.

SUPPLEMENTARY INFORMATION: The International Trade Administration, United States Department of Commerce (ITA), wishes to remind those members of the bar who appear before it in antidumping and countervailing duty proceedings of the extreme importance of protecting the confidentiality of business proprietary information obtained pursuant to administrative protective order (APO) during the course of those proceedings. In order that the gravity with which the ITA views violations of its APO's might be better appreciated, ITA is publishing the following report on a recent allegation that the provisions of an ITA APO have been violated.

An individual employed by a firm allowed proprietary information protected by an APO to become available to an individual at the law firm who was not authorized by the APO to have access to the information. Following an investigation by the ITA, this individual was held responsible for this violation of the APO.

In this case, the individual involved was (1) required to conduct a seminar at the individual's law firm about handling APO protected information; (2) required to submit to the ITA a written copy of the firm's APO handling procedures; and (3) issued a private reprimand which warned that future violations could result in much graver sanctions.

We consider these sanctions to be appropriate for the following reasons: First, the violation appears to have been inadvertent; second, the named individual cooperated fully with the ITA's investigation; and, third, no apparent harm resulted from the violation.

Serious harm can result from the failure to properly safeguard proprietary information obtained under APO. The ITA will continue to investigate vigorously allegations that the provisions of APOs have not been faithfully observed, and is prepared to impose sanctions commensurate with the nature of the violations, including letters of reprimand, denial of access to proprietary information, or disbarment from practice before the ITA.

This notice is published pursuant to 19 CFR 354.15(e) of the Department's regulations.

Editorial Note: This document was received by the Office of the Federal Register on April 22, 1993.

Dated: January 19, 1993.

William Piez,

Deputy Assistant Secretary for Planning.

National Institute of Standards and Technology

Visiting Committee on Advanced Technology; Meeting

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. app. 2, notice is hereby given that the National Institute of Standards and Technology Visiting Committee on Advanced Technology will meet Wednesday, June 9, 1993, from 8:30 a.m. to 5 p.m. The Visiting Committee on Advanced Technology is composed of nine members appointed by the Director of the National Institute of Standards and Technology who are eminent in such fields as business, research, new product development, engineering, labor, education, management consulting, environment, and international relations. The purpose of this meeting is to review and make recommendations regarding general policy for the Institute, its organization, its budget, and its programs within the framework of applicable national policies as set forth by the President and the Congress. The agenda will include presentations on the strategic planning of the Chemical Science and Technology Laboratory; management and planning of the Advanced Technology Program; review of the Non-Volatile Electronics, Inc., venture under the Advanced Technology Program; Boulder site issues; the NIST strategic vision, the Manufacturing Extension Partnership; NIST budget update; and a laboratory tour.

VOL 58 ISS 79 AP 27 1993 UMI

DATES: The meeting will convene June 9, 1993, at 8:30 a.m. and will adjourn at 5 p.m. on June 9, 1993.

ADDRESSES: The meeting will be held in Conference Room 1103, Radio Building, National Institute of Standards and Technology, Boulder, Colorado.

FOR FURTHER INFORMATION CONTACT: Dale E. Hall, Visiting Committee Executive Director, National Institute of Standards and Technology, Gaithersburg, Maryland 20899, telephone number (301) 975–2158.

Dated: April 21, 1993.

BILLING CODE 3510–13–M

National Oceanic and Atmospheric Administration

Marine Mammals; Permits

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Issuance of Scientific Research Permit No. 827 (P278D).

SUMMARY: On November 16, 1992, notice was published in the **Federal Register** (57 FR 54051) that a request for a scientific research permit to take marine mammals (P278D) had been submitted by Dr. Brent S. Stewart, Hubbs-Sea World Research Institute, 1700 South Shores Road, San Diego, CA 92109, to conduct scientific research on pinnipeds in the Channel Islands over a five-year period.

Notice is hereby given that on April 20, 1993, as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 part 216), the Fur Seal Act of 1966 (16 U.S.C. 1151–1187), the Endangered Species Act (16 U.S.C. 1531–1543), and the regulations governing endangered fish and wildlife (50 CFR parts 217–222), the National Marine Fisheries Service issued the requested Permit for the above activities subject to the Special Conditions set forth therein.

The Permit and other related documentation are available for review by interested persons in the following offices by appointment:

Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Highway, room 7330, Silver Spring, MD 20910 (301/713–2289); and

Director, Southwest Region, National Marine Fisheries Service, 501 West Ocean Boulevard, suite 4200, Long Beach, CA 90802, (310/980–4016).

Dated: April 20, 1993.

William W. Fox, Jr.,

Director, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Office of the Secretary

Joint Advisory Committee on Nuclear Weapons Surety

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Joint Advisory Committee (JAC) on Nuclear Weapons Surety will meet in closed session on May 10–12, 1993, at Albuquerque, NM.

The mission of the Joint Advisory Committee is to advise the Secretary of Defense, Secretary of Energy, and the Joint Nuclear Weapons Council on nuclear weapons systems surety matters. At this meeting, the Joint Advisory Committee will receive classified briefings on the surety aspects of the nuclear weapons systems in the enduring nuclear weapons stockpile.

In accordance with section 19(d) of the Federal Advisory Committee Act Public Law 92–463, as amended (5 U.S.C. App. II, (1988)), it has been determined that this Joint Advisory Committee meetings concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly this meeting will be closed to the public.

Dated: April 22, 1993.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Navy

CNO Executive Panel; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Domestic Issues Task Force will meet May 6-7, 1993, from 9 a.m. to 5 p.m. in Alexandria, Virginia.

The purpose of this meeting is to continue efforts to forecast emerging demographic and sociological trends and their effect on the Navy of the future. The agenda of the meeting will consist of discussions of key issues related to domestic changes in response to demographic, sociological, cultural, and political phenomena, with emphasis on managing and capitalizing on diversity within the workforce.

For further information concerning this meeting, contact: J. Kevin Mattonen, Executive Secretary to the CNO Executive Panel, 4401 Ford Avenue, Room 601, Alexandria, VA 22302-0268, Phone (703) 756-1205.

Dated: April 20, 1993.

BILLING CODE 3810-AE-F

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 1933–005 California]

Southern California Edison Co.; Availability of Environmental Assessment

April 21, 1993.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47910), the Office of Hydropower Licensing (OHL) has reviewed an application to amend the license for the Santa Ana River No. 1 & 2 Water Power Project to relocate the 33 kV transmission line between Santa Ana River Project 1, 2, and 3. The project's are located on the Santa Ana River in San Bernardino County, California. The transmission line will consist of 16 H-framed steel structures and 5 tubular steel structures, and will be approximately four miles long. The proposed action is necessary to allow the project to continue to operate. The existing transmission line will be inundated with the construction of the Seven Oaks Dam. Relocating the transmission line to a route above high water will allow Southern California Edison Company to continue to provide reliable power to the public. The staff of OHL's Division of Project Compliance and Administration has prepared an Environmental Assessment (EA) for the proposed action. In the EA, the staff concludes that relocating the transmission line would not constitute a major Federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Reference and Information Center, room 3308, of the Commission's

Offices at 941 North Capitol Street, NE., Washington, DC 20426.

BILLING CODE 6717–01–M

[Docket No. CP93–295–000]

Arkla Energy Resources Co. and Natural Gas Pipeline Co. of America; Application

April 21, 1993.

Take notice that on April 14, 1993, Arkla Energy Resources Company (AER), 525 Milam Street, Shreveport, Louisiana 71101 and Natural Gas Pipeline Company of America (NGPL), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP93–295–000, a joint application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a transportation and exchange service provided pursuant to AER's Rate Schedule XE–39 and NGPL's Rate Schedule X–45, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that by order issued March 19, 1974, in Docket Nos. CP74–117 (AER) and CP74–156 (NGPL), AER, successor-in-interest to Arkansas Louisiana Gas Company and Arkla Energy Resources, a division of Arkla, Inc., and NGPL were authorized to exchange natural gas pursuant to an agreement dated August 21, 1973. It is stated that the agreement provided for the exchange of natural gas in the Northwest Mooreland Field, Harper County, Oklahoma, delivered by AER to NGPL at a point of interconnection in Woodward County, Oklahoma and redelivered by NGPL to AER at points of interconnection in Beckham County, Oklahoma or Grady County, Oklahoma. AER and NGPL state that this arrangement is no longer necessary or beneficial to the parties and has been terminated pursuant to mutual written agreement of the parties.

No facilities are proposed to be abandoned herein.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 12, 1993, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for AER and NGPL to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

[Docket No. RS92–63–000]

Great Lakes Gas Transmission Limited Partnership; Compliance Filing

April 21, 1993.

Take notice that on April 15, 1993, Great Lakes Gas Transmission Limited Partnership filed with the Commission its revised Order No. 636 compliance filing. Parties desiring to comment on the filing should file their comments with the Commission on or before May 6, 1993.

Lois D. Cashell,

Secretary.

[FR Doc. 93–9707 Filed 4–26–93; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP93–296–000]

Sea Robin Pipeline Co.; Application

April 21, 1993.

Take notice that on April 14, 1993, Sea Robin Pipeline Company (Sea Robin), Post Office Box 2563, Birmingham, Alabama 35202–2563, filed an application with the Commission in Docket No. CP93–296–000 pursuant to section 7(b) of the Natural Gas Act (NGA) for permission and approval to abandon a transportation service for CNG Transmission Corporation (CNG), all as more fully set forth in the application which is open to public inspection.

Sea Robin proposes to abandon a firm transportation service performed under its FERC Rate Schedule X–24 for CNG.[1] Sea Robin is authorized to transport for CNG up to 18,000 Mcf of natural gas per day produced in South Marsh Island Blocks 142 and 143, offshore Louisiana, from a subsea tap on Sea Robin's pipeline system in South Marsh Island Block 127, offshore Louisiana, to a point onshore near Erath, Vermilion Parish, Louisiana. CNG has notified Sea Robin that it wishes to terminate the transportation agreement when the primary term expires on August 1, 1993.

No facilities would be abandoned in this proposal.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 12, 1993, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). All protests filed with the Commission will

VOL 58 ISS 79 AP 27 1993 UMI

be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the NGA and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Sea Robin to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

Office of Fossil Energy

[FE Docket No. 93-35-NG]

Meridian Marketing & Transmission Corp.; Application for Blanket Authorization To Export Natural Gas to Mexico

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on March 25, 1993, of an application filed by Meridian Marketing & Transmission Corp. (Meridian) requesting blanket authorization to export up to 36 Bcf of natural gas per year to Mexico over a two-year period beginning with the date of first delivery of the exported volumes. Meridian states it would use existing pipeline facilities to transport the gas and would advise DOE of the date of first delivery and submit quarterly reports detailing each transaction.

The application is filed under section 3 of the Natural Gas Act (NGA) and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene or notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures, and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time May 27, 1993.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–50, 1000 Independence Avenue, SW. Washington, DC 20585 (202) 586–9478.

FOR FURTHER INFORMATION CONTACT:

Stanley C. Vass, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3H–087, FE–53, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9482.

Lot Cooke, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, GC–14, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: Meridian, a Delaware corporation with its principal place of business in Pittsburgh, Pennsylvania, is a marketer of natural gas. Meridian would export the gas purchased from U.S. suppliers under short-term and spot market transactions, either on its own behalf or as the agent for others. All sales would result from arms-length negotiations and the prices would be competitive. The requested authorization does not involve the construction of new pipeline facilities.

All parties should be aware that it DOE approves this requested blanket export authorization, it would designate a total authorized volume for the two-year term rather than set an annual limitation in order to maximize Meridian's flexibility of operation.

Meridian's export application will be reviewed under section 3 of the NGA and the authority contained in DOE Delegation Order Nos. 0204–111 and 0204–127. In deciding whether the proposed export is in the public interest, domestic need for the natural gas will be considered, and any other issue determined to be appropriate, including whether the arrangement is consistent with DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties, especially those that may oppose this application, should comment on these matters as they relate to the requested export authority. Meridian asserts there is no current need for the domestic gas that would be exported under the proposed agreement. Parties opposing this application bear the burden of overcoming this assertion.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Anyone who wants to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from person who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the address listed above.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issue. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Meridian's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, April 20, 1993.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) announces the procedures for disbursement of $636,856, plus accrued interest, in refined petroleum product violation amounts obtained by the DOE pursuant to a June 6, 1986 Remedial Order issued to Metropolitan Petroleum Company, Inc. and Metropolitan Fuel Oil Company (Metropolitan), Case No. LEF–0032. The OHA has determined that the funds obtained from Metropolitan, plus accrued interest, will be distributed to customers who purchased gasoline from Metropolitan during the period March 1, 1979 through July 31, 1979.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director Roger Klurfeld, Assistant Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–2094 (Mann); 586–2383 (Klurfeld).

DATE AND ADDRESSES: Applications for Refund must be filed in duplicate, addressed to "Metropolitan Special Refund Proceeding," and sent to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585

Applications should display a prominent reference to case number "LEF–0032" and be postmarked by September 30, 1993.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 205.282(b), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order sets forth the procedures that the DOE has formulated to distribute to eligible claimants $636,856, plus accrued interest, obtained by the DOE pursuant to a June 6, 1986 Remedial Order. In the Remedial Order, the DOE found that, during the period March 1, 1979 through July 31, 1979, Metropolitan had sold motor gasoline at prices in excess of the maximum lawful selling price, in violation of Federal petroleum price regulations.

The OHA has determined to distribute the funds obtained from Metropolitan in two stages. In the first stage, we will accept claims from identifiable purchasers of gasoline from Metropolitan who may have been injured by overcharges. The specific requirements which an applicant must meet in order to receive a refund are set out in Section III of the Decision. Claimants who meet these specific requirements will be eligible to receive refunds based on the number of gallons of gasoline which they purchased from Metropolitan. The DOE has obtained information indicating the number of gallons purchased by Metropolitan customers during the Remedial Order period. This information will be made available to applicants, and may be used in place of an applicant's own records to document a refund claim.

If any funds remain after valid claims are paid in the first stage, they may be used for indirect restitution in accordance with the provisions of the Petroleum Overcharge Distribution and Restitution Act of 1986 (PODRA), 15 U.S.C. 4501–07.

Applications for Refund must be postmarked by September 30, 1993. Instructions for the completion of refund applications are set forth in the Decision that immediately follows this notice. Applications should be sent to the address listed at the beginning of this notice.

Unless labelled as "confidential," all submissions must be made available for public inspection between the hours of 1 p.m. and 5 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in room 1E–234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: April 21, 1993.

George B. Breznay,

Director, Office of Hearings and Appeals.

April 21, 1993.

Decision and Order of the Department of Energy

Names of Firms: Metropolitan Petroleum Company, Inc., Metropolitan Fuel Oil Company

Date of Filing: April 18, 1991

Case Number: LEF–0032

On April 18, 1991, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) filed a Petition for the Implementation of Special Refund Procedures with the Office of Hearings and Appeals (OHA), to distribute the funds which Metropolitan Petroleum Company, Inc. and Metropolitan Fuel Oil Company (hereinafter referred to collectively as Metropolitan) remitted to the DOE pursuant to a June 6, 1986 Remedial Order. Metropolitan has remitted $636,856 pursuant to the order, to which $58,491 in interest has accrued as of March 31, 1993. In accordance with the provisions of the procedural regulations at 10 CFR part 205, subpart V (subpart V), the ERA requests in its Petition that the OHA establish special procedures to make refunds in order to remedy the effects of regulatory violations set forth in the Remedial Order. This Decision and Order establishes the procedures which OHA will employ to distribute these funds.

I. Background

During the period relevant to this proceeding, Metropolitan was engaged, *inter alia*, in the business of purchasing and selling motor gasoline. These sales were made to gasoline retailers and to end-users or ultimate consumers in south Florida. The ERA issued a Proposed Remedial Order (PRO) to Metropolitan on February 24, 1982. The PRO alleged that, during the period March 1, 1979 through July 31, 1979, Metropolitan sold motor gasoline at prices in excess of the maximum lawful selling price, in violation of Federal petroleum price regulations. After considering and rejecting the firm's objections to the PRO, the DOE issued a final Remedial Order on June 3, 1986. *Metropolitan Petroleum Company, Inc.*, 14 DOE ¶ 83,026 (1986). The Remedial Order was appealed to the Federal Energy Regulatory Commission and was affirmed on July 2, 1987. *Metropolitan Fuel Oil Co.*, 40 FERC ¶ 61,013 (1987). On December 28, 1989, the United States sought enforcement of the Remedial Order in the United States District Court for the Southern District of Florida. The court granted plaintiff's motion for summary judgment and ordered Metropolitan to remit the amount of the overcharges, $173,239.09, plus pre-judgment and post-judgment interest. *United States* v. *Metropolitan Petroleum Company, Inc.*, 743 F. Supp. 820 (S.D. Fla. 1990). Metropolitan has fully complied with the court order by remitting $636,856, to which $58,491 in

VOL 58 ISS 79 AP 27 1993 UMI

interest has since accrued as of March 31, 1993, making available a total of $695,347 (the Metropolitan Remedial Order fund) for distribution through subpart V.

II. Jurisdiction and Authority

The Subpart V regulations set forth general guidelines which may be used by the OHA in formulating and implementing a plan of distribution of funds received as a result of an enforcement proceeding. The DOE policy is to use the Subpart V process to distribute such funds. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, see *Petroleum Overcharge Distribution and Restitution Act of 1986*, 15 U.S.C. 4501 et seq., *Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

We have considered the ERA's petition that we implement a Subpart V proceeding with respect to the Metropolitan Remedial Order fund and have determined that such a proceeding is appropriate. This Decision and Order sets forth the OHA's plan to distribute this fund.

III. Refund Procedures

On November 27, 1992, OHA issued a Proposed Decision and Order (PD&O) establishing tentative procedures to distribute the Metropolitan Remedial Order fund. That PD&O was published in the **Federal Register**, and a 30-day period was provided for the submission of comments regarding our proposed refund plan. See 57 FR 57451 (December 4, 1992). More than 30 days have elapsed and the OHA has received no substantive comments concerning the proposed procedures for the distribution of the Metropolitan Remedial Order fund.[1] Consequently, the procedures will be adopted as proposed.

We will implement a two-stage refund procedure for distribution of the Metropolitan Remedial Order fund by which purchasers of gasoline from Metropolitan during the period covered by the Remedial Order may submit Applications for Refund in the initial stage. From our experience with Subpart V proceedings, we expect that potential applicants generally will fall into the following categories: (i) end-users; (ii) regulated entities, such as public utilities, and cooperativns; and (iii) refiners, resellers and retailers.

A. First Stage Refund Procedures

In order to receive a refund, each claimant will be required to submit a schedule of its monthly purchases of gasoline from Metropolitan during the period covered by the Remedial Order. If the gasoline was not purchased directly from Metropolitan, the claimant must establish that the gasoline originated with Metropolitan. Additionally, a refiner, reseller, or retailer claimant, except one who chooses to utilize the injury presumptions set forth below, will be required to make a detailed showing that it was injured by Metropolitan's overcharges. This showing will generally consist of two distinct elements. First, a refiner, reseller, or retailer claimant will be required to show that it had "banks" of unrecouped increased product costs in excess of the refund claimed.[2] Second, because a showing of banked costs alone is not sufficient to establish injury, the claimant must additionally provide evidence that market conditions during the remedial order period precluded it from increasing its prices to pass through the additional costs associated with the overcharges. See *Vickers Energy Corp./Hutchens Oil Co.*, 11 DOE ¶ 85,070 at 88,105 (1983). Such a showing could consist of a demonstration that a firm suffered a competitive disadvantage as a result of its purchases from Metropolitan. See *National Helium Co./Atlantic Richfield Co.*, 11 DOE ¶ 85,257 (1984), *aff'd sub nom. Atlantic Richfield Co.* v. *DOE*, 618 F. Supp. 1199 (D. Del. 1985).

Our experience also indicates that the use of certain presumptions permits claimants to participate in the refund process without incurring inordinate expense and ensures that refund claims are evaluated in the most efficient manner possible. See, e.g., *Marathon Petroleum Co.*, 14 DOE ¶ 85,269 (1986) (*Marathon*). Presumptions in refund cases are specifically authorized by the applicable Subpart V regulations at 10 CFR 205.282(e). Accordingly, we will adopt the presumptions set forth below.

1. Calculation of Refunds

First, we will adopt a presumption that the overcharges were dispersed equally in all of Metropolitan's sales of gasoline during the period covered by the Remedial Order. In accordance with this presumption, refunds are made on a pro-rata or volumetric basis.[3] In the absence of better information, a volumetric refund is appropriate because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices.

Under the volumetric approach, a claimant's "allocable share" of the Remedial Order fund is equal to the number of gallons purchased from Metropolitan during the period covered by the Remedial Order times the per gallon refund amount. In the present case, the per gallon refund amount is $0.0463. We derived this figure by dividing the amount of the Remedial Order fund, $636,856, by 13,746,905 gallons, the volume of gasoline which Metropolitan sold from March 1, 1979 through July 31, 1979. A firm that establishes its eligibility for a refund will receive all or a portion of its allocable share plus a pro-rata share of the accrued interest.[4]

In addition to the volumetric presumption, we will also adopt a number of presumptions regarding injury for claimants in each category listed below.

2. End-Users

In accordance with prior Subpart V proceedings, we will adopt the presumption that an end-user or ultimate consumer of gasoline purchased from Metropolitan whose business is unrelated to the petroleum industry was injured by the overcharges resolved by the Remedial Order. See, e.g., *Texas Oil and Gas Corp.*, 12 DOE ¶ 85,069 at 88,209 (1984) (*TOGCO*). Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the period covered by the Remedial Order, and were not required to keep records which justified selling price increases by reference to cost increases. Consequently, analysis of the impact of the overcharges on the final prices of goods and services produced by members of this group would be beyond the scope of the refund proceeding. *Id.* Accordingly, end-users of gasoline purchased from Metropolitan need only document their purchase volumes from Metropolitan during the period covered by the Remedial Order to make a sufficient showing that they were injured by the overcharges.

3. Regulated Firms and Cooperatives

In order to receive a full volumetric refund, a claimant whose prices for goods and services are regulated by a governmental agency, e.g., a public utility, or an agricultural cooperative which is required by its charter to pass through cost savings to its member-purchasers, need only submit documentation of purchases used by itself or, in the case of a cooperative, sold to its members. However, a regulated firm or a cooperative will also be required to certify that it will pass any refund received through to its customers or member-customers, provide us with a full explanation of how it plans to accomplish the restitution, and certify that it will notify the appropriate regulatory body or membership group of the receipt of the refund. See *Marathon*, 14 DOE at 88,514–15. This requirement is based upon the presumption that, with respect to a regulated firm, any overcharges would have been routinely passed through to its customers. Similarly, any refunds received should be passed through to its customers. With respect to a cooperative, in general, the cooperative agreement which controls its business operations would ensure that the overcharges, and similarly refunds, would be passed through to its member-customers. Accordingly, these firms will not be required to make a detailed demonstration of injury.[5]

4. Refiners, Resellers and Retailers

a. *Small Claims Presumption.* We will adopt a "small claims" presumption that a firm which resold gasoline purchased from Metropolitan and requests a small refund was injured by the overcharges. Under the small claims presumption, a refiner, reseller or retailer seeking a refund of $10,000 or less, exclusive of interest, will not be required to submit evidence of injury beyond documentation of the volume of gasoline it purchased from Metropolitan during the period covered by the Remedial Order. This presumption is based on the fact that there may be considerable expense involved in gathering the types of data necessary to support a detailed claim of injury; for small claims the expense might possibly exceed the potential refund. Consequently, failure to allow simplified refund procedures for small claims could deprive injured parties of their opportunity to obtain a refund.[6] Furthermore, use of the small claims presumption is desirable in that it allows the OHA to process the large number of routine refund claims expected in an efficient manner.[7]

b. *Mid-Level Claim Presumption.* In addition, a refiner, reseller or retailer claimant whose allocable share of the refund pool exceeds $10,000, excluding interest, may elect to receive as its refund either $10,000 or 40 percent of its allocable share, up to $50,000, whichever is larger.[8] The use of this presumption reflects our conviction that these larger, mid-level claimants were likely to have experienced some injury as a result of the overcharges. See *Marathon*, 14 DOE at 88,515. In some prior special refund proceedings, we have performed detailed analyses in order to determine product-specific levels of injury. See, e.g., *Getty Oil Co.*, 15 DOE ¶ 85,064 (1986). However, in *Gulf Oil Corp.*, 16 DOE ¶ 85,381 at 88,737 (1987), we determined that based upon the available data, it was more accurate and efficient to adopt a single presumptive level of injury of 40 percent for all mid-level claimants, regardless of the refined product that they purchased, based upon the results of our analyses in prior proceedings. We believe that approach generally to be sound, and we will therefore adopt a 40 percent presumptive level of injury for all mid-level claimants in this proceeding. Consequently, an applicant in this group will only be required to provide documentation of its purchase volumes of gasoline from Metropolitan during the Remedial Order period in order to be eligible to receive a refund of 40 percent of its total allocable share, up to $50,000, or $10,000, whichever is greater.[9]

c. *Spot Purchasers.* Finally, we will adopt a rebuttable presumption that a refiner, reseller, or retailer that made only spot purchases from Metropolitan did not suffer injury as a result of those purchases. As we have previously stated, spot purchasers generally had considerable discretion as to the timing and market in which they made their purchases, and therefore would not have made spot market purchases from a firm at increased prices unless they were able to pass through the full amount of the firm's selling price to their own customers. See, e.g., *Vickers*, 8 DOE at 85,396–97. Accordingly, a spot purchaser claimant must submit specific and detailed evidence to rebut the spot purchaser presumption and to establish the extent to which it was injured as a result of its spot purchases from Metropolitan.[10]

B. Refund Applicotion Requirements

To apply for a refund from the Metropolitan Remedial Order fund, a claimant should submit an Application for Refund containing all of the following information:

(1) Identifying information including the claimant's name, current business address, business address during the refund period, taxpayer identification number, a statement indicating whether the claimant is an individual, corporation, partnership, sole proprietorship, or other business entity, the name, title, and telephone number of a person to contact for any additional information, and the name and address of the person who should receive any refund check.[11] If the applicant operated under more than one name or under a different name during the price control period, the applicant should specify these names;

(2) The applicant's use of gasoline purchased from Metropolitan: e.g., consumer (end-user), reseller, cooperative, or public utility;

(3) A monthly purchase schedule covering the period March 1, 1979 through July 31, 1979. The applicant should specify the source of this gallonage information. In calculating its purchase volumes, an applicant should use actual records from the refund period, if available. If these records are not available, the applicant may submit estimates of its gasoline purchases, but the estimation methodology must be reasonable and must be explained in detail;[12]

(4) If the applicant was a direct purchaser from Metropolitan, it should provide its customer number. If the applicant was an indirect purchaser from Metropolitan (e.g., it purchased Metropolitan gasoline through another supplier), it should submit the name, address, and telephone number of its immediate supplier and should specify why it believes that the gasoline claimed was originally sold by Metropolitan;

(5) If the applicant is a regulated utility or a cooperative, certifications that it will pass on the entirety of any refund received to its customers, will notify its state utility commissinn, other regulatory agency, or membership body of the receipt of any

[1] The OHA received submissions from two parties, both indicating the number of gallons of gasoline each party purchased from Metropolitan during the Remedial Order period. In order for these claimed purchases to be considered for refunds in this proceeding, each party must submit Applications for Refund in accordance with the requirements set forth in Section III B of this Decision and Order.

[2] Claimants who have previously relied upon their banked costs in order to obtain refunds in other special refund proceedings should subtract those refunds from any cost banks submitted in this refund proceeding. See *Husky Oil Co./Metro Oil Products, Inc.*, 16 DOE ¶ 85,090, at 88,179 (1987). Additionally, a claimant attempting to show injury may not receive a refund for any month in which it has a negative accumulated cost bank (for gasoline) or for any prior month. See *Standard Oil Co. (Indiana)/Suburban Propane Gas Corp.*, 13 DOE ¶ 85,030, at 88,082 (1985). If a claimant no longer has records showing its banked costs, the OHA may use its discretion to permit the claimant to approximate those cost banks. See, e.g., *Gulf Oil Corp./Sturdy Oil Co.*, 15 DOE ¶ 85,187 (1986).

[3] If a claimant believes that it was injured by more than its volumetric share, it may elect to forego this presumption and file a refund application based upon a claim that it suffered a disproportionate share of Metropolitan's overcharges. See, e.g., *Mobil Oil Corp./Atchison, Topeka and Santa Fe Railroad Co.*, 20 DOE ¶ 85,788 (1990); *Mobil Oil Corp./Marine Corps Exchange Service*, 17 DOE ¶ 85,714 (1988). Such a claim will only be granted if the claimant makes a persuasive showing that it was "overcharged" by a specific amount, and that it absorbed those overcharges. See *Panhandle Eastern Pipeline Co./Western Petroleum Co.*, 19 DOE ¶ 85,705 (1989). To the degree that a claimant makes this showing, it will receive an above-volumetric refund.

[4] As in previous cases, we will establish a minimum refund amount of $15. In this determination, any potential claimant purchasing less than 324 gallons of gasoline from Metropolitan would have an allocable share of less than $15. We have found through our experience that the cost of processing claims in which refunds for amounts less than $15 are sought outweighs the benefits of restitution in those instances. See *Exxon Corp.*, 17 DOE ¶ 85,590, at 89,150 (1988) (*Exxon*).

[5] A cooperative's purchases of gasoline from Metropolitan which were resold to non-members will be treated in a manner consistent with purchases made by other resellers. See *Total Petroleum, Inc./Farmers Petroleum Cooperative, Inc.*, 19 DOE ¶ 85,215 (1989).

[6] In many prior proceedings, we have used a $5,000 small claims threshold. However, we have found that an increase in the threshold amount is warranted where a large volumetric refund amount would place many applicants who purchased relatively small volumes over the $5,000 threshold. See, e.g., *Texaco, Inc.*, 20 DOE ¶ 85,147 (1990). Because of the relatively large volumetric amount in this proceeding, $0.0463 per gallon, we are setting the small claims threshold at $10,000. *Id.*

[7] In order to qualify for a refund under the small claims presumption, a refiner, reseller, or retailer must have purchased less than 215,983 gallons of gasoline from Metropolitan during the settlement agreement period.

[8] Under the mid-level presumption, a claimant which purchased between 215,983 gallons and 539,956 gallons of gasoline from Metropolitan would be eligible to receive a principal refund, exclusive of interest, of $10,000. A claimant purchasing between 539,957 gallons and 2,699,784 gallons of petroleum products would be eligible for a principal refund equal to 40 percent of its allocable share, and an applicant with a purchase volume in excess of 2,699,784 gallons would be eligible for a principal refund of $50,000.

[9] A claimant who attempts to make a detailed showing of injury in order to obtain 100 percent of its allocable share but, instead, provides evidence that leads us to conclude that it passed through all of the overcharges, or that it was injured in an amount less that the presumed level refund, may not necessarily receive a full presumption-based refund. Instead, such a claimant may receive a refund which reflects the level of injury established in its application.

[10] In prior proceedings, we have stated that refunds will be approved for spot purchasers who demonstrated that: (1) they made the spot purchases for the purpose of ensuring a supply for their base period customers rather than in anticipation of financial advantage as a result of those purchases, and (2) they were forced by market conditions to resell the product at a loss that was not subsequently recouped through the draw down of banks. See, e.g., *Texaco Inc.*, 20 DOE ¶ 85,147 at 88,321 (1990); *Quaker State Oil Refining Corp./Certified Gasoline Co.*, 14 DOE ¶ 85,465 (1986).

[11] Under the Privacy Act of 1974, the submission of a social security number by an individual applicant is voluntary. An applicant that does not wish to submit a social security number must submit an employer identification number if one exists. This information will be used in processing refund applications, and is requested pursuant to our authority under the Petroleum Overcharge Distribution and Restitution Act of 1986 and the regulations codified at 10 CFR part 205, subpart V. The information may be shared with other Federal agencies for statistical, auditing or archiving purposes, and with law enforcement agencies when they are investigating a potential violation of civil or criminal law. Unless an applicant claims confidentiality, this information will be available to the public in the Public Reference Room of the Office of Hearings and Appeals.

[12] In the course of its audit of Metropolitan's books, the ERA obtained information indicating the number of gallons purchased by Metropolitan customers during the Remedial Order period. This information will be made available to applicants, and may be used in place of an applicant's own records to document a refund claim.

VOL 58 ISS 79 AP 27 1993 UMI

refund, and a brief description as to how the refund will be passed along;

(6) If the applicant is a retailer, reseller, or refiner whose allocable share exceeds $10,000 (i.e., whose purchases equal or exceed 107,992 gallons), it must indicate whether it elects to rely on the appropriate reseller injury presumption and receive the larger of $10,000 or 40% of its allocable share. If it does not elect to rely on the injury presumption, it must submit a detailed showing that it absorbed Metropolitan's overcharges. *See* Section III.A.4 *supra*;

(7) A statement as to whether the applicant or a related firm has filed, or has authorized any individual to file on its behalf, any other application in the Metropolitan refund proceeding. If so, an explanation of the circumstances of the other filing or authorization should be submitted;

(8) A statement as to whether the applicant is or was in any way affiliated with Metropolitan. If the applicant is or was so affiliated, it should explain this affiliation, including the time period in which it was affiliated; [13]

(9) A statement as to whether the ownership of the applicant's firm changed during or since the refund period. If an ownership change occurred, the applicant should list the names, addresses, and telephone numbers of any prior or subsequent owners. The applicant should also provide copies of any relevant Purchase and Sale Agreements, if available. If such written documents are not available, the applicant should submit a description of the ownership change, including the year of the sale and the type of sale (e.g., sale of corporate stock, sale of company assets);

(10) A statement as to whether the applicant has ever been a party in a DOE enforcement action or a private Section 210 action. If so, an explanation of the case and copies of relevant documents should also be provided;

(11) The statement listed below signed by the individual applicant or a responsible official of the firm filing the refund application:

I swear (or affirm) that the information contained in this application and its attachments is true and correct to the best of my knowledge and belief. I understand that anyone who is convicted of providing false information to the federal government may be subject to a fine, a jail sentence, or both, pursuant to 18 U.S.C. 1001. I understand that the information contained in this application is subject to public disclosure. I have enclosed a duplicate of this entire application which will be placed in the OHA Public Reference Room.

All applications should be either typed or printed and clearly labeled "Metropolitan Special Refund Proceeding, Case No. LEF-0034." Each applicant must submit an original and one copy of the application. If the applicant believes that any of the information in its application is confidential and does not wish for this information to be publicly disclosed, it must submit an original application, clearly designated "confidential," containing the confidential information, and two copies of the application with the confidential information deleted. All refund applications should be postmarked no later than September 30, 1993, and sent to: Metropolitan Special Refund Proceeding, Office of Hearings and Appeals, Department of Energy, 1000 Independence Ave., S.W., Washington, DC 20585.

In addition, we will adopt the following procedures relating to refund applications filed on behalf of applicants by "representatives," including refund filing services, consulting firms, accountants, and attorneys. *See Texaco Inc.*, 20 DOE ¶ 85,147 (1990). Each such filing service shall, contemporaneously with its first filing in the Metropolitan proceeding, submit a statement indicating its qualifications for representing refund applicants and containing a detailed description of the solicitation practices and application procedures that it has used and plans to use.[14] This statement should contain the following information: [15]

(1) A description of the procedures used to solicit refund applications in the Metropolitan proceeding and copies of any solicitation materials mailed to prospective Metropolitan applicants;

(2) A description of how the filing service obtains authorization from its clients to act as their representative, including copies of any type of authorization form signed by refund applicants;

(3) A description of how the filing service obtains and verifies the information contained in refund applications;

(4) A description of the procedures used to forward refunds to its clients;

(5) A description of the procedures used to prevent and check for duplicate filings.

Upon receipt of this information, we may suggest alteration of a filing service's procedures if they do not conform to the procedural requirements of 10 CFR Part 205 and this proceeding.

Secondly, we will require strict compliance with the filing requirements as specified in 10 CFR § 205.283, particularly the requirement that applications and the accompanying certification statement be signed by the applicant.

Thirdly, in any case where an application has been signed and dated before the issuance of this Decision and Order in this proceeding, we will require a certification statement, signed and dated by the applicant after the date of the issuance of this Decision and Order. This certification should state that the applicant has not filed and will not file any other Application for Refund in the Metropolitan proceeding and that, after having been provided a copy of this Decision and Order, it still authorizes that filing service to represent it.

Fourthly, we will require from each representative a statement certifying that it maintains a separate escrow account at a bank or other financial institution for the deposit of all refunds received on behalf of applicants, and that its normal business practice is to deposit all Subpart V refund checks in that account within two business days of receipt and to disburse refunds to applicants within 30 calendar days thereafter. Unless such certification is received by the OHA, all refund checks approved will be made payable solely to the applicant. Representatives who have not previously submitted an escrow certification form to the OHA may obtain a copy of the appropriate form by contacting: Marcia B. Carlson, HG-13, Chief, Docket & Publications Division, Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Finally, the OHA reiterates its policy to closely scrutinize applications filed by filing services. Applications submitted by a filing service must contain all of the information indicated in this Decision and Order.

C. Distribution of Funds Remaining After First Stage

Any funds that remain after all first stage claims have been decided shall be distributed in accordance with the provisions of the Petroleum Overcharge Distribution and Restitution Act of 1986 (PODRA), 15 U.S.C. §§ 4501-07. PODRA requires that the Secretary of Energy determine annually the amount of oil overcharge funds that will not be required to refund monies to injured parties in Subpart V proceedings and make those funds available to state governments for use in four energy conservation programs. The Secretary has delegated these responsibilities to the OHA, and any funds in the Metropolitan Remedial Order fund that the OHA determines will not be needed to effect direct restitution to injured customers will be distributed in accordance with the provisions of PODRA.

It Is Therefore Ordered That:

(1) Applications for Refund from the funds remitted by Metropolitan Petroleum Company, Inc. and Metropolitan Fuel Oil Company, pursuant to the Remedial Order dated June 6, 1986, may now be filed.

(2) Applications for Refund must be postmarked no later than September 30, 1993.

Dated: April 21, 1993.

George B. Breznay,

Director, Office of Hearings and Appeals.

[FR Doc. 93-9809 Filed 4-26-93; 8:45 am]

BILLING CODE 6450-01-P

[13] Affiliates of firms that have remitted overcharge funds to the DOE are generally not entitled to share in those funds. If an affiliate of Metropolitan was granted a refund, Metropolitan would be indirectly compensated from a Remedial Order fund remitted to settle its own violations. *See Propane Industrial, Inc. v. Department of Energy*, No. 8-23, slip op. at 3 (Temp. Emer. Ct. App. January 8, 1993). In addition, Metropolitan presumably would not have sold petroleum products to an affiliate if such a sale would have placed the purchaser at a competitive disadvantage. *See Marathon Petroleum Co./Pilot Oil Corp.*, 16 DOE ¶ 85,611 (1987), *amended claim denied*, 17 DOE ¶ 85,291 (1988), *reconsideration denied*, 20 DOE ¶ 85,236 (1990).

[14] This statement should be submitted under separate cover and reference the Metropolitan refund proceeding, Case No. LEF-0034.

[15] This information with regard to some filing services has already been requested and received by this Office. Therefore, any filing service that has had more than 10 Applications for Refund approved before the issuance of the Proposed Decision and Order in this proceeding (November 27, 1992) need not submit this information if it has already done so in another proceeding. Instead, such a filing service need only include a copy of the previous submission(s) responsive to items (1)-(5) and provide an update if its response to any of these questions has changed since it first submitted its information. However, in light of the importance of this information, it is prudent for all filing services to review their practices and inform the OHA of any alterations or improvements that may have been made.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before May 27, 1993.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260-2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: Environmental Radiation Ambient Monitoring System (ERAMS) (EPA ICR No. 877.04; OMB No. 2060-0015). This ICR requests renewal of the existing clearance.

Abstract: States and some local governments collect samples of air, pasteurized milk, rain water, surface water and ground water at certain intervals. These samples are sent to EPA's ERAMS, and are tested for radioactive contamination. EPA's ERAMS uses these data to estimate ambient levels of radioactive pollutants in the environment, to recognize trends in radiation levels, to assess the impact of fallout, and other intrusions of radioactive materials.

Burden Statement: Public reporting burden for this collection of information is estimated to average 70 minutes per response including time for reviewing instructions, searching existing data sources, gathering the data needed, and completing the collection of information.

Respondents: States and some local governments.

Estimated Number of Respondents: 313.

Estimated Total Annual Burden on Respondents: 9,201 hours.

Frequency of Collection: Quarterly, monthly, twice weekly, and on occasion.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y), 401 M Street, SW., Washington, DC 20460.

and

Ron Minsk, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, DC 20530.

Dated: April 20, 1993.

Paul Lapsley,

Director, Regulatory Management Division.

BILLING CODE 6560-60-F

[FRL-4618-3]

Availability of Draft Model Title V Operating Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The EPA is announcing a series of draft model operating permits under title V of the Clean Air Act (Act) and is asking for public comment. A number of draft model permits are available for public comment; others will be available in coming months.

FOR FURTHER INFORMATION CONTACT: For general information regarding model permits, contact Ray Vogel at (919) 541-3153, Permits Support Section, Mail Drop 15, Office of Air Quality Planning and Standards, U.S. EPA, Research Triangle Park, North Carolina 27711. For information on specific model permits, contact the person shown on the list in today's notice.

ADDRESSES: Send comments on specific model permits to the contact person identified for that model permit in today's notice. Include the name and mail drop number shown on the list and send to the Office of Air Quality Planning and Standards, U.S. EPA, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION: Under title V of the Act, States are required to submit permits programs by November 15, 1993 governing the issuance of operating permits to major stationary sources of air pollution.[1] Under that program, permitting agencies will issue operating permits to major sources. As part of its assistance to permitting agencies, the EPA is developing "model permits" that provide example permit terms and conditions. In general, the model permits reflect Federal emissions requirements that apply to particular categories of sources. Where no Federal emissions requirements exist, the model permits allow States to insert State-specific requirements. Permitting agencies may use these model permits as is, modifying them to suit their needs, or use their own permits that meet Federal requirements. States are not required to use the EPA model permits.

All title V permits must contain certain elements set forth in 40 CFR part 70, Operating Permits Program; Final Rule, 57 FR 32250, July 21 1992.[2] These elements include assuring compliance with all "applicable requirements,"[3] which are emissions standards and requirements that apply to the permitted sources under the Act. Permits must also comply with all part 70 requirements.

The EPA's model permits are of two types: specific conditions and general conditions. Specific conditions model permits contain specific applicable requirements that apply to source categories affected by a specific requirement. For example, a volatile organic compounds (VOC) model permit for asphalt plants contains only the VOC requirements, and the particles with an aerodynamic diameter less than or equal to a nominal 10 micrometers (PM-10) model permits contain only the PM-10 requirements.

The general conditions model permit contains the part 70 requirements and expresses them as permit terms and conditions. By integrating the general conditions permit with one or more of the specific conditions permits, State

[1] "Major source" means any source with the potential to emit 100 tons per year (tpy) or more of VOC, carbon monoxide, nitrogen oxides (NOx), SO2, lead, or PM-10, or with the potential to emit 10 tpy individually or 25 tpy in combination of any hazardous air pollutant. These limits apply nationwide. In certain nonattainment areas, lower limits may apply for VOC, NOx, or PM-10 sources. "Potential to emit" means the maximum capacity of a source to emit air pollutants, considering any control equipment and any federally-enforceable limitations restricting its emitting capability.

[2] The requirements for permit content are contained in § 70.4, 70.6, and 70.7.

[3] "Applicable requirements" are defined in § 70.2. Examples of "applicable requirements" include State implementation plan requirements, terms and conditions of new source review and prevention of significant deterioration permits, NESHAP requirements, maximum achievable control technology requirements, and acid rain requirements.

VOL 58 ISS 79 AP 27 1993 UMI

permitting agencies may assemble a complete permit for a facility.

Specific conditions model permits have been or are being developed to cover many source categories that are subject to applicable requirements, including VOC reasonably available control technology (RACT) guidelines, national emissions standards for hazardous air pollutants (NESHAP), PM–10, lead, and sulfur dioxide (SO2) requirements. Although many model permits have already undergone extensive review by affected industries and State and local permitting agencies, EPA wants to assure review of these permits by seeking comments from all interested parties.

In the following list, the model permits are grouped by source category. The list shows if a draft model permit is available for a source category, or when it is expected to become available for public review.

STATUS OF MODEL PERMITS

	When draft is available
I. VOC Model Permits Contact: David Sanders (MD–15) (919) 541–3356	
1. Graphic arts	Now.
2. Petroleum storage in fixed roof tanks.	Now.
3. Petroleum refineries	Now.
4. Coating sources (can, coil, paper, fabric, vinyl, metal furniture, large appliances, magnet wire, and misc. metal parts).	Now.
5. Gasoline dispensing (stage I vapor recovery).	Now.
6. Bulk gasoline terminals	Now.
7. Bulk gasoline plant	Now.
8. Leaks from gasoline tank trucks.	Now.
9. Auto and light-duty truck coating operations.	Now.
10. Leaking sources (petroleum refinery, natural gas/gasoline processing, synthetic organic chemical, and polymer and resin manufacturing).	Now.
11. Cutback and emulsified asphalt.	Now.
12. Pneumatic rubber tire manufacturing.	Now.
13. Petroleum storage in external floating roof tanks.	Now.
14. Synthesized pharmaceutical products manufacturing.	Now.
15. High-density polyethylene, polypropylene, and polystyrene resins.	Now.
16. SOCMI—Air oxidation	Now.
17. Petroleum solvent dry cleaners.	Now.
18. Solvent metal cleaning (degreasing).	Now.

STATUS OF MODEL PERMITS—Continued

	When draft is available
19. Flat wood paneling coating.	Now.
II. NESHAP Model Permits Contact: Warren Johnson (MD–13) (919) 541–5124	
1. Beryllium	Fall 1993.
2. Beryllium rocket motor firing.	Fall 1993.
3. Mercury	Now.
4. Vinyl chloride	Now.
5. Leaks of benzene	Fall 1993.
6. Benzene from coke by-product recovery plants.	April 1993.
7. Inorganic arsenic from glass manufacturing plants.	Now.
8. Inorganic arsenic from primary copper smelters.	April 1993.
9. Inorganic arsenic from arsenic trioxide and metallic arsenic.	Fall 1993.
10. Equipment leaks	Fall 1993.
11. Benzene from benzene storage vessels.	April 1993.
12. Benzene from benzene transfer operations.	April 1993.
13. Benzene waste operations.	Fall 1993.
III. PM–10 Model Permits Contact: Charlene Spells (MD–15) (919) 541–5255	
1. Hot mix asphalt plants	April 1993.
2. Nonmetallic metals processing.	April 1993.
3. Grain milling	April 1993.
4. Marine grain elevators	April 1993.
5. Nonprocess fugitive emissions sources.	April 1993.
6. Portland cement plants (lead included).	April 1993.
7. Lime kilns	April 1993.
8. Gypsum processing and products.	April 1993.
9. Primary aluminum plants	April 1993.
10. Pulp mills	April 1993.
11. Elemental phosphorus plants.	April 1993.
12. Petroleum refineries	April 1993.
13. Utility boilers	April 1993.
14. Glass manufacturing (lead included).	April 1993.
15. Nonferrous smelters (lead included).	April 1993.
16. Steel mills (sources with new source performance standards) (lead included).	April 1993.
17. Paint manufacturing (lead included).	April 1993.
IV. Lead Model Permits Contact: Charlene Spells (MD–15) (919) 541–5255	
1. Lead acid battery manufacturing.	April 1993.
2 Secondary lead smelting and refining plants.	April 1993.
3. Secondary lead remelting and consuming plants.	April 1993.

STATUS OF MODEL PERMITS—Continued

	When draft is available
V. SO_2 Model Permits Contact: Laura McKelvey (MD–15) (919) 541–5497	
1. Utility boilers	Spring 1993.
2. Petroleum refineries	Summer 1993.
3. Nonferrous smelters	Summer 1993.
4. Pulp and paper mills	Summer 1993.
5. Portland cement plants	Summer 1993.
6. Industrial boilers	Summer 1993.
7. Sulfuric acid/sulfur recovery plants.	Summer 1993.
8. Natural gas processing	Summer 1993.
9. Coke ovens	Summer 1993.
VI. General Conditions Model Permit Contact: Ray Vogel (MD–15) (919) 541–3153	Summer 1993.
VII. General Permits Contact: Jeff Herring (MD–15) (919) 541–3153	
1. Dry cleaners	Summer 1993.
2. Storage tanks	Summer 1993.
3. Small boilers	Summer 1993.
4. Sheet-fed printers	Summer 1993.
5. Degreasers	Summer 1993.

Additional model permits not listed above may be developed in the future as new requirements and standards are promulgated. Copies of the model permits may be obtained from the Technology Transfer Network (TTN) bulletin board of the Office of Air Quality Planning and Standards. Contact the TTN systems operator at (919) 541–5384 for information on accessing the bulletin board. Persons who are not able to access the bulletin board may obtain copies from the contact person identified at the top of each model permit group.

The public is invited to comment on the draft model permits. Comments should be submitted to the EPA contact persons. Comments must be in writing and, if possible, should also be submitted on an IBM-compatible computer disk in WordPerfect format.

For draft model permits available now, comments will be accepted until 180 days after today's date. For draft model permits available after today's date, comments will be accepted 180 days after the date on which the draft becomes available. Those dates will be posted on the TTN bulletin board. The EPA will review each comment and make revisions to the model permits where appropriate. No response to individual comments is planned.

Dated: April 21, 1993.

Michael Shapiro,

Acting Assistant Administrator.

BILLING CODE 6560–50–P

[FRL 4617–9]

Clean Air Act; Contractor Access to Confidential Business Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has contracted with the Bionetics Corporation ("Bionetics") of Hampton, Virginia, and JACA Corporation ("JACA") of Fort Washington, Pennsylvania, to provide assistance in the development and enforcement of regulatory requirements under title II and VI of the Clean Air Act ("the Act"). Both contractors have been authorized access to information submitted to the Agency under sections 114, 208 and 307(a) of the Act. Some of the information may be claimed or determined to be confidential business information (CBI).

DATES: This notice is effective May 4, 1993.

FOR FURTHER INFORMATION CONTACT: Robert E. Kenney, Senior Staff Attorney, Field Operations and Support Division (6406J), Office of Mobile Sources, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Telephone: (202) 233–9021.

SUPPLEMENTARY INFORMATION: Two contractors have been authorized access to information submitted to EPA under sections 114, 208 and 307(a) of the Clean Air Act. Some of this information may be claimed or determined to be CBI.

Under contract number 68D20172, the Bionetics Corporation, Tenth Floor, suite 1000, Harbour Centre Building, 2 Eaton Street, Hampton, Virginia 23669, provides enforcement support to the Field Operations and Support Division, Office of Mobile Sources, in a number of activities related to Titles II and VI of the Act. These activities include:

- Inspections of fuel and fuel additive dispensing facilities;
- Inspections of fuel and fuel additive refining, importing and distribution facilities;
- Motor vehicle tampering inspections;
- Motor vehicle air conditioning repair inspections;
- Lead phasedown audits;
- Audits of fuel refiner and importer baselines;
- Laboratory analysis of fuel samples;
- Litigation support; and
- Audits of aftermarket catalytic converter warranty cards.
- Bionetics may be assisted in these activities by two subcontractors, Patterson and Associates of Houston, Texas (subcontract number C206–001) and AutoResearch Laboratories, Inc. of Chicago, Illinois (subcontract number C206–002).

Under contract number 68D10114, JACA Corporation, 550 Pinetown Road, Fort Washington, Pennsylvania 19034, provides economic and technical support to the Field Operations and Support Division, Office of Mobile Sources, for the development, implementation and enforcement of regulatory programs under Title II of the Act. General types of economic and technical support under this contract include:

- Analyses of the financial operations and financial accountability of fuel refiners, importers, distributors, and retailers, particularly evaluations of their ability to pay civil penalties for violations of fuels regulations;
- Analyses of the effects that possible regulatory or policy changes will have on the economics and operations of the fuel refining, transportation, and distribution industries, including summaries and evaluations of the technical and economic implications of public comments made in response to proposed regulatory or policy changes;
- Support to obtain information for problem identification, guidelines, regulatory development, and resource requirements; and
- General support for investigations or inspections and court reporting for field use.

JACA may be assisted in these contractual support activities by the one or more of the following subcontractors: Consad Research of Pittsburgh, Pennsylvania; Sobotka and Co. of Washington, DC; Michael Walsh of Washington, DC; James Patterson of Houston, Texas; Christopher Weaver of Sacramento, California; Paul Hagstrom of Henderson, Nevada; Roger Ellefson of Wilmington, Delaware; and various court reporting and process serving companies.

In accordance with 40 CFR 2.301(h)(2), EPA has determined that disclosure of confidential business information to Bionetics (and its subcontractors) under contract number 68D20172 and to JACA (and its subcontractors) under contract number 68D10114 is necessary for these entities to carry out the work required by these contracts (and subcontracts issued thereunder). EPA is issuing this notice to inform all submitters of information to the Field Operations and Support Division, Office of Mobile Sources, under section 114, 208, and 307(a) of the Clean Air Act that the Agency may provide access to CBI contained in such submittals to Bionetics and JACA as necessary to carry out work under these contracts. Disclosure of CBI under these contracts may continue until September 30, 1995, for Bionetics and September 30, 1994, for JACA.

As required by 40 CFR 2.301(h)(2), both the Bionetics and JACA contracts include provisions to assure the appropriate treatment of CBI disclosed to contractors and subcontractors.

Dated: April 19, 1993.

Michael H. Shapiro,

Acting Assistant Administrator for Air and Radiation.

[FR Doc. 93–9820 Filed 4–24–93; 8:45 am]

BILLING CODE 6560–50–M

[OPPTS–140208; FRL–4578–2]

Access To Confidential Business Information to Certain Contractors

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA intends to transfer confidential business information (CBI) collected from the pulp, paper, and paperboard manufacturing industry to four contractors. Transfer of the information will allow the contractors to assist EPA in developing regulations for the land application of sludge from pulp and paper mills using chlorine and chlorine-derivative bleaching processes under section 6 of the Toxic Substances Control Act (TSCA). The information being transferred was collected under the authority of section 308 of the Clean Water Act (CWA), section 114 of the Clean Air Act (CAA), and section 3007 of the Resource Conservation and Recovery Act (RCRA). Interested persons may submit comments on this intended transfer of information to the addresses noted below.

DATES: Comments on the transfer of data are due May 7, 1993.

ADDRESSES: Comments on transfer of data collected under section 308 of the CWA, section 114 of the CAA, and section 3007 of RCRA may be sent to Lynne Blake-Hedges, Regulatory Impacts Branch, Economic Exposure and Technical Division (TS–779), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Lynne Blake-Hedges at (202) 260–7241 for general information and Scott Sherlock at (202) 260–1536 for information regarding uses of CBI under TSCA authority.

SUPPLEMENTARY INFORMATION: EPA intends to transfer information, including CBI, to four contractors: Eastern Research Group, Inc. (ERG), 110

VOL 58 ISS 79 AP 27 1993 UMI

Hartwell Ave., Lexington, MA 02173–3198; Abt Associates (Abt), 4800 Montgomery Lane, Suite 500, Bethesda, MD 20814 and 55 Wheeler St., Cambridge, MA 02138–1168; Radian Corporation, 2455 Horsepen Road, Suite 250, Herndon, VA 22071; and RCG/Hagler Bailly, Inc. (RCG), P.O. Drawer O, Boulder, CO 80306.

More specifically, the information being transferred to the contractors includes the following information collected under the authority of section 114 of the CAA, section 308 of the CWA, and section 3007 of RCRA: Information collected through questionnaires and surveys of the industry; all joint EPA industry studies; site visit reports; monitoring and test data; test reports and sampling episodes reports; and analytical summaries of this information and data.

EPA also intends to transfer to ERG, Abt, Radian and RCG all information listed above (including CBI) that may be collected or developed in the future under the authorities listed above. This information is necessary to enable ERG, Abt, Radian, and RCG to carry out the work required by their contracts to support EPA's development of regulations for the pulp, paper, and paperboard industry under section 6 of TSCA. The contractors, contract numbers, and type of support to be provided to EPA are listed in the following table:

EPA Office Receiving Support	Contractor	Contract No.	Type of Support
OPPTS/OPPT/EETD	ERG, Lexington, MA	68–D2–0175	Economic
OPPTS/OPPT/EETD	Abt, Bethesda, MD	68–D2–0175	Economic
OPPTS/OPPT/EETD	Abt, Cambridge, MA	68–D2–0175	Economic
OPPTS/OPPT/EETD	Radian, Herndon, VA	68–D2–0175	Economic
OPPTS/OPPT/EETD	RCG, Boulder, CO	68–D2–0175	Economic

In the case of information claimed to be proprietary and, therefore, confidential, all regulations and confidentiality agreements apply. This transfer would not affect the status of this information as information claimed to be proprietary. The relevant contracts contain all confidentiality provisions required by EPA's confidentiality regulations. Need for access to the information shall continue until September 30, 1993.

In accordance with those regulations, companies who have submitted information claimed to be confidential have until May 7, 1993 to comment on EPA's proposed transfer of this information to ERG and ABT for the proposed outlined above.

Dated: April 19, 1993.

George A. Bonina,

Acting Director, Information Management Division.

[FR Doc. 93–9812 Filed 4–26–93; 8:45 am]

BILLING CODE 6560–50–F

[OPPTS–140209; FRL–4580–2]

Access to Confidential Business Information by Versar, Inc.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized its contractor, Versar, Inc. (VER), of Springfield, Virginia, and Versar's subcontractors, General Science Corporation (GSC) of Laurel, Maryland, and Syracuse Research Corporation (SYR) of Syracuse, New York for access to information which has been submitted to EPA under sections 4, 5, 6, and 8 of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

DATES: Access to the confidential data submitted to EPA will occur no sooner than May 7, 1993.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, TSCA Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. E–545, 401 M St., SW., Washington, DC 20460, (202) 554–1404, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: Under contract number 68–D3–0013, contractor VER of 6850 Versar Center, Springfield, VA, and its subcontractors GSC of 6100 Chevy Chase Drive, Laurel, MD, and SYR of Merrill Lane, Syracuse, NY will assist the Office of Pollution Prevention and Toxics (OPPT) in providing exposure assessment support for both new and existing chemicals.

In accordance with 40 CFR 2.306(j), EPA has determined that under EPA contract number 68–D3–0013, VER, GSC, and SYR will require access to CBI submitted to EPA under sections 4, 5, 6, and 8 of TSCA to perform successfully the duties specified under the contract. VER, GSC, and SYR personnel will be given access to information submitted to EPA under sections 4, 5, 6, and 8 of TSCA. Some of the information may be claimed or determined to be CBI.

In a previous notice published in the **Federal Register** of October 15, 1992 (57 FR 47336), VER, GSC, and SYR were authorized for access to CBI submitted to EPA under sections 4, 5, 6, and 8 of TSCA. EPA is issuing this notice to extend VER, GSC, and SYR's access to TSCA CBI under the new contract number 68–D3–0013.

EPA is issuing this notice to inform all submitters of information under sections 4, 5, 6, and 8 of TSCA that EPA may provide VER, GSC, and SYR access to these CBI materials on a need-to-know basis only. All access to TSCA CBI under this contract will take place at EPA Headquarters, at VER's Springfield, VA site, and at SYR's Syracuse, NY site only.

VER and SYR will be authorized access to TSCA CBI at their facilities under the EPA "Contractor Requirements for the Control and Security of TSCA Confidential Business Information" security manual. GSC will be authorized access to TSCA CBI at EPA Headquarters only. Before access to TSCA CBI is authorized at VER and SYR's sites, EPA will approve their security certification statements, perform the required inspection of their facilities, and ensure that the facilities are in compliance with the manual. Upon completing review of the CBI materials, VER, GSC, and SYR will return all transferred materials to EPA.

Clearance for access to TSCA CBI under this contract may continue until March 1, 1996.

VER, GSC, and SYR personnel will be required to sign nondisclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Dated: April 14, 1993.

George A. Bonina,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

FEDERAL COMMUNICATIONS COMMISSION

Applications for Consolidated Proceeding

1. The Commission has before it the following mutually exclusive applications for a new FM station:

Applicant, City and State	File No.	MM Docket No.
A. Concord-Carlisle Regional School District (WIQH (FM)); Concord, MA.	BPED–860424MC	93–115
B. Technology Broadcasting Corporation (WMBR (FM)); Cambridge, MA.	BPED–920326IA	

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

Issue Heading and Applicants

1. 307(b) Noncommercial Educational—Both
2. Ultimate—Both

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Service, Inc., 2100 M Street, NW., suite 140, Washington, DC 20037; telephone (202) 857–3800.

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

BILLING CODE 6712–01–M

Licensee Order To Show Cause

The Chief, Mass Media Bureau, has before him the following matter:

Applicant, City and State	MM docket No.
H. Gibbs Flanders, Jr., Trustee, Licensee of WJHH(AM); Soperton, GA	93–110

(Regarding the silent status of Station WJHH(AM).)

Pursuant to section 312(a) (3) and (4) of the Communications Act of 1934, as amended, H. Gibbs Flanders, Jr., Trustee, has been directed to show cause why the license for Station WJHH(AM) should not be revoked, at a proceeding in which the above-matter has been designated for hearing concerning the following issues:

1. To determine whether H. Gibbs Flanders, Jr., Trustee, has the capability and intent to expeditiously resume broadcast operations of WJHH(AM) consistent with the Commission's Rules.

2. To determine whether H. Gibbs Flanders, Jr., Trustee, has violated sections 73.1740 and/or 73.1750 of the Commission's Rules.

3. To determine, in light of the evidence adduced pursuant to the forgoing issues, whether H. Gibbs Flanders, Jr., Trustee, is qualified to be and remain the licensee of Station WJHH(AM).

A copy of the complete Show Cause Order and HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Docket Branch (room 320), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Service, 2100 M Street, NW., suite 140, Washington, DC 20037 (telephone 202–857–3800).

Roy J. Stewart,

Chief, Mass Media Bureau.

BILLING CODE 6712–01–M

Licensee Order To Show Cause

The Chief, Mass Media Bureau, has before him the following matter:

Applicant, City and State	MM docket No.
Honus Shain, Licensee of WKLO(AM); Danville, KY	93–109

(Regarding the silent status of Station WKLO(AM)).

VOL 58 ISS 79 AP 27 1993 UMI

Pursuant to section 312(a)(3) and 4 of the Communications Act of 1934, as amended, Honus Shain has been directed to show cause why the license for Station WKLO(AM) should not be revoked, at a proceeding in which the above matter has been designated for hearing concerning the following issues:

1. To determine whether Honus Shain has the capability and intent to expeditiously resume broadcast operations of WKLO(AM) consistent with the Commission's Rules.

2. To determine whether Honus Shain has violated sections 73.1740 and/or 73.1750 of the Commission's Rules.

3. To determine, in light of the evidence adduced pursuant to the forgoing issues, whether Honus Shain is qualified to be and remain the licensee of Station WKLO(AM).

A copy of the complete Show Cause Order and HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 320), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Service, 2100 M Street, NW., suite 140, Washington, DC 20037 (telephone 202–857–3800).

Roy J. Stewart,

Chief, Mass Media Bureau.

FEDERAL DEPOSIT INSURANCE CORPORATION

Pilot Reinsurance Program

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice; Additional comment period.

SUMMARY: On February 3, 1993, the Federal Deposit Insurance Corporation (FDIC) published in the **Federal Register** a notice requesting public comment on all aspects of a planned Pilot Reinsurance Program (Pilot Program) for a 60-day comment period which ended on April 5, 1993. Due to the variety and complexity of issues for comment, the FDIC is now providing an additional 30-day period for public comment. The FDIC is publishing the notice in a form identical to that published on February 3, 1993, with one exception: as a result of providing an additional 30-day period for public comment, the FDIC does not intend to begin actual reinsurance coverage pursuant to the Pilot Program until the semiannual assessment period beginning July 1, 1994. The dates for engaging in the Pilot Program have been amended accordingly.

DATES: Written comments must be received on or before May 27, 1993.

ADDRESSES: Written comments shall be addressed to Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429. Comments may be hand-delivered to room F–402, 1776 F Street, NW., Washington, DC on business days between 8:30 a.m. and 5 p.m. Comments may also be inspected in the FDIC's Reading Room, room 7118, 550 17th Street NW., between 8:30 a.m. and 5 p.m. on business days. [FAX number (202) 898–3838]

FOR FURTHER INFORMATION CONTACT: Arthur J. Murton, Deputy Director, Division of Research and Statistics, (202) 898–3938; Jennifer L. Eccles, Senior Financial Analyst, Division of Research and Statistics, (202) 898–8537; or Lisa M. Stanley, Senior Attorney, (202) 898–7494.

SUPPLEMENTARY INFORMATION: On February 3, 1993, the FDIC published a notice in the **Federal Register** (58 FR 6966) requesting public comment on all aspects of a planned Pilot Program. A number of commenters expressed the opinion that the FDIC should provide additional time for consideration of the issues involved in the Pilot Program. In light of these concerns and in view of the variety and complexity of issues to be analyzed, the FDIC is providing an additional 30-day period for public comment on this notice.

As before, the FDIC is soliciting public comment on all aspects of the planned Pilot Program, including the reinsurance process, the terms and conditions of participation by private reinsurers, and the appropriate criteria for determining which insured depository institutions may be included in the Program. As before, the FDIC is also soliciting public comment on alternate methods of structuring a Pilot Program.

In the request for comment published on February 3, 1993, the FDIC stated its intention to commence actual reinsurance coverage pursuant to the Pilot Program beginning January 1, 1994. As a result of providing an additional 30-day comment period, the FDIC does not intend to commence actual reinsurance coverage pursuant to the Pilot Program until the semiannual assessment period beginning July 1, 1994. This request for comment has been amended in accordance with this new date.

I. Background and Authority

Section 322 of the Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA), Public Law 102–242, requires the Board of Directors of the FDIC, in consultation with the Secretary of the Treasury and individuals from the private sector with expertise in private insurance, private reinsurance, depository institutions, or economics, to conduct a study of the feasibility of establishing a private reinsurance system. The study must include a demonstration project consisting of a simulation, by a sample of private reinsurers and insured depository institutions, of the activities required for a private reinsurance system. These activities include—

(1) Establishing a pricing structure for risk-based premiums;

(2) Formulating insurance or reinsurance contracts; and

(3) Identifying and collecting information necessary for evaluating and monitoring risks in insured depository institutions.

Section 322(a)(3) of FDICIA authorizes the FDIC to engage in actual reinsurance transactions as part of the demonstration project. As part of the new risk-based assessment system required by section 302(a) of FDICIA, the FDIC is authorized to obtain private reinsurance covering not more than 10 percent of any loss the FDIC incurs with respect to an insured depository institution and to base that institution's semiannual assessment, wholly or partially, on the cost of the reinsurance. Pursuant to section 302(g) of FDICIA, the new risk-based assessment system will become effective no later than January 1, 1994.

The FDIC intends to conduct a Pilot Reinsurance Program (Pilot Program) in 1993 through 1995 with reinsurance coverage to commence with the semiannual assessment period beginning July 1, 1994. The FDIC may consider reinsurance information in making assessment risk classification assignments.

Before June 19, 1993, the FDIC must submit to the Congress a report on the study which must include—

(1) An analysis and review of the demonstration project;

(2) Conclusions regarding the feasibility of a private reinsurance system;

(3) Recommendations regarding whether—

(A) A private reinsurance system should be restricted to depository institutions over a certain asset size;

(B) Similar reinsurance systems are feasible for depository institutions or groups of such institutions with total assets below any recommended asset size restriction; and

(C) Public policy goals can be satisfied by such reinsurance systems; and

(4) Recommendations for administrative and legislative action as may be necessary to establish such reinsurance systems.

Before June 19, 1993, the FDIC intends to submit to the Congress a report on the study. After completion of the Pilot Program, the FDIC intends to submit an additional report to the Congress based on the results of the Pilot Program.

II. Description of Pilot Reinsurance Program

Section 322 of FDICIA requires the FDIC to conduct a private reinsurance study which must include a demonstration project and may include actual reinsurance transactions. In order to ascertain whether establishing a private reinsurance system is feasible, the FDIC has determined to engage in a Pilot Program.[1] The goal of the Pilot Program would be to determine whether private reinsurance may be a useful supplement to federal deposit insurance without compromising the public policy objectives of deposit insurance. The FDIC solicits comments on all aspects of the Pilot Program described below.

Private reinsurers would be invited to participate in the Pilot Program for the purpose of deriving market-based deposit reinsurance prices for eligible insured depository institutions. Participating reinsurers would be required to enter into contracts with the FDIC which set the terms and conditions of participation. The FDIC intends to develop a "Request for Proposal" (RFP) delineating the terms and conditions of participation based in part on comments received in response to this request for comment. Reinsurers would then submit bids or price quotes to the FDIC for reinsurance of selected institutions. The FDIC would select reinsurers to engage in actual reinsurance transactions.

A reinsurer would participate in the reinsurance transactions by agreeing to be liable for some portion of the loss or cost of assistance incurred by the FDIC in connection with an insured depository institution that fails or is provided assistance during the period for which reinsurance coverage is in effect. A reinsurer would assume liability for individual insured depository institutions. All reinsurers would operate under uniform terms with the FDIC and charge the FDIC premiums for assuming risk.

[1] Actual reinsurance transactions would commence with the semiannual assessment period beginning July 1, 1994. Section 7(b) of the Federal Deposit Insurance Act, 12 U.S.C. 1817(b), will authorize the FDIC to obtain private reinsurance in connection with the new risk-based assessment system beginning January 1, 1994.

III. Description of Proposed Process

The Pilot Program would commence in 1993, with reinsurance coverage to commence with the semiannual assessment period beginning on July 1, 1994. The Pilot Program would be divided into three phases. The first phase would include the selection of participating reinsurers. The FDIC would issue an RFP to solicit participation in the Pilot Program by all interested reinsurers. The RFP would include detailed terms and conditions of participation in the Pilot Program. Interested reinsurers would be required to demonstrate that they meet the eligibility criteria established by the FDIC. In order to participate in the Pilot Program, a reinsurer must enter into a contractual agreement with the FDIC binding the reinsurer to a set of uniform terms and conditions of participation.

During the second phase of the Pilot Program, participating reinsurers would be provided with approximately six months during which to complete their analysis of insured depository institutions deemed eligible by the FDIC for reinsurance. This phase would culminate in submission of a reinsurance bid to the FDIC by each participating reinsurer. The bid would include prices for each insured depository institution the participating reinsurer is willing to reinsure and a statement of the total volume of reinsurance business desired. All other terms and conditions of reinsurance would have been established previously by the participation contract. The FDIC would assign reinsurance on the basis of price, among other possible factors, for each insured depository institution to be reinsured. Reinsurance would be allocated until the desired volume of business based on total exposure per reinsurer is reached.

The FDIC intends to set a maximum acceptable reinsurance price for all insured depository institutions deemed eligible by the FDIC for reinsurance. The FDIC is interested in receiving comments concerning how a maximum acceptable reinsurance price should be determined and what maximum is appropriate.

During the third phase of the Pilot Program, a separate reinsurance contract would be signed by each reinsurer for each insured depository institution to be reinsured. Reinsurance coverage would be provided for the second semiannual assessment period during 1994 and the first semiannual assessment period during 1995.

The FDIC is considering requiring each participating reinsurer to assume a fixed dollar amount of liability for a particular insured depository institution. The amount of liability would be determined at the time of entering into the contract. Alternatively, the FDIC is considering ceding reinsurance equal to a percentage of the FDIC's loss from the resolution of an insured depository institution with reinsurance or the FDIC's cost of assistance.

The FDIC intends to solicit bids for participation through an RFP during the Summer of 1993. Reinsurers would be selected for participation shortly thereafter. Final Pilot Program participation contracts would be signed during the Fall of 1993. Reinsurers would begin the pricing analysis and submit prices to the FDIC by a deadline in the Spring of 1994. Actual reinsurance transactions would commence with the semiannual assessment period beginning July 1, 1994.

IV. Participants

All segments of the insurance industry and other financial firms would be eligible for participation. One requirement for selection would be the approval of the reinsurer's primary regulator. This requirement would ensure that a participant has adequate financial capacity to participate and that the type of business is authorized by the participant's primary regulator. The FDIC may establish certain financial criteria for participation including a minimum capital requirement. Furthermore, participants would be required to agree to and be bound by the terms and conditions established in the participation contract. These terms and conditions may include a strict confidentiality agreement and provisions relating to conflicts of interest.

The Pilot Program may be difficult to manage if the FDIC seeks reinsurance coverage for all insured depository institutions. Therefore, it may be necessary to select a limited group of insured institutions for which the FDIC will seek coverage. The FDIC is considering limiting the Pilot Program to insured depository institutions with assets over a given asset size, perhaps $1 billion. An alternative under consideration is to select a random sample of insured institutions. The FDIC believes that selecting institutions on the basis of financial condition or

VOL 58 ISS 79 AP 27 1993 UMI

allowing institutions to opt out of the Pilot Program could severely bias the results of the study. The FDIC seeks comments on the appropriate manner of limiting the number of insured depository institutions in the Pilot Program.

Insured depository institution subsidiaries of a depository institution holding company which meet the criteria established for inclusion in the Pilot Program would be reinsured separately from affiliated insured depository institutions.

V. Process Issues

The FDIC is interested in receiving comments on alternate methods of structuring a Pilot Program. Additionally, the FDIC is interested in receiving comments on all general process issues relating to the Pilot Program under consideration, including:

1. How should the pricing information received by the FDIC during the Pilot Reinsurance Program affect an insured depository institution's assessment rate, if at all?

2. What should be the effect of an insured depository institution being considered "unreinsurable" as determined based on the bids received from participating reinsurers?

3. Should participating reinsurers be reimbursed for development costs? If so, should reinsurers be reimbursed fully or should development costs be shared between the FDIC and reinsurers? How should any reimbursement for development costs factor into the FDIC's acceptance of bids?

4. Should the FDIC accept only one bid for reinsurance for each insured depository institution or accept multiple bids for reinsurance up to the total amount of reinsurance desired?

VI. Issues Related to Terms and Conditions of Participation by Private Reinsurers

The FDIC is interested in receiving comments relating to establishing appropriate terms and conditions of participation in the Pilot Program by private reinsurers, including the following possible terms and conditions:

1. *General terms:* Reinsurance contracts would be entered into between the FDIC and participating reinsurers. An insured depository institution deemed eligible for reinsurance by the FDIC would not be a party to the reinsurance contract.

All reinsurers would be required to agree to a uniform set of terms and must enter into identical participation contracts with the FDIC. Terms and conditions of participation in the Pilot Program and for actual reinsurance would be set forth in contracts prepared by the FDIC. Commenters may wish to recommend specific contract language for consideration by the FDIC. Reinsurers would be required to enter into separate contracts for participation in the Pilot Program and for reinsurance of individual insured depository institutions. Separate reinsurance contracts identifying the insured depository institution to be reinsured and setting the reinsurance premium would be signed for each transaction. Reinsurers would be excluded from any participation in the supervision, resolution, and liquidation processes.

The FDIC intends to reserve the right to cancel a reinsurance contract at any time during the term of the contract. The FDIC does not intend to permit reinsurers to cancel reinsurance during the term of the contract.

2. *Duration:* The FDIC envisions an appropriate term for reinsurance contracts as a period of one to two years. The FDIC requests comments on whether one year or some longer term is appropriate for such contracts.

3. *Pricing:* The FDIC would determine a maximum acceptable reinsurance price for all eligible insured depository institutions. The FDIC would not enter into reinsurance contracts in which the premium quoted exceeds the maximum acceptable reinsurance price, as determined by the FDIC. All bids received with reinsurance prices in excess of this maximum amount would be rejected. Each reinsurer would charge the FDIC directly for the reinsurance premium.

4. *Repricing:* The FDIC seeks comments on whether reinsurers should be permitted to adjust premiums during the term of the reinsurance contract. If so, should there be a cap on the amount of repricing permitted?

5. *Exposure:* The FDIC is considering setting a fixed dollar amount of reinsurer liability for the cost of resolution or assistance at the time of entering into reinsurance contracts. Alternatively, the FDIC is considering ceding reinsurance equal to 1 percent of the FDIC's loss from the resolution of an insured depository institution with reinsurance or the FDIC's cost of assistance. This alternative may be subject to a stop-loss provision whereby the maximum loss exposure to a reinsurer would be tied to the size of the institution. The FDIC requests comment on the appropriate percentage of loss to cede for reinsurance and the appropriate stop-loss provisions.

6. *Information requirements:* Most data necessary for determining reinsurance premiums would be generated based on the quarterly consolidated reports of condition and income and other publicly available information.

The FDIC requests comments on whether access to reports of examination is essential to providing reinsurance. If access to examination reports were permitted for the purpose of formulating a reinsurance bid, such access would be subject to appropriate privacy safeguards, confidentiality agreements, and the receipt of express permission of the appropriate Federal banking agency.

The FDIC is also interested in receiving comments concerning the anticipated burden on insured depository institutions of possible contacts from reinsurers interested in submitting a reinsurance bid for a particular insured depository institution.

7. *Bidding requirements:* Each participating reinsurer would be required to submit a list of reinsurance prices to the FDIC by a deadline established by the FDIC for receipt of bids. Each such reinsurer would be required to specify which insured depository institutions it is willing to reinsure, under the terms previously established by the participation contract. The bid must also state the total volume of reinsurance exposure that the reinsurer is willing to accept, based on the price and exposure established per insured depository institution.

8. Conflicts of interest: The FDIC intends to require interested reinsurers to disclose to the FDIC all potential conflicts of interest prior to entering into the participation contract.

9. *Captive insurance companies:* Insured depository institutions may own or control a subsidiary engaged in insurance or reinsurance activities. The FDIC intends to prohibit such "captive" insurance companies from reinsuring affiliated insured depository institutions.

10. *Eligibility:* The FDIC may require the approval of a reinsurer's regulator in order to affirm that the reinsurer is in sound financial condition and authorized by the regulator to engage in reinsurance business. The FDIC is considering establishing certain minimum financial criteria for participating reinsurers such as a minimum capital requirement to be maintained throughout the duration of the Pilot Program. The FDIC is interested in receiving comments concerning whether minimum financial criteria for participating reinsurers are feasible, and, if so, how the appropriate minimum requirements should be determined.

VII. Issues Related to Eligibility of Insured Depository Institutions To Be Included in the Pilot Reinsurance Program

The FDIC is interested in receiving comments relating to establishing appropriate criteria for eligibility of insured depository institutions to be included in the Pilot Program.

1. *Insured depository institutions:* All insured depository institutions would be eligible for reinsurance, except insured branches of foreign banks. To make the Pilot Program manageable, the FDIC intends to select a limited group of insured institutions for which the FDIC will seek coverage. As discussed earlier, the FDIC is seeking comments on the appropriate manner of limiting the number of insured depository institutions in the Pilot Program.

2. *Depository institution holding companies:* Insured depository institution subsidiaries of a depository institution holding company which meet the criteria that may be established for inclusion in the Pilot Program would be reinsured separately from affiliated insured depository institutions.

By order of the Board of Directors. Dated at Washington, DC this 20th day of April, 1993.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-P

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-3097-EM]

Georgia; Amendment To Notice of an Emergency Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of an emergency for the State of Georgia, (FEMA-3097-EM), dated March 15, 1993, and related determinations.

EFFECTIVE DATE: April 3, 1993.

FOR FURTHER INFORMATION CONTACT: Pauline C. Campbell, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3606.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, verbally on April 3, 1993, and in a letter dated April 5, 1993, to former Acting Director William C. Tidball, the President amended the emergency declaration of March 15, 1993, under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the emergency conditions in certain areas of the State of Georgia, resulting from severe snowfall and a winter storm on March 13, 1993, and continuing, are of sufficient severity and magnitude to warrant the expansion of the assistance authorized in my declaration of March 15, 1993, under the Robert T. Stafford Disaster Relief and Emergency Assistance Act ("the Stafford Act").

You are authorized under Title V of the Stafford Act to provide reimbursement for debris removal and emergency protective measures in the affected areas, in addition to the assistance for opening critical emergency access on collector roads and streets, and on minor and principal arterial roads for emergency vehicles, authorized for five days.

Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act will be limited to 75 percent of the total eligible costs.

All other conditions specified in the original declaration remain the same.

Please notify the Governor of the State of Georgia and the Federal Coordinating Officer of this amendment to my emergency declaration.

I do hereby determine the following areas of the State of Georgia to have been affected adversely by this declared emergency:

The counties of Banks, Barrow, Bartow, Carroll, Catoosa, Chattooga, Cherokee, Clayton, Cobb, Dade, Dawson, DeKalb, Douglas, Elbert, Forsyth, Franklin, Fulton, Fannin, Floyd, Gilmer, Gordon, Gwinnett, Habersham, Hall, Hart, Haralson, Jackson, Lumpkin, Murray, Paulding, Pickens, Polk, Rabun, Rockdale, Stephens, Towns, Union, White, Whitfield, and Walker for debris removal and emergency protective measures. (Already designated for assistance for required emergency measures for a period of five (5) days beginning on March 13 for opening critical emergency access on collector roads and streets, and on minor and principal arterial roads for emergency vehicles).

The counties of Appling, Bacon, Bulloch, Camden, Chatham, Coffee, Glynn, Lowndes, Thomas, Ware, and Wayne for debris removal and emergency protective measures, in addition to the assistance for opening critical emergency access on collector roads and streets, and on minor and principal arterial roads for emergency vehicles, authorized for five days beginning on March 13.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

James L. Witt,

Director.

BILLING CODE 6718-02-M

FEDERAL MARITIME COMMISSION

Aruba Bonaire Curacao Liner Association; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202-010950-010.

Title: Aruba Bonaire Curacao Liner Association.

Parties:

Genesis Container Line Ltd.
King Ocean Service de Venezuela S.A.
Kirk Line, Ltd.
Sea-Land Service, Inc.
Crowley American Transport, Inc.

Synopsis: The proposed amendment revises the space chartering provisions to the Agreement.

Dated: April 21, 1993.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

Britton & Koontz Capital Corporation; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

VOL 58 ISS 79 AP 27 1993 UMI

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 21, 1993.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. Britton & Koontz Capital Corporation, Natchez, Mississippi; to acquire Natchez First Federal Savings Bank, Natchez, Mississippi, and thereby engage in operating a savings institution pursuant to § 225.25(b)(9) of the Board's Regulation Y. These activities will be conducted in the State of Mississippi.

Board of Governors of the Federal Reserve System, April 20, 1993.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

George W. Marti; Change in Bank Control Notice

Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notice is available for immediate inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for the notice or to the offices of the Board of Governors. Comments must be received not later than May 17, 1993.

A. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. George W. Marti, Cleburne, Texas; to acquire 69.67 percent of the voting shares of Community Bank, Cleburne, Texas.

Board of Governors of the Federal Reserve System, April 21, 1993.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Mobile National Corporation, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 21, 1993.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. Mobile National Corporation, Mobile, Alabama; to merge with South Alabama Bancorporation, Inc., Brewton, Alabama, and thereby indirectly acquire First National Bank of Brewton, Brewton, Alabama.

B. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. FEO Investments, Inc., Hoskins, Nebraska; to acquire 100 percent of the voting shares of Elkhorn Valley Bank, Norfolk, Nebraska, a *de novo* bank.

C. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. First Bancorp of Louisiana, Inc., West Monroe, Louisiana; to acquire 100 percent of the voting shares of Southern National Bank at Tallulah, Tallulah, Louisiana.

D. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. MCB Financial Corporation, San Rafael, California; to become a bank holding company by acquiring 100 percent of the voting shares of Marin Community Bank, National Association, San Rafael, California.

Board of Governors of the Federal Reserve System, April 21, 1993.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Bruce B. Morgan, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than May 17, 1993.

A. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Bruce B. Morgan, Kansas City, Missouri; to acquire 25.87 percent; A. Major Hull, as trustee for the A.M. Hull Revocable Trust, Kansas City, Missouri, to acquire 10.78 percent; Winton A. Winter, Jr., Lawrence, Kansas, to acquire 5.99 percent; Peoples Savings, Inc., Ottawa, Kansas, to acquire 4.89 percent; Frank C. Sabatini, IRA, Topeka, Kansas, to acquire 5.92 percent; Sabatini Company, Inc., Pension Plan, Topeka, Kansas, to acquire 4.89 percent; and David O. Smith, Louisburg, Kansas, to acquire 10.82 precent of the voting shares of Valley Bancshares, Inc., Atchison, Kansas, and thereby indirectly acquire Valley State Bank, Atchison, Kansas.

Board of Governors of the Federal Reserve System, April 20, 1993.

NationsBank Corporation; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound

VOL 58 ISS 79 AP 27 1993 UMI

banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 17, 1993.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Senior Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *NationsBank Corporation*, Charlotte, North Carolina; to engage *de novo* through NationsBank Capital Markets, Inc., Charlotte, North Carolina, in debt and equity securities underwriting and dealing activities pursuant to Board order. *J.P. Morgan & Co., Inc., The Chase Manhattan Corporation, Bankers Trust New York Corporation, Citicorp, and Security Pacific Corporation*, 75 Federal Reserve Bulletin 192 (1989).

BILLING CODE 6210-01-F

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register**.

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

BILLING CODE 6750-01-M

GENERAL SERVICES ADMINISTRATION

[GSA Bulletins FTR 6, Supplement 4 and FTR 7, Supplement 3]

Federal Travel Regulation; Reimbursement for Actual Subsistence Expenses in Presidentially Declared Disaster Areas of Florida

AGENCY: Federal Supply Service, GSA.

ACTION: Notice of bulletins.

SUMMARY: The attached bulletins inform agencies of a modification to, and the extension for an additional 30-day period of, the special actual subsistence expense ceiling for official travel to certain Florida localities designated Presidentially declared disaster areas as a result of Hurricane Andrew.

EFFECTIVE DATES: The extended period applies to official travel performed during April 21, 1993 through May 20, 1993.

FOR FURTHER INFORMATION CONTACT: Jane E. Groat, General Services Administration, Transportation Management Division (FBX), Washington, DC 20406, telephone 703-305-5745.

SUPPLEMENTARY INFORMATION: The Administrator of General Services, pursuant to 41 CFR 301-8.3(c) and at the official request of the Acting Director of the Federal Emergency Management Agency (FEMA), has extended for an additional 30 days the period during which agencies may approve a higher maximum daily rate for the reimbursement of actual subsistence expenses of Federal employees on official travel to any one of the Presidentially declared disaster areas in Florida named in GSA Bulletins FTR 6 and 7. During this period agencies may approve actual and necessary subsistence expense reimbursement for lodging only not to exceed 300 percent of the lodging portion of the applicable maximum locality per diem rate. The attached GSA Bulletin FTR 6, Supplement 4 and GSA Bulletin FTR 7, Supplement 3 are issued to extend the effective dates for these four Florida counties.

Dated: April 20, 1993.

Allan W. Beres,

Assistant Commissioner, Transportation and Property Management.

ATTACHMENT 1

[GSA Bulletin 6, Supplement 4]

April 20, 1993

To: Heads of Federal agencies

Subject: Reimbursement for actual subsistence expenses in Presidentially declared disaster areas of Florida.

1. *Purpose.* This supplement informs agencies of a modification to, and the extension for an additional 30-day period of, the special actual subsistence expense ceiling described in GSA Bulletin FTR 6 (57 FR 40466, Sept. 3, 1992), as extended by Supplement 1 (57 FR 44751, Sept. 29, 1992), Supplement 2 (57 FR 54793, Nov. 20, 1992), and Supplement 3 (58 FR 5730, Jan. 22, 1993) for official travel to certain Florida localities designated Presidentially declared disaster areas as a result of Hurricane Andrew.

2. *Explanation of change.* The Administrator of General Services, pursuant to 41 CFR 301-8.3(c) and at the official request of the Acting Director of the Federal Emergency Management Agency (FEMA), has extended for an additional 30 days the period during which agencies may approve, in accordance with paragraph 3 of GSA Bulletin FTR 6, a higher maximum daily rate for the reimbursement of actual subsistence expenses of Federal employees on official travel to a Presidentially declared disaster area in Florida named in paragraph 4 of GSA Bulletin FTR 6. For Florida counties named in GSA Bulletin FTR 6, the extended period covers April 21, 1993 through May 20, 1993. During this period agencies may approve actual and necessary subsistence expense reimbursement for *lodging only* not to exceed 300 percent of the lodging portion of the applicable maximum locality per diem rate.

3. *Expiration date.* This supplement expires on August 31, 1993.

4. *For further information contact.* Jane E. Groat, General Services Administration, Transportation Management Division (FBX), Washington, DC 20406, telephone 703-305-5745.

By delegation of the Commissioner, Federal Supply Service.

Allan W. Beres,

Assistant Commissioner, Transportation and Property Management.

BILLING CODE 6820–34–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Solicitation of Nominations for Membership on the U.S. Advisory Board on Child Abuse and Neglect

Purpose

Pursuant to the terms of the Child Abuse Prevention and Treatment Act (the Act), the Department of Health and Human Services is soliciting nominations for seven vacancies (seats) on the U.S. Advisory Board on Child Abuse and Neglect (the Board).

Membership

The Board consists of 15 members appointed by the Secretary of Health and Human Services (the Secretary). Thirteen are appointed from the general public and two from the Federal Government. In making all 15 appointments, the Secretary is required by the Act to ensure that ethnic and racial minorities and diverse geographic areas are represented.

All 15 persons appointed must possess general knowledge about child maltreatment (i.e., policy; prevention; intervention; treatment; and research). In addition, among the 13 members from the general public, each of 11 must represent one of the following areas:

- The legal aspects of child maltreatment;
- The psychological aspects;
- The social services aspects;
- The medical aspects;
- The role of State and local government in the prevention and treatment of child abuse and neglect;
- The role of organizations providing services to disabled persons;
- The role of organization providing services to adolescents;
- The role of elementary and secondary school teaching;
- The role of parent self-help organizations;
- The role of parent's groups; and
- The role of voluntary groups.

In order to qualify for selection as such a representative, each individual must possess specific knowledge in the area which he/she represents.

Responsibilities and Duties

Among the responsibilities the Act requires the Board to perform is the preparation of an annual report to the Secretary of Health and Human Services, appropriate committees of the Congress, and the Director of the National Center on Child Abuse and Neglect. In addition, the Board holds hearings, conducts symposia, and issues position papers.

In its annual reports, the Board is charged with evaluating the nation's efforts to accomplish the purposes of CAPTA and developing recommendations about ways that those efforts can be improved. The 1990 report of the Board is entitled, Child Abuse and Neglect: Critical First Steps in Response to a National Emergency; the 1991 report, Creating caring communities: Blueprint for an Effective Federal Policy on Child Abuse and Neglect; and the 1992 report, The Continuing Child Protection Emergency: A Challenge to the Nation.

The Board usually meets three times each year, and, occasionally, four times. Meetings last three to four days. Between meetings, much of its work is accomplished by conference call. Service on the Board is extremely demanding of both time and effort.

Duties of Board members are:

- To serve as the Board authority in one or more areas of expertise, keeping current on developments in those areas;
- To be conversant with the extensive array of background information provided to members prior to meetings and conference calls;
- To attend meetings;
- To participate in conference calls;
- To suggest materials to staff for distribution as background information;
- To author portions of Board publications;
- To edit Board publications; and
- To avoid all possible conflicts of interest between Board membership and non-Board activities.

Terms of Office

The length of the terms to which persons from the general public are appointed is a maximum of four years. When an appointment is made to replace a member who has resigned before the end of his/her term, the term of the newly appointed member will expire on the date on which the original appointment would have expired. Once appointed, a person from the general public may be reappointed to one additional term at the discretion of the Secretary.

Nomination

The Department is soliciting nominations for the seven seats to be occupied by members possessing specific expertise in:

- The legal aspects of child maltreatment;
- The psychological aspects;
- The medical aspects;
- The role of organizations providing services to disabled persons;
- The role of organizations providing services to adolescents;
- The role of parent self-help organizations; and
- The role of parents' groups.

Two of the seven seats to be filled are or will be vacant as a result of resignations. The term of the seat for the person with expertise in the psychological aspects of child maltreatment will expire on May 29, 1995. The term of the seat for the person with expertise in the role of parents' groups in the prevention and treatment of child abuse and neglect will expire on May 29, 1996. The terms of the other five seats will expire on May 29, 1997.

Nominations may be made for one's self or for someone else. The same individual may be nominated for a seat in more than one category. Nominations should be made in the form of a letter which indicates the seat or seats for which the nominee is being nominated and provides information about the qualifications for office of the nominee. A current curriculum vita for the nominee should be attached to the letter. (If the nominee is not the person submitting the nomination, a letter from the nominee indicating a willingness to serve should be attached). All nominations will be evaluated. To assist in that evaluation, persons submitting nominations may wish to provide the following kinds of information about the nominee's qualifications:

- What general knowledge about child maltreatment (i.e., policy; prevention; intervention; treatment; and research) does the nominee possess and how has he/she gained that knowledge?
- What specific knowledge does the nominee possess about the aspect of child maltreatment which he/she is being nominated to represent on the Board and how has he/she gained that knowledge? (If the individual is being nominated for more than one seat, separate answers should be provided setting forth the individual's specific knowledge in connection with each seat).
- What materials has the nominee authored, what presentations has he/she made, what meetings has he/she planned, et cetera, which shed light on both the general and/or specific knowledge of the nominee?
- What skills does the nominee possess which will allow him/her to contribute substantially to the conduct of Board business and what highlights and achievements in the nominee's career shed light on such skills?
- Does the nominee possess other abilities which are relevant to his/her appointment to the Board?
- Will the nominee's schedule permit him/her to devote a significant segment of time to Board activities?
- Is the nominee's ethnic or racial background that of an American Indian or Alaskan Native, Asian or Pacific Islander, African-American, or Hispanic?

Each letter of nomination should be accompanied by at least one but no more than three letters of reference attesting to the nominee's qualifications for office. Authors of reference letters may include but are not limited to: Elected officials (Federal, State, or local); persons in the field of child maltreatment; and persons in the subject area of the seat being sought.

The Secretary will select the seven persons to be named to the Board from among those individuals either who are nominated in response to this announcement or who are otherwise qualified to serve. After the Secretary reaches a decision, those persons selected to serve will receive a letter of invitation. Service will begin on September 24, 1993 with the new members in attendance as invited observers during the fifteenth Board meeting on September 21–23, 1993.

Nomination packages (letter of nomination; attachment(s); and accompanying letter(s) of reference) must be postmarked no later than May 21, 1993. Packages received with a postmark later than May 21, 1993 will not be considered.

Nominations should be sent to the: U.S. Advisory Board on Child Abuse and Neglect, room 303–D, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

Contact person for more information: Marilyn J. Gosdeck, Special Projects Specialist, U.S. Advisory Board on Child Abuse and Neglect, Room 303–D, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, Telephone: (202) 690–8604.

Dated: April 20, 1993.

Preston Bruce,

Acting Executive Director, U.S. Advisory Board on Child Abuse and Neglect.

Food and Drug Administration

[Docket No. 93N–0019]

TPC Products, Inc.; Proposal to Withdraw Approval of New Animal Drug Applications; Opportunity for Hearing

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is providing an opportunity for hearing on a proposal to withdraw approval of three new animal drug applications (NADA's) because the applicant, TPC Products, Inc., has failed to submit required annual reports.

DATES: Requests for hearing, including data, information, and analyses relied on to justify a hearing are to be submitted by May 27, 1993.

ADDRESSES: Requests for hearing in response to this notice should be identified with Docket No. 93N–0019 and sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William C. Keller, Center for Veterinary Medicine (HFV–210), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–295–8722.

SUPPLEMENTARY INFORMATION: An applicant is required to report periodically to FDA concerning each of its approved NADA's in accordance with 21 CFR 510.300. TPC Products, Inc., P.O. Box 4308, 2021 North Grove St., Fort Worth, TX 76106 (last known address), previously (pre-1982) known as Texas Phenothiazine Co., holds three approved NADA's: (1) NADA 3808 for the use of phenothiazine drench in cattle, (2) NADA 5224 for the use of phenothiazine and lead arsenate drench in sheep and goats, and (3) NADA 13–685 for the use of trichlorfon and phenothiazine as a parasiticide in horses. TPC Products, Inc., has not submitted annual reports for the NADA's held by the firm and has not responded to the agency's requests by certified mail for submission of these reports.

Therefore, notice is given to TPC Products, Inc., and to all other interested persons that the Director, Center for Veterinary Medicine, proposes to issue an order under section 512(e) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360b(e)) withdrawing approval of the NADA's and all amendments and supplements thereto on the ground that the applicant has failed to submit the reports required under 21 CFR 510.300. Upon withdrawal of NADA 13–685, the corresponding regulation (21 CFR 520.2520h) will be revoked.

In accordance with section 512 of the act and the regulations promulgated under it (21 CFR parts 510 and 514), the applicant is hereby given an opportunity for a hearing to show why approval of the NADA's should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of the drug products named above.

An applicant who decides to seek a hearing shall file on or before May 27, 1993, a written notice of appearance and request for hearing, including data, information, and analyses relied on to justify a hearing as specified in 21 CFR 514.200.

The failure of an applicant to file a timely written notice of appearance and request for hearing as required by 21 CFR 514.200 constitutes an election by the applicant not to make use of the opportunity for a hearing concerning the action proposed for the drug product and constitutes a waiver of any contentions about the legal status of the drug product. The drug product may not thereafter lawfully be marketed, and FDA will begin appropriate regulatory action to remove it from the market. Any new animal drug product marketed without an approved NADA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that justifies a hearing. Reports submitted to remedy the deficiencies must be complete in all respects in accordance with 21 CFR 510.300. If the submission is not complete or if a request for hearing is not made in the required format or with the required reports, the Commissioner of Food and Drugs will enter summary

VOL 58 ISS 79 AP 27 1993 UMI

judgment against the person(s) who requests a hearing, making findings and conclusions, and denying a hearing.

All submissions pursuant to this notice must be filed in two copies. Except for information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, the submissions may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (section 512(e) (21 U.S.C. 360b(e))) and under authority delegated to the Director, Center for Veterinary Medicine (21 CFR 5.84).

Dated: April 20, 1993.

Richard H. Teske,

Deputy Director, Center for Veterinary Medicine.

BILLING CODE 4160-01-F

National Institutes of Health

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

The inventions listed below have potential uses in the treatment or diagnosis of cancer, as well as in other health care fields. The inventions are owned by agencies of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for U.S. companies and may also be available for licensing.

ADDRESSES: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to Ms. Marjorie D. Hunter, Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, Box OTT, Bethesda, Maryland 20892 (telephone 301/496-7735; fax 301/402-0220). A signed Confidentiality Agreement will be required to receive copies of the patent applications. Issued patents may be obtained from the Commissioner of Patents, U.S. Patent and Trademark Office, Washington, DC 20231.

05/895,082 . Anti-Neoplastic 4,4-Bis-(Substituted Aminoalkyl Amino)-Anthraquinones.

05/928,252 . 7-O(2,6-Dideoxy-a-L-Lyxo-Hexopyranosyl)-Daunomycinone, Desmethoxy Daunomycinone Adriamycinone and Carminomycinone (U.S. Patent No. 4,201,773).

06/050,100 . Anti-Neoplastic 1,4-Bis-(Substituted Aminoalkyl Amino)-Anthraquinones (U.S. Patent No. 4,310,666).

06/180,373 . Nitroimidazoles of Low Toxicity and High Activity as Radiosensitizers of Hypoxic Tumor Cells (U.S. Patent No. 4,371,540).

06/182,632 . Method for Producing 3,6-Bis(Carboethoxcyamino)-2,5-Diaziridinyl 1,4-Benzoquinone (U.S. Patent No. 4,337,196).

06/243,775 . Synthesis of Ethyl-4(3'-Methoxypenyl)-1-Methyl Piperdine-3-Carboxylate (U.S. Patent No. 4,435,572).

06/294,368 . Process for the Production of 2-B-D-Robofuranosylthiazole-4-Carboxamide (U.S. Patent No. 4,451,648).

06/317,056 . 5-Iminodoxorubicin (U.S. Patent No. 4,353,894).

06/341,123 . Carbamate Compounds (U.S. Patent No. 4,686,304).

06/408,942 . 2-halo Derivatives of Daunomycin, Desmethoxy Daunomycin, Adriamycin, and Carminomycin (U.S. Patent No. 4,427,664).

06/468,950 . 2',5'-Riboadenylate-Morpholinoadenylate Nucleotides (U.S. Patent No. 4,515,781).

06/906,353 . Leukoregulin, An Antitumor Lymphokine, and Its Therapeutic Uses (U.S. Patent No. 4,849,506.

07/069,867 . Anti-Human Ovarian Cancer Immunotoxins and Methods of Use Thereof (U.S. Patent No. 4,958,009).

07/182,222 . Flavone 8-Acetic Acid and Interleukin-2 for Cancer Therapy (U.S. Patent No. 5,096,707).

07/279,186 . Acylaminoalkylpyridine- amides as Inhibitors of Metastasis (U.S. Patent No. 5,030,642).

07/281,951 . Monoclonal Antibody Specific for Bombesin (U.S. Patent No. 5,109,115).

07/289,723 . Method and Kit for Detecting Human Exposure to Genotoxic Agents (U.S. Patent No. 5,096,808).

07/355,744 . Therapeutic Application of an Anti-Invasive Compound (U.S. Patent No. 5,132,315).

07/360,363 . Platinum Complexes Derived From B-Silyamines.

07/437,819 . SCL Gene, and a Hematopoietic Growth and Differentiation Factor Encoded Thereby (U.S. Patent No. 5,132,212).

07/539,287 . Method of Administering Suramin Sodium in the Treatment of Cancers.

07/556,420 . The PDQ Cancer Treatment Information System.

07/649,182 . Cancer Therapy Using Interleukin-2 and Flavone Compounds (U.S. Patent No. 5,126,129).

07/655,502 . Non-Mitogenic Competitive HGF Antagonist.

07/695,004 . Human SCLC Autocrine Growth Factors and Monoclonal Antibody Blocking the Same.

07/695,024 . Recombinant Virus Expressing Human Carcinoembryonic Antigen and Methods of Use Thereof.

07/764,695 . Oncoimmunins.

07/767,331 . Recombinant Immunotoxin.

07/770,026 . Blockage of Cell Adhesion Molecules.

07/775,081 . Method of Diagnosing Cancer Susceptibility or Metastatic Potential.

07/789,652 . Method for Quantitatively Meesuring Collagenase.

07/822,042 . Blockage of Cell Adhesion Molecules.

07/822,043 . Autotaxin: Motility Stimulating Protein Useful in Cancer Diagnosis and Therapy.

07/826,470 . SCL Gene, and A Hematopoietic Growth and Differentiation Factor Encoded Thereby.

07/827,043 . AAMP-1.

07/835,637 . Novel Antitumor Compound Compositions and Method of Use.

07/869,933 . Isolation, Characterization, and Use of the Human B Subunit of the High Affinity Receptor for Immunoglobulin E.

07/875,438 . 06-Substituted Guanine Derivatives Possessing 06-Alkylguanine-DNA Alkyltransferase Depleting Activity for Use in Enhancing the Therapeutic Effectiveness of Chemotherapeutic Alkylating Agents.

07/877,523 . Phosphorothioate Derivatives of Cyclic AMP Analogues.

07/879,649 . Recombinant Virus Expressing Human Carcinoembryonic Antigen and Methods of Use Thereof.

07/880,525 . Method for Designing Cancer Treatment Regimens and Methods and Pharmaceutical Compositions for the Treatment of Cancer.

07/882,223 . Use of Inhibitors of 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase as a Modality in Cancer Therapy.

07/888,292 . Use of Purinergic Receptor Agonists as Antineoplastic Agents.

07/894,891 . Signal Transduction Inhibitor Compounds.

07/901,261 . A Method for the Treatment of Cancer by Use of the Cooper Complex of S-(Methylthio)-DL-Homocysteine or the L-Enantiomorph Thereof.

07/903,588 . MET Expression is a Prognostic Indicator in Human Breast Cancer Progression.

07/914,630 . Hepatic Growth Factor Receptor is the MET Proto-Oncogene.

07/916,250 . Tumoricidal Activity of Benzoquinonoid Ansamycins Against Prostate Cancer and Other Primitive Neural Malignancies.

07/925,762 . 7,8-Dihydroxy-Isoquinoline-3-Carboxylates as Protein Kinase Inhibitors.

07/946,061 . MET Functions in Alteration of Cell-to-Cell Interactions Scatter Factor/HGF.

07/949,266 . Human MU-Crystallin: A Novel Protein Expressed in Human Retina.

07/952,796 . DNA Clones for the Expression of Pigment Epithelium Derived Factor and Related Proteins.

Dated: April 13, 1993.

BILLING CODE 4140-01-M

National Institute of Child Health and Human Development; Meeting of the National Advisory Child Health and Human Development Council

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the National Advisory Child Health and Human Development Council, June 7-8, 1993. The meeting will be held in Building 31, Conference Room 10, National Institutes of Health, Bethesda, Maryland. The meeting of the Subcommittee on Planning will be held on June 7 in Building 31, Room 2A03.

The Council meeting will be open to the public on June 7 from 9:30 a.m. until 5 p.m. The agenda includes a report by the Director, NICHD, an overview of the Method to Extend Research in Time (MERIT) Award mechanism, and a report by the Division of Epidemiology, Statistics, and Prevention Research, NICHD. The meeting will be open on June 8 immediately following the review of applications if any policy issues are raised which need further discussion. The Subcommittee meeting will be open on June 7 from 8 a.m. to 9:30 a.m. to discuss program plans and the agenda for the next Council meeting. Attendance by the public will be limited to space available.

In accordance with the provision set forth in sections 552b(c)(4) and 552b(c)(6), title 5, U.S.C. and section 10(d) of Public Law 92-463, the meeting of the full Council will be closed to the public on June 8 from 8 a.m. to completion of the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Mary Plummer, Executive Secretary, NICHD, 6100 Executive Boulevard, room 5E03, National Institute of Health, Bethesda, Maryland 20892, Area Code 301, 496-1485, will provide a summary of the meeting and a roster of Council members as well as substantive program information. Individuals who plan to attend the open session and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Ms. Plummer.

(Catalog of Federal Domestic Assistance Program Nos. 93.864, Population Research, and 93.865, Research for Mothers and Children, National Institutes of Health)

Dated: April 20, 1993.

BILLING CODE 4140-01-M

National Institute of Neurological Disorders and Stroke; Meeting

Pursuant to Public Law 92-463, notice is hereby given of meetings of committees of the National Institute of Neurological Disorders and Stroke (NINDS). These meetings will be open to the public to discuss program planning, program accomplishments and special reports or other issues relating to committee business as indicated in the notice.

The Council meeting will be open to the public on June 3, 1993, as listed below. The agenda includes a report by the Director, NINDS, a report by the Special Assistant for Extramural Activities, NINDS, and a scientific presentation by an NINDS grantee. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in section 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Public Law 92-463, for the review, discussion and evaluation of individual grant applications. These applications and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Summaries of meetings, rosters of committee members, and other information pertaining to the meetings can be obtained from the Executive Secretary or the Scientific Review Administrator indicated. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the Executive Secretary or the Scientific Review Administrator listed for the meeting.

Name of Committee: The Planning Subcommittee of the National Advisory Neurological Disorders and Stroke Council.

Date: June 2, 1993.

Place: National Institutes of Health, Bldg. 31, Conference room 8A28, 9000 Rockville Pike, Bethesda, MD 20892.

Open: 1 p.m.-3 p.m.

Closed: 3 p.m.—recess.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–381]

T & P Railway Abandonment—In Shawnee, Jefferson and Atchison Counties, KS

AGENCY: Interstate [1] Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts, under 49 U.S.C. 10505, from the prior approval requirements of 49 U.S.C. 10903–10904 the abandonment by T And P Railway, Inc. of its 41-mile line between Topeka and Parnell, KS, subject to environmental, historic preservation, and public use conditions.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on May 27, 1993. Formal expressions of intent to file an offer [2] of financial assistance under 49 CFR 1152.27(c)(2) must be filed by May 7, 1993, petitions to stay must be filed by May 12, 1993, and petitions to reopen must be filed by May 24, 1993.

ADDRESSES: Send pleadings referring to Docket No. AB–381 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423, and

(2) Petitioner's representative: Fritz R. Kahn, Suite 700, The McPherson Building, 901 15th Street, NW, Washington, DC 20005–2301.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder, (202) 927–5610 [TDD for hearing impaired: (202) 927–5721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359.

Decided: April 8, 1993.

By the Commission, Chairman McDonald, Vice Chairman Simmons, Commissioners Phillips, Philbin, and Walden. Vice Chairman Simmons dissented with a separate expression.

Sidney L. Strickland, Jr.,

Secretary

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to CERCLA

In accordance with section 122(d)(2) of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9622(d)(2), as well as Departmental Policy, 28 CFR 50.7, notice is hereby given that a proposed Amendment to Consent Decree in *United States* v. *Harris Corporation*, No. 91–624–CIV–ORL–19, was lodged with the United States District Court for the Middle District of Florida on April 15, 1993. Under this amendment, the definition of Operable Unit #1 ("OU #1") under the Consent Decree entered by the Court on October 25, 1991, is changed to include additional property at the Harris Corporation Superfund Site ("Site") located in Palm Bay, Brevard County, Florida.

Under a remedial action plan for the Site, approved by the State of Florida under a state consent order, Harris is to expand the existing on-site groundwater withdrawal and treatment system to include additional Site property known as the Building #100 property. The proposed amendment to the Consent Decree adopts these changes and requires Harris to expand the current groundwater extraction and treatment system to include the Building #100 property.

The Department of Justice will receive for a period of (30) days from the date of this publication, comments relating to the proposed Amendment to Consent Decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Harris Corporation, DOJ* #90–11–3–620.

The Amendment to Consent Decree may be examined at the offices of the United States Environmental Protection Agency, 345 Courtland Street, NE., Atlanta, Georgia 30365, and at the Consent Decree Library, 1120 G Street, NW. 4th Floor, Washington, DC (20005). 202–624–0892. A copy of the proposed Amendment to Consent Decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC (20005). In requesting a copy, please enclose a check in the amount of $1.50 (25 cents per page reproduction costs) payable to Consent Decree Library.

Myles E. Flint,

Acting Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Antitrust Division

Notice Pursuant to the National Cooperative Research Act of 1984—International Pharmaceutical Aerosol Consortium for Toxicology Testing of HFA–134a (IPACT–I)

Notice is hereby given that, on January 14, 1993, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the International Pharmaceutical Aerosol Consortium for Toxicology Testing of HFA–134a ("IPACT–I"), has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing a change in its membership. The notification was filed for the purpose of maintaining the protections of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

As of November 12, 1992, Schering-Plough Corporation's membership in IPACT–I ended. No other changes have been made in the membership, objectives, or planned activities of IPACT–I.

On August 7, 1990, IPACT–I filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on September 6, 1990 (55 FR 36710).

The last notification was filed with the Department on February 28, 1992, identifying changes in its membership. A notice was published in the **Federal Register** on May 5, 1992 (57 FR 19310).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

[FR Doc. 93–9704 Filed 4–26–93; 8:45 am]

BILLING CODE 4410–01–M

Notice Pursuant to the National Cooperative Research Act of 1984—International Pharmaceutical Aerosol Consortium for Toxicology Testing of HFA–227 (IPACT–II)

Notice is hereby given that, on January 14, 1993, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 *et seq.* ("the Act"), the International Pharmaceutical Aerosol Consortium for Toxicology Testing of HFA–227 ("IPACT–II"), has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing a change in its membership. The notification was filed for the purpose of maintaining the protections of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

As of November 12, 1992, Schering-Plough Corporation's membership in IPACT–II ended. No other changes have been made in the membership, objectives, or planned activities of IPACT–II.

On February 21, 1992, IPACT–II filed its original notification pursuant to section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to section 6(b) of the Act on April 2, 1991 (56 FR 13489).

The last notification was filed with the Department on February 7, 1992, identifying changes in its membership. A notice was published in the **Federal Register** on March 11, 1992 (57 FR 8675).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–27,804]

Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

Anadrill (a division of Schlumberger Technology Corporation) a/k/a The Analysts, Inc., headquartered in Sugarland, Texas and operating out of the following locations:

TA–W–27,804A	Anchorage, AK
TA–W–27,804B	Bakersfield, CA
TA–W–27,804C	Houma, LA
TA–W–27,804D	Lafayette, LA
TA–W–27,804E	New Orleans, LA
TA–W–27,804F	Hobbs, NM
TA–W–27,804G	Williston, ND
TA–W–27,804H	Oklahoma City, OK
TA–W–27,804I	Alice, TX
TA–W–27,804J	Kilgore, TX
TA–W–27,804K	Houston, TX
TA–W–27,804L	Odessa, TX
TA–W–27,804M	Casper, WY

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on November 25, 1992, applicable to the workers of the subject firm.

At the request of the State Agency, the Department reviewed the certification for workers of the subject firm. The investigation findings show that the claimants' wages were paid under a predecessor unemployment insurance (UI) account number bearing the name: The Analysts, Inc.

VOL 58 ISS 79 AP 27 1993 UMI

Accordingly, the Department is amending the certification to properly reflect the correct UI tax status for the above certified worker group.

The amended notice applicable to TA-W-27,804 is hereby issued as follows:

All workers engaged in employment related to exploration and drilling at Anadrill, a Division of Schlumberger Technology Corporation, also known as (a/k/a) The Analysts, Inc., headquartered in Sugarland, Texas (TA-W-27,804) and operating out of the below cited locations who became totally or partially separated from employment on or after August 28, 1991 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974:

TA-W-27,804A Anchorage, AK
TA-W-27,804B Bakersfield, CA
TA-W-27,804C Houma, LA
TA-W-27,804D Lafayette, LA
TA-W-27,804E New Orleans, LA
TA-W-27,804F Hobbs, NM
TA-W-27,804G Williston, ND
TA-W-27,804H Oklahoma City, OK
TA-W-27,804I Alice, TX
TA-W-27,804J Kilgore, TX
TA-W-27,804K Houston, TX
TA-W-27,804L Odessa, TX
TA-W-27,804M Casper, WY

Signed at Washington, DC, this 19th day of April 1993.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[TA-W-28,078]

Beaver Dam Products, Beaver Dam, WI; Negative Determination on Reconsideration

On April 7, 1993, the Department issued an Affirmative Determination Regarding Application for Reconsideration for workers and former workers of Beaver Dam Products in Beaver Dam, Wisconsin. This notice was published in the **Federal Register** on April 16, 1993 (58 FR 19846).

Investigation findings show that the Beaver Dam Products is a subsidiary of the Chrysler Corporation. The workers produce automotive components for Chrysler cars. All of Beaver Dam's auto component production in 1991 and 1992 went to Chrysler's assembly plant at Belvidere, Illinois where they are used in the production of automobiles.

The union states that Canadian components have replaced those of Beaver Dam's because Chrysler's New Yorker and 5th Avenue cars formerly produced at Belvidere are now being assembled in Canada and imported into the U.S.

In order for component workers to be certified for trade adjustment assistance there must be increased imports of articles like or directly competitive to the component produced at the worker's firm which contributed importantly to decreased employment, sales or production. Since there are no company imports of Beaver Dam's components, the only way the workers can be certified is if there was a reduced demand for their production by a parent or controlling firm which produces an article and whose workers are independently certified for trade adjustment assistance and the reduced demand for the components must relate directly to the decreased employment, sales and/or production at Beaver Dam. These conditions have not been met. There are no Chrysler plants producing the New Yorker or 5th Avenue cars which have workers who are currently under a worker group certification.

Findings on reconsideration show that Chrysler will not need Beaver Dam's production in the 1994 model year (MY) because of the introduction of new models. A new model called the Neon will go into production at Belvidere in September, 1993 for which Belvidere will produce its own components. Production of the New Yorker is being transferred to Canada. The 94MY New Yorker is a different car from its 93 model counterpart. The 94 model is built on a different chassis requiring different components. Other findings show that the production of the 5th Avenue is being discontinued at the end of the 93MY.

Conclusion

After reconsideration, I affirm the original notice of negative determination to apply for adjustment assistance to workers and former workers of Beaver Dam Products in Beaver Dam, Wisconsin.

Signed at Washington, DC, this 16th day of April 1993.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Service, Unemployment Insurance Service.

Cox Exploration Co., Corpus Christi and Dallas, TX; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at Cox Exploration Company, Corpus Christi, Texas and Dallas, Texas. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued:

Signed at Washington, DC this 19th day of April, 1993.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; Koch Gathering Systems et al.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 7, 1993.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 7, 1993.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210.

Signed at Washington, DC this 12th day of April, 1993.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-28,173]

Texaco Exploration and Production, Inc., Midland Division (West Texas), Midland, TX; Revised Determination on Reconsideration

On April 16, 1993, the Department issued an Affirmative Determination Regarding Application for Reconsideration for workers and former workers of Texaco Exploration and Production, Inc., Midland Division, Midland, Texas. This notice will soon be published in the **Federal Register**.

The company claims that the Department was inconsistent in its determinations by certifying the workers at Texaco Exploration and Production in Velma, Oklahoma (TA-W-28,249) and denying the workers at Texaco Exploration and Production in Midland, Texas.

The investigation files show that a predominant portion of the crude oil and natural gas produced by Midland is sold internally.

The findings also show that the production of both crude oil and natural gas at Midland decreased in 1991 compared to 1990 and in the first 10 months of 1992 compared to the same period in 1991. Significant worker separations began in 1992 and will continue into 1993.

Findings on reconsideration show increased company imports of crude oil in 1991 compared to 1990 and in the first 10 months of 1992 compared to the same period in 1991.

Conclusion

After careful review of the additional facts obtained on reconsideration, it is concluded that increased imports of articles like or directly competitive with crude oil and natural gas produced at the Midland Division of Texaco Exploration and Production, Inc., in Midland, Texas contributed importantly to the decline in sales or production and to the total or partial separation of workers at Texaco Exploration and Production, Inc. in Midland, Texas. In accordance with the provisions of the Trade Act of 1974, I make the following revised determination:

All workers of Texaco Exploration and Production, Inc., Midland, Texas and operating at various locations in the Midland Division (West Texas) who became totally or partially separated from employment on or after December 12, 1991 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

BILLING CODE 4510-30-M

[TA-W-27,461; TA-W-27,462]

Transco Energy Corp. Aviation Department, Houston, TX and Transco Energy Corp. Administration, Houston, TX; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on December 24, 1992, applicable to the workers of the subject firms except the Transcontinental Gas Pipe Line Corporation in Houston, Texas.

At the request of the State Agency, the Department reviewed the certification for workers of the subject firms. The investigation findings show that the claimants' wages for all the above firms were reported under the Transcontinental Gas Pipe Line Corporation Unemployment Insurance (UI) tax account.

Accordingly, the Department is amending the certification to properly reflect the correct UI tax status for the above certified worker groups.

The amended notice applicable to TA-W-27,461 and TA-W-27,462 is hereby issued as follows:

All workers of Transco Exploration and Production Company a/k/a Transcontinental Gas Pipe Line Corporation, headquartered in Houston, Texas (TA-W-27,462A) and operating at various other locations in Colorado (TA-W-27,462B; Louisiana (TA-W-27,462C) and Texas (TA-W-27,462D) engaged in the exploration and production of crude oil and natural gas who became totally or partially separated from employment on or after November 28, 1992 and

All workers of Transco Energy Corporation, Administration (TA-W-27,462) and the Aviation Department (TA-W-27,461) a/k/a Transcontinental Gas Pipe Line Corporation, Houston, Texas engaged in the support for the exploration and production of crude oil and natural gas who became totally or partially separated from employment on or after June 8, 1991 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

I further determine that all workers at Transco Gas Pipe Line Corporation, headquartered in Houston, Texas (TA-W-27,462E) engaged in the transportation of natural gas and natural gas liquids are denied eligibility to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 19th day of April 1993.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Occupational Safety and Health Administration

Advisory Committee on Construction Safety and Health; Full Committee Meeting

Notice is hereby given that the Advisory Committee on Construction Safety and Health, established under section 107(e)(1) of the Contract Work Hours and Safety Standards Act (40 U.S.C. 333) and section 7(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656), will meet on May 11-12, 1993, at the Frances Perkins Building, U.S. Department of Labor, 200 Constitution Avenue, NW., room S-3215A and B, Washington, DC. The meeting is open to the public and will begin at 9 a.m. on each day.

The agenda for this meeting includes work group reports; OSHA status reports on rulemaking activity regarding hazardous waste operations training, scaffolds, fall protection, steel erection, lead, asbestos, air contaminants and the incorporation by reference of national consensus standards; the incorporation of general industry (part 1910) standards in part 1926; and OSHA reports on the proposed rule for occupational exposure to glycol ethers and on targeting inspections at construction workplaces. The Advisory Committee will also discuss the use of joint labor-management committees to address safety and health issues.

Written data, views or comments may be submitted, preferably with 20 copies, to the Division of Consumer Affairs, at the address provided below. Any such submissions received prior to the meeting will be provided to the members of the Committee and will be included in the record of the meeting.

Anyone wishing to make an oral presentation should notify the Division of Consumer Affairs before the meeting. The request should state the amount of time desired, the capacity in which the person will appear and a brief outline of the content of the presentation. Persons who request the opportunity to address the Advisory Committee may be allowed to speak, as time permits, at the discretion of the Chairman of the Advisory Committee.

FOR ADDITIONAL INFORMATION CONTACT: Toni Hall, Division of Consumer Affairs, Occupational Safety and Health Administration, room N-3647, 200 Constitution Avenue NW., Washington, DC 20210, Telephone 202-219-8615. An official record of the meeting will be available for public inspection at the Division of Consumer Affairs.

Signed at Washington, DC this 22nd day of April 1993.

David C. Zeigler,

Acting Assistant Secretary of Labor.

BILLING CODE 4510-26-M

Pension and Welfare Benefits Administration

[Application No. D-9357, et al.]

Proposed Exemptions; Day Runner, Inc. 401(k) Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or request for a hearing on the pending exemptions, unless otherwise stated in the Notice of Proposed Exemption, within 45 days from the date of publication of this **Federal Register** Notice. Comments and request for a hearing should state: (1) The name, address, and telephone number of the person making the comment or request, and (2) the nature of the person's interest in the exemption and the manner in which the person would be aversely affected by the exemption. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing.

ADDRESSES: All written comments and request for a hearing (at lenst three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Exemption Determinations, room N-5649, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Proposed Exemption. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N-5507, 200 Constitution Avenue NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of proposed exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of proposed exemption are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Day Runner, Inc. 401(k) Plan (the Plan); Located in Fullerton, California

[Application No. D-9357]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted the restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed cash sale by the Plan to Day Runner, Inc. (the Employer), the sponsor of the Plans, of a guaranteed investment certificate (the GIC) issued by Mutual Benefit Life Insurance Company of New Jersey (Mutual Benefit); provided that (1) the sale is a one-time transaction for cash; (2) the Plan does not suffer any loss or incur any expenses in the transaction; and (3) the Plan receives no less than the fair market value of the GIC at the time of the transaction.

Summary of Facts and Representations

1. The Plan is a defined contribution pension plan with a cash or deferred compensation arrangement intended to meet the requirements of section 401(k) of the Code. The Plan provides for individual participant accounts (the Accounts) and participant-directed investment of the Accounts. As of December 31, 1992, there were approximately 385 participants and total assets of $492,229 in the Plan. The Employer is a California publicly-held corporation engaged in the manufacture and distribution of Day Runner personal organizers, with its headquarters in Fullerton, California. The trustees of the Plan are Dennis Marquardt and Lee Coffey (the Trustees), each of whom is an officer of the Employer.

2. The Plan document authorizes the Employer to select the investment options offered to Plan participants. After the Employer selects such investment vehicles, the Plan participants direct the investment of their Accounts among the selected options. From January 1, 1991, the effective date of the Plan, until July 16, 1991, all Accounts were solely invested in four different investment funds (the Funds) offered and managed by Mutual Benefit under a group annuity contract. The Funds include a guaranteed certificate account (the GCA Fund) which invests in guaranteed investment certificates issued by Mutual Benefit. The sole asset of the GCA Fund is the GIC, a benefit-responsive guaranteed investment certificate issued by Mutual Benefit with respect to the Plan's investments in the GCA Fund during 1991. The terms of the GIC provide that principal deposits made during 1991 earn interest at the rate of 8.25 percent (the Contract Rate) through the GIC's maturity date of March 31, 1996, at which time a final payment (the Maturity Payment) is due in the amount of total principal deposits plus interest at the Contract Rate, less previous withdrawals. Pre-maturity withdrawals from the GIC are allowed to enable the GCA Fund to effect benefit distributions, in-service withdrawals, participant loans, and participant-directed transfers of Account balances to other Funds (collectively, the Withdrawal Events). As of December 31, 1992, the GIC had an accumulated book value of $34,141.07, representing total principal deposits plus interest at the Contract Rate, less previous withdrawals, and constituting approximately 7.45 percent of the total assets of the Plan as of that date.

3. On July 16, 1991, Mutual Benefit was placed in conservatorship and rehabilitation by the insurance commissioner of the State of New Jersey (the Commissioner).[1] Since the commencement of the conservatorship, payments on all Mutual Benefit guaranteed investment certificates, including the GIC, have been suspended.[2] Consequently, the GCA Fund has been and remains unable to withdraw amounts from the GIC for Withdrawal Events. The Commissioner and Mutual Benefit are developing a plan of rehabilitation with respect to all of Mutual Benefit's guaranteed investment certificate obligations outstanding as of the commencement of the conservatorship. On July 16, 1991, the GCA Fund ceased making deposits under the GIC, and shortly thereafter the Employer contracted with Fidelity Institutional Retirement Services Company (Fidelity) to replace Mutual Benefit in providing investment options for Plan participants. Since July 16, 1991, all contributions to the Plan have been invested, pursuant to Participant directions, among five funds offered and managed by Fidelity.

The Employer represents that it is unknown whether, when, or under what circumstances Mutual Benefit will resume payments for Withdrawal Events, or whether it will make the Maturity Payment, with respect to the GIC. In order to eliminate risk associated with continued investment in the GIC, and to allow GCA Fund assets invested under the GIC to be transferred to Fidelity management, the Employer proposes to purchase the GIC from the Plan, and is requesting an exemption for such transaction under the terms and conditions described herein.

[1] The Department notes that the decisions to acquire and hold the GIC are governed by the fiduciary responsibility requirements of Part 4, Subtitle B, Title I of the Act. In this regard, the Department herein is not proposing relief for any violations of Part 4 which may have arisen as a result of the acquisition and holding of the GIC.

[2] On August 7, 1991, the Superior Court of New Jersey removed restrictions on withdrawals from Mutual Benefit's "separate accounts", which enabled the Trustees to withdraw all the Funds from the Mutual Benefit group annuity contract except the GCA Fund.

VOL 58 ISS 79 AP 27 1993 UMI

4. The Employer proposes to purchase the GIC from the Plan by paying the Plan cash in the amount of the GIC's accumulated book value, representing total principal deposits plus interest at the Contract Rate less previous withdrawals, as of the date of the purchase. The Plan will not incur any expenses with respect to the transaction. The Trustees represents that they have determined that the purchase price of the GIC, at its accumulated book value, is in excess of the GIC's fair market value, due to the financial instability of Mutual Benefit. The Trustees also represent that the sale of the GIC to the Employer under the terms proposed will be in the best interests of the participants and beneficiaries of the Plan because it will eliminate the risk of loss on the Plan's investment in the GIC and will allow the Trustees to place the GCA Fund assets under new management.

5. In summary, the applicant represents that the transaction satisfies the criteria of section 408(a) of the Act for the following reasons: (1) The transaction enables the Plan to avoid any risk associated with continued holding of the GIC and to redirect the GCA fund's assets to new management; (2) The Plan will receive cash for the GIC in the amount of the accumulated book value as of the sale date, which the Trustees have determined to be in excess of the fair market value of the GIC; (3) The Plan will not incur any expenses or experience any loss with respect to the transaction; and (4) The Trustees have determined that the Plan's sale of the GIC to the Employer on the basis of the GIC's book value is in the best interests of the participants and beneficiaries of the Plan.

[Application No. D–8324]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975).

Part I—Exemption for Payment of Certain Fees to AEW

The restrictions of section 406 (b)(1) and (b)(2) of the Act and the taxes imposed by section 4975 of the Code, by reason of section 4975(c)(1)(E) of the Code, shall not apply to the payment of certain initial investment fees (the Investment Fee) and disposition fees (the Disposition Fee) to AEW by employee benefit plans for which AEW provides investment management services (the Client Plans), pursuant to an investment management agreement (the Agreement) entered into between AEW and the Client Plans either individually, through the establishment of a single client separate account (Single Client Account), or collectively as participants in a multiple client commingled account (Multiple Client Account), provided that the conditions set forth below in Part III are satisfied.

Part II—Exemption for Investments in a Multiple Client Account

The restrictions of section 406(a)(1)(A) through (D) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to any investment by a Client Plan in a Multiple Client Account (collectively, the Accounts) managed by AEW, provided that the conditions set forth below in Part III are satisfied.

Part III—General Conditions

(a) The investment of plan assets in a Single or Multiple Client Account, including the terms and payment of any Investment Fee and Disposition Fee, shall be approved in writing by a fiduciary of a Client Plan which is independent of AEW and its affiliates and, in the case of a Multiple Client Account for which ultimate investment discretion is exercised by a bank trustee, a fiduciary which is independent of the bank trustee and AEW and its affiliates (the Independent Fiduciary). Notwithstanding the foregoing, AEW may authorize the transfer of cash from a Single Client Account to a Multiple Client Account provided that: (1) The Multiple Client Account has similar investment objectives and the identical fee structure as the Single Client Account; (2) the Agreement governing the Single Client Account authorizes AEW to invest in a Multiple Client Account; (3) AEW receives no additional fees from the Single Client Account for cash invested in the Multiple Client Account and no additional Investment Fee is paid with respect to cash transferred to the Multiple Client Account; and (4) the transfer occurs within six months of the Independent Fiduciary's decision to allocate assets to the Single Client Account or, in the event AEW's binding commitment to make the transfer occurs more than six months after such Fiduciary's decision, AEW obtains an additional authorization from the Independent Fiduciary.

(b) The terms of any investment in an Account and of any Investment Fee or Disposition Fee shall be at least as favorable to the Client Plans as those obtainable in arm's-length transactions between unrelated parties.

(c) At the time any Account is established and at the time of any subsequent investment of assets (including the reinvestment of assets) in such Account:

(1) Each Client Plan shall have total net assets with a value in excess of $50 million; and

(2) No Client Plan shall invest, in the aggregate, more than five percent (5%) of its total assets in any Account or more than ten percent (10%) of its assets in all Accounts established by AEW.

(d) Prior to making an investment in any Account, the Independent Fiduciary of each Client Plan investing in an Account shall receive offering materials from AEW which disclose all material facts concerning the purpose, structure and operation of the Account, including any fee arrangements.

(e) With respect to its ongoing participation in an Account, each Client Plan shall receive the following written information from AEW:

(1) Audited financial statements of the Account prepared by independent public accountants selected by AEW no later than 90 days after the end of the fiscal year of the Account;

(2) Quarterly and annual reports prepared by AEW relating to the overall financial position and operating results of the Account and, in the case of a Multiple Client Account, the value of each Client Plan's interest in the Account. Each such report shall include a statement regarding the amount of fees paid to AEW during the period covered by such report;

(3) Annual appraisals indicating the fair market value of the Account's assets as established by an MAI licensed real estate appraiser independent of AEW and its affiliates which is approved by the Client Plan prior to investing in the Account; and

(4) In the case of any Multiple Client Account, a list of all other investors in the Account.

(f) The total fees paid to AEW shall constitute no more than reasonable compensation.

(g) The Investment Fee shall be equal to a specified percentage of the net value of the Client Plan assets allocated to the Account which shall be payable either:

(1) At the time assets are deposited (or deemed deposited in the case of reinvestment of assets) in the Account; or

(2) In periodic installments, the amount (as a percentage of the aggregate Investment Fee) and timing of which have been specified in advance based on the percentage of the Client Plan's assets invested in real property as of the payment date; provided that (i) the installment period is no less than three months, and (ii) if the percentage of the Client Plan assets which have actually been invested by a payment date is less than the percentage required for the aggregate Investment Fee to be paid in full through that date (both determined on a cumulative basis), the Investment Fee paid on such date shall be reduced by the amount necessary to cause the percentage of the aggregate Investment Fee paid to equal only the percentage of the Client Plan assets actually invested by that date. The unpaid portion of such Investment Fee shall be deferred to and payable on a cumulative basis on the next scheduled payment date (subject to the percentage limitation described in the preceding sentence).

(h) The Disposition Fee shall be payable after the Client Plan has received distributions from the Account in excess of an amount equal to 100% of its invested capital plus a pre-specified annual compounded cumulative rate of return (the Threshold Amount), except that in the case of AEW's removal or resignation, AEW shall be entitled to receive a Disposition FEE payable either at the time of removal or, in the event of AEW's resignation, upon termination of the Account subject to the requirements of paragraph (k) below, as determined by a deemed distribution of the assets of the Account based on an assumed sale of such assets at their fair market value (in accordance with independent appraisals), only to the extent that the Client Plan would receive distributions from the Account in excess of an amount equal to the Threshold Amount at the time of AEW's removal or resignation. Both the Threshold Amount and the amount of the Disposition Fee, expressed as a percentage of the amount distributed (or deemed distributed) from the Account in excess of the Threshold Amount, shall be established by the Agreement and agreed to by the Independent Fiduciary of the Client Plan.

(i) The Threshold Amount for any Disposition Fee shall include at least a minimum rate of return to the Client Plan, as defined below in Part IV(f).

(j) For any sale of property in an Account which shall give rise to the payment of a Disposition Fee to AEW prior to the termination of the Account, the sales price of the property shall be at least equal to a target amount (the Target Amount), as defined in Part IV(g), in order for AEW to sell the property and receive its Disposition Fee. If the proposed sales price of the property is less than the Target Amount, the proposed sale shall be disclosed to and agreed to by the Independent Fiduciary for a Single Client Account or the responsible independent fiduciaries of Client Plans and other authorized persons acting for investors in a Multiple Client Account (the Responsible Independent Fiduciaries), as defined in Part IV(e) below. If the proposed sales price is less than the Target Amount and the Independent Fiduciary's or Responsible Independent Fiduciaries' approval is not obtained, AEW shall still have the authority to sell the property, if the Agreement provides AEW with complete investment discretion for the Account, provided that the Disposition Fee which would have been payable to AEW is paid only at the termination of the Account.

(k) In the event AEW resigns as investment manager for an Account, the Disposition Fee shall be calculated at the time of resignation as described above in paragraph (h) and allocated to each property based upon the relationship that the appraised value of such property bears to the total appraised value of the Account. Each amount arrived at through this calculation shall be multiplied by a fraction, the numerator of which shall be the actual sales price received by the Account on disposition of the property (or in the case of a property which has not been sold prior to the termination of the Account, the appraised value of the property as of the termination date) and the denominator of which shall be the appraised value of the property which was used in connection with determining the Disposition Fee at the time of resignation, provided that this fraction shall never exceed 1.0. The resulting amount for each property shall be the Disposition Fee payable to AEW upon termination of the Account.

(l) AEW or its affiliates shall maintain, for a period of six years, the records necessary to enable the persons described in paragraph (m) of this Part III to determine whether the conditions of this exemption have been met, except that: (1) a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of AEW or its affiliates, the records are lost or destroyed prior to the end of the six year period; and (2) no party in interest, other than AEW, shall be subject to the civil penalty that may be assessed under section 502(i) of the Act or to the taxes imposed by section 4975(a) and (b) of the Code if the records are not maintained or are not available for examination as required by paragraph (m) below.

(m) (1) Except as provided in paragraph (m)(2) and notwithstanding any provisions of sections 504(a)(2) and (b) of the Act, the records referred to in paragraph (1) of this Part III shall be unconditionally available at their customary location for examination during normal business hours by:

(i) Any duly authorized employee or representative of the Department or the Internal Revenue Service;

(ii) Any fiduciary of a Client Plan or any duly authorized employee or representative of such fiduciary;

(iii) Any contributing employer to a Client Plan or any duly authorized employee or representative of such employer; and

(iv) Any participant or beneficiary of a Client Plan or any duly authorized employee or representative of such participant or beneficiary.

(2) None of the persons described above in paragraph (m)(1)(ii)–(iv) shall be authorized to examine the trade secrets of AEW and its affiliates or any commercial or financial information which is privileged or confidential.

Part IV—Definitions

(a) An *affiliate* of a person includes:

(1) Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with the person;

(2) Any officer, director, employee, relative of, or partner of any such person; and

(3) Any corporation or partnership of which such person is an officer, director, partner or employee.

(b) The term *control* means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(c) The term *management services* means:

(1) Development of an investment strategy for the Account and identification of suitable real estate-related investments;

(2) Directing the investments of the assets of the Account, including the determination of the structure of each investment, the negotiation of its terms and conditions and the performance of all requisite due diligence;

(3) Timing and directing the disposition of any assets of the Account and directing the liquidation of the Account;

(4) Administration of the overall operation of the investments of the

VOL 58 ISS 79 AP 27 1993 UMI

Account, including all applicable leasing, management, financing and capital improvement decisions;

(5) Establishing and maintaining accounting records of the Accounts and distributing reports to Client Plans as described in Part III; and

(6) Selecting and directing all services providers of ancillary services as defined in this Part IV.

(d) The term *ancillary services* means:

(1) Legal services;

(2) Services of architects, designers, engineers, hazardous materials consultants, contractors, leasing agents, real estate brokers, and others in connection with the acquisition, construction, improvement, management and disposition of investments in real property;

(3) Insurance brokerage and consultation services;

(4) Services of independent auditors and accountants in connection with auditing the books and records of the Accounts and preparing tax returns;

(5) Appraisal and mortgage brokerage services; and

(6) Services for the development of income-producing real property.

(e) The term *Responsible Independent Fiduciaries* means with respect to a Multiple Client Account the Independent Fiduciary of each Client Plan invested in the Account and other authorized persons acting for investors in the Account which are not employee benefit plans as defined under section 3(3) of the Act (such as governmental plans, university endowment funds, etc.) that are independent of AEW and its affiliates and are persons other than the bank trustee for the Account, that collectively hold at least 50% of the interests in the Account.

(f) The term "Threshold Amount" means with respect to any Disposition Fee an amount which equals all of a Client Plan's capital invested in an Account plus a pre-specified annual compounded cumulative rate of return that is at least a minimum rate of return determined as follows:

(1) A non-fixed rate which is at least equal to the rate of change in the consumer price index (CPI) during the period from the deposit of the Client Plan's assets in the Account until distributions of the Client Plan's assets from the Account equal or exceed the Threshold Amount; or

(2) A fixed rate which is at least equal to the rate of change in the CPI over some period of time specified in the Agreement, which shall not exceed 10 years.

(g) The term "Target Amount" means a value assigned to each property in the Account established by AEW either (1) at the time the property is acquired, by mutual agreement between AEW and the Independent Fiduciary for a Single Client Account or the Responsible Independent Fiduciaries for a Multiple Client Account, or (2) pursuant to an objective formula approved by such fiduciaries at the time the Account is established. However, in no event will such value be less than the acquisition price of the property.

The availability of this exemption, if granted, will be subject to the express condition that the material facts and representations contained in the application are true and complete and that the application accurately describes all material terms of the transactions which are the subject of the exemption.

Effective Date: If granted, this exemption will be effective as of the date this notice of proposed exemption appears in the **Federal Register**.

Summary of Facts and Representations

1. AEW is a privately-owned real estate investment management company, located in Boston, Massachusetts, and is an investment adviser registered under the Investment Advisers Act of 1940. AEW manages approximately $4 billion worth of assets for a variety of clients, including employee benefit plans. Most of AEW's investment management business has been shifted to a Delaware limited partnership, AEW, L.P. In this regard, AEW is the general partner of AEW Holdings, L.P., which is the general partner of AEW, L.P. AEW's client accounts consist of either separate accounts for a single client or commingled accounts for multiple clients.

2. AEW will offer the investment arrangement described below involving the payment of an Investment Fee or a Disposition Fee (collectively, the Fees) to Client Plans that seek to invest in real estate and have aggregate net plan assets with a fair market value in excess of $50 million.[3] AEW will serve as an investment manager for all Single Client Accounts and for most Multiple Client Accounts. In general, AEW will have complete discretion for identifying appropriate investments, making investment decisions, and managing and disposing of the properties acquired for the Accounts. However, with respect to certain Single Client Accounts, AEW will not exercise absolute investment discretion and will be required to obtain approval for certain investment decisions from the Independent Fiduciary of the Client Plan. Such approvals will typically be obtained from the Client Plan sponsor or an investment committee appointed by the Client Plan sponsor. With respect to Multiple Client Accounts, ultimate investment discretion will be exercised by either AEW or a bank trustee of the Account which is unrelated to AEW and its affiliates (the Bank Trustee).

3. Single Client Accounts will be established pursuant to Agreements negotiated with the Client Plans. The terms of AEW's compensation will be established in the Agreement governing the Single Client Account and will be fully disclosed to the Independent Fiduciary prior to the investment of assets of the Client Plan in the Single Client Account. If agreed to by the Independent Fiduciary, the compensation arrangement involving the payment of the Fees (as described in Item 6 below) will be included in the Agreement.[4] The term of each Account will be predetermined in the Agreement and approved by the Independent Fiduciary of the Client Plan (see Item 9 below).

Multiple Client Accounts will be organized either as a group trust as defined in IRS Revenue Ruling 81–100, as a limited partnership, or as a common law trust.[5] In the case of a Multiple Client Account that is a group trust, the Account could be structured in one of two ways. First, the group trust could be maintained by a totally independent Bank Trustee which has discretionary investment control over the assets of the trust. In this situation, AEW would serve as a non-discretionary investment adviser to the Bank Trustee. The Bank Trustee would

[3] In the case of multiple plans maintained by a single employer or a single controlled group of employers, the assets of which are invested on a commingled basis (e.g. through a master trust), this $50 million threshold will be applied to the aggregate assets of all such plans.

[4] Section 404 of the Act requires, among other things, that a plan fiduciary act prudently and solely in the interest of the plan's participants and beneficiaries. Thus, the Department expects a plan fiduciary, prior to entering into any performance-based compensation arrangement with an investment manager, to fully understand the risks and benefits associated with the compensation formula following disclosure by the investment manager of all relevant information pertaining to the proposed arrangement. In addition, a plan fiduciary must be capable of periodically monitoring the actions taken by the investment manager in the performance of its duties and must consider, prior to entering into the arrangement, whether such plan fiduciary is able to provide adequate oversight of the investment manager during the course of the arrangement.

[5] The applicant represents that in some instances a Client Plan's investment in a Multiple Client Account that is a common or collective trust fund maintained by a bank will be exempt from the restrictions of section 406(a) of the Act by reason of section 408(b)(8). The Department expresses no opinion herein whether all of the conditions of section 408(b)(8) will be satisfied in such transactions

select AEW and have the power to remove AEW with the approval of Client Plans invested in the Account, pursuant to the terms of the Agreement governing the Account (as discussed below). However, AEW would not have such powers with respect to the Bank Trustee. Second, AEW could organize a non-bank maintained group trust for which AEW would serve as the discretionary investment manager with the Bank Trustee serving as a directed trustee. AEW would have the power to select and remove the Bank Trustee. In the case of a Multiple Client Account organized as a common law trust, AEW would serve as the investment manager and, in most cases, AEW would appoint a Bank Trustee to act as a directed trustee. However, in some cases, an affiliate of AEW may be approved to act as the trustee by the Client Plans investing in the Account, pursuant to the terms of the Agreement. In the case of a Multiple Client Account organized as a limited partnership, AEW would serve as the general partner with investment discretion for assets held in the partnership.

For any Multiple Client Account, various decisions regarding the Account other than investment management decisions for the Account (such as the initial decision to allocate Client Plan assets to the Account, the decision to reinvest income or proceeds in the Account, decisions with respect to the removal of AEW or the termination of the Account) will be made by the Responsible Independent Fiduciaries. AEW represents that in all instances the Responsible Independent Fiduciaries will be acting for Account investors that collectively hold at least 50% of the interests in the Account. The exact percentage required for such decisions will be specified in the governing documents of the Account. In addition, AEW states that in no case will the Bank Trustee be deemed a Responsible Independent Fiduciary for purposes of decisions which are required to be made by such fiduciaries under the documents governing the Account.

The decision to invest assets of a Client Plan in any Multiple Client Account will be made by the Independent Fiduciary of such Client Plan, based upon full written disclosure of the compensation arrangement involving the Fees prior to such investment. Notwithstanding the foregoing, AEW may authorize the transfer of cash from a Single Client Account to a Multiple Client Account where: (i) The Multiple Client Account has similar investment objectives and the identical fee structure as the Single Client Account; (ii) the Agreement governing the Single Client Account authorizes AEW to invest in a Multiple Client Account; (iii) AEW receives no additional fees from the Single Client Account for cash invested in the Multiple Client Account and no additional Investment Fee is paid for cash transferred to the Multiple Client Account; and (iv) the transfer occurs within six months of the Independent Fiduciary's decision to allocate assets to the Single Client Account or, in the event the transfer would occur after six months, AEW obtains an additional authorization from the Independent Fiduciary. AEW states that the six month period for the Client Plan's authorization to make a transfer of cash to the Multiple Client Account would relate to AEW's decision to make a binding commitment to invest such cash in the Multiple Client Account, rather than the actual date the cash is transferred to the Account. AEW represents that its commitment to invest the cash would normally occur within six months of the Independent Fiduciary's decision to allocate assets to the Single Client Account. However, if more than six months has transpired since the Independent Fiduciary's decision to invest the assets in the Single Client Account, AEW will obtain an additional authorization from such fiduciary. The approval will occur following written disclosure to the Independent Fiduciary of AEW's binding commitment to make a cash transfer to the Multiple Client Account which will be deemed approved unless such fiduciary objects within a reasonable time.

AEW may not receive an Investment Fee for cash invested by AEW in the Multiple Client Account if the Investment Fee was previously paid for such assets when the Client Plan invested in the Single Client Account. Otherwise, after a transfer of cash, the fee structure for the Multiple Client Account will govern all fees received by AEW for such Client Plan assets. The precise terms of AEW's compensation arrangement will be established as part of the documents pursuant to which the Multiple Client Account is organized and can be amended only with the approval of the Responsible Independent Fiduciaries.

4. The applicant represents that the investment objectives of each Account will be to obtain current income and capital appreciation, primarily through the purchase of real estate-related assets, including fee interests, leaseholds, joint venture participations, partnership interests, options with respect to real estate, mortgage loans and interests in any of the foregoing. The Accounts may be designed as either "blind" accounts for which AEW will select the real estate investments after the Client Plans have invested therein or "pre-identified property" accounts for which AEW identifies particular properties for investment prior to the Client Plans' investments in the Accounts.

5. AEW will provide management services, as defined in Part IV(c) above, to the Accounts. In some cases, AEW and the Independent Fiduciary acting on behalf of the Client Plan may agree in advance that in addition to management services, AEW will also provide all day to day property management services required to maintain the properties. AEW represents that day-to-day property management services will include all locally performed services related to property maintenance and repair, rent collection, leasing and tenant relations, supervision of capital improvements, and payment of local expenses such as real estate taxes and utilities. In the event AEW provides day-to-day property management services, the percentage used in determining AEW's on-going management fee (as discussed in Item 6 below) will be increased to reflect the additional services to be provided by AEW (either directly or by independent contractors retained by AEW at its expense). Alternatively, AEW and the Independent Fiduciary for a Single Client Account or the Responsible Independent Fiduciaries for a Multiple Client Account may agree that management services provided by AEW for an Account will not include day to day property management services, in which event such services will be provided by independent contractors selected and supervised by AEW at the expense of the Account, the Client Plans, or the plan sponsors, as determined by the parties prior to the investment in the Account.

AEW will not provide any ancillary services, as defined in Part IV(d) above. Ancillary services are those services provided in connection with the acquisition, construction, improvement, management and disposition of investments in real property, such as services provided by attorneys, architects, designers, engineers, hazardous materials consultants, contractors, leasing agents and real estate brokers. Independent service providers will be retained by AEW to provide all ancillary services at the expense of the Account, the Client Plan or the plan sponsor, as determined by the parties prior to investment in the Account.

6. AEW proposes to have the Client Plans pay for investment management

VOL
58
ISS
79
AP
27
1993
UMI

services rendered to the Accounts based upon a multi-part fee structure which will be approved in advance by the Independent Fiduciaries of the Client Plans. In addition to an on-going investment management fee (the Management Fee) paid to AEW typically quarterly by the Client Plan, the fee structure may include the following fees: (i) The Investment Fee, a one-time initial fee paid at the time the Client Plan's assets are invested in the Account either as a lump-sum or in periodic installments as discussed below; and (ii) the Disposition Fee, a fee payable upon a distribution (or a deemed distribution) of the assets from the Account after the Client Plan has received (or would receive) a return of all its invested capital plus a certain pre-specified rate of return on its investments in the Account. AEW requests an exemption for the payment by Client Plans of the Investment Fee and the Disposition Fee under circumstances described below.

With respect to the Investment Fee, such fee will be a one-time fee intended to cover the expense of organizing the Account, identifying suitable investments, and completing the initial purchases of properties for the Account, based on the assets allocated by the Client Plan to the Account. If additional assets are allocated to the Account at a later date at the express direction of a Client Plan (including amounts which are reinvested in the Account rather than distributed to the Client Plan), an Investment Fee will be paid for such additional assets. However, an additional Investment Fee will not be paid for any cash of a Single Client Account which is transferred by AEW to a Multiple Client Account pursuant to the Agreement (as described above in Item 3).

The Investment Fee will be equal to a pre-specified percentage of the net value of the Client Plan assets which are allocated to the Account. The exact percentages to be used in determining the Investment Fee will be negotiated between AEW and the Client Plan prior to the initial investment of any assets of the Client Plan in an Account.

The Investment Fee will be payable either: (a) at the time assets are deposited (or deemed deposited in the case of a reinvestment) in the Account;[6] or (b) in periodic installments, the amount (calculated as a percentage of the aggregate Investment Fee) and timing of which have been specified in advance based on the percentage of the Client Plan's assets invested in real property as of the payment date.[7] AEW states that the installment period will never be less than three months. In addition, if the percentage of the Client Plan assets which have actually been invested by a payment date is less than the percentage required for the aggregate Investment Fee to be paid in full through that date (both determined on a cumulative basis), the Investment Fee paid on such date will be reduced by the amount necessary to cause the percentage of the aggregate Investment Fee paid to equal only the percentage of the Client Plan assets actually invested by that date. The unpaid portion of such Investment Fee will be deferred to and payable on a cumulative basis on the next scheduled payment date (subject to the percentage limitation described in the preceding sentence).[8]

With respect to the Management Fee, such fee will be paid throughout the term of the Account on a pre-specified periodic basis. The amount of this fee will be based on a percentage of the net fair market value of the Client Plan assets in the Account (i.e. without regard to any leveraged amounts) as of the last day of each period, and will be pro-rated for any partial periods. The exact percentages to be used in determining the Management Fee will be negotiated between AEW and the Client Plan prior to the initial investment of any Plan assets in the Account. As described above, the Management Fee may or may not cover day-to-day property management services.

The Management Fee will be based upon property values as determined at least annually by an MAI licensed real estate appraiser independent of AEW and its affiliates. For any appraisal of a property used to determine the Management Fee, AEW will initially notify in writing the Independent Fiduciary for a Single Client Account or the Responsible Independent Fiduciaries for a Multiple Client Account regarding the identity of the appraiser whom AEW proposes to retain to value the property. The Independent Fiduciary or the Responsible Independent Fiduciaries will have an opportunity to approve or disapprove the suggested appraiser with an approval being deemed to have occurred unless such fiduciaries object to the appraiser within a reasonable time. Once approved, the appraiser could perform all future valuations of the particular property unless either (i) the Independent Fiduciary or Responsible Independent Fiduciaries affirmatively withdraw the prior approval of the appraiser, or (ii) AEW suggests a different appraiser, in which case an approval by such fiduciaries would again be required. AEW states that if there have been capital improvements to a property since the date of the most recent appraisal, the cost of such capital improvements will be added to the appraisal in determining the property's value. In addition, AEW states that if any internal appraisal by AEW results in a lower value than the most recent independent appraisal (as adjusted in either case for subsequent capital improvements), the fee will be based on the lower valuation.

In lieu of either or both the Investment Fee and/or the Management Fee, AEW and Independent Fiduciaries of the Client Plans may agree to an alternative fee arrangement for an Account (the Alternative Fee) which is based upon either a fixed amount or amounts or an objective formula to be negotiated (in either case) between AEW and the Client Plan prior to the initial investment of any Client Plan assets in the Account. Any such Alternative Fees are not covered by the requested exemption.[9]

The Disposition Fee will be payable either: (i) After the Client Plan has actually received distributions from the Account, or (ii) in the case of the removal or resignation of AEW, based on deemed distributions from the Account (as discussed in Item 8 below), equal to its invested capital plus a pre-specified annual compounded rate of return (i.e. the Threshold Amount). The Disposition Fee will be equal to a fixed percentage (or several fixed percentages) of all amounts distributed from an Account in excess of the Threshold Amount (or several Threshold Amounts). In this regard, AEW represents that there is a possibility that several Threshold Amounts may be established with different percentages being utilized to determine the Disposition Fee depending upon which Threshold Amount has been exceeded. AEW states that this structure will allow a Client Plan to negotiate an arrangement pursuant to which the amount of the Disposition Fee will increase as the level of investment performance increases.[10] Both the annual rate of return used in determining the Threshold Amount(s) and the percentage(s) used to determine the amount of the Disposition Fee will be negotiated between, and agreed to by, AEW and the Client Plan prior to the Client Plan's initial investment in the Account.

With respect to the determination of the Threshold Amount, AEW represents that all amounts invested by a Client Plan in an Account will have to earn a pre-specified rate of return, which is at least equal to the minimum rate of return specified in Part IV(f) above, for the entire period such assets are in the Account and must actually be distributed (or deemed distributed) back to the Client Plan in order for the Threshold Amount to be reached. AEW states that a bookkeeping account will be maintained for each Client Plan which will show the amount required to be distributed from the Account to satisfy the Threshold Amount. When a certain amount is invested in the Account on a particular date, this bookkeeping account will initially equal the invested amount and will thereafter be increased to reflect the threshold rate of return compounded on an annual basis. Whenever a distribution (whether it arises from income, sale of assets, or otherwise) is made from the Account to the investing Client Plans, the amount of this bookkeeping account will be reduced by the full amount of the distribution. Thereafter, the required return will be added to this reduced amount until the next distribution is made when the bookkeeping account will be reduced to reflect the amount of that distribution. Only when this bookkeeping account is reduced to zero will the Threshold Amount be satisfied. At this time, the Disposition Fee will be payable to AEW on all further distributions from the Account.

AEW states that for any sale of property in an Account which causes the payment of a Disposition Fee and which occurs prior to the termination of the Account, the sales price for the property will be at least equal to a Target Amount in order for AEW to be able to sell the property and receive its Disposition Fee. The Target Amount for each property in an Account will be established by AEW either at the time the property is acquired, by mutual agreement between AEW and the Independent Fiduciary for a Single Client Account or the Responsible Independent Fiduciaries for a Multiple Client Account, or pursuant to a formula approved by such fiduciaries at the time the Account is established. If the proposed sales price of the property is less than the Target Amount, the proposed sale will be disclosed to the Independent Fiduciary or Responsible Independent Fiduciaries for approval in order for AEW to receive its Disposition Fee as a result of the sale. Such approval will be deemed to have occurred unless the Independent Fiduciary or Responsible Independent Fiduciaries object to the sale within a reasonable time prior to the transaction. If the proposed sales price is less than the Target Amount and the Independent Fiduciary's or Responsible Independent Fiduciaries' approval is not obtained, AEW will still have the authority to sell the property in situations where the Agreement provides AEW with complete investment discretion for the Account. However, in such instances and in all other circumstances where the sales price is less than the Target Amount and the Independent Fiduciary's or Responsible Independent Fiduciaries' approval is not obtained (such as where a Bank Trustee has ultimate investment discretion for the Account), the Disposition Fee which would have been payable to AEW will be paid only at the termination of the Account.

7. All income and proceeds from the sale of the assets of the Account will be applied first to pay expenses of the Account. These expenses will include the maintenance of reasonable reserves in connection with Account assets, whether such reserves are for repayment of existing or anticipated obligations or for contingent liabilities. Subject to the written approval of the Independent Fiduciary for a Single Client Account or the Responsible Independent Fiduciaries (as defined herein) for a Multiple Client Account, all income and proceeds in excess of the amount required to pay the Account's expenses may be reinvested in the Account, provided that such Account fiduciaries: (i) Approve the reinvestment of income and/or proceeds from the sale of the Client Plans' assets in the Account no more than ninety (90) days before such assets become available for distribution; and (ii) approve the payment to AEW of the Investment Fee on the amounts reinvested in the Account.

If the Independent Fiduciary for a Single Client Account or the Responsible Independent Fiduciaries for a Multiple Client Account do not consent to the reinvestment of the income and proceeds of the Account, in excess of the amount reasonably necessary for Account purposes, then such amounts will be distributed from the Account to the Client Plans. Only actual distributions from an Account, and not any amounts reinvested as described above, will be included in calculating whether the Threshold Amount has been reached for purposes of the payment of the Disposition Fee.

8. AEW may be removed as the investment manager for an Account at any time, without cause, upon the delivery of a notice of removal to AEW by the Independent Fiduciary for a Single Client Account or by the Responsible Independent Fiduciaries for a Multiple Client Account. AEW may resign as investment manager of an Account at any time, without cause, upon written notice to the Independent Fiduciary for a Single Client Account or the Responsible Independent Fiduciaries for a Multiple Client Account.

With respect to a Single Client Account, such removal or resignation will not become effective until a successor investment manager is appointed by the Independent Fiduciary for the Account.

With respect to a Multiple Client Account, the removal of AEW will become effective when either: (i) A successor investment manager is appointed by the Responsible Independent Fiduciaries; or (ii) sixty (60) elapse, whichever is sooner. Any resignation by AEW for a Multiple Client Account will become effective when either: (i) A successor investment

[6] Under this approach, the value of the assets in the Account, for purposes of determining the amount of the Investment Fee, would be equal to the total dollar amount the Client Plan invested in the Account.

[7] Under this approach, the value of the assets in the Account will be determined by the acquisition price of the property less any debt assumed by the Account with respect to the property. Therefore, if AEW purchases a property for the Account for $50 million and assumes a mortgage on the property in the amount of $20 million, the net asset value of the Account for the property would be $30 million. AEW's Investment Fee would be a pre-specified percentage of $30 million.

[8] For example, the Agreement governing the Account might provide that the Investment Fee would be payable at the end of a six, twelve, eighteen and twenty-four month period after the date on which the Account was established. If at the end of six months 25% or more of the assets of the Account had been invested, 25% of the Investment Fee would be paid. If at the end of twelve months fifty percent (50%) or more of the assets had actually been invested, the next 25% of the Investment Fee would be paid, and so on. Alternatively, if at the end of the six month period only fifteen percent (15%) of the assets in the Account had been invested, only 15%, rather than 25%, of the Investment Fee would be paid at the end of the six month period. The remaining ten percent (10%) of the Investment Fee would be deferred to the next period, in this case twelve months, and added to the additional 25% that would be payable at the end of twelve months. If at the end of the twelve month period 50% of the assets of the Account had been invested, 35% of the Investment Fee would be payable (i.e., the original 25% plus the 10% left over from the preceding six month period). This process will continue at six month increments until 100% of the assets in the Account have been invested.

[9] AEW represents that both the Management Fee and the Alternative Fee would be covered by section 408(b)(2) of the Act and the regulations thereunder (see 29 CFR 2550.408b–2). However, the Department expresses no opinion as to whether the payment of such fees, as described herein, would meet the conditions of section 408(b)(2) of the Act.

[10] For example, a Client Plan could negotiate a Disposition Fee whereby AEW would receive 10% of all distributions from the Account once an initial Threshold Amount (i.e. return of all invested capital plus an 8% annual return) has been achieved and 20% of all distributions once a second Threshold Amount (i.e. return of all invested capital plus a 12% annual return) has been achieved.

VOL 58 ISS 79 AP 27 1993 UMI

manager is appointed by Responsible Independent Fiduciaries; or (ii) 180 days elapse, whichever is sooner.

Upon removal of AEW as investment manager, AEW will be entitled to receive a Disposition Fee is the Client Plans would receive distributions from the Account in excess of an amount equal to the Threshold Amount at the time of AEW's removal. Such Disposition Fee will be determined by a deemed distribution of the assets of the Account based on an assumed sale of such assets at their fair market value, in accordance with appraisals by an independent MAI appraiser mutually agreed upon by AEW and the Client Plans. If AEW and the Client Plans cannot agree on an appraiser, then the fair market value of such assets for the assumed sale will be equal to the average of the two closest appraisals generated by three independent MAI appraisers—one selected by AEW, one selected by the Client Plans, and the third selected by the two appraisers chosen by the parties.

Upon AEW's resignation as investment manager, AEW will not receive a Disposition Fee until the Account is terminated. The amount of the Disposition Fee will be based upon a deemed distribution of the assets of the Account at their fair market value at the time of such resignation, as determined by an independent MAI appraiser mutually agreed to by AEW and the Client Plans. However, if AEW and the Client Plans cannot agree on an MAI appraiser, the procedure described above will be followed.

The Disposition Fee will be calculated at the time of resignation and allocated to each property based upon the relationship that the appraised value of such property bears to the total appraised value of the Account. However, the amount of the Disposition Fee for each property will be multiplied by a fraction, the numerator of which will be the actual sales price received by the Account on the disposition of the property (or in the case of a property which has not been sold prior to termination of the Account, the appraised value of the property as of the termination date) and the denominator of which will be the appraised value of the property which was used in connection with determining the Disposition Fee at the time of resignation, provided that this fraction will never exceed 1.0. The resulting amount for each property will be the Disposition Fee payable to AEW upon termination of the Account. Thus, even if the values of the properties decline after AEW's resignation, AEW will still receive the Disposition Fee for the period of time that it acted as an investment manager for the Account if the Client Plans would have received distributions from the Account (based on an assumed sale of the assets at their fair market value) in excess of an amount equal to the Threshold Amount at the time of AEW's resignation, subject to the operation of the fraction discussed above. The fraction ensures that an appropriate reduction in the Disposition Fee will be made upon termination of the Account if the value of any property in the Account declines after AEW resigns as the investment manager.

9. A Single Client Account will terminate upon expiration of the period of years specified as the term for the Account in the Agreement or upon the removal or resignation of AEW. However, the period of years specified in the Agreement may be extended by the Independent Fiduciary of the Client Plan. In addition, a Single Client Account may be terminated at any time by the Independent Fiduciary of the Client Plan upon ninety (90) days written notice to AEW.

A Multiple Client Account will terminate upon the occurrence of any of the following events: (i) The affirmative decision of the Responsible Independent Fiduciaries; (ii) the failure of the Responsible Independent Fiduciaries to appoint a successor investment manager; or (iii) upon expiration of the period of years specified as the term of the Account in the Agreement, provided that the period of years is not extended by the Responsible Independent Fiduciaries.

Upon termination of a Single Client Account, the assets of the Account will be distributed to the Client Plan in cash or in kind as agreed to by AEW and the Independent Fiduciary. However, in the case of a Multiple Client Account, such distributions will be agreed to by the Responsible Independent Fiduciaries for the Account.

AEW will be entitled to the Disposition Fee upon termination of the Account for all remaining distributions made from the Account if the Threshold Amount has been or would be reached at such time. In the case of in kind distributions of assets of the Account, the Disposition Fee will be based on the fair market value of the assets of the Account as determined by an independent MAI appraiser mutually agreed to by AEW and the Client Plans. If AEW and the Client Plans cannot agree on an appraiser, then the same procedure discussed in Item 8 above will be followed.

10. Each Client Plan will receive throughout the term of an Account the following information:

(a) Quarterly and annual reports prepared by AEW relating to the overall financial position and operating results of the Account and, in the case of a Multiple Client Account, the balance of each Client Plan's interest in the Account. In addition, such reports will include a statement regarding the amount of all fees paid to AEW during the period covered by the report.

(b) Annual appraisals indicating the current fair market value of all properties owned by the Account as established by an independent MAI appraiser.

(c) In the case of a Multiple Client Account, a list of the investors in the Account.

(d) Audited financial statements prepared by independent public accountants selected by AEW, within 90 days of the end of the Account fiscal year.

The Independent Fiduciary for the Client Plan, as well as other authorized persons described above in paragraph (m)(1) of Part III, will have access during normal business hours to AEW's records for the Accounts in which the Client Plan has an interest.

11. In summary, the applicant represents that the proposed transactions satisfy the criteria of section 408(a) of the Act because, among other things:

(a) Each investment is authorized in writing by an Independent Fiduciary of a Client Plan and, in the case of a Multiple Client Account for which ultimate investment discretion is exercised by a Bank Trustee, an Independent Fiduciary which is independent of such Bank Trustee and AEW and its affiliates;

(b) No Client Plan may establish a Single Client Account or invest in a Multiple Client Account unless the Client Plan has total net assets with a value in excess of $50 million. In addition, a Client Plan may not invest, in the aggregate, more than five percent (5%) of its total assets in any one Account or more than ten percent (10%) of its total assets in all Accounts established by AEW;

(c) Prior to making an investment in any Account, an Independent Fiduciary for each Client Plan will receive offering materials disclosing all material facts concerning the purpose, structure and operation of the Account, including any fee arrangements;

(d) AEW will provide each Independent Fiduciary of a Client Plan with periodic written disclosures with respect to the financial condition of the Account, the fees paid to AEW, the balance of each Client Plan's interest in the Account, annual independent appraisals of the Account's assets and, in the case of a Multiple Client Account, a list of other investors in the Account;

(e) The total fees paid to AEW will constitute no more than reasonable compensation; and

(f) The timing and formula for determining the Fees will be established and agreed to by the Independent Fiduciary for each Client Plan prior to the Client Plan's investment in the Account and will be based on pre-specified percentages of the Client Plan's assets invested in the Account or distributed (or deemed distributed) from the Account.

Citizens First National Bank of New Jersey Employee Stock Ownership Plan (the Plan) Located in Glen Rock, New Jersey

[Application No. D–9271]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted, the restrictions of sections 406(a), 406 (b)(1) and (b)(2) and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to (a) the past acquisition by the Plan of certain transferable subscription rights (the Rights) for the purchase of common stock of Citizens First Bancorp, Inc. (CFB), a party in interest with respect to the Plan, which were issued to shareholders of record, as of August 26, 1992, pursuant to a stock rights offering (the Rights Offering), and (b) the holding and exercise of the Rights by the Plan during the subscription period, provided that (1) the acquisition of the Rights occurred in connection with the Rights Offering made available to all shareholders of CFB, (2) all holders of the common stock of CFB were treated in the same manner with respect to the Rights Offering, including the Plan, and (3) all decisions regarding the acquisition, holding, and disposition of the Rights by the Plan was exercised by a qualified, independent fiduciary of the Plan, which made all determinations as to whether and how the Plan should exercise or sell the Rights received by the Plan through the Rights Offering.

EFFECTIVE DATE: This proposed exemption, if granted, will be effective as of August 26, 1992.

Summary of Facts and Representations

1. Citizens First National Bank of New Jersey (the Employer), the sponsoring employer of the Plan, is a national banking association organized in 1920, which is a full service commercial bank providing a broad spectrum of personal, commercial, and trust services, including secured and unsecured personal and business loans, real estate financing, and letters of credit. The Employer operates 43 banking offices located in the northern New Jersey counties of Bergen, Hudson, Morris, and Passaic and 7 offices in Ocean City County in southern New Jersey.

CFB is a bank holding company incorporated in New Jersey and registered under the Bank Holding Company Act of 1956, as amended. As of June 30, 1992, the Consolidated Financial Statements of CFB had total assets of $2.4 billion, total deposits of $2.3 billion, and total shareholder's equity of $88.6 million. CFB commenced business in 1982 when it acquired all the outstanding capital stock of the Employer. The Employer accounts for substantially all of the consolidated assets, revenues, and operating results of CFB.

2. The Plan is an employee stock ownership plan within the meaning of section 407(d)(6) of the Act. It has 761 participants, of which 551 participants have account balances, and total assets of $3,217,293, as of December 31, 1991. Less than 1 percent of the assets of the Plan is held in cash or cash equivalents. The remainder of the assets of the Plan consist of common stock issued by CFB.

The Plan is administered by a Committee, as named fiduciary, consisting of three individuals appointed by the Board of Directors of the Employer, who are outside Directors of both the Employer and CFB. The Committee directs the administration of the Plan in accordance with its terms and possesses all powers necessary to carry out the terms of the Plan, including the appointment of investment managers to manage the acquisition and disposition of any assets of the Plan.

The current trustee (the Trustee) of the Plan is the Employer, which is subject to written instructions from the Committee.

3. On August 26, 1992, (the Record Date), CFB issued Rights to the holders of record of its common stock (the Common Stock), enabling such shareholders to purchase additional shares of the Common Stock for a price of $2.50 per share (the Subscription Price). Shareholders of record of CFB received one Right for each share of the Common Stock held by them as of the close of business on the Record Date. The Rights Offering expired on September 23, 1992, after which date, if not exercised, the Rights expired and became worthless.

Each Right entitled the registered holder of the Common Stock on the Record Date to subscribe for one share of the Common Stock (The Basic Subscription Privilege) at the Subscription Price. Each Right also included the right to subscribe (the Oversubscription Privilege) at the Subscription Price for an unlimited number of shares of the Common Stock that are not otherwise purchased pursuant to the exercise of the Basic Subscription Privilege, subject to reduction by CFB in certain circumstances and subject to proration.[11] Only owners of the Common Stock that purchased at least one share of the Common Stock pursuant to the exercise of the Basic Subscription Privilege were entitled to exercise the Oversubscription Privilege.

In addition, CFB entered into purchase agreements (the Standby Purchase Agreements) with 14 institutional investors which agreed to purchase at the Subscription Price of $2.50 per share a total of 18,289,191 shares of the Common Stock offered but not subscribed for in the Rights Offering. Also, pursuant to the Standby Purchase Agreements the Directors of CFB and the Directors of the Employer were committed to purchase up to 3,136,082 shares of the Common Stock under the Rights Offering.

The Common Stock issued by CFB, is listed and traded on the American Stock Exchange. During the Rights Offering both the Rights and the Common Stock were traded on the American Stock Exchange.

A total of 28,394,932 shares of the Common Stock were sold pursuant to the Rights Offering. Of this total, 21,425,273 shares were purchased through the exercise of Rights: 19,149,680 through the Basic Subscription Privilege and 2,275,593 shares through the Oversubscription Privilege. The Standby Agreements generated the sale of 6,937,193 shares to the institutional investors and the sale of 32,466 shares to the Directors of CFB. The gross proceeds generated for CFR

[11] CFB did not limit any purchase of the Common Stock pursuant to the Rights Offering.

VOL 58 ISS 79 AP 27 1993 UMI

from the Rights offering totalled $70,987,330. All sales of the Common Stock were made at the Subscription Price of $2.50 per share.

The Plan received 981,787 Rights from the Rights Offering and, in four different transactions during September 1992, sold 748,253 Rights through the services of Shearson Lehman American Express (Shearson) on the American Stock Exchange for an average price of $.80 per Right, netting a return to the Plan, after brokerage commissions, of $583,835. The proceeds from the sale of the Rights were used by the Plan to exercise the remaining 233,534 Rights it held in order to purchase at the Subscription Price an additional 233,534 shares of the Common Stock.[12]

4. Prior to the commencement of the Rights Offering, amendments were made to the Plan and Trust documents to allow the Plan to participate in the Rights offering and to allow for the appointment of an independent fiduciary to make all decisions for the Plan with respect to the receipt, holding, and disposition of the Rights issued to the Plan by CFB.

On August 11, 1992, the Committee retained U.S. Trust Company of California, N.A. (U.S. Trust) as the independent fiduciary for the Plan with respect to the Right Offering. U.S. Trust was organized in 1978 as a non-deposit trust company, located in Los Angeles, California. In 1991, following a change in the banking laws of California and the acquisition of a Los Angeles bank, U.S. Trust gained the ability to take deposits and became a full-service trust company. U.S. Trust is one of six subsidiaries wholly-owned by U.S. Trust Corporation. U.S. Trust Corporation, which was incorporated in New York in December 1977 and became a bank holding company under the Bank Holding Company Act of 1956, as amended, has total assets of approximately $2.9 billion, total deposits of approximately $2.1 billion, and shareholders' equity of approximately $182 million, as of December 31, 1991.

As independent fiduciary for the Plan, U.S. Trust had the power, authority, and responsibility to make all decisions for the Plan regarding the receipt, holding, and disposition of the Rights under the Rights Offering.

5. U.S. Trust represents that it was an active participant with respect to the Rights Offering throughout August and September 1992. In addition, U.S. Trust represents that, although not formally retained prior to August 11, 1992 by the Committee, it began performing due diligence for the Plan approximately one week prior to August 11, 1992, and was involved in negotiations with CFB regarding all aspects of the impact of the Right Offering upon the Plan. Prior to the Rights Offering on August 26, 1992, negotiations with CFB on behalf of the Plan were undertaken by U.S. Trust to obtain possible alternatives to the Rights Offering in an attempt to avoid a possible violation of the prohibited transaction provisions of the Act. Legal counsel determined that the federal and state statutes pertaining to the Rights Offering required CFB to treat the Plan in the same manner as all other shareholders of the Common Stock.

U.S. Trust represents that, recognizing that the Plan is required to primarily invest in securities of the Employer, it conducted extensive due diligence and financial analysis to determine the prudent disposition of the Rights. A determination was made that, in order to maximize the value of the Rights for the benefit of the Plan, a portion of the Rights should be sold and the proceeds used to exercise the Rights in order to obtain additional shares of the Common Stock. U.S. Trust used a number of computer generated models to determine the appropriate numbers of Rights to sell and the proper timing for the sales.

U.S. Trust represents that it acted throughout the Rights Offering in a prudent manner and in the best interests of the participants of the Plan, enabling the Plan to add substantial value to its assets without risking other assets of the Plan.

Furthermore, U.S. Trust represents that under the Rights Offering the best interests of the Plan and its participants and beneficiaries were served and the rights of the participants and beneficiaries were protected as required under the Act.

6. In summary, the applicant represents that the transactions satisfied the statutory criteria of section 408(a) of the Act for the following reasons: (a) The acquisition of the Rights by the Plan resulted from an independent act by CFB as a corporate entity and all holders of the common Stock were treated in a like manner, including the Plan; (b) all decisions regarding the acquisition, holding, and exercise or other disposition of the Rights by the Plan were made by an independent fiduciary, including the determinations as to whether and how the Plan would exercise or sell the Rights acquired through the Rights Offering; (c) the Rights and the Common Stock were both traded on a national securities exchange from which current price information was readily ascertainable, and the terms and conditions of the Rights Offering were readily ascertainable from public documents distributed to Common Stock shareholders, including the Plan, and filed with the U.S. Securities and Exchange Commission and the national securities exchanges; and (d) other than brokerage commissions to Shearson, the Plan paid no commissions or other expenses in connection with the receipt, holding and disposition of the Rights, or the application for exemption from the prohibited transaction provisions of the Act.

Bentley Nevada Corporation Profit Sharing 401(k) Plan (the Plan) Located in Minden, Nevada

[Application No. D–9265]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted the restrictions of sections 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale (the Sale) by the Plan of certain parcels of real property (the Property) to Mr. Donald E. Bentley (Mr. Bentley), President and Chief Executive Officer and sole owner of the sponsoring employer (the Employer), a party in interest with respect to the Plan, provided that (a) the Plan receives not less than the fair market value of the Property as determined by a qualified, independent appraiser on the date of the Sale, and (b) the Plan will not incur any expenses incident to the Sale.

Summary of Facts and Representations

1. The Employer, the Bentley Nevada Corporation, is a Nevada corporation, which is wholly owned by Mr. Bentley. It has manufacturing and product development facilities in Minder, Nevada, Houston, Texas, and Warrington, England. Also, it has sales and service offices throughout many parts of the world. Approximately 1,252 individuals are employed by the

[12] On January 27, 1993, the closing price of the Common Stock on the American Stock Exchange was $5.25 per share, yielding an aggregate value of $1,226,053.50 for the 233,534 shares acquired by the Plan from exercising its Rights obtained from the Rights Offering.

Employer in capacities involving product development, manufacturing, sales, services, and administration. The Employer is a worldwide engineering/manufacturing organization in the design and application of proximity systems for the measurement of high-speed rotating machinery.

2. The Plan is a profit sharing 401(k) plan with 960 participants and total assets of approximately $16,860,320, as of June 30, 1992. Recently the Plan was amended to provide for participant directed accounts for both the salary deferral accounts and the profit sharing accounts. The current fiduciaries of the Plan are Messrs. Raymond J. Case (Chief Financial Officer of the Employer), Donald W. Tally (Controller of the Employer), and Donald E. Halvorson (Manager of Revenue and Service Accounting of the Employer). Mr. Halvorson replaced Mr. Roger G. Harker as a fiduciary of the Plan on July 1, 1991. Sanwa Bank acted as custodial trustee for the assets of the Plan, with the exception of the Property, from 1988 until July 1, 1991, when the current fiduciaries took over all trust responsibilities for the Plan.

3. The Property consists of undeveloped land located in Churchill County, Nevada (the Churchill Parcel) and in Douglas County, Nevada (the Douglas Parcels) that was acquired from unrelated persons with respect to the Plan, the Employer, and Mr. Bentley. The Churchill Parcel was purchased on December 8, 1977, and The Douglas Parcels was purchased on December 8, 1978. The purchase price of the Property totalled $833,405, and the Plan expended from 1979 through 1992 the sum of $92,542 for property taxes. Also, the Plan incurred an expense of $9,362 on the Douglas Parcels for engineering costs for water rights and parceling.

The Property was purchased by the Plan in anticipation of realizing capital gains from marketing the Property when nearby properties were developed as the local population and the tourist activity grew. The fiduciaries of the Plan were represented by the applicant to have been expecting at the time of the purchase of the Churchill Parcel the construction of a nearby hotel that would employ 6,000 people, resulting in new construction of commercial and residential facilities in the area of the Property. Neither the anticipation nor the expectations of the fiduciaries have materialized, and neither the anticipation or the expectations of the fiduciaries are forseeable in the near future.

The applicant represents that neither the Churchill Parcel nor the Douglas Parcels are located near or adjoining to land owned by the Employer or Mr. Bentley. In addition, the applicant represents that neither the Churchill Parcel nor the Douglas Parcels had been leased to nor used by any party in interest with respect to the Plan.

Mr. Jerry W. Thran, a Certified General Appraiser, State of Nevada (#125) from Minden, Nevada, determined that the fair market value of the Douglas Parcels was $1,400,000, as of August 7, 1992, and the fair market value of the Churchill Parcel was $29,500, as of August 31, 1992.

The Douglas Parcels are described by the independent appraiser to consist of 800.15 acres of 30 vacant lots/sites located on U.S. Highway 395 South, approximately 16 miles south of Gardnerville, Nevada and 6 miles north of Topaz Lake on the California/Nevada state line.

The appraiser described the highest and best use currently of the Douglas Parcels is vacant lands for grazing, and the highest and best use of the Douglas Parcels in the future is single family ranchette sites of 2.45 acres to 327 acres. Future changes and development is described by the appraiser as a slow change over the next 5 to 15 years. Water and sewer services are described as available for the Douglas Parcels through private wells and septic/leach line systems.

The Churchill Parcel is described by the appraiser to consist of 589.56 acres of vacant land located approximately 10 miles east of Fernley and 1.5 miles north of Interstate Highway 80.

The appraiser described the highest and best use for the Churchill Parcel as a potential trade with the Bureau of Land Management for other lands in other Nevada communities. The Churchill Parcel is described by the appraiser as having no access except over adjoining land and no dedicated easements from a public road.

4. The applicant represents that the fiduciaries of the Plan desire to sell the Property to Mr. Bentley. This proposed Sale of the Property is to be undertaken in order to replace the Property with more beneficial and liquid investments and to overcome the illiquid impediment that the Property causes. In addition, the fiduciaries of the Plan represent that it is not in the best interests of the Plan or its participants and beneficiaries to incur additional expenses and risks in an attempt to develop the Property now or in the foreseeable future.

The Applicant represents that several unrelated persons during 1990 and 1991 have expressed interest and/or made offers to purchase the Douglas Parcels from the Plan. However, none of them could be accepted by the Plan because either they lacked sufficient, independent financing and required an exchange with the Plan of undesirable properties and/or required the Plan to accept promissory notes as partial payment of consideration. All of the offers were for less than the current fair market value as determined by the independent appraiser.

In a letter, dated February 22, 1993, Marsha L. Tomerlin of ITILDO, Inc., Realtors, an independently owned and operated member of Coldwell Banker Residential Affiliates, Inc., located at Minden, Nevada, represents that she is familiar with the Douglas Parcels and has attempted to market the Douglas Parcels on a number of occasions. Miss Tomerlin also represents that there are two chronic problems with marketing the Douglas Parcels: (a) The inability of the prospective purchaser to increase the permitted housing density on the property, and (b) the inability of the prospective purchaser to finance the transaction or to obtain financing for the purchase price. In addition, Miss Tomerlin reiterates that the Douglas Parcels not only lacks owner financing but easy development potential which are both essential for marketing of large properties.

Mr. Bentley is offering to purchase the Property for the total sum of $1,435,000 in cash with no expenses being incurred by the Plan from the transaction. Mr. Bentley represented that the transaction will be helpful to the Plan and at the same time be a diversification and long term investment for his estate.

The applicant represents that proposed transaction will be in the best interests of the Plan and its participants and beneficiaries because the Plan will not continue to hold an illiquid investment which has proven difficult to sell, and the funds generated from the Sale can be put to better use to fund the participant directed investments. Also, the applicant represents that the rights of the participants and beneficiaries will be protected because the Sale will be a one-time transaction for cash with the Plan incurring no expenses, and the purchase price will be determined by an independent, qualified appraiser on the date of the Sale.

5. In summary, the applicant represents that the proposed Sale will satisfy the criteria of section 408(a) of the Act because (a) the Sale of the Property involves a one-time transaction; (b) the Plan will not incur any expenses incidental to the Sale; (c) the Sales price will be determined from appraisals of the Property prepared by a qualified, independent appraiser; (d) the Sale will permit the Plan to realize

VOL 58 ISS 79 AP 27 1993 UMI

liquid funds that can be reinvested at the direction of the participants in more liquid assets; and (e) the Plan will not have to risk its assets in the development of the Property.

FOR FURTHER INFORMATION CONTACT: Mr. C.E. Beaver of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest of disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 22nd day of April 1993.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 93–9784 Filed 4–26–93; 8:45 am]

BILLING CODE 4510–29–M

[Prohibited Transaction Exemption 93–26; Exemption Application No. D–8978, et al.]

Grant of Individual Exemptions; United Company Profit Sharing and Retirement Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, DC. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of proposed exemption were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, 32847, August 10, 1990) and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

United Company Profit Sharing and Retirement Plan (the Plan) Located in Bristol, Virginia

[Prohibited Transaction Exemption 93–26; Exemption Application No. D–8978]

Exemption

The restrictions of section 406(a)(1)(A) through (D) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply retroactively to a series of loans (the Past Loans) [1] made on a revolving basis by the Plan to the Employer in accordance with the following conditions:

(1) The terms and conditions of the Past Loans were at least as favorable to the Plan as those obtainable by the Plan under similar circumstances in arm's length transactions with unrelated third parties;

(2) The exemption applies to the Past Loans up to an aggregate amount of the outstanding balances of such loans that did not exceed twenty-five percent (25%) of the assets of the Plan;

(3) Within sixty (60) days of the grant of this proposed exemption, the Employer will file with the Internal Revenue Service (IRS) the Form 5330, and will pay excise tax, if any is then deemed to be due and owing with respect to the amounts above twenty-five percent (25%) of the assets of the Plan borrowed by the Employer under the Past Loans.

(4) An independent fiduciary, on behalf of the Plan, negotiated, reviewed, and approved the terms and conditions of the Past Loans prior to entering into such Past Loans;

(5) An independent fiduciary, on behalf of the Plan, monitored the Employer's compliance with the terms of the Past Loans to ensure that the Plan and its participants and beneficiaries were protected throughout the duration of such Past Loans;

(6) The Past Loans were at all times secured by collateral which was valued at not less than 200 percent (200%) of the aggregate balance of all outstanding Past Loans from the Plan to the Employer;

(7) The Plan incurred no fees, commissions, or other charges as a result of the Past Loans; and

(8) The Plan suffered no loss as a result of the Past Loans.

EFECTIVE DATES: This exemption is effective beginning August 31, 1990, through December 29, 1991, the date by which all of the Past Loans were repaid.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on February 18, 1993, at 58 FR 8989.

FOR FURTHER INFORMATION CONTACT: Angelena C. Le Blanc of the Department, telephone (202) 219–8883. (This is not a toll-free number.)

Mid-Hudson Medical Group P.C. Profit Sharing Trust (the Plan) Located in Fishkill, New York

[Prohibited Transaction Exemption 93–27; Exemption Application No. D–9153]

Exemption

The restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the continued leasing (the Lease) of certain improved real property (the Property) by the Plan to Mid-Hudson Medical Group, P.C. (the Employer), a party in interest with respect to the Plan, provided the following conditions are satisfied: (a) The Property represents no more than 25% of the value of the Plan's assets; (b) the terms of the Lease are, and will remain, at least as favorable to the Plan as those obtainable in an arm's-length transaction with an unrelated party; (c) the fair market rental value of the Property has been, and will continue to be determined on an annual basis by a qualified, independent appraiser; (d) the Plan's independent fiduciary has determined, as of June 30, 1992, that the transaction is appropriate for the Plan and in the best interests of the Plan's participants and beneficiaries; (e) the Plan's independent fiduciary will continue to monitor the transaction and the conditions of the exemption and take whatever action is necessary to enforce the Plan's rights under the Lease; and (f) the Employer will pay to the Internal Revenue Service all applicable excise taxes due by reason of the Lease during the period from July 1, 1984 through June 29, 1992 within 90 days of the publication in the **Federal Register** of this notice of grant of the exemption.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on February 24, 1993 at 58 FR 11251.

EFFECTIVE DATE: This exemption is effective June 30, 1992.

FOR FURTHER INFORMATION CONTACT: Gary H. Lefkowitz of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

International Rectifier Corporation Profit Sharing and Retirement Plan (the Plan) Located in El Segundo, California

[Prohibited Transaction Exemption 93–28; Exemption Application No. D–8747]

Exemption

The restrictions of sections 406(a) and 406(b) (1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply (1) effective September 30, 1988, to the past leasing of two parcels of real property (the Properties) from the Plan to International Rectifier Corporation (the Employer), a party in interest with respect to the Plan, and (2) to the proposed sale for cash of the Properties from the Plan to the Employer, in accordance with the following conditions:

(1) The terms and conditions of the past leasing of the Properties were at least as favorable to the Plan as those obtainable under similar circumstances in arm's-length transactions with unrelated third parties;

(2) The exemption for the past leasing of the Properties applies with respect to twenty-five percent (25%) of the Plan's assets only, as determined by reference to the combined fair market values of the Properties;

(3) The terms and conditions of the leases were reviewed, approved and monitored by an independent fiduciary on behalf of the Plan;

(4) Within 60 days of the grant of this exemption, the Employer will file with the Internal Revenue Service the Form 5330 and will pay an excise tax if any is deemed to be due with respect to the amounts above 25 percent of the assets of the Plan involved in the leases of the Properties to the Employer on or after September 30, 1988;

(5) The sale of the Properties will be for cash and the Plan will receive no less than the greater of $2,150,000 or the fair market value of the Properties at the time of sale;

(6) The fair market value of the Properties will be established by a real estate appraiser independent of the Employer; and

(7) The Plan will pay no commissions or other expenses in regard to the sale.

EFFECTIVE DATE: This exemption is effective as of September 30, 1988.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on February 18, 1993, at 58 FR 8993.

FOR FURTHER INFORMATION CONTACT: Paul Kelty of the Department, telephone (202) 219–8883. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemptions does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

[1] On August 8, 1989, the Department received an exemption application (D–8146) from the United Company (the Employer) requesting prospective relief for a series of loans to the Employer by the Plan on a revolving basis for a term of five (5) years. The Notice of proposed exemption for D–8148 was published in the Federal Register on January 29, 1990, 55 FR 2903. The granted exemption for D–8146 was published as PTE 90–17 in the Federal Register on April 6, 1990, at 55 FR 12968.

BILLING CODE 4510-29-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration, Office of Records Administration

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 USC 3303a(a).

DATES: Request for copies must be received in writing on or before June 11, 1993. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESSES: Requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in the parentheses immediately after the name of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. Department of Justice, Executive office for United States Trustees (N1-60-92-5). Case files and related records.

2. Department of State (N1-59-93-6). Routine administrative records of the Bureau of International Organization Affairs, Office of the Chief of Protocol, Records Management Division, and Automated Data Processing Division.

3. Department of State, Foreign Service Posts (N1-84-93-8). Case files on voluntary agency employees.

4. Defense Contract Audit Agency (N1-372-93-1). Committee Files.

5. Defense Logistics Agency (N1-361-93-4). Records relating to the Host Enrollee Program and energy market research.

6. Federal Emergency Management Agency (N1-311-92-5). Source materials consisting of duplicate copies of FEMA records used by the agency historian.

7. Federal Emergency Management Agency (N1-311-92-6). Outputs from the Capability and Hazard Identification Program with the Fiscal Management Information System.

8. National Oceanic and Atmospheric Administration, National Weather Service (N1-27-93-1). Manuscript charts and maps, 1948-1960; storm studies, 1819-1965; and cooperative project files, 1947-1975.

9. Office of Secretary of Defense (N1-330-92-10). Facilitative and background records relating to drug enforcement activities.

10. Railroad Retirement Board (N1-184-93-7). Administrative and facilitative records of the Bureau of Unemployment and Sickness Insurance.

11. Tennessee Valley Authority, Generating Group (N1-142-93-3). Reduction of retention periods for recording instrument charts for fossil and hydroelectric generating plants.

Dated: April 19, 1993.

Trudy Huskamp Peterson,

Acting Archivist of the United States.

BILLING CODE 7515-01-M

NATIONAL SCIENCE FOUNDATION

Permit Application Received Under the Antarctic Conservation Act of 1978

April 22, 1993.

AGENCY: National Science Foundation.

ACTION: Notice of permit application received under the Antarctic Conservation Act of 1978, Public Law 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act of 1978 at title 45, part 670 of the Code of Federal Regulations. This is the required notice of permit application received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by May 24, 1993. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, room 627, Office of Polar Programs, National Science Foundation, Washington, DC 20550.

FOR FURTHER INFORMATION CONTACT: Thomas F. Forhan at the above address or (202) 357-7817.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Public Law 95-541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed by the

Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest. The application received is as follows:

1. Applicant

Wayne Z. Trivelpiece, Old Dominion University, P.O. Box 955, Bolinas, CA 94924.

Activity for Which Permit Requested

Taking. Importation into the U.S. Enter Site of Special Scientific Interest. As part of a continuing study to the behavioral ecology and population biology of penguins and their principal avian predators, the applicant proposes banding of up to 6,000 penguins, use of tracking equipment on up to 150 penguins; all birds are released unharmed after capture. The investigator's principal study site has been SSSI #8, and a permit to continue research within that area is requested. A permit to import salvaged carcasses and skeletons of penguins and Antarctic flying birds is requested, the specimens would be returned to the applicant's university for educational purposes.

Location

South Shetland Islands, Antarctica

Dates

10/01/93-04/01/94.

Thomas F. Forhan,

Permit Office, Office of Polar Programs.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of OMB review of information collection.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35).

1. *Type of submission, new, revision, or extension:* Revision.

2. *The title of the information collection:*

10 CFR Part 74—Material Control and Accounting of Special Nuclear Material

NUREG 1065—Acceptance Criteria for the Low Enriched Uranium Reform Amendments

NUREG/CR 5734—Acceptable Standard Format and Content for the Fundamental Nuclear Material Control (FNMC) Plan Required for Low-Enriched Uranium Enrichment Facilities, and

NUREG 1280—Standard Format and Content Acceptance Criteria for the Material Control and Accounting (MC&A) Reform Amendment

3. *The form number if applicable:* Not applicable.

4. *How often the collection is required:* Submission of the material control and accounting plan and the fundamental nuclear material control plan are one-time requirements which have been completed by all current licensees. Specified inventory and material status reports are required annually or semiannually. Other reports are submitted as events occur.

5. *Who will be required or asked to report:* Persons licensed under 10 CFR parts 70 or 72 who possess and use certain forms and quantities of special nuclear material.

6. *An estimate of the number of responses annually:* 22.

7. *An estimate of the total number of hours needed annually to complete the requirement or request:* 52,811 hours (an average of 406 hours per response plus 4,876 hours per recordkeeper).

8. *An indication of whether section 3504(h), Public Law 96-511 applies:* Not applicable.

9. *Abstract:* 10 CFR part 74 establishes requirements for material control and accounting of special nuclear material, and specific performance-based regulations for licensees authorized to possess and use strategic special nuclear material, or to possess and use, or produce, special nuclear material of low strategic significance. The information is used by NRC to make licensing and regulatory determinations concerning material control and accounting of special nuclear material. Submission or retention of the information is mandatory for persons subject to the requirements. The revision reflects an increase in burden because of the addition of requirements for enrichment plants, added by a rulemaking previously approved by OMB.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer: Ronald Minsk, Office of Information and Regulatory Affairs (3150-0123), NEOB-3019, Office of Management and Budget, Washington, DC 20503.

Comments may also be communicated by telephone at (202) 395-3084.

The NRC Clearance Officer is Brenda Jo. Shelton, (301) 492-8132.

Dated at Bethesda, Maryland, this 16th day of April, 1993.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

BILLING CODE 7590–01–M

[Docket No. 50–409]

La Crosse Boiling Water Reactor; Relocation of Local Public Document Room

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of intent to relocate the local public document room (LPDR) collection for the La Crosse Boiling Water Reactor.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) intends to relocate the LPDR collection for records pertaining to the La Crosse Boiling Water Reactor (BWR) from the La Crosse Public Library, La Crosse, Wisconsin, to another location (to be determined). The La Crosse Public Library, which has maintained the LPDR collection since 1972, has asked that the document collection be relocated due to the decline in its use since the facility is no longer operating. The collection currently consists of approximately 30 linear feet of paper copy records, one seven drawer and two ten drawer microfiche storage cabinets, and a microfiche reader printer with table. The paper copy records include documents pertaining only to the La Crosse BWR dated prior to 1981 and collection reference materials. The microfiche covers all NRC publicly available documents since 1981. The purpose of this notice is to invite public comment on possible LPDR sites.

DATES: Comment period expires May 27, 1993. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments filed on or before this date.

ADDRESSES: Written comments may be submitted to Mr. David L. Meyer, Chief, Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW., (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT:

Ms. Jona L. Souder, LPDR Program Manager, Freedom of Information Act/Local Public Document Room Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone number 301–492–4344, or toll-free 1–800–638–8081.

SUPPLEMENTARY INFORMATION: Among the factors the NRC will consider in selecting a location for the collection are:

(1) Whether the institution is an established document repository with a history of impartially serving the public;

(2) The physical facilities available, including shelf space, patron work space, and copying and micrographic equipment;

(3) The willingness and ability of the library staff to maintain the LPDR collection and assist the public in locating records;

(4) The public accessibility of the library, including parking, ground transportation, and hours of operation, particularly evening and weekend hours;

(5) The accessibility of the library to the handicapped;

(6) The proximity of the library to the La Crosse BWR located in Genoa, Wisconsin.

Public comments are requested on libraries in the vicinity of the La Crosse BWR that might be considered for selection as the location for this NRC local public document room collection.

Dated at Bethesda, Maryland, this 21 day of April, 1993.

For the Nuclear Regulatory Commission,

Donnie H. Grimsley,

Director, Division of Freedom of Information and Publications Services, Office of Administration.

[FR Doc. 93–9761 Filed 4–26–93; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–412]

Duquesne Light Co.; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–73, issued to Duquesne Light Company (DLC, the licensee), for operation of the Beaver Valley Power Station, Unit 2 located in Shippingport, Pennsylvania.

The proposed amendment would modify Table 4.3–1 of the Technical Specifications (TS) to add a footnote which states: "Complete verification of OPERABILITY of the manual reactor trip switch circuitry shall be performed prior to startup from the first shutdown MODE 3 occurring after April 6, 1993."

On April 5, 1993, DLC discovered a testing inadequacy for the manual reactor trip function in TS 4.3.1.1.1. The testing inadequacy was discovered as a result of DLC's review of NRC Information Notice 93–15 which alerted licensees to the potential testing inadequacy. Although there was strong evidence indicating that the manual trip system was fully functional, the TS action required by TS 3.0.3 and 4.0.3 would require plant shutdown until the test inadequacy was corrected. The licensee requested the NRC to exercise discretionary enforcement to permit continued operation until the next scheduled or unscheduled shutdown into MODE 3 operation, at which time the manual trip functional test would be performed using a corrected procedure. The NRC determined that this course of action involved minimum or no safety impact. On April 6, 1993, the NRC verbally granted discretionary enforcement, which was documented in a letter to DLC on April 9, 1993.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

Pursuant to 10 CFR 50.91(a)(6) for amendments to be granted under exigent circumstances, the NRC staff must determine that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the change involve a significant increase in the probability or consequences of an accident previously evaluated?

The probability or consequences of an accident previously evaluated is not significantly increased. The reactor trip breaker shunt and undervoltage trip actuation circuitry is redundant and reliable. Should the manual actuation of the shunt trip fail to operate, the diversity and redundancy of the reactor protection system would enable it to perform its design function. If a manual reactor trip signal did not reach the shunt trip coil, the de-energization of the undervoltage relay would cause the reactor trip breakers to open. Additionally, when the undervoltage relay is de-energized, the auto shunt trip relay (STA) also is de-energized. This action closes a contact which will energize the shunt trip coil and open the reactor trip breakers.

An additional back-up to the manual reactor trip function is contained in the Emergency Operating Procedures. These procedures direct the plant operators to perform the following actions in the event that the reactor trip breakers do not open when required:

1. Manually inserting control rods, and
2. Initiation of an emergency boration, and
3. Local opening of the reactor trip breakers and de-energization of the motor generator sets.

Therefore, since the response of the plant to an accident is unchanged, there is no significant increase in either the probability or consequences of an accident previously evaluated as a result of this proposed change.

2. Does the change create the possibility of a new or different kind of accident from any accident previously evaluated?

The proposed change does not affect the operation or response of any plant equipment or introduce any new failure mechanisms. The current accident analyses are unchanged and bound all expected plant transients.

Therefore, this proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the change involve a significant reduction in a margin of safety?

The ability of the Solid State Protection System (SSPS) to initiate a reactor trip via the undervoltage coil and indirectly energize the shunt trip coil has been verified. Should a reactor trip be required, this is the portion of the reactor trip system which would likely function to open the reactor trip breakers. It is unlikely that a manual reactor trip would be required. In the unlikely event that the operator wes required to initiate a manual reactor trip and the signal did not reach the shunt trip coil, the de-energization of the undervoltage coil would cause the reactor trip breakers to open. Additionally, when the undervoltage coil is de-energized, the auto shunt trip relay (STA) is also de-energized. This action closes a contact which will energize the shunt trip coil and open the reactor trip breakers.

The reactor trip system will continue to function as designed with no adverse impact as a result of the delay in performing the Operating Surveillance Test (OST) on the reactor trip breakers. Since the response of the plant is unchanged, there is no significant safety impact resulting from the delay in performing the surveillance testing.

The reactor trip breakers and reactor trip bypass breakers are fully functional and capable of opening in response to a Main Control Board manual trip actuation. Therefore, the proposed license amendment does not impact accident analyses or the associated radiological consequences nor does it impact systems associated with the control of radiological or non-radiological effluents.

Therefore, this proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 15 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 15-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 15-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P–223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examinedat the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555.

The filing of request for hearing and petitions for leave to intervene is discussed below.

By May 27, 1993, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's

VOL 58 ISS 79 AP 27 1993 UMI

property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of the 30-day hearing period, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 248–5100 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to Dr. Walter R. Butler: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Charnoff, Esquire, Jay E. Silberg, Esquire, Shaw, Pittman Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated April 14, 1993, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room, located at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Dated at Rockville, Maryland, this 20th day of April 1993.

For the Nuclear Regulatory Commission.

Gordon E. Edison,

Senior Project Manager, Project Directorate I–3, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 93–9763 Filed 4–26–93; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–250]

Florida Power and Light Co.; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–31 issued to the Florida Power and Light Company (the licensee) for operation of the Turkey Point Nuclear Generating Unit 3 located in Dade County, Florida.

The proposed amendment would revise the Technical Specifications (TS) 3.3.3.2 relating to the Moveable Incore Detector System to reduce the minimum number of operable detector thimbles from 38 to 25 and to increase the minimum number of detector thimbles per quadrant from two to three whenever the number of operable thimbles is less than 38. To compensate for this reduction in the number of detector thimbles, TS 3/4.2.2, Heat Flux Hot Channel Factor—$F_Q(Z)$ and TS 3/4.2.3, Nuclear Enthalpy Rise Hot Channel Factor—F(delta)H, and their associated bases would also be revised to increase their measurement uncertainty factors. The proposed amendment would be applicable to Turkey Point Unit 3 only for the remaining period of its Cycle 13.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different king of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR

50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed amendment allows operation with a fewer number of operable incore detector thimbles [than] currently permitted by the Technical Specifications. These detectors are used to monitor peaking factors; and the number of operable detectors have no impact on the probability or consequences of an accident previously evaluated. An increase in the Fq measurement uncertainty to accommodate a decrease in the number of operable detector thimbles reduces the operational margin to the Technical Specifications limit of 2.32. The 2.32 Fq limit is not affected by this proposed amendment and the results of the Loss of Coolant Accident (LOCA) analyses for Turkey Point remain valid. The increase in the F[delta]H measurement uncertainty to accommodate the decrease in operable detector thimbles reduces the operational margin to the Technical Specification limit of 1.62. The 1.62 F[delta]H limit measurement is not affected by this proposed amendment and the results of the non-Loca (DNBR) analyses remain valid.

An increase in the measured peaking factor uncertainties representing a reduction in the margin to the Technical Specifications limit is applied to ensure that the reduction in the number of operable detector thimbles conservatively calculates the limiting peaking factors in the core, thus ensuring that the monitoring duty of the incore detector system is met. This proposed amendment is only applicable to the current cycle (i.e., Cycle 13) for Turkey Point Unit 3 and sufficient margin exists to ensure that the Technical Specifications are not violated. The proposed amendment does not involve a significant increase in the probability of an accident previously evaluated since the proposed amendment does not change the Turkey Point Unit 3 plant design or operation of the facility as previously evaluated by the NRC.

The increase in uncertainties applied to F[delta]H and Fq does not change the limiting peaking factors used in the UFSAR Chapter 14 safety analyses. By maintaining the Technical Specifications limits of 2.32 and 1.62 Fq and F[delta]H respectively, FPL can assure that the consequences to all LOCA and non-LOCA accident analyses will not change and are bound by the safety analyses for Turkey Point. Therefore, the consequences of any accident previously evaluated have not changed.

(2) Operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated.

The operation of the facility in accordance with the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated since the proposed change will not affect plant safety analysis assumptions or the physical design of the facility. No new failure mode is introduced as a result of the reduction in the minimum required number of operable incore detector thimbles.

(3) Operation of the facility in accordance with the proposed amendment would not involve a significant reduction in a margin of safety.

The operation and physical characteristic of the facility is unchanged by this proposed Technical Specification amendment. By increasing the measurement uncertainties with increasing number of failed detector thimbles the margin of safety is not reduced by the reduction in the number of operable detector thimbles. The increased uncertainty factors ensures that the margin of safety assumed in the Technical Specification limits of 2.32 and 1.62 on Fq and F[delta]H is not exceeded.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P–223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555.

The filing of requests for hearing and petition for leave to intervene is discussed below.

By May 27, 1993, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at Florida International University, University Park, Miami, Florida 33199. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the

VOL 58 ISS 79 AP 27 1993 UMI

petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in providing the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to reply to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 248–5100 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to Herbert N. Berkow, petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Harold F. Reis, Esquire, Newman and Holtzer, P.C., 1615 L Street, NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, and supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated April 13, 1993, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at Florida International University, University Park, Miami, Florida 33199.

Dated at Rockville, Maryland, this 20th day of April 1993.

L. Raghaven,

Project Manager, Project Directorate II–2, Division of Reactor Projects—I/II, Office of the Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

[Docket Nos. 50–327 and 50–328]

Tennessee Valley Authority, Sequoyah Nuclear Plant, Units 1 and 2; Denial of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) has denied a request by the Tennessee Valley Authority (licensee) for an amendment to Facility Operating License Nos. DPR–77 and DPR–78 issued to the licensee for operation of the Sequoyah Nuclear Plant, Units 1 and 2, located in Soddy Daisy, Tennessee. Notice of Consideration of Issuance of this amendment has not been published in the **Federal Register**.

The purpose of the licensee's amendment request was to revise the Technical Specifications (TS) to increase the allowed outage time specified for the centrifugal charging pumps for 3 days to 7 days with one charging pump inoperable.

The NRC staff has concluded that the licensee's request cannot be granted. The licensee was notified of the Commission's denial of the proposed change by a letter dated April 20, 1993.

By May 27, 1993, the licensee may demand a hearing with respect to the denial described above. Any person whose interest may be affected by this proceeding may file a written petition for leave to intervene.

A request for hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC., 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date.

A copy of any petitions should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC, 20555, and to the Office of the General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, ET 11H, Knoxville, Tennessee 37902, attorney for the licensee.

For further details with respect to this action, see (1) the application for amendment dated August 28, 1991, and (2) the Commission's letter to the licensee dated April 20, 1993.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee 37402. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC, 20555, Attention: Document Control Desk.

Dated at Rockville, Maryland, this 20th day of April 1993.

For the Nuclear Regulatory Commission.

David E. LaBarge,

Acting Director, Project Directorate II–4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 93–9762 Filed 4–26–93; 8:45 am]

BILLING CODE 7590–01–M

POSTAL RATE COMMISSION

Notice and Order Accepting Appeal and Establishing Procedural Schedule Under 39 U.S.C. 404(b)(5)

Issued April 21, 1993.

Before Commissioners: George W. Haley, Chairman; John W. Crutcher; W. H. "Trey" LeBlanc, III; H. Edward Quick, Jr.; Wayne A. Schley.

Docket Number: A93–15

Name of Affected Post Office: Lodi, Texas 75564

Name(s) of Petitioner(s): J.C. McKnight and others

Type of Determination: Closing

Date of filing of appeal papers: April 19, 1993

Categories of Issues Apparently Raised:

1. Effect on postal services [39 U.S.C. 404(b)(2)(C)].

2. Effect on the community [39 U.S.C. 404(b)(2)(A)].

Other legal issues may be disclosed by the record when it is filed; or, conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition, in light of the 120-day decision schedule [39 U.S.C. 404(b)(5)], the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request; a copy shall be served on the petitioners. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memoranda previously filed.

The Commission orders:

(A) The record in this appeal shall be filed on or before May 4, 1993.

(B) The Secretary shall publish this Notice and Order and Procedural Schedule in the **Federal Register**.

By the Commission.

Charles L. Clapp,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–32185; File No. SR–Amex–93–10]

Self-Regulatory Organizations; Filing and Order Granting Temporary Accelerated Approval to Proposed Rule Change by American Stock Exchange, Inc., Relating to an Extension of a Pilot Program Which Permits Specialists to Grant Stops in a Minimum Fractional Change Market

April 21, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on March 12, 1993, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1991).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend amendments to Amex Rule 109 for an additional three months until July 20, 1993.[3] The text of the proposed rule change is available at the Office of the Secretary, Amex, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The self-regulatory organization has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On April 17, 1992, the Commission approved amendments to Exchange Rule 109 for a one-year pilot program.[4] The amendments permit a specialist, upon request, to grant to stop[5] in a minimum fractional change market[6] for any order of 2,000 shares or less, up to a total of 5,000 shares for all stopped orders, without obtaining prior Floor Official approval. A Floor Official,

[3] The Amex originally requested a one-year extension of its Rule 109 pilot program. The Commission, however, believes that additional information is necessary before the Commission can review the Amex's proposal and determine whether the program should be extended for such a period. To allow the pilot to continue while this information is being gathered and evaluated, the Amex has agreed to a three-month extension. Letter from Claudia Crowley, Special Counsel, Legal & Regulatory Policy Division, Amex, to Diana Luka-Hopson, Branch Chief, Division of Market Regulation, SEC, dated April 19, 1993 ("Amendment No. 1").

[4] See Securities Exchange Act Release No. 30603 (April 17, 1992), 57 FR 15340 (April 27, 1992) (File No. SR–Amex–91–05) ("1992 Approval Order"). Commission approval of these amendments expires on April 20, 1993. The Exchange seeks accelerated approval of the proposed rule change in order to allow the pilot program to continue without interruption.

[5] When a specialist agrees to a floor broker's request to "stop" a market order, the specialist is obligated to execute the order at the best bid or offer, or better if obtainable. See Amex Rule 109(a).

[6] Amex Rule 127 sets forth the minimum fractional changes for securities traded on the Exchange.

VOL 58 ISS 79 AP 27 1993 UMI

however, must authorize a greater order size or aggregate share threshold.

During the course of the pilot program, the Exchange has monitored compliance with the rule's requirements; analyzed the impact on orders on the specialist's book resulting from the execution of stopped orders at a price that is better than the stop price; and reviewed market depth in a stock when a stop is granted in a minimum fractional change market. The Exchange believes that the amendments to Rule 109 have provided a benefit to investors by providing an opportunity for price improvement, while increasing market depth and continuity without adversely affecting orders on the specialist's book. The Exchange's findings in this regard have been forwarded to the Commission under separate cover.[7]

The Exchange is proposing to extend the pilot program for an additional three month period,[8] in order to provide an opportunity for the Exchange and the Commission to further study and monitor the effects of the pilot program.

2. Statutory Basis

The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)(5) in particular in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest. The Exchange believes that the proposed amendments to Rule 109 are consistent with these objectives in that they provide a market mechanism which contributes to continuity and depth in the markets for exchange-traded securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will impose no burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Amex. All submissions should refer to File No. SR-Amex-93-10 and should be submitted by May 18, 1993.

IV. Commission's Findings and Order Granting Accelerated Approval of Proposed Rule Change

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, with section 6(b)(5)[9] and section 11(b)[10] of the Act. The Commission believes that the amendments to Rule 109 should further the objectives of section 6(b)(5) and section 11(b) through pilot program procedures designed to allow stops, in minimum fractional change markets, under limited circumstances that provide for the possibility of price improvement to customers whose orders are granted stops.[11]

In its order approving the pilot procedures,[12] the Commission asked the Amex to study the effects of stopping stock in a minimum fractional change market. Specifically, the Commission expressed interest in (1) the percentage of stopped orders executed at the stop price, versus the percentage of such orders receiving a better price; (2) whether limit orders on the specialist's book were being bypassed due to the execution of stopped orders at a better price; (3) market depth, including a comparison of the size of stopped orders to the size of the opposite side of the quote and to any quote size imbalance; and (4) specialist compliance with the pilot program's procedures.

On March 12, 1993, the Exchange submitted to the Commission its monitoring report regarding the amendments to Rule 109.[13] The Commission believes that, although this monitoring report provides certain useful information concerning the operation of the pilot program, the Amex must provide further data before the Commission can fairly and comprehensively evaluate the Amex's use of the pilot procedures. To allow such additional information to be gathered and reviewed, without compromising the benefit that investors might receive under Rule 109, the Commission believes that it is reasonable to extend the pilot program for an additional three months. During this extension, the Commission expects the Amex to respond fully to the concerns set forth below.

First, the monitoring report indicates that 54.9% of orders stopped in minimum fractional change markets received price improvement. The Commission, therefore, believes that the pilot procedures provide a benefit to investors by offering the possibility of price improvement to customers whose orders are granted stops in minimum fractional change markets. Assuming that most stopped orders fall within Rule 109's size parameters, the amendments would mainly affect small public customer orders, which the Commission envisioned could most benefit from professional handling by the specialist.

During the pilot extension, the Commission requests that the Amex continue to monitor the percentage of stopped orders executed at the stop price, as compared to the percentage of such orders receiving a better price. To determine who receives the benefit of price improvement, the Amex should also calculate, for the same sample of orders, the percentage of stopped orders which are for 2,000 shares or less.[14]

In terms of how the pilot program affected customer limit orders existing on the specialist's book,[15] the Amex

[7] See letter from Claudia Crowley, Special Counsel, Legal & Regulatory Policy Division, Amex, to Diana Luka-Hopson, Branch Chief, Division of Market Regulation, SEC, dated March 11, 1993 ("monitoring report").

[8] See Amendment No. 1, *supra*, note 3.

[9] 15 U.S.C. 78f (1988).

[10] 15 U.S.C. 78k (1988).

[11] For a description of Amex procedures for stopping stock in minimum fractional change markets, and of the Commission's rationale for approving those procedures on a pilot basis, see 1992 Approval Order, *supra*, note 4. The discussion in the aforementioned order is incorporated by reference into this order.

[12] See, *supra*, note 4.

[13] See, *supra*, note 7.

[14] The Commission believes that an effective compliance program should include continuous surveillance of how often stopped orders fall within the pilot's size parameters.

[15] When stock is stopped, book orders on the opposite side of the market that are entitled to immediate execution lose their priority. If the stopped order then receives an improved price, limit orders at the stop price are bypassed and, if the market turns away from that limit, may never be executed.

As for book orders on the same side of the market as the stopped stock, the Commission believes that Rule 109's requirements make it unlikely that these limit orders would not be executed. Under the Amex's pilot program, an order can be stopped if and only if a substantial imbalance exists on the opposite side of the market. See, *infra*, text accompanying notes 20–23. Given that non-discretionary requirement, the stock would probably trade away from the large imbalance, resulting in execution of orders on the book.

[16] See, *e.g.*, SEC, Report of the Special Study of the Securities Markets of the Securities and Exchange Commission, H.R. Doc. No. 95, 88th Cong., 1st Sess. Pt. 2 (1963).

[17] In the past, the Amex has stated that it does not have the electronic display book technology necessary to make this determination. Telephone conversation between William Iommi, Executive Director, Trading Analysis Division, Amex, and Beth Stekler, Attorney, Division of Market Regulation, on April 6, 1993. However, use of such a display book on the Amex floor is expected to begin on April 26, 1993. See Securities Exchange Act Release No. 32140 (April 14, 1993) (File No. SR-Amex-92-46). The Amex has stated that the electronic book will be phased in, floor-wide, over the remainder of this year. Telephone conversation between William Iommi, Executive Director, Trading Analysis Division, Amex, and Beth Stekler, Attorney, Division of Market Regulation, on April 19, 1993. The Commission expects that the Amex will thereafter be able to assess whether the relevant limit orders had, as of the close, been executed, cancelled or remained on the book.

[18] In this regard, the Commission would like the Amex to submit the documentation the Amex is relying upon to support its conclusions about the final disposition of these limit book orders. See, *infra*, note 19.

[19] As explained in *supra* note 17.

report merely states that "in virtually all cases" such orders were executed at their limit price. The Commission historically has been concerned that book orders may get bypassed when stock is stopped.[16] To reassure the Commission that Rule 109 does not harm public customers with orders on the specialist's book, the Amex should provide detailed facts supporting its conclusion that the pilot's impact on book orders is "minimal."

The Commission therefore requests that the Amex conduct a more rigorous review of this issue. Specifically, the Amex should attempt to measure how often limit orders on the opposite side of the market from a stopped order are entitled to, but do not receive, immediate execution. At a minimum, the Amex should determine how often such limit orders are executed by the close of the day's trading.[17] Finally, the Amex should conduct a one-day review of all book orders in the five stocks receiving the greatest number of stops, and should submit to the Commission both raw trade data for,[18] and a description of the final disposition of,[19] each such order.

Third, the Amex's monitoring report found that market depth increased when stopped orders received price improvement. According to the report, however, there was little, if any, increase in depth when such orders were executed at the stop price. From the Commission's perspective, this response does not directly or fully address the substantive issues raised by the pilot program. The Amex has stated, both to the Commission[20] and to its members,[21] that specialists can only stop stock in a minimum fractional change market when (1) an imbalance exists on the opposite side of the market and (2) such imbalance is of sufficient size to suggest the likelihood of price improvement. Commission approval of this pilot program turned, in large part, on such representations. However, based on the Exchange's monitoring report, it does not appear that the Amex has established a formal system for routinely measuring, in some quantitative way, the size of the market imbalance and the sufficiency of that imbalance.

The Commission, therefore, wishes to emphasize strongly that Rule 109 can only be implemented when it is clear that the imbalance on the opposite side of the market from the order being stopped is of sufficient size to suggest the likelihood of price improvement. No other market condition (no matter how great the likelihood of price improvement) justifies a specialist's stopping stock in a minimum fractional change market. In summary, the Commission believes that the requirement of a sufficient market imbalance is the most critical aspect of the pilot program.[22] Strict adherence to this standard is necessary to ensure that stops are only granted, in a minimum fractional change market, when the benefit (*i.e.*, price improvement) to orders being stopped far exceeds the potential of harm to orders on the specialist's book.[23]

To evaluate how this standard is being applied in practice, the Commission requests that the Amex conduct a comprehensive quantitative analysis of market depth.[24] In its next monitoring report, the Amex should compare the size of the stopped order to the size of the opposite side of the quote and to any quote size imbalance.[25] The Amex should break individual orders down as follows: 2,000 shares or less; 2,001 to 5,000 shares; 5,001 to 10,000 shares; and over 10,000 shares. The Amex should provide the requested information in the form of an average for all buy orders stopped, and then for all sell orders stopped, in each of the above size ranges. Furthermore, when a Floor Official approves a stop that causes the total number of stopped shares to exceed 5,000 shares, the Amex should provide the Commission with information comparing the aggregate size of all orders stopped to the size of the opposite side of the quote and to any quote size imbalance.[26] The Amex should provide the requested information in the form of an average for multiple buy orders, and then for multiple sell orders, which require such Floor Official approval. Finally, the Amex should calculate, as of the time a stop is granted, the ratio of the size of the bid to the size of the offer.[27] The Amex should provide the requested information in the form of an average for all buy orders stopped, and then for all sell orders stopped, in each of the aforementioned order size ranges.[28]

Finally, the Amex report describes its efforts regarding compliance with the pilot procedures. According to the Exchange, every order that exceeded Rule 109's parameters received Floor Official approval. In this regard, the Commission believes that the Exchange has sufficient means to determine whether a specialist complied with the amendments' order size and aggregate share thresholds and, if not, whether Floor Official approval was obtained for

[20] See letter from Claire P. McGrath, Senior Counsel, Legal & Regulatory Policy Division, Amex, to Mary Revell, Branch Chief, Division of Market Regulation, SEC, dated January 6, 1992 (Amendment No. 1 to File No. SR-Amex-91-05). Amendment No. 1 formally incorporated the requirement that the indicia of market depth discussed below must, without exception, be satisfied before a specialist is permitted to stop stock in a minimum fractional change market.

[21] See Amex Information Circular Nos. 92-74 (April 24, 1992) and 93-333 (April 7, 1993).

[22] Recently, in approving a comparable proposal by the New York Stock Exchange, the Commission placed similar emphasis on the critical nature of the sufficient size standard. See Securities Act Release No. 32031 (March 22, 1993), 58 FR 16563 (March 29, 1993) (File No. SR-NYSE-93-18).

[23] See, *supra*, text accompanying notes 15–19.

[24] The Commission believes that an effective compliance program should include surveillance of the indicia of market depth discussed below, see *infra* text accompanying notes 25–28, for every stopped order.

[25] Every time a specialist stops a market order to buy, the size of that stopped order should be compared (1) to the size of the offer side of the quote and (2) to the quote size imbalance, *i.e.*, the difference between the size of the offer and the size of the bid.

Every time a specialist stops a market order to sell, the size of that stopped order should be compared (1) to the size of the bid side of the quote and (2) to the quote size imbalance, *i.e.*, the difference between the size of the bid and the size of the offer.

[26] As explained in *supra* note 25.

[27] Every time a specialist stops a market order to buy, the Amex should calculate the size of the bid as a percentage of the size of the offer.

Every time a specialist stops a market order to sell, the Amex should calculate the size of the offer as a percentage of the size of the bid.

[28] See, *supra*, text accompanying note 25.

VOL 58 ISS 79 AP 27 1993 UMI

larger parameters. The Commission also notes the Amex's on-going effort to keep its specialists properly informed about the pilot program's requirements. In this context, the Amex has distributed Information Circulars [29] and held continuing educational sessions on the pilot program and its requirements for stopping stock in minimum fractional change markets.

During the pilot extension, the Commission requests that the Amex continue to monitor closely specialist compliance with Rule 109's procedures. As before, the Amex should determine how often orders requiring Floor Official approval to be stopped do not receive such approval. In so doing, the Amex should distinguish between instances where the specialist did not ask for permission and those where it was denied (and, if so, on what grounds). If Amex surveillance reveals violations of this or any other requirement of the pilot (especially the requirement of a sufficient market imbalance, as discussed above),[30] the Amex should gather information about the frequency of such non-compliance and the market conditions prevailing at the time of each instance thereof. The Commission also requests that the Amex report on the action taken by the Exchange in response to each instance of specialist non-compliance with the pilot procedures.

The Commission requests that the Amex report its findings on these matters by June 20, 1993. In addition, if the Exchange determines to request an extension of the pilot program beyond July 20, 1993, the Commission requests that the Amex also submit a proposed rule change by June 20, 1993.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of the notice of filing thereof. This will permit the pilot program to continue on an uninterrupted basis. In addition, the procedures the Exchange proposes to continue using are the identical procedures that were published in the Federal Register for the full comment period and were approved by the Commission.[31]

It is therefore ordered, pursuant to section 19(b)(2)[32] that the proposed rule change (SR-Amex-93-10) is hereby approved for a three-month period until July 20, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[33]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34-32177; File No. SR-NASD-93-8]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Clarifying NASD Authority To Suspend or Terminate Nasdaq National Market System Securities When the Issuer Has Filed for Bankruptcy or Announces Liquidation

April 20, 1993.

On February 28, 1993, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder.[2] The proposal amends Part III, Section 4(d) of Schedule D to the By-Laws ("Section 4(d)")[3] to clarify the NASD's authority to suspend or terminate Nasdaq National Market System ("Nasdaq NMS") securities when the issuer files for bankruptcy or announces liquidation.

Notice of the proposed rule change, together with its terms of substance, appeared in the Federal Register on March 16, 1993.[4] The Commission received no comments on the proposal. This order approves the rule change.

Schedule D applies different delisting criteria for Nasdaq Small-Cap and Nasdaq NMS companies filing for bankruptcy. Part II, Section 3(a) of Schedule D[5] provides that the Association "may" suspend or delist an otherwise qualified Nasdaq Small-Cap security when the issuer files for protection under the federal bankruptcy laws. Section 4(d) applies a similar requirement to Nasdaq NMS securities and provides that securities of a Nasdaq NMS issuer filing for bankruptcy or announcing liquidation "shall not remain designated" unless the NASD determines that investor protection and the public interest warrant continued designation.

In practice, however, the NASD applies the same standard for Nasdaq Small-Cap and NMS issuers filing for bankruptcy protection or announcing liquidation. Specifically, a Nasdaq Small-Cap or NMS company filing for bankruptcy or announcing liquidation must notify the NASD, which may institute a trading halt or suspend quotations in the security in Nasdaq, pending review of the company's financial condition. The company must then provide the NASD with current financial information, including a balance sheet and statement of operations, and the NASD then determines whether the company's securities satisfy the NASD's continued maintenance criteria or whether the company has a credible plan for returning to compliance with the NASD's continued maintenance criteria. Requests for exceptions to the delisting of a Nasdaq Small-Cap or NMS security are reviewed by the NASD on a case-by-case basis. If the NASD determines that the public interest and the protection of investors warrant continued designation, a "Q" symbol is attached to the trading symbol of the company's securities to disclose to the public that the issuer has filed for bankruptcy protection or plans to liquidate.

The NASD believes that the term "shall" in section 4(d) implies that the filing for bankruptcy or the announcement of liquidation by a Nasdaq NMS issuer will effect an automatic delisting of the issuer's securities without recourse to a case-by-case NASD review, as currently provided to issuers of both Nasdaq Small-Cap and NMS securities. The NASD, therefore, is amending section 4(d) to preplace the term "shall" with the term "may," to eliminate any such misinterpretation of current language.

The Commission believes that the rule change will clarify for investors that when a Nasdaq NMS issuer files for bankruptcy or announces its intent to liquidate, its securities are not automatically delisted, but instead, the NASD commences a review of the company to determine the action that best serves the public interest and the protection of investors.

For these reasons, and for the reasons above, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD and, in particular, the requirements of section

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b-4 (1992).

[3] NASD Manual, (CCH) ¶ 1811

[4] Securities Exchange Act Release No. 31973 (March 10, 1993), 58 FR 14232.

[5] NASD Manual, (CCH) ¶ 1805.

15A(b)(6) of the Act.[6] Section 15A(b)(6) requires that the NASD's rules be designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing and settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the instant rule change be, and hereby is, approved, effective within 45 days.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

[Release No. 34-32178; File No. SR-PSE-92-20]

Self-Regulatory Organizations; Filing of Proposed Rule Change by the Pacific Stock Exchange, Inc. to Supplement the Provisions of Section 15(f) of the Securities Exchange Act of 1934 and the Insider Trading and Securities Fraud Enforcement Act of 1988

April 20, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 14, 1992, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PSE is submitting to the Commission a rule change that supplements the provisions of section 15(f) of the Act and the Insider Trading and Securities Fraud Enforcement Act of 1988 ("ITSFEA"). The text of the proposed rule change is available at the Compliance Department of the PSE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Change

Proposed Rule 2.6(e) is intended to supplement section 15(f) of the Act and the ITSFEA, by requiring every member of the Exchange to establish, maintain and enforce written policies and procedures reasonably designed to prevent the misuse of material, non-public information by such member and any person associated with the member. In addition, Rule 2.6(e) mandates that all members that are required to file SEC Form X-17A-5 ("FOCUS Reports") with the Exchange on an annual basis must submit with their FOCUS Reports an attestation of compliance with the Rule. Finally, the proposed Rule establishes minimum standards for compliance with the record-keeping requirements of the Rule and the Act, and requires disclosure by members, and associated persons, to the Exchange's Surveillance Department of any possible misuse of material, non-public information.

The proposed Rule contains four Commentaries. Commentary .01 describes conduct that would constitute the misuse of material, non-public information. Specifically, such conduct would include, but is not limited to: (1) Trading in any securities, or in any related securities, options or other derivative securities of a corporation while in possession of material, non-public information concerning that corporation; (2) trading in an underlying security or related options or other derivative securities while in possession of material, non-public information concerning imminent transactions in the underlying security or related securities; and (3) disclosing to another person or entity information described in (1) or (2) for the purpose of facilitating the possible misuses of such material, non-public information.

The scope of the aforementioned definition is intended to be consistent with the intended goal of section 15(f) of the Act and ITSFEA: To prevent the misuse of material, non-public information. This definition should be broad enough to encompass frontrunning, trading on the basis of material corporate inside information, tipping and misappropriating material corporate inside information.

Commentary .02 would define the term "associated person" or "person associated with a member" as any partner, officer, director, or branch manager of a member (or any person occupying a similar status or performing similar functions), any person directly or indirectly controlling, controlled by, or under common control with a member, or any employee of a member. The purpose of this Commentary is to provide a definition that is consistent with the definition of "associated person" in section 3(a)(21) of the Act.

Commentary .03 would require members to establish, maintain and enforce certain policies and procedures pursuant to Rule 2.6(e). Specifically, members would be required to: (1) Advise all associated persons in writing of the prohibition against the misuse of material, non-public information; (2) maintain for at least three years, the first two years in an easily accessible place, signed attestations from the member, and all associated persons of the member, affirming their awareness of, and agreement to abide by, the above-mentioned prohibitions; (3) maintain for at least three years, the first two years in an easily accessible place, records of all brokerage accounts in which an associated person either has a direct or indirect interest or makes investment decisions; (4) periodically review all such brokerage accounts for the purpose of detecting the possible misuse of material non-public information; and (5) identify and document business dealings the member may have with publicly traded corporations that may result in the member receiving material non-public information.

The standards contained in this Commentary are intended to be minimum standards for compliance with the record-keeping requirement of the Act and the Rule. Adherence to these standards will not necessarily constitute compliance with the Act and the Rule for all members. The adequacy of any one member's policies and procedures will depend on the nature of that member's business.

Commentary .04 and the Bulletin (Exhibit B to the proposed rule change) describes a set of forms, denominated as the "Sample ITSFEA Compliance

VOL 58 ISS 79 AP 27 1993 UMI

Procedures" (Exhibit C to the proposed rule change), which may be used by certain "eligible members" to satisfy the record-keeping and filing requirements of the Act and the Rule. "Eligible members" are member organizations and sole PSE members that do not carry or introduce customer accounts and for whom the Exchange is the Designated Examining Authority.

Specifically, the Sample ITSFEA Compliance Procedures require: (1) All associated persons to disclose each securities account in which they have a direct or indirect financial interest, or make investment decisions; (2) all associated persons to disclose whether they are an officer, director or 10% shareholder in a company whose shares are publicly traded; (3) written affirmation by all associated persons that they understand and will abide by the prohibition against the misuse of material, non-public information; (4) written affirmation by a senior officer, partner or sole proprietor that such person ensures that all of the ITSFEA compliance procedures are being followed, including the regular review of all accounts and trading activities of associated persons. The Sample ITSFEA Forms are intended to constitute the minimum policies and procedures required by the Act and the Rule; their use does not ensure compliance with the record-keeping and filing requirements.

The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)(5) in particular, in that it prevents fraudulent and manipulative acts and practices and promotes just and equitable principles of trade.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change imposes a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer periods to be appropriate and publishes its reasons for so finding, or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the PSE. All submissions should refer to File No. SR-PSE-92-20 and should be submitted by May 18, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34-32175; International Series Release No. 534; File No. SR-PHLX-92-20]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating to New Foreign Currency Options Floor Procedure Advice (FF-17) Defining the Perimeters of the Trading Pit Areas

April 20, 1993.

On August 6, 1992, the Philadelphia Stock Exchange, Inc. ("PHLX" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] a proposal to amend its rules by adding a new Foreign Currency Options Floor Procedure Advice ("OFPA") FF-17 entitled "Foreign Currency Options ("FCO") Trades to be Effected in the Pit."

The proposed rule change was published for comment in Securities Exchange Act Release No. 31143 (September 3, 1993), 57 FR 41535. No comments were received on the proposed rule change.

The proposal requires each bid and offer represented for execution on the FCO floor to be voiced loudly and audibly in the option's trading pit. For purposes of OFPA FF-17, the proposal defines "trading pit" as "the common area immediately in front of the respective option post and, in case of an active trading crowd, all common areas immediately adjacent thereto necessary to contain such crowd."

In addition, for any trading segment,[3] the proposal authorizes a floor official to extend the boundaries of a trading pit to include other common areas available on the floor for trading, except booth spaces and the aisles between the booth spaces. The OFPA includes the following fine schedule for violations of its provisions: (1) $100 for the first occurrence; (2) $500 for the second occurrence; and (3) a sanction discretionary with the Exchange's Business Conduct Committee ("BCC") for the third occurrence and any occurrence thereafter.

The PHLX explains that the proposal, which originated with the night trading session, is designed to: (1) Define the perimeters of the trading pit areas, (2) provide for compliance with the perimeters through the PHLX's minor disciplinary plan procedures; and (3) reconcile the controversy between traders situated in the common pit areas fronting the rows of broker booths who may be at risk of missing orders which emanate from the floor broker booths and floor brokers who want to remain on the telephone with a customer while an order is being represented. Although the proposal will restrict the execution of orders from broker booths, the PHLX notes that floor brokers may shout their orders to two-dollar brokers who can represent their orders in the crowd.

The Commission finds that the proposed rule change is consistent with

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1992).

[3] The PHLX expanded its foreign currency options trading hours on September 20, 1990, in order to coincide with the afternoon business hours in Japan and the Far East. The Exchange's foreign currency options trading hours are 18 hours in duration, lasting from 7 p.m. to 11 p.m. (EDT) and 12:30 a.m. to 2:30 p.m. (EDT). See Securities Exchange Act Release No. 28470 (September 25, 1990), 55 FR 40253.

the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6.[4] Specifically, the Commission finds that the OFPA is designed to facilitate transactions in securities, perfect the mechanism of a free and open market, and protect investors and the public interest by enhancing the fair, orderly and efficient operation of the PHLX's markets. By providing for specific trading pit areas and requiring that all FCO orders be voiced loudly and audibly in their respective trading pit areas, the Commission believes it will be easier for all market participants to hear all open interest in the crowd and equally participate and represent their orders. Accordingly, the Commission believes the proposal will help to ensure that all FCO orders are represented adequately and allowed to interact fully with one another, thereby, in turn, helping to ensure the best execution of customers' orders.

In addition, the Commission believes that the OFPA's definition of trading pit as "the common area immediately in front of the respective option post and, in case of an active trading crowd, all common areas immediately adjacent thereto necessary to contain such crowd," should reduce confusion on the trading floor, facilitate the orderly functioning of the PHLX's markets and help to ensure the efficient execution of transactions by identifying the trading pit for a given option so that bids and offers may be placed in a limited and clearly specified area. At the same time, the provision allowing a floor official to extend the boundaries of a trading pit should help the PHLX to accommodate the needs of market participants. For example, the provision will allow a floor official to extend the trading area during times when there are relatively few participants on the Exchange's floor, such as the night trading session. In addition, should a particular foreign currency option be in a "break-out" situation with extreme volume and volatility, the floor official would be able to expand the size of the pit to accommodate those market participants who decide to trade the option.

Moreover, the Commission also believes that it is appropriate for the Exchange to establish a fine schedule consistent with its Minor Infraction Rule Plan for minor infractions of its trading pit perimeter and order announcement rules.[5] Specifically, the Commission believes that the use of the fine schedule will enable Exchange officials to impose sanctions for minor infractions of the trading pit perimeter and order announcement rules in a timely manner. The Commission also believes that this streamlined disciplinary process will help the Exchange to ensure that members of the foreign currency options trading crowds abide by the Exchange's rules governing the establishment of trading pit areas and the announcement of orders.

Finally, the Commission finds that the OFPA's fine schedule and the inclusion of the violations in the PHLX's minor rule plan will provide a fair and effective means to enforce compliance with the rule consistent with the requirements of section 6(b)(6) and 6(b)(7) of the Act.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[6] that the proposed rule change (SR-PHLX-92-20) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 34-32174; File No. SR-PHLX-92-22]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval to a Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating to an Extension and Expansion of the Pilot Program for Position Limit Exemptions for Hedged Equity Options Positions

April 20, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on August 19, 1992, the Philadelphia Stock Exchange, Inc. ("PHLX" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

On May 24, 1988, the Commission approved the PHLX's proposal to adopt Exchange Rule 1001, Commentary .07, on a two-year pilot basis.[1] Commentary .07 provides a limited exemption from equity option position limits for the four most commonly used hedge positions: (i) Long call and short stock; (ii) short call and long stock; (iii) long put and long stock; and (iv) short put and short stock. The PHLX proposes to extend the pilot program through November 17, 1993, and to expand Commentary .07 to include convertible securities. Specifically, Commentary .07, as amended, will exempt from position and exercise limits stock options hedged by 100 shares of stock or securities convertible into the stock. The text of the proposal is available at the Office of the Secretary, PHLX, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

[4] 15 U.S.C. 78F (1982).

[5] Even though the Exchange has proposed that violations of the trading pit perimeter and order announcement rules for foreign currency options be sanctioned according to the PHLX's Minor Infraction Rule Plan, violations of these rules do not necessarily have to be subject to the Minor Infraction Rule Plan. For instance, for egregious violations, the Commission would expect that these matters would be handled under the PHLX's full disciplinary procedures.

[6] 15 U.S.C. 78s(b)(2) (1982).

[7] 17 CFR 200.30-3(a)(12) (1992).

[1] See Securities Exchange Act Release No. 25738 (May 24, 1988), 53 FR 20201 (order approving File Nos. SR-Amex-87-13, SR-CBOE-87-27, and SR-PHLX-87-32) ("Pilot Approval Order"). See also Securities Exchange Act Release Nos. 29436 (July 12, 1991) 56 FR 33317 (order approving File No. SR-NYSE-91-19, relating to extension of pilot programs for position limit exemptions for hedged equity option and index option positions and expansion of the pilot program to allow the underlying hedged portfolio to include securities that are readily convertible into common stock); 27326 (October 2, 1989), 54 FR 42121 (order approving File No. SR-Amex-89-20, extending and expanding the exchange's index hedge exemption pilot program to include convertible instruments in the "equivalent" positions that may be eligible to serve as the basis for the underlying exemption); and 27322 (September 29, 1989), 54 FR 41889 (order approving File No. CBOE-89-08, extending and expanding exchange's index hedge exemption program to include in qualified stock portfolios securities readily convertible into stock and, for convertible bonds, those that are economically convertible into common stock).

VOL 58 ISS 79 AP 27 1993 UMI

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Currently, Exchange Rule 1001, Commentary .07, which was approved by the Commission on a two-year pilot basis on May 24, 1988,[2] provides a limited exemption from equity option position limits for the four most commonly used hedge positions: (i) Long call and short stock; (ii) short call and long stock; (ii) short call and long stock; (iii) long put and long stock; and (iv) short put and short stock. The PHLX proposes to amend Commentary .07 to extend the pilot program through November 17, 1993, to clarify that the hedge exemption applies to exercise limits as well as position limits, and to expand Commentary .07 to include convertible holdings (securities convertible into the stock) as the underlying basis for the exemption. To help ensure that the pilot's expiration is not overlooked, paragraph (b) of Commentary .07 will state that the equity hedge exemption pilot program has been authorized by the Commission through November 17, 1993.

Currently, Commentary .07's hedge exemption applies only to stock options where each option contract is hedged by 100 shares of stock. The PHLX proposes to add convertible securities to the securities eligible to serve as the underlying basis for the exemption.[3] The Exchange believes that such convertible securities are an appropriate hedge against equity options because they represent the same economic interest. For example, the price of the convertible security moves with the stock and such security represents the right to receive the same security as that underlying the option at a future date.

The Exchange believes that the proposed addition will provide greater depth and liquidity to the PHLX's equity options market and will afford investors the opportunity to effectively hedge their stock portfolios without increasing the possibility of manipulation in the options markets or in the underlying stock market. The PHLX states that it has not experienced any significant problems with the operation of the pilot and will continue to monitor the effects of the hedge exemption on the market to ensure that problems do not arise due to the increased position and exercise limits authorized by the exemption.

[2] See Pilot Approval Order, *supra* note 1.

[3] The PHLX notes that the Chicago Board Options Exchange ("CBOE") has submitted a similar proposal. See File No. SR–CBOE–91–43.

The PHLX believes that the proposed rule change is consistent with section 6(b)(5) of the Act in that it is designed to prevent fraudulent and manipulative acts and practices and to protect investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has requested that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the Act.[4]

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirement of section 6(b)(5) thereunder.[5] Specifically, the Commission concludes, as it did when approving the commencement of the pilot, as well as similar programs by the other options exchanges,[6] that the PHLX's proposal to provide for increased position and exercise limits for equity options in circumstances where those excess positions are fully hedged with offsetting stock positions will provide greater depth and liquidity to the market and allow investors to hedge their stock portfolios more effectively, without significantly increasing concerns regarding intermarket manipulations or disruptions of either the options markets or the underlying stock market.

In addition, with respect to the Exchange's proposal to expand the types of securities eligible to serve as the basis for the underlying hedge position to include convertible securities, the Commission believes such an expansion is consistent with the Act because it will allow investors to use equity options more efficiently and effectively to hedge positions in instruments that are economically equivalent to stocks.[7] Specifically, because the value of a convertible security likely will fluctuate in tandem with the value of the security that it is convertible into, the Commission believes investors with positions in convertible securities should be able to hedge their positions with equity options to the same extent that investors with long or short positions in the underlying security can. Moreover, as with the original pilot program, the Commission believes the expansion of the pilot program to include convertible securities likely will enhance the depth and liquidity in the Exchange's options markets. In addition, because the pilot program still requires the positions in the convertible securities and the corresponding options to be fully hedged, the Commission believes the expansion will not significantly increase concerns regarding intermarket manipulations or disruptions of either the options markets or the underlying stock market. Lastly, the Commission notes that the hedged position limit pilot programs of the other options exchanges have been expanded to include convertible securities.[8] Accordingly, the Commission believes it is appropriate and consistent with the Act to expand the pilot program to include convertible securities.

The Commission also notes that before the pilot program can be approved on a permanent basis the PHLX must provide the Commission with a report on the operation of the pilot.[9] Specifically, the PHLX must provide the Commission with details on: (1) The frequency with which the exemptions have been used; (2) the types of investors using the exemptions; (3) the size of the positions established pursuant to the pilot program; (4) what types of convertible securities are being used to hedge positions and how frequently convertible securities have been used to hedge; (5) whether the Exchange has received any complaints on the operation of the pilot program; (6) whether the Exchange has taken any disciplinary action against, or commenced any investigations, examinations, or inquiries concerning, any of its members for any violation of any term or condition of the pilot program; (7) the market impact, if any, of the pilot program; and (8) how the Exchange has implemented surveillance procedures to ensure compliance with the terms and conditions of the pilot program.

[4] See letter from Theresa McCloskey, Assistant Vice President, Market Surveillance, PHLX, to Yvonne Fraticelli, Staff Attorney, Options, Branch, Division of Market Regulation, Commission, dated January 7, 1993.

[5] 15 U.S.C. 78f(b)(5) (1982).

[6] See note 1, *supra*.

[7] The Commission expects the Exchange to determine on a case-by-case basis whether an instrument that is being used as the basis for the underlying hedged position is readily and immediately convertible into the security underlying the corresponding option position. In this regard, the Commission specifically finds that an instrument which will become convertible into a security at a future date, but which is not presently convertible, is not a "convertible" security for purposes of the equity hedge exemption pilot program until the date it becomes convertible.

[8] See note 1, *supra*.

[9] The Commission also expects the PHLX to monitor the pilot as outlined below and to inform the Commission of the results of any surveillance investigations undertaken for apparent violations of the provisions of the hedge exemption rule.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register** so that the pilot program may continue. As noted above, the hedge exemption pilot programs of the other options exchanges have been expanded to include convertible securities.[10] In addition, the Commission notes that notice of the original pilot program appeared in the **Federal Register** and that the Commission received no comments. Because there have been no adverse comments concerning the pilot program during the initial comment period or since its implementation and because of the importance of maintaining the quality and efficiency of the pHLX's markets, the Commission believes good cause exists to approve the extension and expansion of the pilot program on an accelerated basis.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 18, 1993.

It is therefore Ordered, pursuant to section 19(b)(2) of the Act [11] that the proposed rule change (SR–PHLX–92–22) is approved, and thereby that the equity hedge exemption pilot program is extended until November 17, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–32179; File No. SR–PHLX–91–34]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change Relating to Option Floor Procedure Advice A–14—Equity and Index Option Opening Price Parameters

April 20, 1993.

On October 21, 1991, the Philadelphia Stock Exchange, Inc. ("PHLX" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to add Options Floor Procedure Advice ("OFPA") A–14 relating to equity and index option opening price parameters.[3] The proposal mirrors existing Commentary .15 to PHLX Rule 1014 regarding the obligations of specialists upon opening an options series for trading. The OFPA also adds a fine schedule under the Exchange's Minor Infraction Rule Plan for violations of the parameters by specialists.

The proposed rule change was published for comment in Securities Exchange Act Release No. 30387 (February 19, 1992), 57 FR 6632. No comments were received on the proposed rule change. This order approves the proposal.

The Exchange proposes to add OFPA A–14 in connection with Exchange Rules 1014 and 1020. Proposed OFPA A–14 mirrors Commentary .15 to PHLX Rule 1014 which provides that an opening transaction in an options series may not occur at a price which falls outside of the previous trading session's closing quote in that options series by more than the difference between the preceding session's closing sale price for the underlying instrument and the present sessions's opening sale price for the underlying instrument.[4] Specialists would be required to observe opening price parameters for equity and index options where the underlying stock opens on firm quotes. In the event that a stock or index is quoted significantly away from the prior trading session's closing value, however, OFPA A–14 would permit a floor official to approve the opening of the option outside the stated parameters.

The purpose in creating OFPA A–14 to mirror Commentary .15 is to provide a fine schedule for violations of the opening price parameter guideline, and, thereby, permit violations of the guideline to be imposed pursuant to the Exchange's Minor Infraction Rule Plan.[5] In particular, the proposed fine schedule is as follows: (1) $50 fine for the first violation; (2) $100 fine for the second violation; (3) $200 fine for the third violation; and (4) sanctions determined by the Business Conduct Committee ("BCC") for further violations.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5), 6(b)(6) and 6(b)(7) under the Act and the rules and regulations thereunder. The Commission believes that sanctioning members for violations of the opening price parameter guidelines found in Commentary .15 to PHLX Rule 1014 pursuant to the Phlx's Minor Infraction Rule Plan promotes just and equitable principles of trade by maintaining

[4] See Securities and Exchange Act Release No. 18480 (February 10, 1982), 47 FR 7355 (original order approving Commentary .15 to PHLX Rule 1014).

[5] Pursuant to paragraph (c)(1) of Rule 19d–1, an SRO is required to file promptly with the Commission notice of any "final" disciplinary action taken by the SRO. Pursuant to paragraph (c)(2) of Rule 19d–1, any disciplinary action taken by the SRO for violation of an SRO rule that has been designated a minor rule violation pursuant to the plan shall not be considered "final" for purposes of Section 19(d)(1) of the Act if the sanction imposed consists of a fine not exceeding $2500 and the sanctioned person has not sought an adjudication, including a hearing, or otherwise exhausted his or her administrative remedies. By deeming unadjudicated minor violations as not final, the Commission permits the SRO to report violations on a periodic (quarterly), as opposed to immediate, basis.

VOL 58 ISS 79 AP 27 1993 UMI

consistency in the application of these important pricing guidelines. Moreover, the Commission believes that it is appropriate for the Exchange to establish a fine schedule consistent with its Minor Infraction Rule Plan for minor infractions of the opening price parameter guidelines.[6]

Specifically, the Commission believes that the use of the fine schedule will enable Exchange officials to impose sanctions for minor infractions of the guidelines in a timely manner. The Commission also believes that this streamlined disciplinary process will help the Exchange to ensure that PHLX specialists in equity and index options abide by the Exchange's rule governing opening price parameters for options series. In addition, the Commission further finds that the fine schedule provides for suitable sanctions for minor violations of the opening price parameter guidelines, and is consistent with section 6(b)(6) and 6(b)(7) of the Act, which requires exchanges to have appropriate sanctions and proceedings to discipline members for violations of exchange rules.

It Is Therefore ordered, pursuant to section 19(b)(2) of the Act,[7] that the proposed rule change (SR–PHLX–91–34) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–19420; 811–5633]

J.W. Gant Fund, Inc.; Application

April 20, 1993.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of application for deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANTS: J.W. Gant Fund, Inc. (the "Fund"), and William A. Fox.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicants seek an order declaring that the Fund has ceased to be an investment company under the Act.

FILING DATE: The application on Form N–8F was filed on March 5, 1992 and amended on October 26, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on May 14, 1993, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicants: the Fund, Harlequin Plaza South, 7600 East Orchard Road, suite 201, Englewood, CA 80111; William A. Fox, 5651 Northeast 16th Avenue, Fort Lauderdale, FL 33334.

FOR FURTHER INFORMATION CONTACT: Felice R. Foundos, Staff Attorney, (202) 272–2190, or Barry D. Miller, Senior Special Counsel, (202) 272–3023 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. The Fund is an open-end diversified management company incorporated under the laws of Maryland. On August 10, 1988, the Fund registered under the Act and filed a registration statement pursuant to section 8(b) of the Act. On that date, the Fund also filed a registration statement pursuant to the Securities Act of 1933, which registered an indefinite number of shares of common stock. The registration statement became effective on November 15, 1988.

2. On December 2, 1991, the Fund's board of directors approved a plan of liquidation and dissolution (the "Plan") and recommended that the Plan be submitted to the Fund's shareholders for their approval. The Fund filed copies of the preliminary proxy materials relating to the proposed dissolution with the Commission on December 19, 1991 and definitive proxy materials on January 21, 1992. On or after January 21, 1992, the Fund mailed the proxy material concerning the Plan to its shareholders. The Fund's shareholders approved the Plan at a special shareholders' meeting held on February 10, 1992.

3. In December 1991 and January 1992, the Fund sold its debt holdings held in its portfolio through its underwriter, J.W. Gant & Associates, on an agency basis. These assets were readily marketable securities and were sold at market prices. In February of 1992, the Fund sold its remaining equity asset, which was not readily marketable, through an unaffiliated broker-dealer. No commission costs were incurred in these transactions.

4. Pursuant to the Plan, the Fund's adviser, Louis Anthony Advisory Group, Inc., agreed to pay all expenses incurred in connection with the liquidation and dissolution of the Fund.

5. On March 3, 1992, the Fund mailed to its public shareholders of record on such date a liquidating distribution, in cash, equal to their *pro rata* portion of the remaining assets of the Funds. Each shareholder received $1.37 per share representing the remaining net asset value per share. On March 4, 1992, the Fund made a liquidating distribution with respect to the initial shares held by J.W. Gant Financial, Inc., the parent of the Fund's adviser and underwriter. Such liquidating distribution was reduced by the amount of unamortized organizational expenses remaining on February 10, 1992 of $16,179.

6. On March 27, 1992 the Fund filed Articles of Dissolution with the Maryland Department of Assessments and Taxation to effect the complete statutory dissolution of the Fund upon receipt of such articles.

7. As of the date of the application, the Fund had no assets, debts, liabilities or securityholders, and was not a party to any litigation or administrative proceeding.

8. The Fund is neither engaged in nor proposes to engage in any business activities other than those necessary for the winding up of its affairs.

9. Mr. William A. Fox is the former president and a former director of the Fund, the former president, treasurer, and a director of the Fund's adviser, and under section 3–410 of the Maryland General Corporation Law, a former trustee of the assets of the Fund for purposes of liquidating such assets.

10. As a condition for the Commission issuing an order, pursuant to section 8(f) of the Act, declaring that the Fund has ceased to be an investment company, Mr. Fox will retain and preserve all of the records of the Fund that rules 31a–1 and 31a–2 under the Act require a registered investment company to maintain for a two year period beginning from the date the Commission issues such an order pursuant to section 8(f) of the Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Secretary.

BILLING CODE 8010–01–M

---

[6] Even though the Exchange has proposed that violations of the opening price parameter guidelines be sanctioned according to the PHLX's Minor Infraction Rule Plan, violations of the guidelines do not necessarily have to be subject to the Minor Infraction Rule Plan. For instance, for egregious violations, the Commission would expect that these matters will be handled directly under the Phlx's full disciplinary proceedings.

[7] 15 U.S.C. 78s(b)(2) (1982).

[8] 17 CFR 200.30–3(a)(12) (1991).

[Rel. No. IC–19424; 812–8334]

Shearson Daily Dividend Inc., et al.; Notice of Application

April 21, 1993.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: Shearson Daily Dividend Inc. (which does business as American Express Daily Dividend Fund), Shearson Government and Agencies Inc. (which does business as American Express Government and Agencies Fund), Shearson Daily Tax-Free Dividend Inc. (which does business as American Express Municipal Money Market Fund), American Express New York Municipal Money Market Fund, American Express California Municipal Money Market Fund (collectively, the "Funds"), The Trust for TRAK Investments ("TRAK"), Shearson Lehman Brothers Inc. ("Shearson"), Smith, Barney Advisers, Inc. ("SBA"), and Mutual Management Corp. ("Mutual Management").

RELEVANT ACT SECTIONS: Order requested under section 6(c) for an exemption from section 15(a) of the Act and rule 15a–4 thereunder.

SUMMARY OF APPLICATION: Applicants seek a conditional order that would permit two separate actions. First, the order would permit the temporary implementation, without shareholder approval, of (a) new investment advisory agreements between the Funds and the non-money market series of TRAK and a wholly owned subsidiary of Smith Barney, Inc. called the Greenwich Street Advisors Division of Mutual Management; (b) a new investment advisory agreement between the money market series of TRAK and The Consulting Group, which will become a division of either Mutual Management or SBA ("Consulting"); and (c) with respect to the money market series of TRAK, a new sub-advisory agreement between Standish, Ayer & Wood, Inc. ("Standish") and Consulting. This relief would cover an interim period no longer than 120 days after the date Smith Barney, Harris Upham & Co. Incorporated ("Smith Barney") acquires certain businesses of Shearson. Second, the order would permit Thorsell, Parker Partners Inc. ("Thorsell") to serve as subinvestment adviser to the Small Capitalization Value Equity Investments sub-trust of TRAK (the "Value Equity Series of TRAK") until the earlier of (a) August 12, 1993 or (b) the date of shareholder approval or disapproval of its sub-investment advisory agreement (the "Thorsell Sub-Advisory Agreement").

FILING DATE: The application was filed on April 2, 1993. By supplemental letter dated April 20, 1993, counsel, on behalf of applicants, agreed to file an amendment during the notice period to make certain technical changes. This notice reflects the changes to be made to the application by such further amendment.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on May 12, 1993, and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants: The Funds, TRAK, and Shearson, Two World Trade Center, New York, New York 10048. SBA and Mutual Management, 1345 Avenue of the Americas, New York, New York 10105.

FOR FURTHER INFORMATION CONTACT: John V. O'Hanlon, Staff Attorney, at (202) 272–3922, or Elizabeth G. Osterman, Branch Chief, at (202) 272–3016 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. The Funds and TRAK are open-end management investment companies registered under the Act. The Funds and the money market series of TRAK (collectively, the "Money Market Funds") are money market funds that value their portfolio securities on the basis of amortized cost consistent with rule 2a–7 under the Act. Each Fund has entered into an investment advisory agreement with Shearson acting through Shearson Lehman Advisors, a unit of the Investment Management Group of the SLB Asset Management Division of Shearson, pursuant to which Shearson provides investment advisory and management services, subject to the general supervision of the Board of Directors or Board of Trustees ("Governing Board") of the Funds.

2. Shearson's Consulting Group is the investment adviser of the money market series of TRAK. The Consulting Group has entered into a sub-investment advisory agreement with Standish pursuant to which Standish provides sub-investment advisory services to the series, subject to the general supervision of its Governing Board and Shearson. For purposes of the application, Shearson acting as investment adviser or manager through its Shearson Lehman Advisors unit or its Consulting Group is referred to as the "Adviser."

3. The Value Equity Series of TRAK is one of twelve series offered by TRAK. Prior to January 13, 1993, Dremen Value Management, L.P. ("Dreman") served as the investment adviser to the Value Equity Series of TRAK. On January 13, 1993, with the prior approval of TRAK's Governing Board in accordance with rule 15a–4, the Value Equity Series entered into a new interim advisory agreement (the "Interim Agreement") with Thorsell pursuant to which Thorsell assumed responsibility for the management of the Series' assets as of such date for a period of 120 days. The Interim Agreement contains substantially the same terms and conditions, including fees, as the previous agreement with Dreman. Thorsell is a newly formed entity controlled by Richard Thorsell and Lewis Parker, both of whom formerly were employed by Dreman, where they were responsible for, among other things, the management of the assets of the Value Equity Series of TRAK.

4. In addition to serving (through an advisory group) as investment adviser or manager of the Funds and TRAK, Shearson is a broker-dealer registered under the Securities Exchange Act of 1934. Shearson serves as the principal underwriter for the Funds and TRAK. Shearson is an indirect wholly owned subsidiary of American Express Company. The Adviser is registered as an investment adviser under the

VOL 58 ISS 79 AP 27 1993 UMI

Investment Advisers Act of 1940, as amended (the "Advisers Act").

5. Mutual Management, a wholly owned subsidiary of Smith Barney Inc., is an investment adviser registered under the Advisers Act. Mutual Management currently acts as investment adviser to five registered investment companies. Smith Barney is a wholly owned subsidiary of Smith Barney Inc., which is in turn a wholly owned subsidiary of Primerica Corporation ("Primerica").

6. On March 12, 1993, Shearson entered into a purchase agreement with Primerica and Smith Barney providing for the sale to Smith Barney and its designated affiliates of substantially all of the assets of the Shearson Lehman Brothers Division and the SLB Asset Management Division of Shearson, including Shearson's advisory business with respect to the Funds, TRAK, and other investment company clients (the "Transaction").

7. The closing of the Transaction is subject to certain conditions, including the condition that new investment advisory contracts with Smith Barney or a wholly owned subsidiary of Smith Barney (the "New Advisers") shall have been approved by (a) the boards of the Money Market Funds and of registered investment companies (and any series thereof) other than the Money Market Funds for which Shearson or its affiliates serve as investment adviser (collectively, the "Non-Money Market Funds"), including in each case a majority of the independent board members; and (b) the shareholders of the Non-Money Market Funds who, as of February 28, 1993, represented at least 75% of all of the assets of the Non-Money Market Funds.

8. On April 7, 1993, the Governing Board of the Money Market Funds approved the new agreements for the Money Market Funds providing for advisory and sub-advisory services after the Transaction. The Money Market Funds will present the agreements for shareholder approval and ratification at shareholder meetings currently scheduled for June 1 or 23, 1993.

9. Applicants anticipate that the Transaction will be consummated on or about July 4, 1993, assuming that all of the conditions to consummation of the Transaction will have been fulfilled prior to that date.

10. The Transaction would result in the termination of advisory and/or sub-advisory agreements for the Funds, TRAK, and Non-Money Market Funds advised by the Adviser. Faced with a desire to consummate the Transaction expeditiously, it was agreed that the consummation of the Transaction would be contingent upon approval of the new advisory contracts by shareholders of the Non-Money Market Funds but not upon approval by the shareholders of the Money Market Funds. Shares of the Money Market Funds are held beneficially by more than 2,278,000 shareholders. Although the Money Market Funds are currently preparing proxy materials, and have scheduled special meetings of shareholders to be held prior to the Transaction, there may not be an adequate solicitation period reasonably to assure a quorum of shareholders present at those meetings. Applicants assert that it is generally more difficult to obtain proxies from shareholders of money market funds than from shareholders of other investment companies.

11. Because of the difficulties described above, applicants seek relief from section 15(a) in the event applicants are unable to obtain a quorum of shareholders of the Money Market Funds prior to the scheduled July 4, 1993 closing of the Transaction. This temporary relief would cover an interim period no longer than 120 days after the date of the Transaction (the "Interim Period").

12. Each Money Market Fund's new investment advisory agreement that will be implemented during the Interim Period will contain the same terms and conditions as its current investment advisory agreement, and the new sub-advisory agreement that will be implemented during the Interim Period with respect to the money market series of TRAK will contain the same terms and conditions as the current sub-advisory agreement, except in all cases, the names of the parties and the dates of commencement and termination of the agreements.

13. The Thorsell Sub-Advisory Agreement has been approved by the Governing Board of TRAK, including a majority of the independent board members. Under the terms of rule 15a-4 under the Act, Thorsell will be able to serve as sub-adviser to the Value Equity Series of TRAK until May 13, 1993 without shareholder approval of the Thorsell Sub-Advisory Agreement. A notice of meeting and draft proxy statement were prepared and filed with the Commission for review and comment in anticipation of mailing them to shareholders of the Value Equity Series of TRAK on or about March 24, 1993. While the process of completing the proxy statement was underway, the Transaction was announced. Applicants soon recognized that any approval of the Thorsell Sub-Advisory Agreement at the scheduled May 6, 1993 meeting of shareholders would be rendered moot at the closing of the Transaction because, since the Adviser was proposed to be a party to the Thorsell Sub-Advisory Agreement, the Agreement would terminate at the closing of the Transaction and a second shareholders meeting would be required to reconsider the Agreement. Therefore, applicants also seek relief to present the Thorsell Sub-Advisory Agreement to the shareholders of the Value Equity Series of TRAK along with proposals relating to the Transaction at a shareholder meeting scheduled for June 1, 1993.

Applicants' Legal Analysis

1. Applicants request an order pursuant to section 6(c) exempting applicants from the provisions of section 15(a) and rule 15a–4 thereunder to the extent necessary (a) to permit the implementation during the Interim Period of the new advisory agreements and the new sub-advisory agreement without shareholder approval; (b) to permit the relevant New Adviser to receive from each Money Market Fund all fees earned under new advisory agreements implemented during the Interim Period if and to the extent approved and ratified by the shareholders of the Money Market Fund; (c) to permit Consulting to pay to Standish any and all fees earned by Standish under the sub-advisory agreement implemented during the Interim Period; and (d) to permit Thorsell to serve as sub-investment adviser to the Value Equity Series of Trak until the earlier of August 12, 1993 or the date on which shareholder approval or disapproval of the Thorsell Sub-Advisory Agreement is obtained.

2. Section 15(a) of the Act provides, in pertinent part, that it shall be unlawful for any person to serve or act as investment adviser of a registered investment company, except pursuant to a written contract that has been approved by the vote of a majority of the outstanding voting securities of such registered investment company. Section 15(a) further requires that such written contract provide for automatic termination in the event of its assignment. Section 2(a)(4) of the Act defines "assignment" to include any direct or indirect transfer of a contract by the assignor.

3. Rule 15a–4 provides, among other things, that if an investment advisory contract with an investment company is terminated by assignment, a person may act as investment adviser for a period of up to 120 days after termination pursuant to a written contract that has not been approved by the investment company's shareholders, provided that the new contract is approved by the

board of directors of the investment company (including a majority of the non-interested directors), the compensation to be paid under the new contract does not exceed the compensation which would have been paid under the contract most recently approved by shareholders of the investment company, and neither the investment adviser nor any controlling person of the adviser directly or indirectly receive money or other benefit in connection with the assignment.

4. Upon completion of the Transaction, Smith Barney (or another direct or indirect wholly owned subsidiary of Smith Barney) is expected to own substantially all of the advisory business of the Adviser. The Transaction will result in an "assignment" within the meaning of section 2(a)(4) of the Act of the existing advisory agreements between the Adviser and the Money Market Funds, terminating each such investment advisory agreement, and the sub-advisory agreement between the Adviser and Standish, pursuant to its terms. Applicants cannot rely on rule 15a–4 because of the benefits to Shearson arising from the transaction.

5. Nonetheless, applicants assert that the granting of the requested exemption would be within the spirit of rule 15a–4. The release proposing rule 15a–4 indicates that the rule was designed to provide relief in cases where the assignment of an advisory contract occurs by virtue of an occurrence which may not be reasonably foreseeable, in order to avoid serious adverse consequences from the gap in an investment company's receipt of advisory services. Applicants submit that the situation at hand is similar to other types of assignments that are not reasonably foreseeable. In practical terms, the rapid culmination of the negotiations of the purchase agreement may not present, and the form of transaction deemed most appropriate by the parties to the purchase agreement may not permit, an opportunity to secure prior approval of new advisory and sub-advisory agreements by shareholders of the Money Market Funds, despite diligent attempts to do so.

6. Applicants assert that it is reasonable to permit the New Advisers to provide investment advisory services to the Money Market Funds without shareholder approval of the new advisory contracts for up to 120 days from the closing of the Transaction. This number of days will allow for reasonable adjournments of the shareholder meetings if necessary to obtain sufficient shareholder response to the solicitations in order to obtain the required approval as set forth in section 2(a)(42) of the Act.

7. Applicants submit that to deprive the New Advisers of fees for the Interim Period for no reason other than the fact that the Transaction may result in an assignment of the Money Market Funds' existing investment advisory agreements would be a harsh result and an unreasonable penalty to attach to the Transaction and would serve no useful purpose. This is particularly true where the parties have sought, to the extent reasonably practicable, to comply with section 15(a) of the Act by making a good faith attempt to obtain shareholder approval prior to the Transaction. Moreover, fees earned by the New Advisers and paid by a Money Market Fund or, in the case of the money market series of TRAK, by Consulting to Standish during the Interim Period will be maintained in an interest-bearing escrow account. Amounts in the account (including interest) will be paid to the relevant New Adviser or, in the case of the money market series of TRAK, to Standish, only upon approval by the shareholders of that Money Market Fund. In the absence of such approval, amounts in the escrow account will be paid to the respective Money Market Fund.[1]

8. The fees to be paid during the Interim Period would be at the same rate as the fees currently payable by the Money Market Funds, which fees have been approved by the Governing Board of the Money Market Funds (including the independent board members) in accordance with their obligations under the Act. Moreover, the investment advisory agreement of each of the Money Market Funds was approved by its public shareholders.

9. Applicants submit that a 90-day extension of the time period provided by rule 15a–4 is in the best interests of the Value Equity Series of TRAK and its shareholders because it will permit the Thorsell Sub-Advisory Agreement to be implemented at a single meeting with a singly proxy solicitation. Holding one meeting on June 1, 1993 instead of the two that would be required were the May 6 meeting to be followed in short order by a June meeting necessitated by the Transaction will be both less costly to the Value Equity Series of TRAK and less confusing to its shareholders. Applicants also assert that it would be beneficial to shareholders to consider the Thorsell Sub-Advisory Agreement at the same time as it considers a new investment advisory agreement with Consulting. Because events may develop that might preclude adherence to this time frame, applicants are seeking an extension until August 12, 1993.

10. For the reasons set forth above, applicants assert that the relief requested from the provisions of section 15(a) of the Act and rule 15a–4 thereunder is reasonable, necessary, and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the Act.

Applicants' Conditions

Applicants agree as conditions to the issuance of the exemptive order requested by the application that:

1. (a) The new advisory agreements to be implemented during the Interim Period will have the same terms and conditions as the existing advisory agreements; (b) the new sub-advisory agreement to be implemented during the Interim Period will have the same terms and conditions as the existing sub-advisory agreement; and (c) the Thorsell Sub-Advisory Agreement will have the same terms and condition as the Interim Agreement, except in each case for the names or identities of the parties, and the commencement and termination dates.

2. The Governing Board of each Money Market Fund will have approved each investment advisory or sub-investment advisory agreement with the relevant New Adviser in accordance with section 15(c) of the Act.

3. Fees earned by the New Advisers and paid by a Money Market Fund or, in the case of the money market series of TRAK, by Consulting to Standish during the Interim Period in accordance with the terms of a new advisory agreement or the new sub-advisory agreement will be maintained in an interest-bearing escrow account, and amounts in the account (including interest) will be paid (a) to the relevant New Adviser or, in the case of the money market series of TRAK, to Standish only upon approval by the shareholders of that Money Market Fund, or (b) in the absence of such approval, to the respective Money Market Fund.

4. The Money Market Funds will hold meetings of shareholders to vote on approval of the new investment

[1] The staff notes that applicants do not propose to escrow fees earned by Thorsell under the Thorsell Sub-Advisory Agreement. Because no money or other benefit was received by an investment adviser or a controlling person thereof in connection with the termination of the prior advisory agreement with Dreman, Thorsell was able to rely on rule 15a–4, which permits the payment of interim fees. In contrast, the fees earned by the New Advisers, or paid by Consulting to Standish, could not be paid under rule 15a–4 at any time.

VOL 58 ISS 79 AP 27 1993 UMI

advisory agreements ant the new sub-advisory agreement (and, in the case of TRAK, the Thorsell Sub-Advisory Agreement) on June 1 and 23, 1993, which meetings may be adjourned for a reasonable period for legitimate business purposes in accordance with applicable state law.

5. Shearson and Smite Barney will share evenly the costs of preparing and filing the application and the costs relating to the solicitation of stockholder approval of the Money Market Funds' shareholders necessitated by the Transaction.

6. The New Adviser will take all appropriate steps so that the scope and quality of advisory and other services provided to the Money Market Funds during the Interim Period will be at least equivalent, in the judgment of the respective Governing Boards, including a majority of the independent board members, to the scope and quality of services previously provided. In the event of any material change in personnel providing services pursuant to the advisory or sub-advisory agreements, the New Advisers will apprise and consult with the Governing Board of the affected Money Market Funds in order to assure that they, including a majority of the independent board members, as satisfied that the services provided will not be diminished in scope or quality.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

[Public Notice 1782]

Shipping Coordinating Committee, International Maritime Organization (IMO) Legal Committee; Meeting

The U.S. Shipping Coordinating Committee (SHC) will conduct an open public meeting at 10 a.m., on Tuesday, May 18, 1993, in room 2415 of U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC. The primary purpose of this meeting is to report on the results of the 68th Session of the International Maritime Organization (IMO) Legal Committee, held March 15 through March 19, 1993, in London, and the Diplomatic Conference on Maritime Liens and Mortgages, held in Geneva, April 19 through May 7, 1993.

To facilitate the attendance of those participants who may be interested in only certain aspects of the public meeting, the first subject addressed will be the various issues before the IMO Legal Committee with particular focus on the draft Convention on Liability and Compensation for Damages Arising from the Maritime Carriage of Hazardous and Noxious Substances (the HNS Convention). The second subject, which will be considered at approximately 12:30 p.m., will be a discussion on the results of the April Diplomatic Conference on Maritime Liens and Mortgages.

By way of background, since 1987, the Legal Committee has been working to develop a draft HNS Convention which was originally intended to apply to catastrophes caused by substances other than oil. While today's draft HNS Convention would still cover catastrophes, it would also extend to smaller incidents caused by a broader range of substances and currently would include oil pollution damage to the extent not already covered by the international oil pollution liability regimes.

The draft HNS Convention would impose strict liability upon the shipowner for damages arising from hazardous substances up to a yet-to-be-determined limit of liability with a second-tier international fund available to provide compensation for catastrophic damages or when the shipowner, for one reason or another, could not pay. The second-tier international fund, modeled after the International Oil Pollution Compensation Fund, may be financed by levies imposed upon hazardous cargo shipments or by postincident collections.

The draft convention would provide compensation for environmental damage as well as personal injury and property damage. Compensation for damage caused by a broad range of substances including oils (those not covered under the oil regimes), bulk liquid cargo, bulk solid cargo, bulk gases, packaged cargo, and flammable residues are all within the scope of the draft convention as presently written.

Important questions remain to be decided which include: (1) Whether the two-tier system is workable and can be implemented with an acceptable balance between equity and practicality; (2) which substances would be included within the scope of the convention's coverage for purposes of both compensating damage as well as for contributing to the financing of the second-tier fund; (3) how the levy amounts imposed upon cargo would be determined; (4) how the levies would be collected; (5) whether postincident funding of the second-tier fund is appropriate in some cases; and (6) whether the second-tier fund should be separated into multiple accounts for different sectors of the industry.

The views of the public, and particularly those of affected maritime commercial and environmental interests, are requested. While the views of the public and affected interests are encouraged on all relevant issues underlying the draft HNS Convention, comment is specifically requested regarding the following subjects: (1) The definition of "HNS" (those substances to which the draft HNS Convention would apply for purposes of shipowner liability as described in document LEG 67/3, Article 1(5)(d)); the definition of "contributing cargo" (those substances to which the draft HNS Convention would apply for purposes of financing the second-international fund as described in document LEG 67/3 Article 1(10)); the definition of "shipper" (the party responsible for levy payment in Article 1(4)); the definition of "carriage by sea" (defining when the convention would be applicable in Article 1(9)); whether postincident funding of the second-tier fund is appropriate in some cases; and whether the second-tier fund should be separated into multiple accounts for different sectors of the industry (see, for example, document LEG 68/4/4 proposing four separate accounts and postincident funding).

By way of background on the draft convention on Maritime Liens and Mortgages, the April Diplomatic Conference is the culmination of work commenced by an International Subcommittee of the Comite' Maritime Internationale (from 1972 through 1984) and a joint group of experts (JIGE) from IMO and the United Nations Conference on Trade and Development (UNCTAD) to revise the 1967 Convention on Maritime Liens and Mortgages (from 1986 through 1989).

The U.S. Shipping Coordinating Committee discussed the draft Maritime Liens and Mortgages Convention at its last two meetings (March 10, 1993 and November 19, 1992). The May meeting will focus on the results of the Diplomatic Conference.

Copies of the draft texts and other relevant documents have been distributed previously by way of regular mailings. Persons requesting to be added to the mailing list should contact Lieutenant Lee Handford at the telephone/fax numbers below.

Members of the public are invited to attend the SHC meeting, up to the seating capacity of the room.

For further information or to submit views concerning the SHC meeting, contact either Captain David J. Kantor or Lieutenant Lee Handford, U.S. Coast Guard (G-LMI), 2100 Second Street, SW., Washington, DC 20593, telephone (202) 267-1527, telefax (202) 267-4496. For information regarding the Maritime Liens and Mortgages Convention, contact Lieutenant Commander Mark J. Yost, U.S. Coast Guard (G-LGL), telephone (202) 267-0059, telefax (202) 267-4163.

Dated: April 15, 1993.

Geoffrey Ogden,

Chairman, Shipping Coordinating Committee.

BILLING CODE 4710-07-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Modification of Sanctions With Respect to the European Community Pursuant to Title VII of the Omnibus Trade and Competitiveness Act of 1988

AGENCY: Office of the United States Trade Representative.

ACTION: Postponement of implementation of prohibition of awards of contracts by federal agencies for products and services from Member States of the European Community until further notice.

SUMMARY: On April 22, 1993, the United States Trade Representative announced that the effective date of the prohibition on awards of contracts by federal agencies for products and services of some or all member states of the European Community (EC), scheduled to go into effect on that date, was being postponed in light of the agreement reached in principle with the EC on April 21, 1993 that will eliminate EC discrimination in the heavy electrical sector. An announcement of sanctions modified to reflect that agreement will be made shortly.

FOR FURTHER INFORMATION CONTACT: Mark Linscott, Office of GATT Affairs (202-395-3063), or Laura B. Sherman, Office of the General Counsel (202-395-7203), Office of the United States Trade Representative, 600 Seventeenth Street, NW., Washington, DC 20506.

Frederick L. Montgomery,

Chairman, Trade Policy Staff Counsel.

BILLING CODE 3190-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Noise Exposure Map Notice; Seattle-Tacoma International Airport, Seattle, WA

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by Seattle-Tacoma International Airport (SEA) under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR part 150 are in compliance with applicable requirements.

EFFECTIVE DATE: The effective date of the FAA's determination on the Seattle-Tacoma International Airport noise exposure maps is April 15, 1993.

FOR FURTHER INFORMATION CONTACT: Dennis Ossenkop, FAA, Airports Division, ANM-611, 1601 Lind Avenue, SW., Renton, Washington, 98055-4056.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the noise exposure maps for Seattle-Tacoma International Airport are in compliance with applicable requirements of part 150, effective April 15, 1993. Under section 103 of Title I of the Aviation Safety and Noise Abatement Act of 1979 (herein after referred to as "the Act"), an airport operator may submit to the FAA a noise exposure map which meets applicable regulations and which depicts noncompatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies and persons using the airport.

An airport operator who has submitted a noise exposure map that has been found by FAA to be in compliance with the requirements of Federal Aviation Regulation (FAR) part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by SEA. The specific maps under consideration are Exhibit 4A and 4B in the submission. The FAA has determined that these maps for Seattle-Tacoma International Airport are in compliance with applicable requirements. This determination is effective on April 15, 1993. FAA's determination on an airport operator's noise exposure maps is limited to the determination that the maps were developed in accordance with the procedures contained in appendix A of FAR part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on noise exposure maps submitted under section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of Section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the maps depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under Section 103 of the Act. The FAA has relied on the certification by the airport operator, under § 150.21 of the FAR part 150, that the statutorily required consultation has been accomplished.

Copies of the noise exposure maps and of the FAA's evaluation of the maps are available for examination at the following locations:

Federal Aviation Administration, Independence Avenue, SW, room 615, Washington, DC.

Federal Aviation Administration, Airports Division, ANM-600, 1601 Lind Avenue, SW., Renton, Washington, 98055-4056.

BILLING CODE 4910-13-M

Executive Committee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Executive Committee of the Federal Aviation Administration Aviation Rulemaking Advisory Committee.

DATES: The meeting will be held on May 12, 1993, at 9 a.m. Arrange for oral presentations by May 5, 1993.

ADDRESSES: The meeting will be held at the Loew's L'Enfant Plaza Hotel, 480 L'Enfant Plaza, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Miss Jean Casciano, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267-9683; fax number (202) 267-5075.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. II), notice is hereby given of a meeting of the Executive Committee to be held on May 12, 1993, at the Loew's L'Enfant Plaza Hotel, 480 L'Enfant Plaza, SW., Washington, DC. The agenda will include:

- A discussion of revisions to the proposed working group procedures.
- A discussion of revisions to the committee operating procedures.
- Status reports on issues.

Attendance is open to the interested public but will be limited to the space available. The public must make arrangements by May 5, 1993, to present oral statements at the meeting. The public may present written statements at the meeting. The public may present written statements to the executive committee at any time by providing 20 copies to the Executive Director, or by bringing the copies to him at the meeting. In addition, sign and oral interpretation can be made available at the meeting, as well as an assistive listening device, if requested 10 calendar days before the meeting. Arrangements may be made by contacting the person listed under the heading FOR FURTHER INFORMATION CONTACT.

Issued in Washington, DC, on April 20, 1993.

Chris A. Christie,

Executive Director, Aviation Rulemaking Advisory Committee.

[FR Doc. 93-9774 Filed 4-26-93; 8:45 am]

BILLING CODE 4910-03-M

Intent To Rule on Application Passenger Facility Charge (PFC); Fort Collins-Loveland Municipal Airport, Loveland, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use a PFC at Fort Collins-Loveland Municipal Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before May 27, 1993.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Alan Wiechmann, Manager, Denver Airport District Office, DEN-ADO, Federal Aviation Administration, 5440 Roslyn, Suite 300; Denver, CO 80216-6026.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to the Fort Collins—Loveland Municipal Airport, Loveland, Colorado, at the following address: 4824 Earhart Road, Loveland, Colorado 80538.

Air carriers and foreign air carriers must submit copies of written comments previously provided to the Fort Collins-Loveland Municipal Airport, under § 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Mr. Chris Schaffer, (303) 286-5525; Denver Airports District Office, DEN-ADO; Federal Aviation Administration; 5440 Roslyn; suite 300; Denver, Colorado 80216-6026. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use a PFC at Fort Collin-Loveland Municipal Airport, under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On April 19, 1993, the FAA determined that the application to impose and use a PFC submitted by the City of Loveland and the City of Fort Collins was substantially complete within the requirements of § 158.25 of part 159. The FAA will approve or disapprove the application, in whole or in part, no later than July 22, 1993.

The following is a brief overview of the application.

Level of the proposed PFC: $3 00

Proposed charge effective date: October 1, 1993

Proposed charge expiration date: May 31, 1996

Total estimated PFC revenue: $207,857.00

Brief description of proposed project: Expand aircraft parking apron; modify taxiway guidance signs; terminal building expansion; construct ARFF building; groove runway 15/33; update airport master plan; rehabilitate aircraft parking apron.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: None.

Any person may inspect the application is person at the FAA office listed above under FOR FURTHER INFORMATION CONTACT and at the FAA regional Airports office located at: Federal Aviation Administration, Northwest Mountain Region, Airports Division, ANM-600, 1601 Lind Avenue S.W., Suite 540, Renton, WA 98055-4056.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Fort Collins-Loveland Municipal Airport.

Issued in Renton, Washington, on April 19, 1993.

Matthew J. Cavanaugh,

Assistant Manager, Airports Division, Northwest Mountain Region.

[FR Doc. 93-9772 Filed 4-26-93; 8:45 am]

BILLING CODE 4910-13-M

Federal Railroad Administration

[FRA Docket No. H-92-1]

Addendum to the Petition for Waiver for Test Program, National Railroad Passenger Corporation

In accordance with 49 CFR part 211, notice is hereby given that the National Railroad Passenger Corporation (Amtrak) has requested an addendum to a previously granted temporary waiver of compliance with certain requirements of 49 CFR 231.12 in order to conduct a limited demonstration of a passenger trainset, the X2000. The previously granted waiver pertains to the operation of the X2000 without handbrakes, side and end handholds and uncoupling levers. The demonstration programs described in this notice would, if approved, involve a number of major cities in which Amtrak provides passenger service. Amtrak anticipates that the X2000 train sets will be on static display, but does not totally eliminate the possibility of some demonstration runs with the possibility of limited revenue service. The X2000 demonstration program would tentatively commence in June 1993 and terminate by August 31, 1993. The X2000 train set is electric powered, and will be moved to the various locations over non electrified railroads by a new General Electric Company built AMD-103 diesel-electric locomotive. The X2000 trainset will be equipped with a special coupler at the power car end to facilitate the coupling to a standard locomotive. The movements would be by mutual agreement between the various railroads and Amtrak with the foreknowledge of the Federal Railroad Administration (FRA).

The cities tentatively identified by Amtrak are as follows:

Harrisburg, Pennsylvania
Albany, New York
Chicago, Illinois
Dearborn, Michigan
Orlando, Florida
Portland, Oregon
Pittsburgh, Pennsylvania
Cleveland, Ohio
Milwaukee, Wisconsin
Birmingham, Alabama
Seattle, Washington
Los Angles, California.

The five corridors identified by Amtrak are as follows:

Los Angeles to San Diego or San Francisco, California
Seattle to Vancouver, Canada
New York City to Albany and/or Buffalo, New York
Chicago to Milwaukee or St. Louis, Missouri
Chicago to Dearborn

The X2000 demonstration train set will be composed of a power car (locomotive), four trailer coaches and a control driving trailer (in effect, a cab-control car for reverse running). This equipment is representative of the fleet of similar trainsets operated on a daily basis by Stevens Järnvägar (SJ), the Swedish State Railways. The distinguishing feature of this trainset in normal operation is that the coaches are tilted hydraulically on curves to compensate for centrifugal force. The presence of curved track, including acuteness of curvature, along with specific amounts of superelevaton, is sensed by instrumentation which actuates the carbody tilting mechanism.

The X2000 trainset operates in daily revenue service in Sweden at up to 9 inches of cant deficiency and has been successfully operated during tests in Europe at up to 12 inches of cant deficiency. In movement between various locations the X2000 will operate without the tilting system operative. Further, the train will be operated with a cant deficiency limited to 3 inches or less and at a maximum speed of 79 mph or less.

During the off-corridor demonstration period, Amtrak will notify all operating personnel, before their first encounter, that the X2000 trainset is not equipped with hand brakes, side or end handholds or uncoupling levers and to exercise caution. Although Amtrak will be hauling the entire train set around the country, the X2000 power car [locomotive] will be dead. It is being included because it is an integral part of the train set and is needed to condition the auxiliary power that will be supplied from the hauling locomotive.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., FRA Docket No. H-92-1) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, S.W., Washington, DC 20590.

Communications received before May 25, 1993 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) in room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC on April 21, 1993.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

[FR Doc. 93-9807 Filed 4-26-93; 8:45 am]

BILLING CODE 4910-06-M

Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of 49 CFR Part 236

Pursuant to 49 CFR part 235 and 49 U.S.C. app. 26, the following railroads have petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR part 236 as detailed below.

Block Signal Application (BS-AP)—No. 3227

Applicant: Chicago and NorthWestern Transportation Company, Mr. D.E. Waller, Vice President—Engineering and Materials, One NorthWestern Center, Chicago, Illinois 60606.

The Chicago and NorthWestern Transportation Company seeks approval of the proposed modification of the traffic control system, on the single main track, between Manly, Iowa, milepost 224.9 and Albert Lea, Minnesota, milepost 253.03, on the Owatonna Subdivision; consisting of the relocation of 15 automatic block signals and the discontinuance and removal of controlled signals L82, L84, R82, and R84.

The reason given for the proposed changes is to maximize efficiency and safety of train operations by replacing aging pole line with modern solid state coded track circuitry, and the controlled signals are no longer warranted due to removal of the switches and control point.

BS-AP-No. 3228

Applicant: Consolidated Rail Corporation, Mr. J.F. Noffsinger, Chief Engineer—C&S, 15 North 32nd Street, Philadelphia, Pennsylvania 19104-2849.

The Consolidated Rail Corporation seeks approval of the proposed signal changes on the Bailey Avenue Branch, Sycamore Street Branch, and Belt Line Branch, at Buffalo, New York, on the Albany Division, consisting of the following:

1. The discontinuance and removal of the traffic control system on the two main tracks of the Bailey Avenue Branch between Bailey Avenue, milepost 0.0 and "CP-T" Interlocking,

VOL 58 ISS 79 AP 27 1993 UMI

milepost 0.7, and operate the tracks as yard tracks;

2. The discontinuance and removal of the traffic control system on the single main track of the Sycamore Street Branch between Bailey Avenue, milepost 0.0 and "CP Sycamore" Interlocking, milepost 1.2, and operate the tracks as yard tracks; and

3. The discontinuance and removal of automatic singles 21, 24, 29, and 59 on the two main tracks of the Belt Line Branch.

The reason given for the proposed changes is to retire facilities no longer required for present day operation.

BS–AP–No. 3229

Applicant: Montana Rail Link, Inc., Mr. Richard L. Keller, Chief Engineer, P.O. Box 8779, Missoula, Montana 59807.

The Montana Rail Link, Incorporated seeks approval of the proposed modification of the signal system, on the single main track, between milepost 186.3 and milepost 194.2, near Toston, Montana, on the Second Subdivision; consisting of the relocation of signals 1926 and 1906 to the opposite side of the track, the relocation of signals 1889 and 1888 from milepost 188.9 to milepost 188.5, and the discontinuance and removal of signals 1873 and 1974, in connection with the installation of coded track circuits.

The reason given for the proposed changes is to upgrade the signal system and improve train operations.

BS–AP–No. 3230

Applicant: Burlington Northern Railroad Company, Mr. W.G. Peterson, Director Control Systems Engineering, Engineering Department, 373 Inverness Drive South, Englewood, Colorado 80112.

The Burlington Northern Railroad Company seeks approval of the proposed modification of the traffic control system, on the single main track, between Brookfield, Missouri, milepost 109.1 and Maxwell, Missouri, milepost 173.9, on the Galesburg Division, Brookfield Subdivision; consisting of the discontinuance and removal of 26 automatic signals and the installation of 44 automatic signals.

The reason given for the proposed changes is to respace and relocate signals at the time of a pole line elimination project.

BS–AP–No. 3231

Applicant: Wisconsin Central Limited, Mr. Glenn J. Kerbs, Vice President Engineering, P.O. Box 5062, Rosemont, Illinois 60017–5062.

The Wisconsin Central Limited (WC) seeks approval of the following proposed modifications of the traffic control system near Fond Du Lac, Wisconsin, on the Chicago Subdivision and Neenah, Wisconsin, on the Neenah Subdivision, associated with the installation of three new control points and track rearrangement:

1. The discontinuance and removal of existing control point "Fond Du Lac East", milepost CM157.38, on the Chicago Subdivision, consisting of the removal of three controlled signals and conversion of the power-operated switch to hand operation;

2. The discontinuance and removal of existing control point "Fond Du Lac West", milepost CM159.54, on the Chicago Subdivision, consisting of the removal of four controlled signals and conversion of the power-operated switch to hand operation;

3. The discontinuance and removal of existing control point "Neenah East", milepost CM184.86, on the Neenah Subdivision, consisting of the removal of three controlled signals and conversion of the power-operated switch to hand operation; and

4. The discontinuance and removal of two automatic block signals near milepost CM180.9 and two automatic block signals near milepost CM183.2, on the Neenah Subdivision.

The reason given for the proposed changes is to route the main line around the Fond Du Lac Yard and increase the length of the siding to accommodate increased rail traffic.

BS–AP–No. 3232

Applicant: Burlington Northern Railroad Company, Mr. W. G. Peterson, Director Control Systems Engineering, Engineering Department, 373 Inverness Drive South, Englewood, Colorado 80112.

The Burlington Northern Railroad Company seeks approval of the proposed modification of the traffic control system, on the single main track, between Huben, Missouri, milepost 192.5 and Teed, Missouri, milepost 233.5, on the Springfield Division, Cuba Subdivision; consisting of the discontinuance and removal of 23 automatic signals and 6 controlled signals, and the installation of 24 automatic signals and 5 controlled signals.

The reason given for the proposed changes is to respace and relocate signals at the time of a pole line elimination project.

BS–AP–No. 3233

Applicants: Montana Western Railway Company, Mike Greene, General Manager, 700½ Railroad Street, Butte, Montana 59701.

Union Pacific Railroad Company, Mr. P. M. Abaray, Chief Engineer—Signals, 1416 Dodge Street, room 920, Omaha, Nebraska 68179.

Rarus Railway Company, Mr. William T. McCarthy, President, P. O. Box 1070, Anaconda, Montana 59711.

The Montana Western Railway Company (MWRR), Union Pacific Railroad Company (UP), and Rarus Railway Company (RAWR) jointly seek approval of the proposed discontinuance and removal of the interlocking signal system, near milepost 7.0, at Silver Bow, Montana, where a single main track of the MWRR cross at grade a single main track of the RAWR and UP; consisting of the removal of four controlled signal and two approach signals, and the installation of stop signs on the RAWR and UP trackage on each side of the grade crossing.

The reason given for the proposed changes is due to operational changes the system is no longer required for safe train movements over the crossing.

BS–AP–No. 3234

Applicant: Duluth Missabe and Iron Range Railway Company, Mr. W. H. Harrison, Chief Engineer, Engineering Department, 329 Second Street, Proctor, Minnesota 55810–1091.

The Duluth Missabe and Iron Range Railway Company seeks approval of the proposed discontinuance and removal of the automatic block signal system, on the single main track between Carson, Minnesota, milepost 12.3 and Sax, Minnesota, milepost 51.0 and the discontinuance and removal of the traffic control system, on the single main track, between Sax, Minnesota, milepost 51.0 and Forbes, Minnesota, milepost 58.6, on the Missabe Division, a combined distance of approximately 46.3 miles, and operate via Computerized Track Warrant Control.

The reasons given for the proposed changes are the safety of Computerized Track Warrant Control, the trackage in the application area is relatively flat, train traffic in the area has been declining, the low train density over the trackage, and to eliminate maintenance costs.

BS–AP–No. 3235

Applicant: Montana Rail Link, Inc., Mr. Richard L. Keller, Chief Engineer, P. O. Box 8779, Missoula, Montana 59807.

The Montana Rail Link, Inc. seeks approval of the proposed modification of the signal system, on the single main track, between Austin, Montana, milepost 12.9 and Elliston, Montana,

milepost 25.5, on the Third Subdivision; consisting of the discontinuance and removal of automatic block signals 132, 139, 145, 146, 169, 170, 196, and 230, and the discontinuance and removal of controlled signals 55L, 55R, 53L, 53R, and 45L in conjunction with the installation of coded track circuits.

The reason given for the proposed changes is to upgrade the signal system and improve train operations.

BS–AP–No. 3236

Applicant: Burlington Northern Railroad Company, Mr. William G. Peterson, Director Control Systems Engineering, 9401 Indian Creek Parkway, P.O. Box 29136, Overland Park, Kansas 66201–9136.

The Burlington Northern Railroad Company seeks approval of the following proposed signal modifications, on the single main track, between Lyndale Jct., Minnesota, milepost 14.0 and Darwin, Minnesota, milepost 69.9, on the Minnesota Division, Wayzata Subdivision:

1. The discontinuance and removal of 35 automatic block signals;

2. The installation of 30 automatic block signals; and

3. The discontinuance and removal of "Cokato" control point, milepost 59.6, including the discontinuance and removal of three controlled signals and conversion of the power-operated switch to electrically locked hand operation.

The reasons given for the proposed changes are due to a pole line elimination project associated with the installation of electronic coded track circuits, and previously made track changes at Cokato make the control point unnecessary.

BS–AP–No. 3237

Applicant: Consolidated Rail Corporation, Mr. J.F. Noffsinger, Chief Engineer—C&S, 15 North 32nd Street, Philadelphia, Pennsylvania 19104–2849.

The Consolidated Rail Corporation seeks approval of the proposed modification of the traffic control system, on Track No. 1, milepost 197.7, near Union City, Ohio, on the Indianapolis Line, Indianapolis Division, consisting of the discontinuance and removal of automatic signal 1972.

The reason given for the proposed changes is to retire facilities no longer required for present operations.

BS–AP–No. 3238

Applicant: Consolidated Rail Corporation, Mr. J. F. Noffsinger, Chief Engineer—C&S, 15 North 32nd Street, Philadelphia, Pennsylvania 19104–2849.

The Consolidated Rail Corporation seek approval of the proposed modification of the traffic control system, on the two and three main tracks of the Chicago Line, between "CP 5" Interlocking, milepost 5.4, near Buffalo, New York and "CP 285" Interlocking, milepost 285.4, near Vickers, Ohio, on the Albany, Pittsburgh, and Darborn Divisions, associated with the installation of electronic coded track circuits. The changes include the following:

1. The discontinuance and removal of interlockings "CP 32," milepost 32.7, "CP 117," milepost 117.0, and "CP 145," milepost 145.2; consisting of the removal of all controlled signals and the conversion of all remaining switches to hand operation, equipped with an electric lock;

2. The discontinuance and removal of 63 existing automatic block signals; and

3. The installation of 45 new automatic block signals.

The reason given for the proposed changes is replacement of pole line retire associated with the installation of electronic track circuits allowing for respacing of signals for improved train operations and follow block capability.

Rules Standards & Instructions Application (RS&I–AP) No. 1087

Applicant: Union Pacific Railroad Company, and Missouri pacific Railroad Company, Mr. A. L. Shoener, Executive Vice president—Operations, 1416 Dodge Street, room 1206, Omaha, Nebraska 68179.

The Union Pacific Railroad Company (UP) and Missouri Pacific Railroad Company jointly seek relief from the requirement of the Rules, Standard and Instructions, 49 CFR part 236 in its entirety for the UP coded cab signal system on locomotives and in its track regulated pursuant to 49 CFR part 236 and related rules, in those locations where UP has a federally regulated wayside automatic signal system in place.

Applicant's justification for relief: Where both the wayside signal system and the coded cab signal-safety control system (CCS–CS) are in place there is a high level of redundancy. The wayside signal system is highly regulated and tested. Most of the UP system has only a wayside signal system in place. UP's efforts to enhance its operations with the CCS–CS have been impaired by FRA's denial of waivers and field interpretations and have resulted in a burdensome and costly system disadvantaging the UP as compared to other railroads without the CCS–CS.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and contain a concise statement of the interest of the protestant in the proceeding. The original and two copies of the protest shall be filed with the Associate Administrator for Safety, FRA, 400 Seventh Street SW., Washington, DC 20590 within 45 calendar days of the date of issuance of this notice. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

FRA expects to be able to determine these matters without oral hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

Issued in Washington, DC, on April 21, 1993.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

[FR Doc. 93–9806 Filed 4–26–93; 8:45 am]

BILLING CODE 4910–06–M

National Highway Traffic Safety Administration

[Docket No. 93–28; Notice 1]

Ford Motor Co.; Receipt of Petition for Determination of Inconsequential Noncompliance

Ford Motor Company (Ford) of Dearborn, Michigan, has determined that some of its vehicles fail to comply with the labeling requirements of 49 CFR 571.105, Federal Motor Vehicle Safety Standard (FMVSS) No. 105, "Hydraulic Brake Systems," and has filed an appropriate report pursuant to 49 CFR part 573. Ford has also petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 et seq.) On the basis that the noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

During the period of May 9, 1989, through March 18, 1993, Ford manufactured approximately 16,800 F53 Basic Chassis incomplete vehicles which, when completed by manufacturers other than Ford, may not

VOL 58 ISS 79 AP 27 1993 UMI

meet the brake fluid warning label requirements of Standard No. 105. The brake fluid warning label required by Standard No. 105 is present, but may not be "located so as to be visible by direct view" as required. In the incomplete vehicle manual provided with the subject vehicles, Ford indicated that the vehicle, when completed, would conform to Standard No. 105 provided no alterations or modifications were made to the brake system reservoir labeling.

In Standard No. 105, Paragraph S5.4.3 *Reservoir labeling* states that "[e]ach vehicle shall have a brake fluid warning statement that reads as follows, in letters at least one-eighth of an inch high: 'WARNING, Clean filler cap before removing. Use only—fluid from a sealed container.' (Inserting the recommended type of brake fluid as specified in 49 CFR 571.116, e.g. 'DOT 3').' The lettering shall be * * * (b) [l]ocated so as to be visible by direct view, either on or within four inches of the brake fluid reservoir filler plug or cap."

On the subject vehicles, the lettering is embossed on the top surface of the master cylinder mounted reservoir and also on the reservoir cap. When installed in the chassis, the reservoir is located approximately four inches below the vehicle floor in the area just forward of the driver's seat. The master cylinder/reservoir assembly is serviceable through the left front wheel-well area, but neither the statement on the cap, nor the statement on the top surface of the reservoir is visible, in entirety, by direct view. However, the information provided on both the reservoir and the cap is correct, and the correct information also is provided in the owner's manual which accompanies each chassis and in Ford's service manuals.

Ford supports its petition for inconsequential noncompliance with the following:

It is important to note that the master cylinder reservoir on the Ford chassis is sufficiently transparent to allow the brake fluid level to be checked without removal of the cap. Consequently, the only time the cap should need to be removed is when it is necessary to add brake fluid, which should not occur in normal service because (1), as required by FMVSS No. 105, the reservoir capacity is sufficient to operate the brakes from a new lining, fully retracted position, to a fully worn, fully applied position, and (2), the fluid is not consumed in use. Rather, it should be necessary to add brake fluid only when the system is being bled to evacuate air during service to replace worn brake system components, or if a leak should occur, which requires repair to the system and bleeding to evacuate air. These kinds of brake system service are of the type likely to be performed only by trained and experienced personnel familiar with proper brake system servicing procedures, and [with] the need to use the correct type of brake fluid and avoid contamination.

Further increasing the likelihood that servicing the brake system in these vehicles will only be performed by knowledgeable personnel is the construction of the vehicle and location of the master cylinder and reservoir. The master cylinder and brake fluid reservoir must be serviced via the left front wheel-well either by turning the front wheels all the way to the left to create access, or by raising the vehicle on a hoist.

Ford believes that the likelihood that only trained personnel will be servicing the brake system, along with the less frequent need to remove the brake reservoir cap in these chassis because of the transparent reservoir, reduces considerably the likelihood that contaminants or incorrect brake fluid will be introduced into the brake system. With respect to the potential for brake fluid contamination, we find merit and submit the argument included in the [General Motors] petition [Docket No. 92–56] regarding the anomalous nature of this part of the warning statement concerning contamination, which in the practical sense is unnecessary if the area around the cap is clean, and may not be visible or may be illegible if the cap area is dirty.

This anomaly notwithstanding, Ford believes, based on the above information, that the ability to directly view the part of the warning statement addressing contamination in these chassis is somewhat less critical than in some other vehicles. With respect to usage of the proper type of brake fluid, adding fluid is not possible without removing the cap, and once the cap is removed, the statement on the cap is in fact "visible by direct view" by whomever removes the cap. We therefore believe that the likelihood of using incorrect brake fluid in these vehicles, particularly considering they are most likely to be serviced by knowledgeable personnel, is minimal, and noncompliance related to the part of the warning statement addressing the use of the proper brake fluid is especially inconsequential to motor vehicle safety.

In summary, in spite of the fact that the brake fluid reservoir warning statement on the affected Ford chassis may not be "visible by direct view," in entirety, as required by FMVSS No. 105, Ford does not believe there is a risk that contaminants would be introduced into the brake fluid reservoir, nor that incorrect fluid would be added. In addition, we are aware of no complaints, accidents, or injuries related to the brake fluid reservoir statement not being "visible by direct view."

Interested persons are invited to submit written data, views, and arguments on the petition of Ford, described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street, SW., Washington, DC, 20590. It is requested but not required that six copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, the notice will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: May 27, 1993.

(15 U.S.C. 1417; delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on: April 22, 1993.

Barry Felrice,

Associate Administrator for Rulemaking.

DEPARTMENT OF THE TREASURY

[Treasury Directive Number: 16–24]

Distributions of Foreign Claims Funds to Awardees; Authority Delegation

Dated: April 13, 1993.

1. Delegation.

By virtue of the authority delegated to the Fiscal Assistant Secretary by Treasury Order (TO) 101–05, I hereby delegate to the Commissioner, Financial Management Service, the authority to determine the pro rata distributions of awards under the War Claims Act of 1948, as amended, and the International Claims Settlement Act of 1949, as amended, that are certified to the Secretary of the Treasury by the Foreign Claims Settlement Commission.

2. Cancellation

Treasury Directive 16–24, "Distributions of War Claims Funds to Awardees," dated September 22, 1986, is superseded.

3. Authority.

a. TO 101–05, "Reporting Relationships and Supervision of Officials, Offices and Bureaus, Delegation of Certain Authority, and Order of Succession in the Department of the Treasury."

b. 50 U.S.C. App. 2017*l*.

c. 22 U.S.C. 1626 et seq.

d. 31 CFR part 250, part 251, and part 253.

4. Office of Primary Interest

Office of the Fiscal Assistant Secretary.

Gerald Murphy,

Fiscal Assistant Secretary.

BILLING CODE 4810–25–P

DEPARTMENT OF VETERANS AFFAIRS

Commercial Activities, Performance; Cost Comparison Schedules (OMB A–76 Implementation)

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In order to apprise the public of cost comparison studies which the Department of Veterans Affairs will conduct for the purposes of 38 U.S.C. 8110, the Department of Veterans Affairs serves notice to the public that the schedule of cost comparisons within the Veterans Health Administration (VHA) published on pages 43626–43628 of the **Federal Register** of October 28, 1985, has been changed. A number of cost comparison studies scheduled to begin earlier have been rescheduled to begin in 1993, due to extensive construction, replacement initiatives, and other management requirements. The following comprehensive list of the Department of Veterans Affairs cost comparison studies scheduled includes rescheduled start dates for some of the previously published VHA cost comparisons and approved schedules to re-study activities.

EFFECTIVE DATE: January 4, 1993.

FOR FURTHER INFORMATION CONTACT: Brodie C. Covington, Office of Policy and Planning, Management Analysis and Reports Service (008B3), Department of Veterans Affairs Central Office, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233–2487. Questions relating to specific cost comparisons or local "service-contracting" should be referred to the Director of the VA facility concerned.

Sunshine Act Meetings

Federal Register
Vol. 58, No. 79
Tuesday, April 27, 1993

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

BLACKSTONE RIVER VALLEY NATIONAL HERITAGE CORRIDOR COMMISSION

Notice of Meeting

Notice is hereby given in accordance with Section 552b of Title 5, United States Code, that a meeting of the Blackstone River Valley National Heritage Corridor Commission will be held on Thursday, May 6, 1993.

The Commission was established pursuant to Public Law 99-647. The purpose of the Commission is to assist federal, state and local authorities in the development and implementation of an integrated resource management plan for those lands and waters within the Corridor.

The meeting will convene at 7 p.m. at the Whitin Middle School, Granite Street, Uxbridge, MA, for the following reasons:

1. Introduction of new Corridor video
2. Report of Executive Committee on Budget and Administration
3. Report on status of boundary expansion effort
4. Report of Legislative Leadership Committee
5. Public Comment period

It is anticipated that about twenty people will be able to attend the session in addition to the Commission members.

Interested persons may make oral or written presentations to the Commission or file written statements. Such requests should be made prior to the meeting to James Pepper, Executive Director, Blackstone River Valley National Heritage Corridor Commission, P.O. Box 730, Uxbridge, MA 01569. Telephone: (508) 278-9400.

Further information concerning this meeting may be obtained from James Pepper, Executive Director, Blackstone River Valley National Heritage Corridor Commission, P.O. Box 730, Uxbridge, MA 01569.

James R. Pepper,

Executive Director, Blackstone River Valley National Heritage Corridor Commission.

Treatment of Shareholders of Certain Passive Foreign Investment Companies

Correction

In proposed rule document 92-6705 beginning on page 11024 in the issue of Wednesday, April 1, 1992, make the following corrections:

1. On page 11025:

a. In the first column, in the last complete paragraph, in the fifth line, "1.1291-10(2)(vii)" should read "1.1291-10(d)(2)(vii)".

b. In the second column, under **Background**, in the fifth line, "These" was misspelled.

c. In the same column, in the last complete paragraph, in the fifth line from the end, "subject" should have been capitalized.

d. In the third column, in the third line, "special" was misspelled and in the eighth line, "PFTC" should read "PFIC".

2. On page 11026, in the third column, in the second complete paragraph, in the eighth line from the end, "the" was misspelled the first time it appears, and in the last line insert "a" before "pedigreed".

3. On page 11027:

a. In the first column, in the sixth line, "prior PFIC" was misspelled.

b. In the same column, in the third complete paragraph, in the ninth line, "section" was misspelled.

c. In the second column, in the first line, "exceed" was misspelled.

d. In the same column, in the second complete paragraph, in the third line, "if" should read "in".

e. In the same column, in the third complete paragraph, in the second line, "generally" was misspelled and in the seventh line, "earnings" was misspelled.

f. In the same column, in the last line, "income sections" should read "income under section".

4. On page 11028:

a. In the first column, in the first complete paragraph, in the fourth line, "shareholder's" was misspelled.

b. In the same column, in the seventh line from the bottom, "§ 1.1291-2(f)(6)" should read "§ § 1.1291-2(f)(6)".

c. In the 2d column, under Indirect Dispositions, in the 6th line, "virtue" was misspelled and in the 12th line, "latter" was misspelled.

d. In the third column, above the last paragraph, "Transfers With" should read "Transfers Within".

5. On page 11029, in the first column, in the third full paragraph, in the third line, after "The" delete "tax" the first time it appears.

6. On the same page, in the same column, in the last full paragraph, in the eighth line from the end, "distribution" was misspelled.

7. On the same page, in the third column, in the last full paragraph, in the fifth line from the end, "transferee" was misspelled.

8. On page 11030:

a. In the first column, in the first full paragraph, in the fifth line, "gets" was misspelled and in the seventh line, "distribution" was misspelled.

b. In the same column, in the second full paragraph, in the fourth line, after "1291" insert "fund".

c. In the second column, in the first paragraph, in the fourth line from the end, "gain" was misspelled.

d. In the third column, in the second full paragraph, in the fifth line, "make" should read "made".

9. On page 11031, in the second column, in the eighth line, "mark-to-market" was misspelled.

§ 1.367(a)-1T [Corrected]

10. On the same page, in § 1.367(e)-1T(d)(4), in the last line, "§ 1.1291-(c)(1)." should read "§ 1.1291-1(c)(1)."

§ 1.367(e)-2T [Corrected]

11. On the same page, in § 1.367(e)-2T(c)(3)(iv), in the third line, after "to" insert "a".

§ 1.1291-1 [Corrected]

12. On page 11034, in the second column, in § 1.1291-1(b)(6), in the fourth line, "representation" was misspelled.

13. On page 11035, in the second column, in § 1.1291-1(h)(3), in the *Example*, beginning in the fifth line from the end, "§ 1.1291-1(H)(3)" should read "§ 1.1291-1(h)(3)".

14. On the same page, in the third column, in § 1.1291-1(h)(4)(i)(B), in the last line, "predecessor" was misspelled

VOL 58 ISS 79 AP 27 1993 UMI

15. On page 11036, in the first column, in § 1.1291-1(i), in the tenth line, "corporation" was misspelled.

§ 1.1291-2 [Corrected]

16. On page 11037:

a. In the first column, in § 1.1291-2(b)(3)(i), in the second line, "and" should read "any".

b. In the same column, in § 1.1291-2(b)(3)(i), in the *Example*, in the seventh line from the end, "§ 1.1291-2(b)(3)(1)" should read "§ 1.1291-2(b)(3)(i)".

c. In the same column, in § 1.1291-2(c)(1), in the sixth line from the end "section" was misspelled and in the second line from the end "distribution" was misspelled.

d. In the same column, in § 1.1291-2(c)(2), in the first line, "*distribution*" was misspelled.

e. In the second column, in § 1.1291-2(c)(2)(iii), in the sixth line, "during" was misspelled.

17. On page 11038, in the third column, in § 1.1291-2(d)(5)(i)(A), in the second line, "fund" was misspelled.

18. On page 11040:

a. In the first column, in § 1.1291-2(e)(4)*Example 2*(ii), in the first line, "shareholder" should read "PFIC".

b. In the same column, in § 1.1291-2(e)(4)*Example 2*(iii), in the sixth line, "$150,00" should read "$150,000", and in the second line after the table, insert "year" after "prePFIC".

c. In the same column, in § 1.1291-2(e)(4)*Example 3*(iii), in the second line, "Block #1" was misspelled.

d. In the third column, in § 1.1291-2(f)(1)*Example*(iii), in the fifth line, "$801" should read "$80".

19. On page 11041, in the first column, in § 1.1291-2(f)(6), in the sixth line, "paragraph" was misspelled.

§ 1.1291-3 [Corrected]

20. On page 11041:

a. In the second column, in § 1.1291-3(b)(1), in the eighth line, "transfer" was misspelled.

b. In the same column, in § 1.1291-3(c), in the last line, "disposition" was misspelled.

c. In the third column, in § 1.1291-3(d)(1), in the tenth line, "paragraph" was misspelled.

d. In the same column, in § 1.1291-3(d)(6), in the fourth line from the end, "secure" was misspelled.

21. On page 11042:

a. In the first column, in § 1.1291-3(d)(7), in *Example 1*, in the fifth line from the end, "pledged" was misspelled.

b. In the same column, in § 1.1291-3(d)(7), in *Example 2*, in the second line, "*Example*" should read "*Example 1*", and in the eighth line, "disposition" was misspelled.

c. In the same column, in § 1.1291-3(e)(2)(i), in the last line, "in" should read "under".

d. In the same column, in § 1.1291-3(e)(2)(iii), in the seventh line, "ownership" was misspelled.

e. In the second column, in § 1.1291-3(e)(3)*Example 1*, in the second line from the end, "§ 1.1291-3(e)(iii)" should read "§ 1.1291-3(e)(2)(iii)".

f. In the same column, in § 1.1291-3(e)(3)*Example 3*, in the second line from the end, before "pursuant" insert "and therefore is an indirect disposition of the FYZ stock," and "§ 1.1291-3(e)(2(iii)" should read "§ 1.1291-3(e)(2)(iii)".

g. In the third column, in § 1.1291-3(e)(4)(iii), in the fifth line, "the" was misspelled, and in the second line from the end, "paragraph" was misspelled.

22. On page 11043, in the second column, in § 1.1291-3(j), in the eighth line, "section" was misspelled.

§ 1.1291-4 [Corrected]

23. On the same page, in the third column, in § 1.1291-4(d)(2), in the seventh line, "section 453(c)" should read "section 453A (c)".

24. On page 11044, in the first column, in § 1.1291-4(e)*Example 2*(ii), beginning in the tenth line, "§ 1.291-3(e)(5)" should read "1.1291-3(e)(5)".

§ 1.1291-5 [Corrected]

25. On page 11046, in the first column, in § 1.1291-5(c)(vi), in the second line, "tentative" was misspelled.

26. On the same page, in the same column, in § 1.1291-5(c)(vii), in the second line, "foreign" was misspelled.

27. On page 11047, in the second column, in § 1.1291-5(3)(viii), in the fifth line from the end, after "$30.62" insert "(1987 general limiation FTC limitation) and $23.73".

28. On the same page, in the same column, in § 1.1291-5(d), in the third line from the end, after "apply to" insert "a".

§ 1.1291-6 [Corrected]

29. On page 11048, in the 2d column, in § 1.1291-6(b)(4)(iv), in the 11th line, "dividend" was misspelled.

30. On page 11049:

a. In the first column, in § 1.1291-6(c)(2)(ii), in the fourth line, "section 358(b)" should read "section 368(b)".

b. In the second column, in § 1.1291-6(c)(2)(vi)(A), in the third line, "pursuant" was misspelled.

c. In the same column, in § 1.1291-6(c)(3)(i), in the third line, "disposition" was misspelled.

d. In the same column, in § 1.1291-6(c)(3)(ii), in the second line, "*partnership*" and "recognized" were misspelled.

31. On page 11050, in the first column, in § 1.1291-6(e), in the first line, "*nonqualifying*" was misspelled.

32. On the same page, in the second column, in § 1.1291-6(f)*Example 3*, in the third line from the end, "or" should read "of".

§ 1.1291-8 [Corrected]

33. On page 11052, in the third column, in § 1.1291-8(f), in the seventh line, "federal" should not have been capitalized.

34. On the same page, in the same column, in § 1.1291-8(g)(1)(i), in the sixth line, "or" should read "of".

§ 1.1291-9 [Corrected]

35. On page 11053, in the first column, in § 1.1291-9(a)(2)(i), in the third line, after "profits" delete "and".

§ 1.1295-1 [Corrected]

36. On page 11055, in the second column, in § 1.1295-1(b)(2)(i), in the fourth line, after "QEF." delete the comma.

BILLING CODE 1505-01-D

the Federal Register

April 27, 1993

Part II

Environmental Protection Agency

40 CFR Parts 260, et al.

Wood Surface Protection; Identification and Listing of Hazardous Waste; Testing and Monitoring Activities; Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities; Proposed Rule

VOL 58 ISS 79 APR 27 1993 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 260, 261, 264, 265, 270 and 302

[FRL–4596–6]

RIN 2050–AD60

Wood Surface Protection; Identification and Listing of Hazardous Waste; Testing and Monitoring Activities; Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is proposing to amend the regulations for hazardous waste management under the Resource Conservation and Recovery Act (RCRA) by proposing to list as hazardous certain wastes from the use of chlorophenolic formulations in the wood surface protection industry. The Agency is proposing to list these wastes if the user's in-process formulation contains a concentration greater than 100 ppb pentachlorophenate. This action proposes various testing, analysis, recordkeeping requirements and management standards for wood surface protection plants. Related to the testing requirement, the Agency proposes to amend SW–846 ("Test Methods for Evaluating Solid Waste, Physical/Chemical Methods") to include Method 4010 (Immunoassay Test for the Presence of Pentachlorophenate). This action also proposes to modify the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) list of hazardous substances to reflect the newly proposed listing. This action proposes to add six hazardous constituents to appendix VIII of 40 CFR part 261 and to amend appendix VII of 40 CFR part 261 by adding F033 and the hazardous constituents found in the wastes on which the listing determination is based. Finally, this action also requests comment on the option not to list as hazardous wastes from the surface protection processes which would fall within the scope of this proposed listing. The "no-list" option is being considered by the Agency because future generation of these wastes is expected to rapidly diminish and because the results from risk analysis show that risk from the dominant exposure pathways is relatively modest assuming the widespread use of chlorophenolics does not resume. The intended effect of this proposed listing will be to insure that wastes generated from surface protection processes covered under this listing will be properly managed.

DATES: EPA will accept public comments on this proposed rule until June 28, 1993. Comments postmarked after this date will be marked "late" and may not be considered. Requests for extensions will not be granted due to judicial deadlines for the promulgation of a final rule. Any person may request a public hearing on this proposal by filing a request with Mr. David Bussard, whose address appears below, by May 11, 1993.

ADDRESSES: The official record of this rule-making is identified by Docket Number F–93–F33P–FFFFF and is located at the following address: EPA RCRA Docket Clerk, room 2427 (OS–332), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

The docket is open from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. The public must make an appointment to review docket materials by calling (202) 260–9327. The public may copy 100 pages from the docket at no charge; additional copies are $0.15 per page. Copies of materials relevant to the CERCLA portions of this rulemaking also are located in room 2427 at the above address.

To request a public hearing on this proposal file a request with Mr. David Bussard (OW–330), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: The RCRA/Superfund Hotline, at (800) 424–9346 (toll-free) or (703) 920–9810, in the Washington, DC metropolitan area. The TDD Hotline number is (800) 553–7672 (toll-free) or (703) 486–3323, locally. For technical information on the proposed listing, contact Mr. David J. Carver at (202) 260–6775, Office of Solid Waste (OS–333), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

For technical information on the CERCLA aspects of this rule, contact: Ms. Gerain H. Perry, Response Standards and Criteria Branch, Emergency Response Division (5202–G), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (703) 603–8732.

SUPPLEMENTARY INFORMATION: To assist the public in its review of critical documents, the Agency has provided copies of all relevant background documents to the following affected National trade groups: American Forest & Paper Association, and the National Furniture Manufacturers Association. These documents are also available for public review in the docket for this rulemaking. The contents of this preamble are listed in the following outline:

I. Legal Authority
II. Background
A. History of the Regulation
B. Summary of Additional Information Collection
III. Description of the Industry and Surface Protection Processes
A. Defining Surface Protection
B. Process Description
IV. Summary of the Proposed Regulation
A. Overview of Proposed Hazardous Waste Listing
B. Proposed Hazardous Waste Management Standards
C. Historical Soil Contamination
V. Options Considered by the Agency
A. Not Listing Wood Surface Protection Wastes as Hazardous
B. Rationale for Proposing to List Wood Surface Protection Wastes as Hazardous
VI. Description of Wastes Generated
A. Types of Wastes Included in this Proposal
B. Quantities of Waste Generated
C. Waste Management Practices
D. Pollution Prevention and Recycling Practices
VII. Analysis Supporting this Proposal
A. Recorded Incidents of Environmental Contamination
B. Waste Characterization and Constituents of Concern
C. Health and Ecological Effects

I. Legal Authority

These regulations are being promulgated under the authority of sections 2002(a) and 3001(b) and (e)(1) of the Solid Waste Disposal Act, as amended, 42 U.S.C. 6912(a), 6921(b) and (e)(1), and 6922 (commonly referred to as RCRA), and section 102(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9602(a).

II. Background

A. History of the Regulation

Section 3001(e) of RCRA as amended by the Hazardous and Solid Waste Amendments (HSWA) requires EPA to determine whether to list as hazardous wastes containing chlorinated dioxins and chlorinated dibenzofurans. As part of this mandate, the Agency in 1988 initiated an investigation of dioxin-containing wastes from wood surface protection and wood preserving processes.

On December 30, 1988, EPA proposed four hazardous waste listings pertaining to wastes from wood preserving and surface protection, as well as a set of standards for the management of these wastes (53 FR 53282). The Agency finalized three generic hazardous waste listings for wastes from wood preserving processes and promulgated standards in 40 CFR parts 264/265, Subpart W for the management of these wastes on drip pads on December 6, 1990 (55 FR 50450). (The Agency subsequently modified those listings on December 24, 1992 (57 FR 61492).) In the December 6, 1990 final rule, the Agency deferred listing wastes from the surface protection industry because of a need for additional data on these wastes to determine whether they should be listed as hazardous wastes.

In accordance with a proposed consent decree signed by the EPA and the Environmental Defense Fund (EDF), EPA has agreed to promulgate a final listing determination for chlorophenolic wastes generated by the wood surface protection industry by the end of December, 1993.

B. Summary of Additional Information Collection

Since 1990, the Agency has acquired a substantial amount of new information on the surface protection industry and its waste generation. This new information was obtained, in part, from questionnaire responses which the Agency received from 134 plants under the authority of RCRA section 3007. The information obtained includes a history of past use of the chlorophenolic surface protectants and information on the duration of their use, as well as production information, process information, and waste generation and management information.

In addition to the information collected through the questionnaires, the Agency visited and interviewed personnel at various plant sites throughout the Nation. The majority of the plants selected for on-site interviews used, at the time of the visit, chlorophenolic formulations to protect the surface of lumber. All process types and varying production sizes were observed. These visits assisted the Agency in selecting appropriate initial sampling locations, as well as in obtaining information about process layouts, terrain, and proximity to groundwater wells. In addition, the Agency studied waste management and pollution prevention practices. Subsequent site visits included familiarization sampling which was used to estimate present waste content prior to record sampling which followed during subsequent site visits. The site selection process was not a random selection process. The Agency conducted on-site studies at 19 different operating plants. From information collected at these on-site visits, combined with extensive research and industry trade group assistance, the Agency determined that it could obtain better, more realistic information on the wastes generated by the sawmill industry if it chose specific sites, instead of using a random selection process. The Agency used various parameters to select the five chosen sites for record analysis. A more detailed discussion as to site selection can be found in the background document for this rulemaking. However, the Agency believed that the following variables affected waste generation to the largest degree: (1) Process type, (2) production quantity, (3) current management practices, (3) current or past user status (along with time period since last used a chlorophenolic), (4) degree for potential groundwater contamination as expressed by a drastic score analysis, and (5) whether or not a plant cleaned out equipment prior to switching over to a substitute product. Video and still photography captured much of the on-site work. Information was also collected from plant personnel. The Agency also collected information from EPA Regional Offices, State and local agencies, and other federal agencies including the U.S. Forest Service, the Department of Commerce, the Internal Revenue Service, and the U.S. Customs Service. All information related to this proposal for which a Confidential Business Information (CBI) claim has not been made is available for public review in the docket for this rulemaking. For more information about the Agency's CBI protection, please refer to 40 CFR part 2, subpart B. The Agency requests comment on the information gathered to support this proposal, including information gathered from sawmill sites across the country.

Based on the additional data collected, the Agency examined potential human health pathways, ecological effects, and performed new risk modeling to simulate the flow of waste drippage to ground water and to nearby streams. Both waste and environmental media samples were taken to obtain true soil concentrations for the purpose of running the risk models. Also, additional damage incidents were identified to provide additional data for this listing determination. The details of the Agency's risk assessment and health effects analysis are discussed in section VI.(C) of the preamble.

III. Description of the Industry and Surface Protection Processes

A. Defining Surfoce Protection

The wood surface protection industry consists primarily of sawmills that cut rough lumber and timber. United States manufacturers produced a total of 43.13 billion board feet of lumber in 1989. Of the total production, the top 10 lumber producers manufactured 13.71 billion board feet, about 28 percent of the total U.S. output. Small sawmill operations account for the remaining volume (72%) of the lumber produced in the U.S.

The types of wood that are cut are divided into two main classes, softwoods and hardwoods. Softwoods are those obtained from such coniferous trees as pines, spruces, hemlocks, and firs; hardwoods come from deciduous trees, and include such trees as oaks, ashes, maples, basswood, poplars, gums, as well as many tropical trees. Softwoods are used more extensively in building construction and hardwoods

VOL 58 ISS 79 AP 27 1993 UMI

are used for furniture, interior finish, and for products where special wood structure is desired.

The surface protection industry protects wood against sapstaining that may occur during temporary lumber storage. Sapstaining of freshly cut lumber will occur in humid conditions, typically when the water content inside the wood is greater than 19% water. Sapstain does not attack the structural components of the wood, however, the affected surface becomes colored with dark blue or black stains. This discoloration is often objectionable to the buyer and may decrease the value of the wood. Following one day of storage, the stain can usually be planed away; however, stains that remain on lumber for a longer period usually cannot be planed away without excessive wood loss. To avoid staining, many plants coat lumber with chemicals to prevent the occurrence of stain. This practice is accomplished on-site at sawmills throughout the country, during various periods of the year, depending on the regional climate. The Agency believes that there are approximately 3200 sawmills operating in the U.S. today. Out of that number, approximately 980 mills perform some surface protection activities.

The Agency believes that other industries, including furniture manufacturing and lumber export, are or have been engaged in surface protection operations. The Agency requests information on the extent or absence of this practice (both past and current) within these and other industries. It is important to note that because the Agency is proposing a non-specific source hazardous waste listing (F waste code), all industries performing surface protection operations are potentially subject to this proposed regulation, not just sawmills. Based on any information received during the comment period and from further EPA investigations before promulgation of the final rule, EPA will modify the risk and cost estimates as appropriate to account for other potentially affected facilities.

The surface protection of wood involves the application of sapstain control agents by spraying or dipping. Historically, chlorophenolic formulations used for anti-stain purposes consisted of sodium pentachlorophenate, which is an aqueous solution produced by dissolving pentachlorophenol in sodium hydroxide (NaOH). The active ingredient in the formulation, depending upon the pH of the system, may exist as pentachlorophenol or as sodium pentachlorophenate.

The trade names of the chlorophenolic formulations used in wood surface protection include Permatox 101, Permatox 181, and Permatox 10S, all of which were made by Chapman Chemicals and are no longer being produced. By the time today's proposal is promulgated as a final rule, the Agency does not expect there will be any users of full-strength chlorophenolic formulations within the surface protection industry. ("Full-strength" formulations are those having a typically recommended chlorophenolic content by the manufacturer of approximately 0.4 percent pentachlorophenate.) Many plants, however, use, and will continue to use for some time, formulations with lower concentrations of pentachlorophenate.

As a result of increased environmental concerns and more stringent regulation involving pentachlorophenol and related chemicals, alternative formulations have been developed to replace sodium pentachlorophenate. The Agency requests information on substitute chemicals sold in the U.S. that can be used in place of the chlorophenolic formulations with which this proposed listing is concerned. Information on alternate use will be incorporated into a manual detailing pollution prevention methods currently being developed by the Agency to benefit the lumber industry.

B. Process Description

Sawmill cutting operations are typically the same at all plants. Raw logs are cut into cants that are trimmed into rough lumber. In some cases, cants are cut to specific lengths or further finished depending on the final destination of the lumber product. Not all sawmills conduct surface protection operations. Surface protection is typically conducted at mills that process hardwoods; however, soft woods cut for export may also be surface protected.

An estimation of process "cutting" production rates is important in estimating surface protection waste generation rates. For this purpose, the Agency grouped mills into three categories, by production rate: Small mill production (less than 5 million board feet (mbf) per year), medium mill production (between 5 and 25 mbf/year), and large mill production (more than 25 mbf/year). The Agency studied these groups to determine if particular management standards or practices are related to mill size. The Agency conducted on-site interviews and sampling at mills in all three production categories. After the wood is cut, it is stacked and prepared for surface protection. The large mills in the western U.S. export much of their product and treat their lumber with surface protectants all year, while smaller plants or large plants that do not typically export, only treat their lumber with surface protectants during humid months depending on the region of the country in which they operate. Often, wood that is prepared for export is treated with surface protectants because ship transit often subjects the wood to high humidity. Usually, only high grade wood is treated with surface protectants.

Once the wood has been cut at a sawmill, it is typically surface protected unless it is low quality, or will be preserved later at a different facility (i.e., by the customer). Although surface protection is usually accomplished at the sawmill, the Agency recognizes, as noted above, that other types of facilities (particularly furniture manufacturers) may perform this process. The Agency assumes that the types of processes used at sawmills (described below) are the same as those used by furniture manufacturers or other types and that the quantities of waste generated are also similar. This assumption is based on the Agency's in-depth knowledge of wood surface protection. The processes described in this section are, to the Agency's knowledge, the only types of processes available for wood surface protection, and, therefore, are the only processes likely to be used by any industry which surface protects wood.

There are three major processes used by sawmills for applying anti-stain formulation to wood: the dip process, the spray process, and the green chain process. The Agency was unable to obtain information on the treatment of wood by furniture manufacturers or exporting firms and requests information on this.

Typically, a sawmill will use only one process to surface protect; however, the Agency realizes that some plants use a combination of processes to treat lumber at different locations throughout a mill. Dipping is a batch process; green chain and spray operations are continuous processes. The process type influences the amount of control a plant has on waste which it generates.

Dip operations offer the best opportunity to control drippage since an owner or operator has the capability of keeping the wood over the tank until it stops dripping. In actuality, however, dipping operations can lead to more drippage when mills do not allow the treated loads to stop dripping before the next load is dipped. Lumber is dipped in horizontal bundles, as a result, surface protectant is often trapped within the bundles (referred to as "entrained" liquid). When forklifts remove the lumber, large quantities of protectant can drip from the wood if the lumber is tipped.

Unlike the dipping operation, the spray operation is a continuous operation. Individual pieces of lumber are fed end-to-end by chain, roller, or conveyor belt system through a spray box, which is often equipped with flexible brushes or curtains at both ends to isolate the formulation spray and minimize drippage.

Green-chain systems represent another type of continuous operation. The green-chain is so-named because chains drag fresh cut (or "green") lumber through a tank of protectant formulation and back out again for sorting and grading. After the wood is cut, it is transferred to the green chain. A dip vat containing anti-stain formulation is typically located at the head of the green chain and the wood falls into this vat from the cutting operations. Some systems utilize wheels or rollers just above the formulation surface to force the wood pieces completely into the solution. As the wood is drawn from the vat and along the green chain, excess formulation is released from the wood pieces. Green-chain operations are typically the least controllable operation with respect to drippage.

IV. Summary of the Proposed Regulation

A. Overview of Proposed Hazardous Waste Listing

The Agency is proposing to add one group of wastes from the wood surface protection industry to the list of hazardous wastes from non-specific sources (40 CFR 261.31). This listing, if made final, would carry the F033 waste code and includes the following specific wastestreams:

F033: Process residuals, wastewaters that come in contact with protectant, discarded spent formulation, and protectant drippage from wood surface protection processes at plants that use surface protection chemicals having an in-process formulation concentration of pentachlorophenate (expressed as pentachlorophenol during analysis) exceeding 0.1 ppm. (T)

As noted in the language of the listing description, the Agency proposes to list as hazardous only those wastes from wood surface protection processes using protectant formulations that have a pentachlorophenate concentration greater than 0.1 ppm. Under this concentration trigger, the F033 listing may cover owners or operators who have switched to an alternate, non-chlorophenolic formulation (so-called "transitional users") and who did not clean out their equipment prior to switch-over. The Agency considers the wastes generated by such transitional users to be included within the scope of this proposed listing if their formulations exceed the proposed concentration. It is possible, however, that wastes generated by a transitional user may not meet the listing description if product switch-over either occurred long enough ago so that all the chlorophenolics have been consumed in the process or if the tank was cleaned out thoroughly prior to switch-over.

To minimize future risks to human health and the environment from the release of wastes, EPA has set a maximum level of pentachlorophenate in a formulation of 0.1 ppm (100 ppb) as the level above which the proposed listing applies. An owner/operator using formulations containing pentachlorophenate at or below 0.1 ppm does not generate wastes that meet the proposed F033 listing. As described later, the Agency's risk assessment suggests that the use of surface protection formulations containing chlorophenolics at concentrations greater than 0.1 ppm may pose risks to human health and the environment.

Formulations with penta-chlorophenate concentrations at or below the 0.1 ppm threshold established in the proposed listing description would result in levels of pentachlorophenate that reach ground water that are below health-based levels of concern. The 0.1 level was calculated using a Maximum Contaminant Level (MCL) of 0.001 ppm and a risk analysis using the Agency's Multi-med model. Multi-med simulates the risk to groundwater from specific sources, and for this proposal, it incorporated variables which are specific to sawmill conditions. The Agency's analysis approximated the dilution of pentachlorophenate from the time the waste contacts the ground to when it reaches a ground water well. The Agency's selection of the 0.1 ppm formulation concentration level generates risk levels to human health from groundwater contamination ranging from a high end individual risk range of 5×10^{-7} to 7×10^{-6} to a central tendency individual risk of 2×10^{-8}. The Agency considers these risks to lie within the acceptable risk range. The Agency did not arrive at the 0.1 ppm level by applying a dilution attenuation factor (DAF) of 100 (as the Agency has done in other circumstances) to the MCL. Indeed, the Agency is not taking a position, in this proposal, about the use of DAFs in calculating acceptable risk levels for any constituents. A detailed discussion of the Agency's modeling assumptions and actual parameters used to generate risk approximations can be found in the docket for this proposed rule.

This calculated level of 0.1 ppm for the pentachlorophenate formulation content is also consistent with levels used in the Agency's RCRA hazardous waste delisting program (see 40 CFR 260.22). In making delisting determinations, the Agency compares leachable levels of the constituents of concern associated with a particular waste with health based levels for those constituents. The model used (the Composite Model for Landfills, or CML) in making delisting determinations generates Dilution Attenuation Factors (DAFs) in a range from 10 to 100. Where a particular waste's volume is not known, a conservative DAF of 10 is used. The CML-generated DAF is then used to determine constituent levels for delisting. A typical level for which wastes may be delisted for leachable pentachlorophenol constituents is between 1×10^{-2} to 0.1 ppm. A typical level for pentachlorophenate constituents would be the same, because the leachable pentachlorophenate would be expressed in analysis as pentachlorophenol. Thus, the pentachlorophenate concentration level of 0.1 for in-process formulations in the proposed listing is consistent with the delisting level.

The Agency notes that industry has been voluntarily switching to alternate non-chlorophenolic substitutes. By listing wastes generated from formulations whose pentachlorophenate concentration is above 0.1 ppm, the Agency hopes to contribute to these voluntary measures and to create an impetus for switching away from the use of chlorophenolic compounds. In order to achieve a pentachlorophenate level at or beneath 0.1 ppm, a plant that at one point used a chlorophenolic formulation must typically clean its equipment. The Agency has determined that sandblasting the formulation tank is one effective method for cleaning equipment to reduce penta-chlorophenate levels. The Agency has also found that formulation tank sandblasting followed by coating the tank with epoxy coating will reduce both pentachlorophenate levels and dioxin levels. This is because dioxin tends to bind to the walls of equipment and the coating provides a physical barrier to cross-contamination. Because of the added environmental benefits of reducing levels of dioxin in the formulation (and this reducing possible dioxin contamination in process area

VOL 58 ISS 79 AP 27 1993 UMI

soils due to drippage), the Agency recommends, but is not requiring, that formulation tanks be cleaned by sandblasting followed by epoxy coating. Further information on the Agency's findings, including a discussion equipment cleaning field testing conducted during the development of this proposal can be found in the docket associated with this rulemaking.

The Agency is also proposing to require that those surface protection plants that do not generate an F033 hazardous waste because their in-process formulation is equal to or less than 0.1 ppm pentachlorophenate to test their formulations using a method found in SW–846 (Test Methods for Evaluating Solid Waste, Physical/Chemical Methods). Several appropriate methods can be found in SW–846, including methods 8040 and 8270. This notice also proposes to add Method 4010 (Immunoassay Test for Determining the Presence of Pentachlorophenate) to SW–846. The testing analysis must be performed by a laboratory qualified to perform the analysis. The Agency also proposes to require that either a licensed professional engineer or a responsible company official sign a certification stating the sampling location, the laboratory used with address, the date the analysis was performed, the type of analysis used and the analysis results.

The Agency notes that the proposed testing requirement does not affect the requirement of 40 CFR 262.11 that every generator of a solid waste determine whether that waste is a hazardous waste. Maintaining a signed certification, as described above, will, however, establish a presumption that the plant has complied with 40 CFR 262.11.

Although EPA has not, in the past, imposed an affirmative testing requirement in connection with the listing of other hazardous wastes, the Agency feels that the testing requirement proposed today is both reasonable and appropriate. Unlike other listed hazardous wastes, F033, as proposed, includes in its regulatory listing description a specific numerical concentration component. Without testing and analysis requirements it would be difficult for an Agency inspector to determine whether the surface protectant formulation at a given plant is at or beneath the proposed threshold level: The level of pentachlorophenate in formulations level cannot be determined by observation alone. It is important to note that concentration testing is not required for *wastes;* rather, the concentration of pentachlorophenate in the in-process formulation defines, in part, the scope of the proposed listing, thus making testing appropriate. The Agency requests comment on the appropriateness of imposing this testing requirement.

The importance of the proposed concentration trigger in the proposed listing description cannot be overemphasized. Only processes using formulations with a concentration of pentachlorophenate exceeding the standard in the proposed listing would generate F033 wastes and, thus, be subject to the requirements proposed today. It is important to note that all wood surface protection plant owner and/or operators that have used chlorophenolics in the past who wish to transition from the use of chlorophenolic to non-chlorophenolic formulations in order to avoid handling their wastes as F033 hazardous wastes will be required to test their in-process formulations. Plants whose formulations test at or below 0.1 ppm pentachlorophenate would not generate F033 wastes. Under today's proposal, however, these plants must maintain records of this analysis and comply with other one-time provisions of proposed subpart T (§ 264.561(a) and § 264.562).

If a plant elects to not handle its wastes as F033 hazardous waste, and believes that its in-process formulation is at or beneath the proposed pentachlorophenate concentration level, the plant owner/operator must sample and analyze the in-process product formulation used to protect the surface of lumber. Such sampling must be conducted immediately following operation (and consistent with safe plant operations), and must be conducted by the owner/operator utilizing the guidance found in chapter 9 (sampling plan) and chapter 10 (sampling methods) of EPA's Test Methods for Evaluating Solid Waste, Physical/Chemical Methods (SW–846). Analysis of the formulation will require the utilization of a qualified analytical laboratory. Sampling must be performed immediately after operation to ensure a true characterization of the formulation, since it is the formulation, agitated by use during operation, that drips from treated wood as waste. The results of this analysis must be maintained on-site as long as the plant is in operation. EPA is proposing that laboratories must use test methods found in SW–846. Methods 8040 and 8270, which appear in SW–846 are appropriate for this analysis. The Agency believes that method 4010, which is presently in draft form and not a part of SW–846, is also appropriate for the determination of pentachlorophenate content. EPA is proposing to add method 4010 to SW–846.

Method 4010 is an immunoassay test for the presence of pentachlorophenate. It does not provide an exact concentration, but determines whether a sample is above or below a set limit (like the 0.1 ppm level proposed today). The detection limit for this test is 0.005 ppm. Method 4010 is presently in draft status and this action proposes its incorporation in SW–846.

Other methods for the determination of pentachlorophenate as pentachlorophenol are SW–846 Methods 8270 and 8040. Method 8270 (entitled Semi-Volatile Organic Compounds by Gas Chromatography/Mass Spectrometry (GC/MS)) uses a mass spectrometer to perform analytical measurements. Another SW–846 method, EPA Method 8040 (entitled Phenols by Gas Chromatography), utilizes a flame ionization technique or an electron capture procedure to obtain pentachlorophenate concentrations. EPA requests data on other test methods that may be equally effective in detecting pentachlorophenate.

B. Proposed Hazardous Waste Management Standards

The EPA has found that the wastes proposed for listing today contain toxic constituents, some of which are carcinogenic. These wastes, when mismanaged, pose a substantial threat to human health and the environment. Based on its study of the industry, the Agency considers waste mismanagement to include drippage, spillage, or other releases onto soil as well as disposal of tank sludge into sawdust piles to be carried off as boiler fuel. The Agency considers the burning of sawdust contaminated by sludges heavily laden with pentachlorophenate and dioxin to be an example of mismanagement of this waste when the plants which burn the sawdust usually do not follow 40 CFR part 266, subpart H under the Boiler and Industrial Furnace ("BIF") Rule or 40 CFR parts 264/265, subpart O which covers incinerator operation requirements. If, however, a plant was classified as a boiler or an industrial furnace and is in compliance with applicable regulations, then the burning of these sludges would not be an example of mismanagement. In addition, the Agency has compiled information showing that certain constituents found in these wastes are persistent and mobile in the environment surrounding surface protection plants. Wastes from this industry are also water-soluble and can be carried by precipitation run-off over and down through soil. These

constituents are capable of reaching sensitive environmental systems in harmful concentrations. Information that supports these claims is described in detail in section VI(C) of this preamble and additional supporting information can be found in the docket for this rulemaking.

In support of the F033 listing proposed today, EPA is proposing to amend appendices VII and VIII of part 261, Basis for Listing Hazardous Waste and Hazardous Constituents, respectively. These appendices are amended to add the hazardous constituents that form the basis for listing proposed hazardous waste No. F033 (appendix VII), as well as other hazardous constituents contained in the proposed F033 waste streams (appendix VIII).

The Agency is proposing to require wood surface protectors whose wastes fall within the scope of this listing to comply with certain specific management standards proposed today as subpart T of parts 264 and 265. In addition, surface protectors must operate and maintain their plants in accordance with all otherwise applicable RCRA requirements to minimize the extent to which the wastes contaminate the environment. The Agency believes that existing methods for managing hazardous waste under EPA's regulations are available to many surface protection plants and can adequately protect human health and the environment from the risks posed by the waste streams which the Agency is proposing to list as hazardous. Examples of such regulatory programs are the hazardous waste tank regulations in 40 CFR parts 264/265, subpart J and the standards for drip pads in 40 CFR parts 264/265, subpart W. The Agency is proposing to require plants that generate F033 wastes to manage their F033 wastes in units that satisfy either subpart J or subpart W requirements.

Under today's proposed hazardous waste listing, the Agency would consider surface protection plants who have formulations with pentachlorophenate concentrations greater than 0.1 ppm to be potential generators of F033 hazardous waste under the RCRA program. There is no RCRA requirement that generators, solely due to their status as generators, obtain permits for operation under subpart W or J. However, generators are required, at times, to obtain permits if they store generated wastes on-site for time periods which exceed their RCRA storage allowances based on the amount of waste generated. For example, if a plant generated greater than 100 but less than 1000 kg of waste in any one calendar month and complied with certain conditions, it would be allowed to store hazardous wastes on-site for up to 180 days without obtaining a RCRA permit. See 40 CFR 262.34(d), (f). If a plant generates more than 1000 kg of hazardous waste in any one calendar month (considered a large quantity generator), then the plant would be allowed to store hazardous wastes on-site for up to 90 days without a permit. See 40 CFR 262.34(a).

Because both wood preserving and surface protection processes treat lumber with chlorophenolic formulations, a short description of the differences between the two industries and their waste generation is necessary. The Agency considers a "wood preserving process" to be any process intended to preserve wood from structural attack. A wood surface protection process is a process merely intended to prevent surface discoloration. The distinction, therefore, is not based on the type of process used, i.e., pressure treatment or non-pressure dip treatment, but on the intent of the treatment itself. Therefore, "dipping" operations are not excluded from wood preserving if the intent of the operation is to preserve wood. As the Agency stated in its initial proposed wood preserving hazardous waste listing, that wood preservatives are used to delay deterioration and decay of wood caused by organisms such as insects, fungi, and marine borers. Surface discoloration (sapstaining) during short term storage can be adequately controlled by a superficial application of preservative, but for long lasting effectiveness, penetration of preservative to a uniform depth is required. This deep penetration is usually accomplished by forcing preservative into the wood under pressure, so that "pressure treated" is often used as a synonym for "preserved". (53 FR 53282, December 30, 1988).

Typically, sodium penta-chlorophenate is used for sapstain control on lumber following cutting. Sapstain control is considered surface protection, not wood preserving. However, if a plant is treating wood with sodium pentachlorophenate with the intent of preserving the wood, it would be considered a wood preserving operation, and the wastes generated would be chlorophenolic wastes from a wood preserving plant (noted as a facility in the wood preserving regulations) designated as F032. The Agency believes that it would be very unlikely that a wood preserving facility would use sodium pentachlorophenate to preserve wood, since the preserving solution is aqueous and would wash off the treated wood and render the treatment ineffective, since it is the intent of wood preserving to obtain a long term protection of the wood.

As noted recently in the Final Modifications to Wood Preserving Regulations (57 FR 61492, December 24, 1992), incidental drippage at active wood preserving plants is not considered illegal disposal of a hazardous waste if it is removed from the storage yard and managed appropriately within 24 hours (or 72 hours) of occurrence, depending on whether the plant was in operation when the drippage occurred. Wood preserving incidental drippage occurs due to "kickback" of preservative following treatment of wood under pressure. This is not the case with surface protection. There is no "kickback" occurring in this industry because protectant is applied to the surface without pressure. However, protectant drippage does occur from newly treated wood at surface protection plants. Additional drippage may occur from surface-protected wood in storage, due either to liquid entrained in the wood bundles or precipitation coming in contact with the wood.

Plants using surface protection formulations with concentrations of pentachlorophenate greater than 0.1 ppm are subject to the proposed subpart T requirements. All drippage from treated wood, including any drippage that may occur as a result of any liquid entrainment within a packed bundle, must cease before it is transferred to the storage yard. For purposes of containing the drippage in the process area, an owner/operator must employ either a tank system, such as a sump, or a drip pad beneath the process area. If a plant has a sump system for removal of drippage in the process area, that system is subject to the tank standards in 40 CFR parts 264/265, subpart J. Likewise, if an owner/operator installs a drip pad for collection of process drippage, the drip pad standards in Subpart W are applicable.

For those plants which generate F033 wastes, the Agency is proposing to require owner/operators of those surface protection plants to develop and implement a contingency plan for immediate response to protectant drippage in storage yards. The Agency does not expect plants within the scope of the proposed listing to experience drippage in the storage yard because the proposed subpart T requires that drippage cease prior to removing wood from the process area. However, the Agency recognizes the possibility that some incidental drippage may, nonetheless, occur after wood is

VOL 58 ISS 79 AP 27 1993 UMI

removed to the storage yard. This contingency plan requirement would not apply to drippage in the process area, where other subpart T requirements would apply.

The requirement is proposed to be the same as the contingency plan requirement promulgated for wood preserving facilities in the December 24, 1992 final rule. In that rule, the Agency clarified what it meant by the term "immediate response" (57 FR 61494). With respect to the word "immediate," EPA intends that owner/operators respond to storage yard drippage that occurs while a plant is in operation within one consecutive working day. A facility is considered to be in operation any day on which it is treating wood. For plants that are not in operation during a storage yard drippage event, the Agency expects the plant to clean up the drippage within 72 hours of occurrence. It is important to note that the timing of response to drippage is based on when the drippage actually occurs, rather than when the drippage is detected in the storage yard. The approach proposed today, like the approach promulgated for wood preserving plants, places the responsibility for checking storage yards for drippage on the plant owner/operator. Regular checks of storage yards, particularly following the initial storage of newly treated wood, will allow owner/operators to respond to drippage in accordance with today's proposal.

With respect to the word "response," EPA intends this term to include cleanup and removal of protectant drippage from the storage yard. For purposes of today's proposal, cleanup of visible drippage from the treated lumber in the storage yard will satisfy the requirements for immediate response. The proposed requirements for the contingency plan are also the same as those finalized in the wood preserving rule. Owner/operators must prepare and maintain a written plan that describes how the plant will respond to storage yard drippage. At a minimum, the plan must describe how the owner/operator will accomplish the following:

(i) Clean up the drippage;
(ii) Document the cleanup of drippage;
(iii) Retain this documentation for three years; and
(iv) Manage the contaminated media in a manner consistent with Federal regulations.

With regard to the requirement to document the cleanup of drippage, the Agency will consider an annual certification, signed by either a registered professional engineer or a responsible company official of proper authority on company letterhead, that the owner/operator has cleaned up drippage in accordance with these rules, to be adequate documentation.

The Agency is proposing to require plants that store wood on-site in areas unprotected from precipitation to cover the treated wood bundles to minimize the quantities of surface protectant that run off the wood into the environment. The chlorophenolic formulations used by the wood surface protection industry are water-soluble, and storage yards are easily contaminated with protectant from precipitation run-off. This cover requirement, and the contingency plan requirement, are being proposed to minimize further contamination of the environment.

C. Historical Soil Contamination

The standards proposed today should substantially decrease any future environmental contamination that would otherwise result from continued generation of these waste streams. There is, however, a considerable amount of soil (process area and storage yard) and water (ground and surface) that already has been contaminated as a result of past surface protection practices.

EPA generally protects human health and the environment against the risks associated with contaminated soil via the "contained-in" policy. The "contained-in" policy states that media containing a listed hazardous waste are themselves considered listed hazardous wastes when they are actively managed (*e.g.*, excavated). See *Chemical Waste Management, Inc.* v *E.P.A.*, 869 F.2d 1526, 1539–40 (D.C. Cir. 1989). The media, henceforth, are regulated as hazardous wastes until such time as the media no longer "contain" the originally listed hazardous waste.

The Agency is in the process of examining issues related to contaminated media and reviewing existing policy on these issues. EPA recently proposed to exempt media contaminated with petroleum wastes. See 57 FR 61542 (Dec. 24, 1992) (materials not regulated under the Underground Storage Tank Program) and 58 FR 8562 (Feb. 12, 1993) (materials regulated under the Underground Storage Tank program). EPA also is involved in an on-going dialogue with interested parties as part of the rulemaking process specifically related to the Hazardous Waste Identification Rule (HWIR), proposed on May 20, 1992 (57 FR 21450) and subsequently withdrawn on October 30, 1992 (57 FR 49280). Since its withdrawal, a national and multi-sectoral outreach program has been initiated.

Because of the historical soil contamination associated with the surface protection industry, the F033 listing proposed today raises issues concerning the regulation and management of contaminated soils. The proposed listing potentially effects actions taken at several thousand sites that are past users of pentachlorophenate. While this proposed listing, coupled with application of the "contained-in" policy to these sites, assures government jurisdiction if such soils are actively managed, it does not, on its own, compel corrective action. It may, in fact, serve to impede or slow site clean-ups as well as other minor activities that, on their own, pose no significant environmental risks, if those activities result in the generation of contaminated soils that must be handled as hazardous wastes. In light of these issues, EPA is requesting data and comment on the "contained-in" policy as it pertains to the wood surface protection industry. Such data and comment might consider:

(1) The appropriateness of subjecting these soils to all requirements of the Subtitle C program when actively managed;
(2) The level of contamination in process area and storage yard soils as well as groundwater; and
(3) The risks posed by these soils.

The Agency acknowledges that a substantial number of plants that previously used chlorophenolic formulations have contaminated their equipment with dioxin, an impurity found in the formulation. Sampling data show that dioxin is, indeed, found in the protectant formulations and wastes from plants that have switched over to non-chlorophenolic formulations, indicating that there has been cross-contamination by previous chlorophenolic use. The original proposal of December 30, 1988 (53 FR 53282) proposed that all cross-contaminated wastes would be included within the scope of the listing unless an equipment-cleaning procedure was used to decontaminate the equipment and prevent the further cross-contamination of product and waste. Today's proposal differs substantially from the 1988 proposal with respect to cross-contaminated wastes. The Agency has determined that a plant must have greater than 0.1 ppm pentachlorophenate (expressed as pentachlorophenol during analysis) in their formulation to generate an F033 waste. There may be plants whose formulations are cross-contaminated due to previous, and now abandoned, use of chlorophenolics, but whose formulations have concentrations of pentachlorophenate less than or equal to 0.1 ppm. Information collected subsequent to the 1988 proposal supports the Agency's findings that wastes from such plants pose what the Agency considers to be an acceptable lifetime excess cancer risk from pentachlorophenate contamination in ground water of 3×10^{-6}, as derived from the carcinogenic slope factor (CSF). A detailed discussion of the Agency's risk assessment is contained in section VI(C) of this preamble, as well as in the docket associated with this rulemaking.

V. Options Considered by the Agency

The Agency carefully considered all the analysis described in Section VII of this preamble in developing today's proposal. The Agency acknowledges that factors in this analysis argue both for listing wood surface protection wastes as well as for not listing these wastes as hazardous. The Agency has decided to list these wastes as hazardous (for reasons described below), but EPA specifically requests comments on the option to not list these wastes as hazardous.

A. Not Listing Wood Surface Protection Wastes as Hazardous

As indicated above, there is some information which suggests that the Agency should not list wood surface protection wastes as hazardous. First, the use of full-strength chlorophenolics has rapidly declined, and is not expected to increase. As indicated in section III, the Agency knows of only two sawmills currently using chlorophenolic formulations to surface protect lumber. Chapman Chemicals (the sole recent producer of chlorophenolic formulations) ceased production of its chlorophenolic formulations in January 1992 and soon after voluntarily filed for product registration cancellation. A notice describing this action was published for public review in the Federal Register notice (see 57 FR 23401 (June 3, 1992)). Following a comment period for this action, a final cancellation order was sent to Chapman Chemicals with an effective date of September 14, 1992. This cancellation notice cancelled the following products produced by Chapman Chemicals: Permatox 181, 10S, and 101, and Mitrol G–ST. Any manufacturer would have to obtain a new registration before these chemicals could be re-introduced and be made available for use in wood surface protection.

Second, the risk associated with surface protection wastes is estimated to be, for some exposure pathways, at or below the range of what the Agency considers acceptable. This is the first hazardous waste listing proposal which uses the Agency's risk characterization guidance (U.S. Environmental Protection Agency. Guidance for Risk Assessment. Risk Assessment Council, November 1991). The purpose of the risk assessment, which is described in detail in section VI of this preamble, was to determine to what extent these wastes pose a threat to human health and the environment. For this proposal, the Agency performed a multifaceted study of how these wastes have been and are currently distributed to the environment. The two principal areas of risk associated with surface protection wastes are:

(1) Drinking water contamination associated with groundwater sources contaminated by the current and past use of chlorophenolics; and

(2) Ingestion of fish and shellfish tissues and ingestion of soils contaminated over a long period of time by PCDDs and PCDFs ("dioxins").

To make a listing determination, the Agency applies a "weight-of-evidence" approach, examining risk associated with all potential human health and environmental exposure pathways. By listing wastes from the use of surface protection formulations that contain 0.1 ppm PCP or above, the Agency would effect a change in the risk associated with the cross-contamination of non-chlorophenolic formulations with PCP and dioxins. The risk reduction achieved by cleaning tanks and equipment to a level below 0.1 ppm, i.e., the incremental risk, is relatively modest. The Agency's risk analysis indicates that the incremental risks attributed to this regulation are as follows:

	High end individual risk estimate	Central tendency individual risk estimate	Population risk estimate [1]
Groundwater Consumption	1×10^{-5} to 2×10^{-4}	5×10^{-7}	0.005
Fish/Shellfish Consumption	1×10^{-8} to 4×10^{-7}	8×10^{-10}	0.2
Soil Ingestion	2×10^{-6} to 2×10^{-5}	7×10^{-7}	0.0004

[1] Best estimate for 70 year lifetime.

A listing is expected to have little or no effect on the risk associated with contaminated soils and ground water that has already occurred due to usage of chlorophenolics in the past. Only remediation of existing contamination would address this risk. Site remediation is not required by the mere listing of the wastes. Site remediation is also not expected to occur to any significant degree as a consequence of the management of contaminated media incidental to general facility operations.

The damage cases described later indicate damages from past usage of chlorophenolics. Damages of this magnitude may not occur in the future unless use of full strength chlorophenolics resumes.

Finally, the Agency is aware that the proposed listing could, in fact, accelerate environmental contamination by encouraging plants to dispose of any chlorophenolic-bearing formulations on-site prior to the effective date of a Final Rule, in an attempt to avoid generating F033 hazardous waste. By not listing wood surface protection wastes as hazardous, this accelerated contamination would not likely occur. However, the Agency notes that if contaminated soils are actively managed following the effective date of a Final Rule, such wastes may be subject to the Agency's contained-in policy. The "contained-in" policy states that media containing a listed hazardous waste are themselves considered listed hazardous wastes when they are actively managed (*e.g.*, excavated). See *Chemical Waste Management, Inc.* v *E.P.A.*, 869 F.2d 1526, 1539–40 (D.C. Cir. 1989). The media, henceforth, are regulated as hazardous wastes until such time as the media no longer "contain" the originally listed hazardous waste.

If a manufacturer of pentachlorophenate wanted to resume its production, it would be required to meet all of the requirements under FIFRA for registering a new chemical.

VOL 58 ISS 79 AP 27 1993 UMI

This requires prior completion of health and environmental effects data sets that EPA uses to determine if the chemical poses an unreasonable risk. EPA requests comment on whether FIFRA requirements would meet RCRA concerns.

B. Rationale for Proposing To List Wood Surface Protection Wastes as Hazardous

The Agency elected to propose the listing of these wastes as hazardous for several reasons. First, the Agency's analysis suggests that, even when chlorophenolic formulations are no longer used by a plant (as is currently the case with a majority of surface protectors), contamination of soils and ground water will continue to occur. This is because "transitional users" typically have not cleaned their equipment and elevated levels of pentachlorophenates still remain in their formulation. Drippage onto the ground following treatment of lumber is a normal occurrence in the surface protection process. The chlorophenolic formulations used by sawmills are aqueous solutions that contain both carcinogenic and systemic constituents, including dioxin.

The risks from these wastes may be comparable to those from other listed wastes. As a comparison, the population risk from the groundwater ingestion pathway for the recently promulgated wood preserving wastes listing was lower than risks from wood surface protection wastes (zero excess case over 300 years). However, the Agency listed wood preserving wastes because of the high levels of constituents of concern and significant number of damage cases including 54 NPL sites. Although the central tendency and high-end risks determined for these surface protection wastes seem to be near the low end of concern, the constituents of concern in the waste are in high enough concentrations that these wastes would have been listed under the previously used methodology employed for listing determinations.

Second, EPA is very concerned about potential risks that may occur if chlorophenolic formulations are put back into use. As indicated above, the cancellation of this formulation's FIFRA registration was voluntary. Following the voluntary action, EPA cancelled the registration. Registration of pesticides are governed by section 3 of FIFRA. The Agency's regulations governing the registration process can be found at 40 CFR part 152, subpart C. If the cancelled chlorophenolic formulations are re-instated for use in wood surface protection operations, the risks associated with the use of pentachlorophenate and dioxin can be expected to increase significantly. The Agency believes that listing these wastes as hazardous will provide additional barrier to the use of these formulations beyond the FIFRA registration process. As noted above, EPA requests comment on whether FIFRA would meet RCRA concerns.

In addition, the Agency has information concerning 21 damage cases that document the presence of, and threats to human health and the environment posed by the past use of pentachlorophenate (PCP) and tetrachlorophenate (TCP) at surface protection plants in ground water, surface water, and soil. Significant concentrations of PCP, often orders of magnitude above the water Health-Based Level (HBL), were detected in the ground water of many sawmills. The sampling and analysis data which contribute to these damage incidents were collected during on-going surface protection operations at a time when chlorophenolic formulations were actively used, and EPA believes they are indicative of damages that could occur in the event that production and widespread use of chlorophenolics resume in the future.

Furthermore, as discussed above, the "no-list" option, if adopted in the final rule, would necessarily rely on the FIFRA cancellation of the chlorophenolic formulations in order to minimize unacceptable adverse impacts on human health and the environment. The Agency may take into consideration the impact of other statutory and regulatory requirements when making hazardous waste listing determinations under RCRA (as it has done here, with respect to the impact of the FIFRA cancellation on the anticipated future volume of wastes generated). However, the regulations governing the listing of hazardous wastes at 40 CFR § 260.10 specify a wide range of factors, not all of which will necessarily be adequately addressed by other statutory or regulatory schemes, such as those administered under FIFRA. Therefore, the Agency is reluctant to rely solely on other statutes to accomplish the goals of EPA's hazardous waste listing program.

Finally, today's listing is unique in that it sets a level of pentachlorophenate of 0.1 ppm in formulations as the level above which the listing would apply. This allows plants to clean their equipment such that their formulation is beneath the 0.1 ppm regulatory level, thus reducing the number of plants that would be affected by this rule. The Agency acknowledges, as discussed above, that there is concern about potential one-time waste disposal prior to the effective date of the final rule. However, EPA believes there may be disincentives to such one-time disposal. The economic value of chlorophenolic formulations may discourage disposal. In addition, potential liability under either the Agency's RCRA contained-in policy (discussed in section IV(c) of this preamble) and/or the Comprehensive Environmental Response Compensation and Liability Act (CERLCA, or Superfund) may deter unsafe on-site waste disposal.

For the above reasons, the Agency is proposing to list wood surface protection wastes as hazardous, but is seeking comment on the option to "not list" these wastes in the final rulemaking. The Agency specifically requests comment and supporting information on the risks posed by these wastes.

VI. Description of Wastes Generated

A. Types of Wastes Included in This Proposal

This section describes the waste streams that are generated by the use of surface protection formulations containing chlorophenolics. Two types of primary waste streams are typically generated: process residuals and drippage. Secondary waste streams include spent formulation and wastewaters.

Process residuals are tank sludges that accumulate in the dip tank and/or mix tank as the lumber passes through for treatment. Some plants use spray systems that generate a sludge when recovered formulation is filtered. Periodically, the accumulated sludge must be removed and is typically placed on sawdust or wood chip piles on-site. The ultimate destination of the sludge is dependent on the management of the sawdust piles. Plants have reported burning the sawdust on-site or shipping it off-site for use as boiler feed for energy recovery. Depending on the particle size, some of these wood chips may be shipped to a pulp or paper mill.

Some plants generate little or no tank sludge as a result of certain process variations. Dip tank operations sometimes utilize an internal circulation system to enhance mixing and promote penetration into the packed bundles. The agitation does not allow any particulates to settle, and when the bundles are removed, some of the suspended solids are also removed. Green chain operations sometimes use a system of rollers that are partially submerged into the dip tank. These rollers force the pieces of lumber under the surface of the formulation to ensure thorough coverage of the exposed surfaces. Forcing the lumber deeper into the tank physically drags the lumber through any sludge that has settled in the tank and this sludge leaves the tank with the treated lumber. This system may agitate the formulation within the tank and achieve the same result as an internal circulation system. These practices are described in more detail in the waste management section of this preamble.

Another wastestream is excess formulation drippage from freshly treated lumber. Excess drippage can fall on the ground when the wood is transported from the dip tank or green chain to stacking and packaging. The Agency has observed that spray operations tend to result in less excess formulation on the wood than either the dipping or green-chain operations. Some plants utilize simple recovery systems to minimize the loss of formulation. Pack dip operations hold the wood over the dip tank at an angle to collect excess formulation prior to transfer to storage. Green chain and spray operations may utilize a collection pan under the conveyor to collect formulation as the freshly treated lumber runs along the green chain. The treated wood is then stored on-site or immediately shipped off-site to the buyer.

Other wastes generated by surface protection processes and included in today's proposed listing are wastewaters and discarded spent formulation. Wastewaters are typically not generated by this industry since it is not desirable to wet freshly treated lumber. Untreated logs awaiting cutting are sometimes kept wet to reduce the risk of fire and mold formation. These wastewaters would not be included within the scope of this proposed listing unless they contacted formulation. The Agency has found that larger plants which operate indoors perform "good housekeeping" measures, including the washdown of floors and equipment. The wastewaters generated from these activities, if they contact formulation within the scope of the proposed listing, would be a listed hazardous waste. Discarded spent formulation includes any discarded formulation that a plant disposes of as a result of a change in product formulation.

B. Quantities of Waste Generated

The Agency believes that there are three distinct user groups within the surface protection industry generating this proposed F033 waste: sawmills, furniture manufacturers, and exporters of wood. The Agency has been unable to acquire information on the extent of use within the furniture manufacturing and export industries and requests such data. The Agency has obtained, as earlier mentioned, a substantial amount of new information on the saw mill industry. The quantity of wastes generated by this industry is described in the following paragraphs.

Based on current industry directories, the Agency estimates that there are approximately 3200 operating sawmills in the United States. The Agency further estimates that approximately 980 (one-third) of these mills perform surface protection operations. Of these 980 mills, the EPA estimates that about 50% of the lumber cut at these plants is actually surface-protected. These percentage estimates may be high for smaller mills and low for the larger mills, but the Agency believes, on weighted average, that they are sufficiently accurate for purposes of estimating waste generation quantities and for performing risk modeling.

Based on the above, quantities of waste generated on a national level can be estimated. Formulation drippage and precipitation run-off from storage yards are the two types of waste generated at surface protection plants that the Agency believes can result in substantial human exposure. These are the highest volume waste streams generated by the industry and are included within the scope of the proposed listing.

The Agency has estimated from on-site field sampling and interviews regarding typical solution concentrations, that the amount of process area drippage that can occur at mills throughout the U.S. is between 1000 and 4000 gallons per one million board feet of lumber treated. Given the number of sawmill plants in operation throughout the country, the number of process types and set-ups, and the type of management practices, the Agency assumes that approximately 2000 gallons of drippage infiltrate soil per one million board feet of lumber surface-protected.

The other type of waste that presents significant human exposure risk is storage yard run-off. Depending on market conditions, lumber may remain in the yard following surface protection for longer than a month. During this period, precipitation may carry formulation into nearby bodies of water or further contaminate soils throughout the yard. The Agency is aware that larger mills often package their wood or otherwise keep their wood protected from weather for better resale. The Agency notes that, given the variability in plant size, location, climate, and management practices, there is a high uncertainty in estimating the amount of storage yard run-off from this industry. A study performed in British Columbia, Canada provides information about run-off from an on-site two-day rain event. A copy of this study is in the docket for today's rulemaking. The formula used to derive the actual concentration of chlorophenolic in run-off for use in making risk assessments is discussed later in the preamble.

Sludges removed from process tanks or filters are generated infrequently and never in large quantities by this industry. Indeed, many small plants have never removed sludge because it has not caused a problem and the system is continuously replenished. Other plants, because of their process, generate sludge, but all of it leaves the plant with the treated wood product.

C. Waste Management Practices

The Agency has found that wastes generated by this industry are managed by any of the following methods: (1) Burned on-site as fuel, (2) shipped off-site for use as boiler fuel, (3) land disposed on-site, (4) land disposed off-site, or (5) dripped or placed onto soil. The majority of mills allow formulation to drip directly onto the ground and dispose of sludge in sawdust piles. The Agency has seen very little evidence of management of these wastes that would be in compliance with RCRA requirements, were this proposed listing finalized. However, EPA notes that there are some plants that dispose of these wastes in what would constitute a proper manner for hazardous wastes. The details of the Agency's findings regarding waste management practices can be found in the docket for this rulemaking.

D. Pollution Prevention and Recycling Practices

The Agency is currently preparing a separate guidance manual recommending voluntary pollution prevention and waste minimization techniques for the lumber industry. The manual will be completed prior to expected promulgation of a final F033 hazardous waste listing rule in December 1993. Some recommended strategies for pollution prevention in the surface protection industry are described in this section. Further information will be included in the manual.

The ultimate goal of pollution prevention is to reduce present and future threats to human health and the environment. Pollution prevention (also referred to as source reduction) is the use of materials, processes, or practices that reduce or eliminate the quantity and/or toxicity of wastes at the source

VOL 58 ISS 79 AP 27 1993 UMI

of generation. Pollution prevention is the first step in a hierarchy of options for reducing the generation of waste. The first recommended pollution prevention option is to replace chemical treatment with another type of treatment to achieve surface protection. One alternate is to dry the wood to reduce water content (high water content leads to sapstain). The Agency is aware that this option may not be economically viable for a smaller mill. If such a system cannot be feasibly employed, it would be preferable for a user of chlorophenolic-containing formulations to switch to an alternate formulation that does not generate a hazardous waste.

Because the proposed F033 listing includes a concentration standard for treatment formulations, a plant could avoid generating a hazardous waste by ensuring that its formulation is at or beneath this concentration standard (0.1 ppm pentachlorophenate). The Agency performed field testing on a dip tank formulation following the cleaning of the tank (the plant was switching from a chlorophenolic formulation to a non-chlorophenolic formulation) by sandblasting and found that sandblasting effectively reduces chlorophenolic contamination to acceptable levels. This is the only method that has been field tested by the Agency. The Agency requests comment and data on the effectiveness of other cleaning procedures, e.g. steam cleaning, etc. Another pollution prevention option is the use of high velocity spray systems that generate fewer process residuals and less drippage. Again, however, a small production volume may not favor this option since spray systems require a larger flow of wood through the system to be economically or technically feasible.

Other pollution prevention strategies for use within the surface protection industry: (1) Local and general ventilation within the cutting process area to reduce dust which would accumulate on wood; (2) blowing wood with air to further reduce sawdust on wood prior to surface protection; and (3) the use of drainage collection devices (gutters) on roof tops to keep rainwater away from process wastes. For wastes that cannot be reduced at the source, generators may consider recycling as the next best option. Pollution prevention practices are very critical in plant operations that produce a hazardous waste since they can reduce the amount of hazardous waste generated. Recycling activities, when safely operated and maintained, are next best because they take what would have been termed hazardous waste generated from the process and reuse it to reduce actual hazardous waste generation that is destined for disposal.

VII. Analysis Supporting This Proposal

In support of this proposed rulemaking, the Agency has:

(1) Performed sampling and analysis of various surface protection sites which include actual waste and soil sampling;

(2) Studied the management of these wastes;

(3) Obtained examples of previous incidents of environmental contamination (known as damage cases), and

(4) Performed a rigorous risk assessment which uses actual sampling and site data to model the effects of past and present contamination and to estimate the risks that the contaminants pose to human health and the environment as a result of chlorophenolic use.

A. Recorded Incidents of Environmental Contamination

The extent of pentachlorophenate contamination in plant process area soils is well documented. The damage cases do not provide data on sediment contamination in nearby streams, but they do support the mobility property of a "chlorophenolic" (such as pentachlorophenate) to ground and surface waters. Ten of the 21 damage cases showed on-site ground-water contamination with PCP above the HBL of 0.001 ppm. Eleven of the 21 plants showed surface water contamination with PCP at levels above the HBL.

B. Waste Characterization and Constituents of Concern

Because the sampling sites were not randomly selected, one cannot draw accurate conclusions about all sawmills from this small sampling population. However, the waste characterization data obtained from the sample population is appropriate and useful in making a determination on the waste itself, although it may be of limited use in characterizing the entire industry. All three waste streams encompassed by the proposed listing contain the following proposed Appendix VIII constituents of concern: Pentachlorophenol, tetrachlorophenol, total equivalence of 2,3,7,8 substituted dibenzo-p-dioxins (PCDDs) and total equivalence of 2,3,7,8-substituted dibenzofurans (PCDFs). Analysis of samples collected at five plants show that process area residuals are not hazardous wastes under the Toxicity Characteristic Leachate Procedure (TCLP, 40 CFR 261.24). Analysis of samples taken at these five plants show that contaminated storage yards (which represent the largest area of a mill) contain low levels of dioxin (at or below 1 ppb) and non-detectable levels of pentachlorophenate. Such dioxin concentrations are below concentrations that would generally trigger a Superfund clean-up (1 ppb). By comparison, process area soils have been found to contain high levels of dioxin and very low to non-detectable levels of pentachlorophenate.

SAMPLE ANALYSIS

Waste stream dioxin	Current user of PCP		Max. Penta (ppm)	Past user of PCP		Median TEF (ppb)
	Penta Conc. (ppm)	TEF dioxin (ppb)		Median penta (ppm)	Max TEF dioxin (ppb)	
Sludge	1722	88	247	28	15.36	3.95
Formulation	290	0.01	8.3	2.6	2.14	0.0085
Process soil	0.17	0.94	1.4	1.0	4.09	2.13
Storage yard	0.09	0.07	Non-Detect	Non-Detect	0.96	0.05
Sediment/drain	No Analysis	No Analysis	0.97	0.03	0.034	0.017

To compare these figures with the corresponding health based levels (HBLs') for each of the constituents in soil and formulation, one can use a HBL (pentachlorophenate in soil)= 9 ppm and a HBL(pentachlorophenate in water)= 0.001 ppm. For the dioxin constituent, on should use HBL (dioxin in soil)= .007 ppb and a HBL (dioxin in water) = 0.000030 ppb.

C. Health and Ecological Effects

1. Toxicity of Constituents

A variety of toxic effects with implications for human health and the environment have been associated with the chemical constituents found in chlorophenolic surface protection formulations. These constituents include pentachlorophenol, 2,3,4,6-tetrachlorophenol, and other chlorophenols, as well as numerous polychlorinated dibenzodioxins and polychlorinated dibenzofurans. Pentachlorophenol is classified as a probable human carcinogen based on sufficient evidence in laboratory animals. In addition, pentachlorophenol exhibits non-cancer pathological effects on the liver and kidneys. 2,3,4,6–Tetrachlorophenol is a systemic toxicant which also has adverse effects on the liver and kidneys at low doses. As a group, polychlorinated dibenzodioxins and dibenzofurans exhibit a wide range of toxic effects at exceptionally low doses. The most studied congener, 2,3,7,8-tetrachlorodibenzo-p-dioxin, is classified as a probable human carcinogen, a teratogen, and an immunotoxin.

a. Human health criteria and effects. EPA uses health-based levels, or HBLs, as a means for evaluating levels of concern of toxic constituents in various media. In establishing HBLs, EPA evaluates a wide variety of health effects data and existing standards and criteria. EPA uses any Maximum Contaminant Level (MCL) promulgated under the Safe Drinking Water Act as an HBL for contaminants in water. For other media, or if there is no MCL, EPA uses an oral reference dose (RfD), an inhalation reference concentration (RfC), and/or a carcinogenic slope factor (CSF) to derive the HBL, in conjunction with various exposure assumptions and, for carcinogens, a risk level of concern. The risk level of concern may vary, but for the purpose of deriving the health-based levels in the following discussion, the risk is taken as 10^{-6} (i.e., one in a million). A given constituent may have an RfD, an RfC, and/or a CSF, depending on the variety and nature of the toxic effects exhibited. The RfD is an estimate (with uncertainty spanning perhaps an order of magnitude) of a daily exposure to the human population, including sensitive subgroups, that is likely to be without appreciable risk of deleterious effects during a lifetime. The CSF is an estimate of the upper bound confidence limit of the lifetime risk of developing cancer, per unit dose, which results from the application of a low-dose extrapolation procedure. When available, EPA uses RfDs, RfCs, and CSFs that have been verified by the Agency's Reference Dose/Reference Concentration (RfD/RfC) Work Group or CRAVE (Carcinogen Risk Assessment Verification Endeavor) Work Group. If no verified values exist, other estimates of RfDs, RfCs, and CSFs are examined to determine if they are appropriate for use in establishing HBLs. HBLs are intended to be protective of human health under a wide variety of exposure conditions. Health-based levels in water and soil, and the criteria used to establish them, are shown in Table 1 for the constituents of concern in chlorophenolic surface protection formulations.

TABLE 1.—HEALTH BASED LEVELS AND CRITERIA FOR CONSTITUENTS OF CONCERN

Constituent	Health based levels		Criteria		
	Water (mg/L)	Soil (mg/kg)	MCL (mg/L)	RfD (mg/kg/d)	CSF $(mg/kg/d)^{-1}$
Pentachlorophenol	0.001	9.0	0.001	0.03	0.12
2,3,4,6-Tetrachlorophenol	1.0	2000		0.03	
2,3,7,8-TCDD	0.00000003	0.000007	0.00000003	0.000000001	160000

Pentachlorophenol has an HBL in water of 0.001 mg/L, based on the MCL. For a person who drinks 2 liters of water containing pentachlorophenate at the HBL each day for 70 years, this corresponds to a risk of 3×10^{-6}, as derived from the CSF. The HBL at a risk level of 10^{-6} in soil is 9 mg/kg, based on the CSF and a soil ingestion rate of 200 mg/day in children (from one year of age to age six).[1] Pentachlorophenol has been classified as a B_2 carcinogen (i.e., a probable human carcinogen) on the basis of statistically significant increases in the incidence of multiple biologically significant tumor types in mice, including hepatocellular carcinomas, malignant pheochromocytomas, and hemangiosarcomas. Pathology of the liver and kidneys, other than carcinomas and sarcomas, has been reported in rats.

2,3,4,6-Tetrachlorophenol has an HBL in water of 1 mg/L based on the RfD and a drinking water ingestion rate of 2 L/day. The HBL in soil is 2000 mg/kg, based on the RfD and a soil ingestion rate in children of 200 mg/day. In laboratory studies, rats exhibited significant increases in liver and kidney weight and centrilobular hypertrophy. 2,3,4,6-Tetrachlorophenol has not been evaluated for carcinogenicity.

2,3,7,8-Tetrachlorodibenzo-p-dioxin has an HBL in water of 30 pg/L (or 30 parts per quadrillion), based on the MCL. For a person who drinks 2 liters of water containing PCDDs and PCDFs at the HBL (in terms of 2,3,7,8-TCDD toxicity equivalent) each day for 70 years, this corresponds to a risk of 1×10^{-4}, as derived from the CSF.[2] The MCL is also consistent with the oral RfD for 2,3,7,8–TCDD, again assuming an intake rate 2 L/day.[3] The HBL at a risk level of 10^{-6} in soil is 7 ng/kg (or 7 parts per trillion), based on the CSF and a soil ingestion rate of 200 mg/day in children (from one year of age to age six). 2,3,7,8-TCDD has been demonstrated to be a potent carcinogen in animals and has been classified as a

[1] This presumes that exposure associated with incidental soil ingestion for individuals over six years old is low relative to childhood exposure.

[2] EPA is currently conducting a scientific reassessment of the risks of exposures to 2,3,7,8,-tetrachlorodibenzo-p-dioxin and related compounds. A major objective of the reassessment is the development of a biologically based dose-response model to reflect significant advances that have been made in understanding the mechanisms of dioxin toxicity. Health assessment and exposure assessment documents are being updated and revised. This will be followed by a public review process, which will also involve EPA's Science Advisory Board (57 FR 37158). Completion of this review process is anticipated to occur in mid-1993.

[3] Although the oral RfD for 2,3,7,8-TCDD has been withdrawn by the Agency's Office of Research and Development pending completion of the reassessment of the health effects of dioxins and related compounds, until such time as a revised RfD for non-cancer effects is established, the Agency believes that the withdrawn RfD continues to be a useful toxicological benchmark.

VOL 58 ISS 79 AP 27 1993 UMI

B_2 carcinogen.[4] Hepatocellular carcinomas and carcinomas of the thyroid, tongue, hard palate, and lung have been observed in rats. Hepatocellular carcinomas have also been observed in mice. In addition, 2,3,7,8-TCDD has been shown to exhibit a wide variety of other effects. Teratogenesis has been observed, including such frank effects as cleft palate and hydronephrotic kidneys in mice and internal organ hemorrhage in rats. Severe reproductive effects (e.g., spontaneous abortion) have been found in monkeys. Suppression of immune system function has been reported in monkeys, mice, and other species.

Other polychlorinated dibenzodioxin (PCDD) and polychlorinated dibenzofuran (PCDF) congeners differ in the number and position of chlorine atoms they contain. Of the limited number of congeners that have been adequately tested, only a mixture of 1,2,3,6,7,8- and 1,2,3,7,8,9-hexachlorodibenzo-p-dioxin has been shown to be carcinogenic in laboratory animals. This mixture of 2,3,7,8-substituted HxCDD congeners is classified as a B_2 carcinogen based on a chronic exposure study in which statistically significant increases were observed in the incidence of hepatocellular carcinomas in mice and rats. Other symptoms of "dioxin toxicity," such as general weight loss and toxic hepatitis, were also observed.

However, a much larger body of data is available from both short-term in vivo and a variety of in vitro studies covering a wide variety of end points (e.g., developmental toxicity, cell transformation, and enzyme induction) which can be used to supplement the comparative lack of long-term in vivo results. This information reveals a strong structure-activity relationship. Specifically, congeners in which the lateral 2, 3, 7, and 8 positions on the dibenzodioxin and dibenzofuran molecules are occupied by chlorine atoms are much more biologically active than the non-2,3,7,8-substituted congeners. Furthermore, the relative potency of the various congeners is generally consistent from one end point to another. Because these compounds generally occur in the environment as a complex mixture, it is appropriate to consider them as a group and to draw conclusions about their toxicity as a group of compounds with related effects. These observations serve as the basis for the "toxicity equivalency factor" concept in which the concentration of a given PCDD or PCDF congener can be translated into an equivalent concentration of 2,3,7,8-TCDD. A subgroup of the North Atlantic Treaty Organization Committee on the Challenges of Modern Society (NATO/CCMS) has approved in principle the adoption of the TEFs for the 2,3,7,8-substituted congeners listed in Table 2.

TABLE 2.—TOXICITY EQUIVALENCY FACTORS (TEFS) FOR PCDD AND PCDF CONGENERS

Dibenzodioxin	TEF	Dibenzofuran	TEF
2,3,7,8-Tetrachlorodibenzo-p-dioxin	1	2,3,7,8-Tetrachlorodibenzofuran	0.1
1,2,3,7,8-Pentachlorodibenzo-p-dioxin	0.5	1,2,3,7,8-Pentachlorodibenzofuran	0.05
2,3,4,7,8-Pentachlorodibenzo-p-dioxin	0.5	2,3,4,7,8-Pentachlorodibenzofuran	0.5
2,3,7,8-Hexachlorodibenzo-p-dioxins	0.1	2,3,7,8-Hexachlorodibenzofurans	0.1
2,3,7,8-Heptachlorodibenzo-p-dioxins	0.01	2,3,7,8-Heptachlorodibenzofurans	0.01
Octachlorodibenzo-p-dioxin	0.001	Octachlorodibenzofuran	0.001

Source: U.S. Environmental Protection Agency. 1989 Update to the Interim Procedures for Estimating Risks Associated with Exposures to Mixtures of Chlorinated Dibenzo-p-Dioxins and -Dibenzofurans (CDDs and CDFs). Washington, D.C.: Risk Assessment Forum, March, 1989.

Other constituents found in chlorophenolic surface protection formulations include 2,4,5-trichlorophenol and 2,4,6-trichlorophenol. 2,4,5-Trichlorophenol, which has an RfD of 0.1 mg/kg/day, has been observed to cause mild diuresis and slight degenerative changes in the liver and kidneys in a subchronic oral study in rats. 2,4,6-Trichlorophenol, which has been classified as a B_2 carcinogen, has a CSF of 0.011 $(mg/kg/day)^{-1}$. 2,4,6-Trichlorophenol has been shown to cause an increase in lymphomas and leukemias in rats and hepatocellular carcinomas in mice. However, both these compounds are found at relatively low concentrations in surface protection formulations, when present at all.

b. Constituents proposed for addition to appendix VIII. A number of the constituents of concern that are present in wastes generated from wood surface protection processes with chlorophenols do not appear on the list of hazardous constituents at 40 CFR part 261, appendix VIII. The Agency is proposing to add six hazardous constituents to appendix VIII: Sodium pentachlorophenate, potassium pentachlorophenate, the sodium salt of 2,3,4,6-tetrachlorophenol, the potassium salt of 2,3,4,6-tetrachlorophenol, octachlorodibenzo-p-dioxin (OCDD) and octachlorodibenzofuran (OCDF).

Sodium and potassium pentachlorophenate are the sodium and potassium salts of pentachlorophenol. As a result of gastric secretions following ingestion, the sodium and potassium salts of pentachlorophenol and 2,3,4,6-tetrachlorophenol are readily converted to the corresponding phenols by acidification. Therefore, the sodium and potassium salts are expected to elicit the same health effects as the corresponding phenols. For this reason, EPA proposes to add these four compounds to the list of hazardous constituents in appendix VIII.

The other two compounds proposed for addition to appendix VIII, OCDD and OCDF, are members of the large family of polychlorinated dioxins and furans (PCDDs and PCDFs). Certain of these compounds, most notably, 2,3,7,8-TCDD, have been shown to be extraordinarily toxic, as discussed elsewhere in today's notice. EPA's Risk Assessment Forum has evaluated toxicity data for many chlorinated dibenzo-p-dioxins and dibenzofurans in order to establish interim procedures for estimating risks associated with exposures to mixtures of these compounds.[6] These data indicate that 2,3,7,8-substituted congeners of chlorinated dibenzo-p-dioxin and dibenzofurans have toxic effects similar to 2,3,7,8-tetrachlorodibenzo-p-dioxin. Data available from in vivo and in vitro studies reveal a strong structure-activity relationship, in which the 2,3,7,8-substituted congeners are much more biologically active than other congeners. Both OCDD and OCDF are 2,3,7,8-substituted congeners. The data also show that the relative responses of different PCDDs and PCDFs are generally consistent across a variety of toxicity end points.

In regard to OCDD specifically, test animals exhibited initial signs of "dioxin toxicity" in a subchronic study of mice exposed to OCDD at low levels.[6] These data suggest that when exposed for long periods, animals absorb and accumulate sufficient amounts of OCDD to manifest dioxin-like effects. Furthermore, rat hepatoma data from in vitro studies demonstrate a form of enzyme induction for OCDD that is characteristic of dioxins. Structure-activity relationships suggest that similar effects would be expected for OCDF (although no confirmatory experimental data are available). Therefore, EPA has concluded that there is sufficient evidence to show that octachlorodibenzo-p-dioxin (OCDD) and octachlorodibenzofuran (OCDF) are hazardous constituents which should be added to appendix VIII of 40 CFR part 261. The Agency specifically solicits comment on the addition of OCDD and OCDF as hazardous constituents to appendix VIII.

c. Potential human exposure pathways. Human exposure to the hazardous constituents found in wastes generated by the use of chlorophenols for surface protection can occur by a wide variety of pathways. These pathways are identified by the nature of the release of the contaminants into the environment, the subsequent fate and transport within the environment (which depends on the physical, chemical, and biological properties of the hazardous constituents), and the routes of human exposure to contaminated media. The primary media of concern are soils, ground water, surface water, and air. However, biological media (such as fish and shellfish, beef and dairy products, and food crops) may also act as significant reservoirs of contamination from which dietary exposures can occur. The major routes of human exposure are ingestion, inhalation, and dermal absorption. Fate and transport processes include sorption onto soils, infiltration to ground water, runoff to surface water, soil erosion to rivers and streams, suspension of soil and dust particles in air, volatilization, translocation and deposition to plants, and bioaccumulation in aquatic and terrestrial organisms. Processes which can lead to changes in the chemical identity of the constituents include photolysis, hydrolysis, microbial degradation, and biological metabolism within the food chain.

A major source of contamination at sawmills is drippage of excess formulation from treated wood. This can occur directly onto bare soils or onto a pad (on which the equipment is supported) from which infiltration or runoff occurs. Another significant source is precipitation wash-off from treated lumber in storage yards, which can run off to surface waters, infiltrate into ground water, or be retained in the soil column.

Of the many possible human exposure pathways, the Agency has focused its assessment on three principle pathways for which data are available. These pathways are: direct ingestion of contaminated soil; infiltration to ground water and ingestion as drinking water; and soil erosion followed by bioaccumulation in fish and shellfish and subsequent dietary ingestion. The Agency's assessment of risk to human health via these three pathways is discussed elsewhere in today's notice.

d. Ecological effects. At one time pentachlorophenol was one of the most widely used biocides in the United States, having been registered for use as an insecticide, fungicide, molluscicide, herbicide, algicide, and general disinfectant. Therefore, it is not surprising that pentachlorophenol has also been found to cause a variety of ecological effects. Even at relatively low concentrations, pentachlorophenol has been shown to be extremely toxic to aquatic life. Among species of fish, salmonoids appear to be the most sensitive, commonly having LC_{50} values below 100 µg/L.[7] However, some non-salmonoid species of fish also display LC_{50} values in this range. Although pentachlorophenol does not appear to bioaccumulate in aquatic organisms, there is some evidence that certain of its metabolites may bioaccumulate. EPA has established ambient water quality criteria for pentachlorophenol for the protection of freshwater aquatic organisms, as a function of pH. At a surface water pH of 6.8, the criterion is 5 µg/L, measured as a four-day average. At lower pH's, the ambient water quality criteria are somewhat lower. However, these criteria may not be protective of the most sensitive species, e.g., juvenile salmonolds, for which lower criteria may be appropriate.[8]

Because process wastewaters, excluding material storage yard runoff (see 40 CFR 429.11(c)), are prohibited from being discharged directly by the effluent guideline regulations for the sawmill portion of the timber products industry (40 CFR part 429), contamination of surface waters with pentachlorophenol from sawmills is expected to occur only from stormwater run-off. Considerable dilution occurs in water courses during rain events, thereby minimizing the possibility that concentrations of pentachlorophenol could be high enough to be harmful to aquatic life. Therefore, EPA does not believe that surface protection operations pose a significant risk to aquatic ecosystems, if transfer of chlorophenolics to the soil and groundwater is prevented, in the absence of unlawful discharge of chlorophenolic surface protection formulations.

Pentachlorophenol is also toxic to terrestrial animals and plants. It has been used as a nonspecific herbicide, defoliant, and crop desiccant and therefore exhibits toxic effects in many species of plants. Pentachlorophenol has been reported to be poisonous to a variety of domestic animals, including cats, horses, pigs, and poultry. Wildlife have also been killed by the use of pentachlorophenol as a pesticide.

Less information is available on the toxicity of 2,3,4,6-tetrachlorophenol in the environment. Although it has not been tested in salmonoid species of fish, it is acutely toxic to bluegill, having an LC_{50} slightly above 100 µg/L. 2,3,4,6-Tetrachlorophenol has also been shown to be acutely toxic to certain species of zooplankton at sub-part per million leveis.

2,3,7,8-Tetrachlorodibenzo-p-dioxin is extremely toxic to mammals, birds, and fish. Exposure to 2,3,7,8-TCDD has been associated with acute and delayed

[4] However, recently published epidemiological studies of occupationally exposed individuals report statistically significant increases in mortality from both lung cancer and from all other cancers combined. EPA is currently evaluating these studies as part of its scientific reassessment of 2,3,7,8-TCDD and related compounds.

VOL 58 ISS 79 AP 27 1993 UMI

mortality and with carcinogenic, teratogenic, reproductive, histopathologic, and immunotoxic effects in a variety of animal species.[9] Although data on ecological effects are generally available only for 2,3,7,8-TCDD, the effects of other dioxin and furan congeners are probably determined by a structure-activity relationship similar to the one elucidated for effects on human health.

Acute oral toxicity studies involving 2,3,7,8-TCDD indicate that LD_{50} values for certain wildlife species are as low as, or lower than, those of some laboratory animals.[10] For example, the LD_{50} value for bobwhite quail is 15 µg/kg, whereas for domestic chickens, LD_{50} values lie in the range of 25 to 50 µg/kg. At lower doses, below 10 µg/kg, domestic chickens exhibit signs of chick edema disease and liver pathology. 2,3,7,8-TCDD is also associated with poor reproduction in herring gulls. Eggshell thinning appears to be the most common reproductive effect in avian species. Acute effects in aquatic organisms show an unusual pattern of delayed response, whereby acute effects show a similarity to chronic effects. Among aquatic organisms, fish appear to be the most sensitive to 2,3,7,8-TCDD. For example, the LC_{50} value for rainbow trout has been estimated to be below 40 pg/L. The most commonly reported nonlethal effect in fish is growth retardation of yolk sac fry.

2,3,7,8-TCDD has been shown to bioaccumulate in the food chain. Therefore, among aquatic species, the highest concentrations and most pronounced effects are expected in the largest predators. In terrestrial species, 2,3,7,8-TCDD has been shown to be bioaccumulated in the earthworm by a factor of three relative to the concentration in soil. Therefore, high exposures are expected in terrestrial species whose diet includes a large proportion of earthworms (e.g., robins, woodcocks, and shrews). As part of an ecological assessment of the risks associated with the land disposal of pulp and paper sludge (56 FR 21802), EPA concluded that levels of 2,3,7,8-TCDD in soil as low as 3 parts per trillion could cause adverse effects to terrestrial wildlife (not including adjustments for uncertainties in the underlying toxicity data). Because levels of 2,3,7,8-TCDD toxicity equivalents in sawmill soils are well above these levels, some adverse effects on terrestrial wildlife may occur. However, the relatively small areas of contaminated soils at sawmills could mitigate these effects. Furthermore, significant effects on wildlife populations would appear to be unlikely. The same assessment found minimal risk to aquatic organisms from run-off of 2,3,7,8-TCDD contaminated soils.

2. Resource Damage Incidents

EPA has assembled a substantial body of information on environmental contamination at sawmill facilities associated with the use of chlorophenols for the surface protection of wood. EPA obtained much of its information from the Oregon Department of Environmental Quality, the California Department of Toxic Substances Control, and California's Regional Water Quality Control Boards. To supplement the information from Oregon and California, EPA conducted a search of the open literature and searched its own CERCLIS data base. CERCLIS is EPA's central repository of information on Superfund site assessments, emergency removals, and site remediation activities.[11]

a. Contaminated media. Altogether, EPA has obtained information on levels of media contamination for 21 sawmill facilities. The preponderance of the data are for pentachlorophenol and 2,3,4,6-tetrachlorophenol in ground water, soils, and surface water.[12] A small amount of data are also available for PCDDs and PCDFs in soils, expressed as 2,3,7,8-TCDD toxicity equivalents (TEQ). The data on soils represent soil in the immediate vicinity of the process area where wood was being treated with chlorophenols or had formerly been treated. The surface water data generally represent water in drainage ditches, catchment basins, or other conveyances on-site. These data, presented as the range of the maximum measured concentrations from among the various sites, are summarized in Table 3.[13]

TABLE 3.—RESOURCE DAMAGE INCIDENT MEDIA CONCENTRATIONS

Media	Ground water			Process soil			Surface water		
Constituent	Low (mg/L)	High (mg/L)	N	Low (mg/kg)	High (mg/kg)	N	Low (mg/L)	High (mg/L)	N
Pentachlorophenol	<0.001	45	14	<9	50,000	17	0.002	0.76	11
2,3,4,6-Tetrachlorophenol	<1	<1	7	<2000	14,000	13	<1	1.1	8
2,3,7,8-TCDD TEQ	N/A	N/A	0	0.004	0.15	3	N/A	N/A	0

N=number of facilities with data available.
N/A=data not available.
Only values that are above health based levels are given.

As shown in Table 3, pentachlorophenol has been found above health based levels in ground water, surface water, and soils. Of the 14 facilities with ground water data, 10 facilities show levels above the MCL of 0.001 mg/L. All 11 facilities with on-site surface water data have levels above the MCL. In addition, measurements of pentachlorophenol at one facility show levels of 50 mg/L in water being discharged from an underground seep into surface waters. This discharge is believed to have originated in the process area. Although not shown in Table 3, of five facilities for which surface water data are available off-site, in streams and rivers, four show pentachlorophenol levels above the MCL; these data range from 0.03 mg/L to 0.1 mg/L. In soils, of 17 facilities with soil data, 16 facilities show pentachlorophenol levels above the health based level of 9 mg/kg. Also not shown in the table are data on subsurface soils, i.e., soils below about six inches from the surface. Of eight facilities with data available, seven show levels in subsurface soils above the health based level; these data range from 90 mg/kg to 4200 mg/kg. More than 15 years after usage of chlorophenols ended at one facility, pentachlorophenol levels still exceed the health based level to depths as great as six feet.

The damage incident data show that, in none of the seven cases for which ground-water data are available, do the levels for 2,3,4,6-tetrachlorophenol exceed the MCL of 1 mg/L. In only one case out of eight do levels in surface water on-site exceed the MCL, and only by a small amount. Although not shown in Table 3, of four cases with surface water data off-site, in streams and rivers, none show levels above the MCL. However, measurements of 2,3,4,6-tetrachlorophenol taken at one facility show levels of 340 mg/L in water being discharged from an underground seep into surface waters, a discharge which is believed to have originated in the process area. In soils, of 13 cases for which data are available, only three show 2,3,4,6-tetrachlorophenol levels above the health based level of 2000 mg/kg. Although not shown in Table 3, of five cases for which subsurface soil data are available, only one is above the health based level. Noteworthy about this case is that the sample, for which a value of 4800 mg/kg is reported, was taken six years after usage of chlorophenols ended at the site.

Data on PCDDs and PCDFs from the resource damage incidents are limited to soils in the process area. Of the three cases for which data are available, all exceed the health based level of 0.000007 mg/kg (7 parts per trillion) by three orders of magnitude or more. In addition, as part of its own sampling and analysis activities, EPA has acquired data on PCDDs and PCDFs in subsurface process soils at two sites and in stream and drainage ditch sediments at four sites. These data are not included in Table 3 but are discussed elsewhere in today's notice. The data on subsurface process soils, which range from 0.00001 mg/kg (10 parts per trillion) to 0.00027 mg/kg (270 parts per trillion), indicate that health based levels can be exceeded to depths of three feet or more. The sediment data, which range from 0.000009 mg/kg (9 parts per trillion) to 0.000034 mg/kg (34 parts per trillion), also exceed the health based level for soil.

b. Discussion. The levels of pentachlorophenol, 2,3,4,6-tetrachlorophenol, PCDDs, and PCDFs in contaminated media at sawmill facilities frequently reach levels of concern, based on the information obtained from resource damage incident reports.[14] Pentachlorophenol has commonly been found at levels of concern across all media (with the exception of air). Compared to pentachlorophenol, 2,3,4,6-tetrachlorophenol tends to be found at similar levels across the same media. However, given that the corresponding health based levels are substantially higher, 2,3,4,6-tetrachlorophenol is generally of lesser concern.[15] Although the sodium and potassium salts of these compounds are highly mobile in water, the data show that following the cessation of usage of chlorophenols for surface protection, significant levels can be retained in soils for time periods of ten years or more. However, the degree of retention in soil appears to be highly site-specific. In addition, pentachlorophenol and 2,3,4,6-tetrachlorophenol are known to biodegrade. The rate at which biodegradation actually occurs in soils can be expected to be highly variable, depending on local environmental conditions. In contrast, PCDDs and PCDFs bind strongly to soils and are quite resistant to biodegradation, indicating that these compounds can be expected to persist at levels of concern for long periods of time. Nevertheless, these compounds appear to exhibit some mobility in the environment, as evidenced by measurements of elevated levels in soils at depths to three feet or more and by both on-site and off-site measurements of elevated levels in sediments.

EPA has limited direct evidence of damage to ecosystems that can be attributed specifically to the usage of chlorophenols for surface protection. One Swedish study documents an extensive fish kill associated with the discharge to an adjacent stream of a chlorophenol solution from a sawmill surface protection operation. Two weeks following this incident, fish collected six kilometers downstream exhibited liver tissue concentrations of 5 parts per million total chlorophenols. Fish collected 15 kilometers downstream exhibited increasing concentrations in liver tissue, reaching a level of 2 parts per million two months after the discharge. This study, which illustrates that chlorophenols are readily distributed in aquatic ecosystems, suggests that chlorophenols can be accumulated in higher organisms through the food chain.

3. Assessment of Risk from Usage of Chlorophenolic Formulations

The resource damage incidents discussed in the previous section demonstrate that soil, ground-water, and surface water resources at sawmill facilities have been damaged due to on-site contamination by hazardous constituents from chlorophenolic surface protection formulations. However, in the context of non-occupational exposures, these damages pose a threat to public health only if the contamination migrates off-site or if on-site exposure occurs as a consequence of a change in land use. To address these scenarios, EPA performed a risk assessment to quantify the potential risks to human health. This assessment focuses on risk associated with exposure to contaminated ground water and soils and risk associated with dietary exposures from fish and shellfish ingestion due to their uptake of contaminated surface water sediments.

a. *Source characterization.* EPA estimates that approximately 3200 sawmills are currently operating in the United States and that approximately one-third of these surface-protect. EPA believes that of the sawmills that surface protect, nearly all have used chlorophenols at some time. An unknown number of additional sawmills that do not currently surface-protect may have done so in the past using chlorophenols.

Although a number of wastes are generated by surface protection operations, the most important in terms of potential human exposure are drippage of excess formulation in the process area and precipitation wash-off in the storage yard. These are by far the highest volume wastes generated at sawmill facilities. The volume of waste is a major factor in determining the potential risk to human health. Process drippage and precipitation wash-off are frequently disposed of directly onto unprotected soils. Process area and storage yard soils that become contaminated as a result of drippage and wash-off then become additional sources of potential human exposures.

1. *Process drippage.* Process drippage is generated whenever excess formulation drips from the wood once it has been treated. Although the drippage

[9] Eisler, R. Dioxin Hazards of Fish, Wildlife, and Invertebrates: A Synoptic Review. U.S. Fish and Wildlife Services, 1986. Biological Report 85.

[10] LD_{50} is the dose (on a unit body weight basis) at which 50 percent mortality is observed in the species tested.

[11] EPA also searched a data base of State bans and advisories on the consumption of fish and shellfish which is maintained by EPA's Office of Water as a special forum of the Nonpoint Source Information Exchange Computer Bulletin Board System (NPS BBS). Although 120 bans and advisories for dioxins were identified, none could be attributed specifically to discharges from sawmills.

[12] Sodium and potassium pentachlorophenate and the sodium and potassium salts of 2,3,4,6-tetrachlorophenol are measured and reported as the corresponding phenols.

[13] EPA's own sampling and analysis data, which are discussed elsewhere in today's notice, are not included in Table 3.

[14] This conclusion is corroborated in part by EPA's own sampling and analysis data, as discussed elsewhere in today's notice.

[15] In this regard, however, the Agency notes that 2,3,4,6-tetrachlorophenol has not been evaluated for carcinogenicity.

VOL 58 ISS 79 AP 27 1993 UMI

may be collected and returned to the process, typically there is little or no effective collection system. In dip tank operations, the amount of drippage generated depends on the length of time the lumber is allowed to drain over the tank before it is transferred from the process area. Process drippage may drip directly onto soils in the vicinity of the tank or onto a concrete pad from which runoff occurs. The runoff may subsequently infiltrate into the subsurface environment or be conveyed to surface waters.

Based on drippage measurements made during a field experiment, EPA estimates that the amount of drippage generated is between 1000 and 4000 gallons for every one million board feet of treated lumber. This compares to an estimate of approximately 10,000 gallons of formulation used per million board feet of lumber treated.[16] Measurements of the amount absorbed by the wood vary widely. However, EPA believes that absorption accounts for no more than about 1500 gallons per million board feet. Based on these figures, the drippage and absorption combined do not appear to account for the amount of formulation actually used. Although measurement error may account for much of the disparity, some portion may be attributable to leaks and spills. In spite of the uncertainty, the Agency is assuming for the purpose of characterizing risk that 2400 gallons infiltrate into soils for every one million board feet of lumber that are treated. The Agency believes that this value is well within the range of uncertainty of the data. EPA requests comment on the validity and reliability of this assumption.

Estimates of the strength of the formulation solution range from 0.2 percent to 2 percent, as total chlorophenols. However, chlorophenolic formulations differ substantially in the proportion of pentachlorophenate and 2,3,4,6-tetrachlorophenate salts from one product to another. Some formulations are composed primarily of sodium or potassium salts of pentachlorophenate while others contain a high proportion of salts of 2,3,4,6-tetrachlorophenate. Drippage consists of undiluted excess formulation; therefore, the strength and composition of the drippage is the same as that of the formulation. For the purpose of characterizing risk associated with the usage of chlorophenols for surface protection, the Agency is assuming that the concentration of chlorophenols in the drippage is 0.4 percent, or 4000 parts per million.[17] For the purpose of characterizing the incremental risk associated with the cross-contamination of non-chlorophenolic formulations, the Agency is assuming based on its record sampling that the residual concentration of chlorophenols in the drippage is approximately 3 parts per million. This estimate is based on sampling and analysis data on levels in the formulation of users of non-chlorophenolics who previously used chlorophenols.

2. *Storage yard wash-off.* Wash-off is generated whenever precipitation contacts treated wood. Although this can occur anywhere that treated wood is handled outdoors, most wash-off is generated at sawmills in uncovered storage yards. While generated only intermittently, these wastes are high in volume. The volume generated depends on the size of the storage yard and the amount of rainfall. However, the concentrations of waste constituents in wash-off are relatively low compared to the concentrations in process drippage. Although storage yards may be paved with asphalt, more typically they are situated on unprotected compacted soil or are overlaid with gravel. In most situations, some portion of the wash-off is expected to infiltrate into the ground, the amount depending on the particular site and the specific conditions at the time. The Agency is assuming for the purpose of characterizing risk that 25 percent of the wash-off infiltrates into the ground.

Studies conducted in British Columbia by Environment Canada show that leaching from treated lumber begins after as little as one millimeter of continuous precipitation and occurs even after extended periods of drying.[18] The Environment Canada study collected data on the concentrations of chlorophenols in storage yard runoff as a function of rainfall intensity. EPA evaluated these data, which include several rain events of one to two days duration each. For the purpose of characterizing risk associated with chlorophenolic usage, the Agency took the average runoff concentrations that were reported for the individual rain events and weighted them by the corresponding cumulative rainfall totals to estimate an overall average runoff concentration. This concentration, which is approximately 7 mg/L, represents the average concentration in the wash-off over several cycles of precipitation and subsequent drying. For the purpose of characterizing the incremental risk associated with cross-contamination of non-chlorophenolic formulations, the Agency reduced this concentration by the same factor that the concentration in drippage was reduced, as described above. The Agency requests comment on whether this approach is appropriate and requests additional data to assist in refining this estimate.

3. *Process area and storage yard soils.* For the purpose of characterizing risk related to soil contamination, EPA collected soil samples from the process area and storage yard at five sawmill facilities, one of which was a current user of chlorophenolics. Each sample was collected by a six inch auger inserted to a depth of six inches. In order to collect representative samples of the areas of soil contamination, a team consisting of a hydrogeologist and chemical engineer made a careful assessment of the sampling locations. The samples were analyzed for PCDDs and PCDFs.[19] The sampling and analysis results demonstrate the presence of PCDDs and PCDFs in both the process area and storage yard. The concentrations of the storage yard samples collected by EPA, which range from 0.014 µg/kg (parts per billion) to 0.96 µg/kg (parts per billion) have a mean value of 0.22 µg/kg (parts per billion), expressed as 2,3,7,8-TCDD toxicity equivalents (TEQ). Two process area soil samples collected by EPA have concentrations of 0.94 µg/kg (parts per billion) and 4.1 µg/kg (parts per billion), expressed as 2,3,7,8-TCDD toxicity equivalents (TEQ), giving a mean value of 2.5 µg/kg (parts per billion).[20]

The levels measured in the process area samples represent the accumulation of PCDDs and PCDFs in soil from drippage over an extended, though unknown, period of time. The Agency lacks adequate historical data

[16] Total usage is based on a manufacturer's estimate.

[17] The concentration of chlorophenols is based on a manufacturer's estimate of what is typically used in the industry.

[18] Environment Canada. Assessment of Storm Water Related Chlorophenol Releases from Wood Protection Facilities in British Columbia. Pacific and Yukon Region. August, 1987. Regional Program Report 87-13.

[19] EPA also analyzed the soil samples for chlorophenols. However, neither pentachlorophenol nor 2,3,4,6-tetrachlorophenol were detected in the soil samples. These results differ with the results from the resource damage incident reports, as discussed elsewhere in today's notice, which show pentachlorophenol and 2,3,4,6-tetrachlorophenol in process soils in the part per million range (and above). Such site to site differences are not unexpected and are probably related to variations in soil types and the soil's ability to bind chlorophenols from aqueous solutions of their salts or other site-specific factors.

[20] EPA notes that the limited data on concentrations of PCDDs and PCDFs in process area soils from the resource damage incident reports, as discussed elsewhere in today's notice, are generally higher than the concentrations discussed here.

on the levels of PCDDs and PCDFs in chlorophenolic surface protection formulations to relate to the observed soil concentrations. Therefore, with the data available, it is not possible to accurately quantify the process area soil contamination that would result from any given level of PCDDs and PCDFs in the formulation. The situation is made even more difficult with respect to storage yard soils because the mechanism by which the contamination occurs is not known. Any one or a combination of the following mechanisms could be involved: (1) Residual drippage in the storage yard (though this has not actually been observed by the Agency); (2) precipitation wash-off from treated lumber (though no actual measurements of PCDDs and PCDFs in wash-off are available); (3) phototransformation of soil pentachlorophenol to octachlorodibenzo-p-dioxin (OCDD) in situ and subsequent photolytic dechlorination to other PCDDs, which has been observed in the laboratory; or (4) phototransformation of phenoxyphenols (i.e., "predioxins," which are co-contaminants of chlorophenolic formulations) to various PCDDs and PCDFs, which appears to require the presence of a strong hydrogen donor. For the purpose of analyzing soil-related exposure pathways, the Agency believes that due to the complexity and uncertainty involved, direct measurement of PCDDs and PCDFs in soils is the best approach for characterizing the source of the contamination.

For characterizing risk associated with existing levels of soil contamination from historical usage of chlorophenolic formulations, the levels measured in soils may be used directly. However, cross-contamination of non-chlorophenolic formulations will continue to contribute to soil contamination with PCDDs and PCDFs. In order to characterize the baseline risks associated with cross-contamination by PCDDs and PCDFs of current non-chlorophenolic formulations, the Agency attempted to estimate the level of soil concentration which would occur from usage of cross-contaminated non-chlorophenolic formulations. A comparison of available data on the levels of these compounds in chlorophenolic and cross-contaminated non-chlorophenolic formulations suggests that concentrations of PCDDs and PCDFs may have dropped by about a factor of four. In the absence of any other information, the Agency believes it is reasonable to expect correspondingly lower levels of PCDDs and PCDFs in soils attributable to such cross-contamination than the levels indicated by direct measurement. Therefore, the measured soil concentrations were reduced by a factor of four to estimate the soil concentrations which would result solely from cross-contamination. EPA requests comment on whether this approach is appropriate to use to estimate the baseline soil concentration for non-chlorophenolic users.

b. *Exposure pathway analyses*—1. *Ground-water ingestion.* This exposure pathway is based on the premise that contaminated ground water in shallow, unconfined aquifers may be used as a drinking water supply. A mathematical model is used to describe ground water flow and pollutant transport in unsaturated soils (i.e., the vadose zone) and unconfined ground water aquifers (i.e., the saturated zone). This model, known as the MULTIMED model, is based on many of the same analytical and numerical solution techniques that have been used by the Agency for other rulemakings, including the Toxicity Characteristic revisions (March 29, 1990; 55 FR 11798).[21] A significant difference in the analysis conducted for this proposal is the simulation of ground water transport in the transient mode; no "infinite source" or steady-state assumption is made in performing the transport calculations. However, important simplifying assumptions of the model remain. These include the assumption that the properties of the saturated, porous medium are isotropic and homogeneous. Fractured media, aquicludes, and multiple aquifers are not simulated. Ground water flow is assumed to be steady and uniform. The sorbed and aqueous phases are assumed to be in equilibrium; sorption is further assumed to follow a linear isotherm.

Initially, EPA used the MULTIMED model to perform screening analyses to identify the constituents that are likely to migrate through ground water at appreciable rates, the model input parameters to which the modeling results are most sensitive, and the sources of ground water contamination that are most important. The screening analyses show that, as expected, PCDDs and PCDFs do not migrate significantly in ground water. The screening analyses also show that drippage in the process area is considerably more important than wash-off in the storage yard as a source of ground water contamination. Parameters to which the modeling results are sensitive include: (1) The initial source concentration; (2) the source infiltration rate; (3) the recharge rate; (4) the various sorption parameters, including the soil:water partition coefficient and the fraction of organic carbon in the vadose zone and the aquifer; (5) the hydraulic conductivity of the aquifer and the vadose zone; and (6) the distance from the source area to the nearest drinking water well. The hydraulic conductivity and the organic carbon fraction are related to the type of geologic materials of which the aquifer and the unsaturated zone are comprised. A variety of other parameters also influence the modeling results. Values of the important parameters used for the ground water analysis are found in Table 4 below.

[21] The reader is referred to the docket for today's proposal for a detailed description of the MULTIMED model and its application for this proposal.

TABLE 4.—PARAMETERS VALUES FOR GROUND WATER INGESTION PATHWAY

Parameter	Central tendency value	High end value
Source Concentration: Chlorophenolic Usage (ppm)	4000	4000
Baseline (ppm)	2.8	2.8
Residual (ppm)	0.1	0.1
Facility Size (MMBF)	20	100
Distribution Coefficient (Kd):		
Pentachlorophenol (mL/g)	1068	412
2,3,4,6-Tetrachlorophenol (mL/g)	966	87
Precipitation (inches/year)	48	40
Recharge Rate (meters/year)	0.24	0.20
Infiltration Rate (meters/year)	0.32	1.14
Vadose Zone:		
Total Thickness (meters)	3.0	1.5
Soil Type (-)	loam	sand
Hydraulic Conductivity (cm/hr)	1.04	29.7
Organic Carbon (percent)	.....	.....
Layer 1	1.1	0.6
Layer 2	0.2	0.1
Aquifer:		
Thickness (meters)	30	15
Hydraulic Conductivity (m/yr)	5000	10000
Organic Carbon Fraction (-)	0.002	0.001
pH	6.2	7.9
Hydraulic Gradient (-)	0.002	0.004
Distance to Well (feet)	500	100
Ingestion Rate (L/day)	1.4	1.4
Exposure Duration (years)	9	9

A discussion of the various ground water modeling assumptions and the values of the input parameters is found

VOL 58 ISS 79 AP 27 1993 UMI

in the risk assessment background document for today's proposal.

2. *Direct soil ingestion.* This exposure pathway is based on the premise that young children may be exposed to hazardous constituents that are present in contaminated soils while playing outdoors, as a result of normal hand to mouth behavior. Such exposure could occur if the site where the contaminated soils are located is converted to residential housing, in the absence of soil remediation.[22] The Agency assumes that adult exposures associated with incidental soil ingestion are generally low when compared to childhood exposures.

Limited sampling and analysis data collected by EPA have identified soils in the process area and storage yard of sawmills that are contaminated with PCDDs and PCDFs. These compounds are highly persistent and can be expected to remain in the soil for many years to come. EPA used actual measurements of these compounds in soil in conjunction with various exposure assumptions to estimate potential childhood exposures to PCDDs and PCDFs if sawmill sites were converted to residential use without prior soil remediation. These assumptions are detailed in Table 6 below and in the risk assessment background document for today's proposal.

TABLE 5.—PARAMETERS VALUES FOR DIRECT SOIL INGESTION PATHWAYS

Parameter	Central tendency value	High end value
Soil Concentration (µg/kg)	0.218	0.96
Soil Ingestion Rate (g/day)	0.1	0.2
Exposure Duration (days)	800	1825
Absorption Fraction (-)	0.3	1.0

As discussed previously, for the baseline risk the Agency reduced the measured values by a factor of four in making estimates of soil concentrations resulting from cross-contamination. With regard to chlorophenols, however, the Agency's own data indicate an absence of significant soil contamination. For this reason, EPA has not attempted to characterize quantitatively, the potential risks associated with childhood exposures to chlorophenols via direct soil ingestion.[23]

[22] The agency recognizes that the very presence of contaminated soils is a factor that could also discourage residential development of former sawmill sites.

[23] The Agency noted that data from the resoure damage incidents described elsewhere in today's notice suggest that process soils could pose a threat to human health due to contamination with chlorophenols, primarily pentachlorophenol. The data are insufficient to draw any conclusions regarding chlorophenols in storage yard soils. However, any risks posed by soils contaminated with chlorophenols are contingent on residential redevelopment, without prior remediation.

3. *Fish and shellfish ingestion.* Most sawmills are located adjacent to or in close proximity to rivers and streams. This fact, combined with the results of actual sediment measurements, indicate a high probability that PCDDs and PCDFs have migrated into surface water sediments, presumably by soil erosion. Once river and stream sediments are contaminated, biological uptake may occur by freshwater organisms. This is of particular concern to human health in the case of freshwater fish which are consumed as part of the diet. Uptake of the more highly chlorinated PCDDs and PCDFs, such as those found in soils at sawmills, has been documented in laboratory studies of young fish exposed to contaminated riverine sediments.[24] Furthermore, estuarine fish and shellfish may also be subject to uptake of PCDDs and PCDFs when contaminated sediments are naturally discharged into bays and estuaries.

EPA used a methodology for fish and shellfish ingestion which is similar to one used in the proposed rule for land application of chlorine-bleached pulp and paper mill sludge (56 FR 21802). This approach uses the USDA's Universal Soil Loss Equation to estimate the ratio of the rate of erosion of soils from a contaminated site to the rate of erosion in the watershed as a whole. The ratio represents the dilution of sediments from a site by sediments from the entire drainage basin. Applying this ratio (or "dilution" factor) to the concentration in soils from a contaminated site gives the average sediment concentration in the watershed to which fish and shellfish may be exposed. To determine the average watershed acreage per sawmill, EPA mapped the location of over 2500 sawmills to determine the number of sawmills in each of over 2000 hydrologic cataloguing units in the continental United States, as defined by the U.S. Geological Survey.[25] Parameters for biological uptake are established using an empirically-derived sediment: fish bioaccumulation factor. Data from a USDA national food consumption survey are then used to estimate human exposure in the general population. In addition, data from other surveys are used to estimate exposures among recreational fishers. Values of the important parameters used in the analysis are summarized in Table 6 below.

TABLE 6.—PARAMETER VALUES FOR FISH AND SHELLFISH INGESTION PATHWAY

Parameter	Central tendency value	High end value
Site Area (hectares)	1.9	16.2
Ratio of Site Slope to Basin Slope (-)	1.0	1.0
Site Delivery Ratio (-)	0.80	0.62
Soil Concentration (µg/day)	0.218	0.96
Sites per Basin Area (ha) - 1	2.79×10^{-6}	1.03×10^{-5}
Cover Factor (-)	0.04	0.004
Bioaccumulation Factor (-)	0.008	0.1
Consumption Rate (g/day)		
Recreational Fishers	30	140
General Population	5.9	38
Ratio of TCDD-TEQ in fish filet to whole body (-)	0.5	0.5
Diet Fraction (-)	0.4	0.4

A detailed description of the methodology for the fish and shellfish exposure pathway is found in the background document for today's proposal.

c. *Characterization of risk from usage of chlorophenolic formulations.*

For today's proposal, EPA is taking a generic approach to the characterization of risk from the land disposal of certain wastes generated by the surface protection of wood at sawmill facilities, specifically process drippage and storage yard wash-off. A generic approach is necessary due to a lack of adequate data to perform site-specific risk assessments for a representative sample of sites.[26] With this approach, a generic scenario is developed in order to represent a prototypical sawmill site.

[24] Kuehl, D.W., P.M. Cook, A.R. Batterman, D. Lothenbach, and B.C. Butterworth. Bioavailability of polychlorinated dibenzo-p-dioxins and dibenzofurans from contaminated Wisconsin River sediment to carp. Chemosphere, Vol. 16, pp 667-679, 1987.

[25] The mapping results indicate that among cataloguing units where sawmills are located, there is one sawmill on average for every 270,000 acres, or approximately three sawmills per cataloguing unit. EPA estimates that approximately a third of these sawmills currently surface protect, or about one sawmill on average per cataloguing unit.

[26] EPA notes that a generic approach to risk characterization complements the site-specific data on media contamination from resource damage incidents, as described elsewhere in today's notice. Although useful for judging the reasonableness of the generic assessment, the resource damage incidents do not of themselves provide an adequate basis for characterizing risk.

The prototypical site is characterized in terms of size, waste generation, waste characterization, waste management practices, hydrogeologic characteristics, and drainage basin characteristics based on industry responses to questionnaires, EPA site visits, sampling and analysis data, and other information available to the Agency. The development of this scenario involves the evaluation of each of the parameters that is required in order to characterize human exposure and the selection of specific values for each of those parameters. Each of the exposure pathways described previously was analyzed using this approach.

If the values for all the exposure parameters are selected to represent what is typical (as indicated by the mean or median values for the parameters), then the corresponding risk from such an exposure scenario represents a central tendency estimate. On the other hand, if the values of all the parameters are selected to represent the high end at the same time, then the corresponding risk represents a bounding estimate; such estimates are generally useful only for eliminating certain exposure scenarios from further consideration. In theory, one can generate a distribution of individual risk in a population from the joint distribution of the various exposure parameters. The Agency has determined that EPA risk assessments should, at a minimum, include both central tendency and high-end estimates of individual risk, where the high end represents conceptually the 90th percentile of the population distribution and above. High end estimates are intended to exclude estimates, such as bounding estimates, that are likely to be above the risk to the most exposed individual in the actual population.

In order to characterize the high end risk, the various exposure parameters are first evaluated individually and high-end values for the parameters are selected based on the 90th to 95th percentile of the distribution of the values, or on some less precise measure of the high end where detailed data are not available. For this analysis, one estimate of the high end risk is made by setting each parameter to its high end value, one parameter at a time, and taking the highest of the estimates from this group of scenarios. A second estimate of the high end risk for this analysis is made by setting the exposure parameters to their high end values, two parameters at a time (resulting in a large matrix of exposure scenarios), and taking the highest of the risk estimates from this group of scenarios. These two estimates are intended to represent the lower and upper ends of the high end range of the distribution of risk. EPA requests comment on this approach for making high end risk estimates.

1. *Individual risk from usage of chlorophenolic formulations.* This section presents the results of the Agency's assessment of individual risk associated with the uncontrolled land disposal of process drippage and storage yard run-off from the use of chlorophenols for the surface protection of wood.

For the carcinogenic waste constituents (i.e., pentachlorophenol, PCDDs, and PCDFs), individual risk is described in terms of a lifetime excess cancer risk. The lifetime excess cancer risk represents the estimated upper bound of the 95th percentile confidence interval of the probability that an individual will contract cancer over his or her lifetime due to exposure to a particular substance. The results for PCDDs and PCDFs are combined in terms of 2,3,7,8-TCDD toxicity equivalents (TEQ) by using the toxicity equivalency factors discussed elsewhere in today's notice. For 2,3,4,6-tetrachlorophenol, which is classified as neither a human nor a probable human carcinogen, individual risk is described in terms of a hazard quotient. The hazard quotient is the ratio of the concentration to which an individual is exposed to the media concentration corresponding to the reference dose (otherwise referred to as the health-based level). The higher the hazard quotient, the greater the likelihood that adverse health effects will be observed in an individual and the greater the severity of those effects.

The risk results for the ground water pathway are given in Table 4. These results are broken out separately for drippage in the process area and wash-off in the storage yard. Risks from cross-contaminated non-chlorophenolic formulations would be lower by about a factor of 1400.

TABLE 7.—INDIVIDUAL RISK FROM USAGE OF CHLOROPHENOLIC FORMULATIONS FROM GROUND WATER INGESTION

Constituent	Central tendency	High end
Pentachlorophenol †	7×10^{-4}	2×10^{-2} to 3×10^{-1}
Tetrachlorophenol *	$1\times10^{+1}$	$2\times10^{+2}$ to $2\times10^{+3}$

† Upper bound excess lifetime cancer risk.
* Hazard quotient.

The expected increased risk to a typically exposed individual is 7×10^{-4}, or a chance of seven in ten thousand of contracting cancer over a lifetime. The assumption is made here that ground water is ingested at the rate of 1.4 liters per day for 9 years. Nine years is typical of the length of time an individual dwells at any one residence and, therefore, of the average duration of exposure to contaminated ground water. The risk calculation assumes that the individual's nine year residency period occurs during the peak nine year exposure segment over the modeling period. Of course, these results are based on the premise that ground water down-gradient of the source of contamination may be used for drinking water. As part of the RCRA section 3007 survey of 166 surface protection facilities, facilities were asked to provide the distance to the nearest ground water well. The survey data indicates that the median distance reported by the 68 responding facilities is 500 feet. Four of the 68 facilities report wells being as close as 100 feet. The further assumptions are made that the well is used for drinking water, is located down-gradient of the facility on the centerline of the plume, and draws from the top of the surficial aquifer. However, since sawmills are often located near rivers and streams, the contaminated ground water plume may be intercepted at least in part by surface water drainages, thereby reducing both the magnitude and likelihood of human exposures. Furthermore, the contaminated plume may not reach a drinking water well for many decades, raising the possibility that biodegradation in situ could significantly lower concentrations in the ground water aquifer. However, the toxicities of the many possible metabolites that may result from

VOL 58 ISS 79 AP 27 1993 UMI

biodegradation have not been characterized and may not be inconsequential. The Agency requests comment on these individual risk estimates.

The risk results for the direct soil ingestion pathway are given in Table 5. Risks from soils contaminated only by cross-contaminated non-chlorophenolic formulations would be lower by about a factor of four. These results are broken out separately for the process area and the storage yard.

TABLE 8.—INDIVIDUAL RISK FROM USAGE OF CHLOROPHENOLIC FORMULATIONS FROM DIRECT SOIL INGESTION

Source	Process area		Storage yard	
	Central tendency	High/End	Central tendency	High/End
Constituent:				
2,3,7,8-TCDD TEQ †	2×10^{-5}	5×10^{-5} to 2×10^{-4}	2×10^{-6}	9×10^{-6} to 2×10^{-5}

† Upper bound excess lifetime cancer risk.

The results in Table 5 suggest that the risk from direct soil ingestion by children is considerably smaller than the risk from ground water ingestion. A child exposed to contaminated storage yard soils under typical conditions would be subject to an increased cancer risk of 2×10^{-6} over a lifetime, or a chance of only two in a million. These risk estimates assume soil ingestion rates in the range of 100 mg/day to 200 mg/day from normal hand to mouth behavior. Children who exhibit pica behavior may consume much larger quantities of soil; these children, therefore, could be subject to proportionately higher risks.

Finally, the risk results for the fish and shellfish ingestion pathway are given in Table 6 for two different population groups, recreational fishers and the general population. Risks from this exposure pathway from soils contaminated only by cross-contaminated non-chlorophenolic formulations would be lower by about a factor of four.

TABLE 9.—INDIVIDUAL RISK FROM USAGE OF CHLOROPHENOLIC FORMULATIONS FROM FISH AND SHELLFISH INGESTION

Population	Recreational fishers		General population	
	Central tendency	High/End	Central tendency	High/End
Constituent:				
2,3,7,8-TCDD TEQ †	1×10^{-8}	2×10^{-7} to 2×10^{-6}	4×10^{-9}	3×10^{-8} to 3×10^{-7}

† Upper bound excess lifetime cancer risk.

Because storage yard soils represent by far the largest area of contamination at sawmill facilities (the process area being relatively small by comparison), the results in Table 6 are based on PCDD and PCDF levels in storage yard soils only. The risk estimates for the general population and the central tendency risk estimates for recreational fishers have been adjusted by the proportion of hydrologic cataloguing units in which sawmills are located in order to account for the proportion of the market basket of fish and shellfish that could be contaminated by sediment from sawmills. This proportion is estimated to be 40 percent. EPA requests comment on the appropriateness of this methodology.

The results suggest that human exposures through this pathway are of relatively little concern to any particular individual. For a typically exposed individual in the general population, the risk of contracting cancer is increased by only 4×10^{-9}, or a chance of four in a billion. In fact, the estimated concentrations of PCDDs and PCDFs in fish tissues are substantially lower than levels which have been characterized by some investigators as "background" levels, which suggests that sawmills are not one of the more important sources of PCDDs and PCDFs in the aquatic food chain. However, as described elsewhere in today's notice, the methodology EPA used for the fish and shellfish ingestion pathway is based on average sediment concentrations in an entire drainage basin, which can represent thousands of square miles. Concentrations in sediments immediately downstream of contaminated sites would be expected to greatly exceed the average sediment concentration, suggesting the possibility of the existence of significant localized risks which have not been quantified. Also, despite the estimated risks to any one individual not being very high, the overall contribution of PCDDs and PCDFs from surface protection operations to the aquatic environment is of concern because of the large number of facilities and the enormous size of the population potentially exposed via dietary consumption of fish and shellfish. Human exposure to these compounds from a variety of sources are already at sufficiently high levels that any increase in exposure is cause for concern.

2. *Population risk from usage of chlorophenolic formulations.* Population risk represents the number of persons in a given population which may be expected to exhibit adverse health effects, either in terms of morbidity or mortality. Although population risk can be estimated by summing individual risks across the entire population, in practice detailed information on the distribution of individual risk is rarely available. However, for carcinogens which are assumed to exhibit a linear dose-response relationship, an estimate of population risk can be made by multiplying the central tendency estimate of individual risk by the size of the exposed population. This estimate, which represents the number of cases over a lifetime, can be divided by the period of time over which the population is exposed to calculate an "annual average" number of cases during the 70 year period of maximum exposure. An estimate of this type is made with the implicit assumption that larger risks to more highly exposed individuals in the population are offset by smaller risks to less exposed individuals. For noncarcinogenic effects, population risk can be estimated by multiplying the proportion of the population that receives an exposure which exceeds the reference dose (RfD) by the size of the exposed population. An estimate of this type obviously requires some knowledge of the distribution of individual risk in the exposed population (as measured by the hazard quotient, for example). This estimate also can be converted to an annual average as discussed above.[27]

Estimates of population risks associated with existing environmental contamination for the ground water ingestion pathway, the fish and shellfish ingestion pathway, and the soil ingestion pathway are given in Table 7. Incremental risk associated with the cross-contamination of non-chlorophenolic formulations is discussed in the benefits section of today's proposal. Note that population risk estimates are not made for pentachlorophenol and 2,3,4,6-tetrachlorophenol for the soil-based pathways (i.e., direct soil ingestion and fish and shellfish ingestion) and for 2,3,7,8-TCDD for the ground water pathway, for the reasons cited earlier.

TABLE 10.—POPULATION RISK FROM USAGE OF CHLOROPHENOLIC FORMULATIONS BY EXPOSURE PATHWAY

Pathway	Ground water	Fish and shellfish	Soil
Constituent:			
Pentachlorophenol †	9×10^{-2}	NA	NA
2,3,4,6-Tetrachlorophenol *	$2\times10^{+2}$	NA	NA
2,3,7,8-TCDD TEQ †	NA	1×10^{-2}	2×10^{-5}

† Cancer cases, annual average during 70 year period of maximum exposure.
* Non-cancer cases, annual average during 70 year period of maximum exposure.

For the ground-water pathway, the population risk estimates are based on an estimated exposed population of approximately 17000 individuals over 70 years. This is derived by adjusting the number of sawmills which currently engage in surface protection operations by the proportion of sawmills reporting the presence of a ground water well and making the assumption of one household per well. The residence time or turnover period is assumed to be 9 years, resulting in eight exposed households (or cohorts) over 70 years. The exposed households are assumed to obtain their drinking water from wells which are located 500 feet directly down-gradient of the surface protection operation and draw from the top of a shallow, contaminated surficial aquifer. The rationale for making these particular assumptions is discussed in the risk assessment background document for today's proposal. Because the assumption that each well is located directly down-gradient of the surface protection operation and is used as a drinking water supply is probably quite conservative (particularly given the frequency with which sawmills are located near surface waters that are likely to intercept at least some portion of the contaminated ground water plume), the population risk estimate could be characterized as a bounding estimate. However, the degree of conservatism is reduced by having not considered that other households at farther distances could also be exposed. Also, sawmills that are not currently conducting surface protection operations may have done so in the past and, if so, would most likely have used chlorophenolic formulations. These would represent additional sites that have the potential for human exposure to contaminated ground water. Although community wells would not be expected to draw from very shallow aquifers, such wells could become contaminated to the extent that the surficial aquifer and the water-bearing aquifer are hydraulically connected. If this occurs, the actual population risk could be much higher. However, because the Agency lacks adequate data on the location of community wells relative to sawmills, EPA regards the existence of contaminated community wells as a matter of speculation only, particularly where community water systems are required to comply with the MCL (the maximum contaminant level established under the Safe Drinking Water Act) for pentachlorophenol.

For the fish and shellfish ingestion pathway, the population risk estimates are based on the entire U.S. population, approximately 250 million people, along with the previously discussed assumption that 40 percent of the commercial freshwater and estuarine fish and shellfish come from regions where sawmills that surface protect are located. As presented previously, a central tendency estimate of individual risk was made for the general population. The assumption made here is that all persons in the general population of the U.S. are potentially exposed. EPA believes that this is a reasonable assumption when one considers that the greatest production of lumber occurs in the regions of the U.S. which also produce the highest commercial fish and shellfish catches, in particular the Gulf Coast and the Pacific Northwest regions. EPA requests comment on these assumptions.

For the direct soil ingestion pathway, an estimate of population risk can be made by estimating the number of children that could be exposed to contaminated soils assuming a change in land use from industrial to residential. This could occur where a sawmill is abandoned and, without prior soil remediation, is later developed for residential housing or is sold to a developer or prospective homeowner. As discussed earlier, the population risk can be estimated by multiplying the exposed population by the central tendency estimate of individual risk. However, because the storage yard is so much larger than the process area, only the individual risk value for the storage yard is used in this calculation. Ideally, one would examine local land-use patterns and land values to ascertain the location of sawmills that are likely candidates for residential development. However, this type of information is not readily available to the Agency. Instead, a bounding estimate can be made by assuming an immediate change in land use to rural

[27] Another way of estimating the number of annual cases for non-carcinogenic health effects is to estimate the rate at which individuals are exposed to levels above the reference dose.

VOL 58 ISS 79 AP 27 1993 UMI

residential and estimating the number of potentially exposed children based on rural residential population densities, age demographic data, and estimated turnover times of child-bearing households (i.e., the time period from when one child-bearing household is replaced with another child-bearing household). Taking this approach, a bounding estimate of the size of the exposed population is approximately 500 children over a 70year period. While this can be characterized as a bounding estimate, it does not consider the possibility that a sawmill site located close to an expanding urban area could be converted to high density single family or multifamily housing. Even if only a small number of sawmills were to be developed for high-density housing, the potential population of exposed children could be larger than EPA's estimate.

VIII. Applicability of the Land Disposal Restrictions

RCRA requires EPA to make land disposal prohibition determinations for hazardous wastes that are newly identified or listed in 40 CFR part 261 after November 8, 1984, within six months of the date of final listing (RCRA section 3004(g)(4), 42 U.S.C. 6924(g)(4)). EPA is also required to set levels or methods of treatment, if any, which substantially diminish the toxicity of the waste or substantially reduce the likelihood of migration of hazardous constituents from the waste so that short-term and longterm threats to human health and the environment are minimized (RCRA section 3004(m)(1), 42 U.S.C. 6924(m)(1)). Land disposal of wastes that meet treatment standards thus established by EPA is not prohibited.

A general overview of the Agency's approach in performing analysis of the how to develop treatment standards for hazardous wastes can be found in greater detail in section III.A.1. of the preamble to the final rule for Third Third wastes (55 FR 22535, June 1, 1990). The framework for the development of the entire Land Disposal Restrictions program was promulgated in the Solvents and Dioxins rule (51 FR 40572, November 7, 1986).

Treatment standards typically are established based on performance data from the treatment of the listed waste or wastes with similar chemical and physical characteristics or similar concentrations of hazardous constituents. Treatment standards also are established for both wastewater and nonwastewater forms on a constituent-specific basis. The constituents selected for regulation under the Land Disposal Restriction Program are not necessarily limited to those identified as present in the F033 wastes in today's notice, but include those constituents or parameters that will ensure that the technologies are operated properly.

Wherever feasible, the Agency anticipates transferring BDAT treatment standards for both wastewater and nonwastewater forms of the proposed F033 wastes from the list of treatment standards for F039, the listing for multi-source leachate, promulgated in the Third Third final rule (see 40 CFR 268.43). Those treatment standards, in fact, should be generally achievable. If F033 wastes have constituents present that are not currently regulated in these wastes, EPA will develop treatment standards for these constituents and may then propose to add them to the treatment standards for F039. (The Final BDAT Background Document for U and P Wastes/Multi-source Leachate is available from NTIS (National Technical Information Service), 5285 Port Royal Road, Springfield, Virginia 22161, (703) 487–4600. The NTIS numbers for the three-volume set are PB90–234337, PB90–234345, and PB90–234352.

Although data on waste characteristics and current management practices for the proposed F033 wastes have been gathered as part of the administrative record for today's rule, the Agency has not completed its evaluation of the usefulness of these data for developing specific treatment standards or assessing the capacity to treat (or recycle) these wastes.

Available treatment performance data for wastes believed as difficult to treat as F033 show that incineration, chemical dechlorination, and biological treatment are potentially applicable to F033. These technologies have shown some promise in the treatment of dioxin-containing wastes. EPA is, in fact, evaluating the feasibility of developing concentration-based treatment standards based on the performance of chemical dechlorination technologies demonstrated on wood preserving wastes or unspent commercial chemical products used in the formulation of solutions that are precursors to the generation of F033 or F032 (wood preserving waste). These data are also under review for the purpose of developing treatment standards for F033. A collection of the available treatment information has been placed in the docket for today's rule.

EPA intends to propose treatment standards for F033 in a separate rulemaking. However, EPA specifically is soliciting comment and data on the following as they pertain to the proposed listing of F033 wastes identified in today's notice:

(1) Technical descriptions of the treatment systems that are or could potentially be used for these wastes;

(2) Descriptions of alternative technologies (such as bioremediation) that might be currently available or anticipated as applicable;

(3) Performance data for the treatment of these or similar wastes (in particular, constituent concentrations in both treated and untreated wastes, as well as equipment design and operating conditions);

(4) Information on known or perceived difficulties in analyzing treatment residues or specific constituents;

(5) Quality assurance/control information for all data submissions;

(6) Factors affecting on-site and off-site treatment capacity;

(7) Information on the potential costs for set-up and operation of any current and alternative treatment technologies for these wastes; and

(8) Information on waste minimization approaches.

IX. State Authority

A. Applicability of Final Rule in Authorized States

Under section 3006 of RCRA, EPA may authorize qualified States to administer and enforce the RCRA program within the State. (See 40 CFR part 271 for the standards and requirements for authorization.) Following authorization, EPA retains enforcement authority under sections 3007, 3008, 3013, and 7003 of RCRA, although authorized States have primary enforcement responsibility.

Before the Hazardous and Solid Waste Amendments of 1984 (HSWA) amended RCRA, a State with final authorization administered its hazardous waste program entirely in lieu of the Federal program in that State. The Federal requirements no longer applied in the authorized State, and EPA could not issue permits for any plants located in the State with permitting authorization. When new, more stringent Federal requirements were promulgated or enacted, the State was obligated to enact equivalent authority within specified time frames. New Federal requirements did not take effect in an authorized State until the State adopted the requirements as State law.

By contrast, under section 3006(g) of RCRA, 42 U.S.C. 6926(g), new requirements and prohibitions imposed by the HSWA take effect in authorized States at the same time that they take effect in nonauthorized States. EPA is directed to implement those requirements and prohibitions in authorized States, including the issuance of permits, until the State is granted authorization to do so. While States must still adopt HSWA-related provisions as State law to retain final authorization, the Federal HSWA requirements apply in authorized States in the interim.

B. Effect on State Authorizations

1. HSWA Provisions

Because this proposel (with the exception of the proposed CERCLA reportable quantity) will be promulgated pursuant to HSWA, a State submitting a program modification is able to apply to receive either interim or final authorization under section 3006(g)(2) or 3006(b), respectively, on the basis of requirements that are substantially equivalent or equivalent to EPA's requirements. The procedures and schedule for State program modifications under section 3006(b) are described in 40 CFR 271.21. It should be noted that all HSWA interim authorizations are currently scheduled to expire on January 1, 2003 (see 57 FR 60129, February 18, 1992).

2. Modification Deadlines

Section 271.21(e)(2) of EPA's state authorization regulations (40 CFR part 271) requires that States with final authorization must modify their programs to reflect Federal program changes and submit the modifications to EPA for approval. The deadline by which the States must modify their programs to adopt this proposed regulation, if it is adopted as a final rule, will be determined by the date of promulgation of a final rule in accordance with § 271.21(e)(2). If the proposal is adopted as a final rule, Table 1 at 40 CFR 271.1 will be amended accordingly. Once EPA approves the modification, the State requirements become RCRA Subtitle C requirements.

States with authorized RCRA programs already may have regulations similar to those in today's proposed rule. These State regulations have not been assessed against the Federal regulations being proposed today to determine whether they meet the tests for authorization. Thus, a State would not be authorized to implement these regulations as RCRA requirements until State program modifications are submitted to EPA and approved, pursuant to 40 CFR 271.21. Of course, States with existing regulations that are not less stringent than current Federal regulations may continue to administer and enforce their regulations as a matter of State law.

It should be noted that authorized States are required to modify their programs only when EPA promulgates Federal standards that are more stringent or broader in scope than existing Federal standards. Section 3009 of RCRA allows States to impose standards more stringent than those in the Federal program. For those Federal program changes that are less stringent or reduce the scope of the Federal program, States are not required to modify their programs. (See 40 CFR 271.1(i).) This proposed rule, if finalized, is neither less stringent than nor a reduction in the scope of the current Federal program and, therefore, States would be required to modify their programs to retain authorization to implement and enforce these regulations.

X. Proposed Amendment of SW–846 (Test Methods for Evaluating Solid Waste, Physical/Chemical Methods)

The Agency is proposing to require that certain wood surface protection plants test the pentachlorophenate concentration of their formulations (see discussion in section IV(B) above) using the analytical and test methods found in SW–846 (Test Methods for Evaluating Solid Waste, Physical/Chemical Methods). In connection with this proposed testing requirement, the Agency is today proposing to add method 4010 (Immunoassay Test for the Presence of Pentachlorophenate) to the Second and Third Editions of SW–846.

SW–846 contains the analytical and test methods that EPA has evaluated and found to be among those acceptable for testing under subtitle C of the Resource Conservation and Recovery Act, as amended (RCRA). These methods are intended to promote accuracy, sensitivity, specificity, precision, and comparability of analyses and test results.

Several of the hazardous waste regulations under subtitle C of RCRA require that specific testing methods described in SW–846 be employed for certain applications. For the convenience of the reader, the Agency lists below a number of the sections currently found in 40 CFR parts 260 through 270 that require the use of a specific method for a particular application, or the use of appropriate SW–846 methods in general. If today's proposal is adopted in final form, the proposed pentachlorophenate testing requirement would be added to this list.

(1) Section 260.22(d)(1)(i)—Submission of data in support of petitions to exclude a waste produced at a particular plant (i.e., delisting petitions);

(2) Section 261.22(a)(1) and (2)—Evaluation of waste against the corrosivity characteristic;

(3) Section 261.24(a)—Leaching procedure for evaluation of waste against the toxicity characteristic;

(4) Sections 264.190(a), 264.314(c), 265.190(a), and 265.314(d)—Evaluation of waste to determine if free liquid is a component of the waste;

(5) Section 266.112(b)(1)—Certain analyses in support of exclusion from the definition of a hazardous waste of a residue which was derived from burning hazardous waste in boilers and industrial furnaces;

(6) Section 268.32(i)—Evaluation of a waste to determine if it is a liquid for purposes of certain land disposal prohibitions;

(7) Sections 268.40(a), 268.41(a), and 268.43(a)—Leaching procedure for evaluation of waste to determine compliance with Land Disposal treatment standards;

(8) Sections 270.19(c)(1)(iii) and (iv), and 270.62(b)(2)(i)(C) and (D)—Analysis and approximate quantification of the hazardous constituents identified in the waste prior to conducting a trial burn in support of an application for a hazardous waste incineration permit; and

(9) Sections 270.22(a)(2)(ii)(B) and 270.66(c)(2)(i) and (ii)—Analysis conducted in support of a destruction and removal efficiency (DRE) trial burn waiver for boilers and industrial furnaces burning low risk wastes, and analysis and approximate quantitation conducted for a trial burn in support of an application for a permit to burn hazardous waste in a boiler and industrial furnace.

In situations where hazardous waste regulations under subtitle C of RCRA require that specific testing methods described in SW–846 be employed for certain applications, methods contained in the Second Edition of SW–846, as amended, currently must be utilized. See 40 CFR 260.11 and 270.6(a). In a separate rulemaking, EPA has proposed to require the use of the Third Edition of SW–846, as amended by update I, in lieu of the Second Edition of SW–846, as amended, in situations where the use of SW–846 methods are specifically mandated. See 54 FR 3212 (January 23, 1989).

In other situations, any reliable analytical method may be used to meet other requirements in 40 CFR parts 260 through 270. SW–846 functions in those situations as a guidance document setting forth acceptable, although not required, methods to be implemented by

VOL 58 ISS 79 AP 27 1993 UMI

the user, as appropriate, in responding to RCRA-related sampling and analysis requirements.

In today's proposed rule, the Agency is proposing to require that certain wood surface protection plants test the pentachlorophenate concentration of their formulations using the analytical and test methods found in SW–846. The proposal does not, however, require the use of any one specific SW–846 method. Because the Agency believes that method 4010 is appropriate for the testing requirements proposed today, it is proposing to add that method to SW–846. Method 4010, including its protocol and documentation supporting this proposal can be found in the docket for this rulemaking.

If the portion of the proposed rule referenced above (54 FR 3212 (January 23, 1989)) that would require the use of SW–846 Third Edition methods in lieu of SW–846 Second Edition methods is promulgated and, thereafter, the Agency determines, after reviewing comments submitted, that SW–846 test methods should be required for the proposed pentachlorophenate testing requirement and that Method 4010 should be added to SW–846, the Agency is proposing that Method 4010 be added only to the Third Edition of SW–846 as Update IIA to that edition. If, on the other hand, a final rule replacing the Third Edition of SW–846 for the Second Edition of SW–846 in situations where the use of SW–846 methods is specifically mandated is not promulgated prior to promulgation of a rule finalizing the proposals discussed above in this section, the Agency will consider adding Method 4010 to the Second and Third Editions of SW–846 so that it will be available for use regardless of which edition is mandated.

SW–846 is a document that will change over time as new information and data are developed. Advances in analytical instrumentation and techniques are continually reviewed by the Agency and periodically incorporated into SW–846 to support changes in the regulatory program and to improve method performance. This proposed addition represents such an incorporation. Therefore, although only comments related to the proposals referenced above will be considered in connection with today's proposed rule, EPA also solicits any available data and information that may affect the usefulness of SW–846.

XI. CERCLA Designation and Reportable Quantities

All hazardous wastes listed under RCRA and codified in 40 CFR 261.31 through 261.33, as well as any solid waste that exhibits one or more of the characteristics of a RCRA hazardous waste (as defined in §§ 261.21 through 261.24), are hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended. See CERCLA section 101(14)(c). CERCLA hazardous substances are listed in Table 302.4 at 40 CFR 302.4 along with their reportable quantities (RQs). Accordingly, the Agency is proposing to:

(1) List the proposed F033 hazardous waste as a CERCLA hazardous substance in Table 302.4 of 40 CFR 302.4; and

(2) Establish an adjusted CERCLA RQ of one pound for F033.

Reporting Requirements

Under CERCLA section 103(a), the person in charge of a vessel or plant from which a hazardous substance has been released in a quantity that is equal to or exceeds its RQ shall immediately notify the National Response Center of the release as soon as that person has knowledge thereof. See 40 CFR 302.6. The toll free number of the National Response Center is 1–800–424–8802; in the Washington, D.C. metropolitan area, the number is (202) 426–2675. In addition to this reporting requirement under CERCLA, section 304 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) requires owners or operators of certain plants to report the release of a CERCLA hazardous substance to State and local authorities. EPCRA section 304 notification must be given immediately after the release of an RQ or more to the community emergency coordinator of the local emergency planning committee for each area likely to be affected by the release, and to the State emergency planning commission of any state likely to be affected by the release. If today's proposal is promulgated as a final rule, releases of one pound or more of F033 waste will be subject to the requirements described above.

Adjustment of RQs

Under Section 102(b) of CERCLA, all hazardous substances newly designated under CERCLA have a statutory RQ of one pound unless and until adjusted by regulation. The Agency's methodology for adjusting RQs of individual hazardous substances begins with an evaluation of the intrinsic physical, chemical, and toxicological properties of each hazardous substance. (For more detailed information on this methodology, see the preamble to an RQ adjustment final rule published on August 14, 1989 (54 FR 33426).) The intrinsic properties examined, called "primary criteria," are aquatic toxicity, mammalian toxicity (oral, dermal, and inhalation), ignitability, reactivity, chronic toxicity, and potential carcinogenicity. Generally, for each intrinsic property, the Agency ranks hazardous substances on a scale, associating a specific range of values on each scale with an RQ of 1, 10, 100, 1000, or 5000 pounds. The data for each hazardous substance are evaluated using various primary criteria; each hazardous substance may receive several tentative RQ values based on its particular intrinsic properties. The lowest of the tentative RQs becomes the "primary criteria RQ" for that substance.

After the primary criteria RQs are assigned, substances are further evaluated for their susceptibility to certain degradative processes, which are used as secondary adjustment criteria. These natural degradative processes are biodegradation, hydrolysis, and photolysis (BHP). If a hazardous substance, when released into the environment, degrades relatively rapidly to a less hazardous form by one or more of the BHP processes, its RQ (as determined by the primary RQ adjustment criteria) is generally raised one level. (No RQ level increase based on BHP occurs if the primary criteria RQ is already at its highest possible level [100 pounds for potential carcinogens and 5000 pounds for all other types of hazardous substances except radionuclides].) This adjustment is made because the relative potential for harm to public health or welfare or the environment posed by the release of such a substance is reduced by the degradative processes. Conversely, if a hazardous substance degrades to a more hazardous product after its release, the original substance is assigned an RQ equal to the RQ of the more hazardous substance, which may be one or more levels lower than the RQ for the original substance. The downward adjustment is appropriate because the hazard posed by the release of the original substance is increased as a result of the BHP.

The methodology summarized above is applied to adjust the RQs of individual hazardous substances. An additional process applies to RCRA listed wastes, which contain individual hazardous substances as constituents. As the Agency has stated (54 FR 33440; August 14, 1989), to assign an RQ to a RCRA waste, the Agency determines the RQ for each constituent of the waste and then assigns the lowest of these constituent RQs to the waste itself.

Under the proposed definition of the F033 waste, its constituents may include 2,3,7,8-tetrachlorodibenzo-p-dioxin, which has an adjusted RQ of one pound (the lowest RQ). Therefore, the Agency is proposing a one-pound adjusted RQ for F033.

XII. Compliance Costs Associated With the Rule

A. Executive Order 12291

Executive Order 12291 requires EPA to conduct a Regulatory Impact Analysis (RIA) for all "major" rules. A major rule is defined as one that is likely to result in:

(1) An annual impact on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant impacts on competition, unemployment, investment, productivity, innovation, or the ability of United States-based enterprises to compete in domestic or export markets.

EPA has determined that the F033 Listing Proposal is not a major rule, as defined by the above criteria. Nevertheless, the Agency has prepared an abbreviated RIA or "Economic Assessment" (EA) in order to examine costs and benefits likely to occur as a result of this action. The EA is in the public docket for this notice. A brief summary of the Economic Assessment findings is presented below for both the no-list and list option.

B. Cost of Proposed F033 No-List Option

Facilities may choose to take some remedial action as a result of publicity surrounding this action. However, no specific action will be required under this option. As a result, incremental cost impacts to the regulated community are expected to be zero under the no-list option.

C. Cost of Proposed F033 List Option

a. Methodology

i. *General approach.* The objective of the cost analysis was to determine the social cost of the actions potentially regulated firms would take to comply with the proposed F033 listing. The principle used to determine the actions firms would take is that they would undertake the lowest cost alternative available that would satisfy rule requirements.

Facilities have several alternative compliance strategies available to them:

(1) Treat waste as hazardous;

(2) Use a non-PCP formulation and take actions necessary to ensure that concentrations of PCP in surface protection formulations are at or below 0.1 ppm;

(3) Replace equipment and use a non-PCP formulation; or

(4) Go out of business.

Using the least-cost alternative principle, EPA projects that all potentially regulated facilities would choose number two above; use a non-PCP formulation and clean their equipment to ensure that PCP concentrations are less than or equal to 0.1 ppm. Under this scenario, facilities are assumed to test their formulation, clean equipment and test again following cleaning to insure compliance. Furthermore, although not required, facilities are assumed to avoid liability concerns through the added costs associated with offsite disposal of wastes generated during the cleaning process.

ii. *Identification of potentially regulated community.* Any entity that generates wastes from wood surface protection processes containing levels of pentachlorophenate above 0.1 ppm is potentially subject to the proposed rule. Because sapstain can begin to form on wood within hours after it is cut, sawmills are in the best position to apply the anti-stain chemicals. Nevertheless, there are isolated cases in which downstream facilities such as furniture manufacturers and flooring companies prefer to surface-protect wood after they receive it. EPA has learned from industry representatives, however, that few, if any, such facilities would be affected by an F033 listing. Therefore, the Economic Assessment (EA) focuses exclusively on sawmills, for this proposal.

As described elsewhere in this preamble, EPA estimates that there are over 3,200 sawmills currently operating in the United States, of which approximately 980 surface protect at least some portion of their wood. The three primary methods of surface protection are dip tank, green chain, and spray chamber.

iii. *General assumptions.* The following assumptions underlie the Agency's projection of what facilities would do in response to an F033 listing and the resulting cost of these actions:

(1) No facility will be using sodium pentachlorophenate upon promulgation of a final rule;

(2) All current users of sapstain control chemicals were once users of sodium pentachlorophenate;

(3) Sodium pentachlorophenate will not be used again by any facility in the future; and

(4) All affected facilities (980) would currently generate wastes that meet the listing description (i.e., have formulations with pentachlorophenate concentrations greater than 0.1 ppm).

The first three of these assumptions reflect the best information available. The last assumption is conservative. Many facilities may currently have formulations with concentrations of pentachlorophenate at or below 0.1 ppm (the approximate number is unknown). Facilities are known to routinely clean their equipment, or did so when they switched formulations.

b. Results

i. *Per facility costs.* Costs of the projected compliance action are assumed to vary across facilities depending on the type of surface protection equipment used and the quantity of lumber processed. Estimated one-time per facility costs range from a low of $1,960 for a sawmill using a spray chamber and producing less than 100 million board feet per year, to as high as $9,350 for a facility using a dip tank and producing more than 100 million board feet per year. Labor, testing and waste disposal are the primary cost factors. Waste disposal costs represent anywhere from six to 70 percent of total estimated facility compliance costs, depending upon equipment used and facility size. In addition, testing costs may vary widely and contribute to the overall range. Labor costs reflect best professional judgment of the estimated hours necessary for a thorough "high pressure" water spray cleaning. These costs also vary based on facility size.

ii. *Total cost estimation.* The total social cost of the proposed rule was calculated by multiplying the number of mills in each industry classification (based on the type of equipment employed and volume of lumber produced) by the per facility cost estimated for that classification.

The aggregate social cost of the proposed F033 listing is estimated to range from $3.5 to $4.5 million. All costs are expected to be incurred entirely within the first year after promulgation of the rule. Forty percent of the facilities sampled were found to have existing PCP levels below the proposed regulatory cutoff (i.e., have formulations with pentachlorophenate concentrations at or below 0.1 ppm). Extrapolating to the total cost figure results in an aggregate low cost estimate of approximately $2.3 million (including affirmative testing for the 40 percent).

This action may also result in classification of certain soils as hazardous, resulting in subtitle C management costs, if they are actively managed. Soil management costs would vary significantly, depending upon the amount of contaminated soil actually

VOL 58 ISS 79 AP 27 1993 UMI

managed and the technology used to dispose of the soil. These factors are difficult to quantify. In practice, the expense of added soil management costs likely would discourage many firms from disturbing (building on, excavating, etc.) areas of contaminated soils. However, even though firms are likely to avoid disturbing contaminated soil areas, some affected facilities may choose to implement stricter soil management requirements out of human health and/or liability concerns. Any estimates of the costs associated with future management of contaminated soils could be only speculative, and are not included in this analysis.

Opportunity costs associated with restricted property use may result from this action. These costs would be reflected in reduced property values. The presence of PCP-contaminated soils may reduce the value of the land by compelling clean-up actions, or through the lost use of restricted areas. These costs are assumed to be reflected in the market value of the property. Furthermore, the Agency feels that most reductions in the market value of property results from past contamination. Opportunity costs, therefore, may be attributable, in many cases, to existing State and Federal laws.

iii. *Agency preferred cleaning option.* Sand blasting and epoxy coating is not required to satisfy rule requirements. However, the Agency recognizes this as the most effective cleaning method available and recommends its use in meeting the required 0.1 ppm PCP concentration level. Sand blasting and epoxy coating would cost approximately $2,500 per facility for the average dip tank and green chain operation. Spray chamber facilities would not be able to employ this method. The most effective alternative for these facilities would be to replace their equipment at costs ranging from $40,000 to $60,000 per facility. None of the above estimates include testing or waste disposal costs.

While sand blasting and epoxy coating (equipment replacement for spray operations) is preferred to ensure the most effective cleaning possible, the Agency recognizes that industry will logically choose the least cost cleaning method available to meet rule requirements. As a result, final cost estimates presented in section C.(b) reflect this assumption.

D. Benefits of Proposed F033 Listing

a. Methodology

i. *Overview.* The objective of the benefits analysis was to estimate the number of cancer cases that could be avoided as a result of the implementation of the proposed rule. To derive this estimate, EPA identified the constituents of concern, identified the exposure pathways, determined the risk to individuals associated with each of the pathways, and correlated the individual risk to the population as a whole by multiplying by the estimated number of exposed persons.

When estimating the potential benefits of the proposed rule, it is important to distinguish between risks that result from past practices and risks from future actions. Because the proposed rule, by its own terms, will not require remediation of existing contamination, it will affect only future actions and will not mandate action with respect to contamination from past practices. The risk analysis conducted in support of this proposed rule examined both risk from past practices as well as incremental risk from action affected by the proposed rule. This proposal addresses only incremental risks, as a result, only the incremental risks are discussed in this section of today's notice.

ii. *Identification of constituents of concern and the measurement of their risks.* The constituents of concern used in the risk assessment include pentachlorophenol (PCP), polychlorinated dibenzo-p-dioxins (PCDD), and polychlorinated dibenzofurans (PCDF). Because of limited quantitative data on the toxicity of the specific isomers and congeners of the latter two constituents, PCDDs and PCDFs were modeled using quantitative values for 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), an isomer of dioxin. Tetrachlorophenol (TeCP) is also a constituent of chlorophenolic formulations and was included in the full risk analysis. However, because it is not a carcinogen, results for this constituent are not discussed in this section of today's notice.

As PCP and TCDD are both Class B_2 carcinogens (probable human carcinogens), the magnitude of their risks was measured using carcinogenic slope factors. The slope factors for PCP and TCDD are 1.2×10^{-1} $(mg/kg/d)^{-1}$ and $1.56\times10^{+5}(mg/kg/d)^{-1}$ respectively.

iii. *Identification of exposure pathways and population risks.* EPA modeled risks for three pathways: Ground water ingestion, fish and shellfish ingestion, and soil ingestion. There are also potential exposures from surface water ingestion, soil and dust inhalation, and dermal exposure to soil, but preliminary analysis suggested that these pathways were unlikely to pose significant risks. The exposure scenarios for each of the modeled pathways are as follows:

(A) *Ground-water ingestion.* Hazardous constituents from surface protection wastes can migrate through the soil to ground water. People can be exposed to the contaminated ground water when it is used for drinking water. PCP was used as the constituent of concern for the ground-water analysis because it is more mobile through the soil column than dioxins, which tend to bind to the soil. Contamination of the upper aquifer, from which residential wells might be drawn, was modeled. Thus the potentially exposed population consists of people drinking contaminated water from residential wells located near the source of the contamination. The lower aquifer, from which community wells might be drawn, was not modeled because of the lack of site-specific information on the location of community wells near sawmill facilities.

Standard exposure assumptions used to translate the estimated constituent concentrations in ground water into health risks included ingestion of 1.4 liters of contaminated ground water per day by a 70 kg adult for an average of nine years. The excess lifetime cancer risk to an individual drinking contaminated ground water was estimated to be 5×10^{-7}. This means that an individual exposed to the contamination would have a one in 2,000,000 incremental risk of contracting cancer over his or her lifetime.

To calculate population risk, the Agency assumed that one residential well serving a family of four would be located directly downgradient of each potentially regulated facility. In addition, the population risk estimate was calculated for eight cohorts of individuals consuming contaminated water over a 70 year period. Because cancer cases were not discounted, the exact timing of the onset of cancer was not important. Under these assumptions, an estimated 17,000 individuals would be exposed to contaminants from ground water consumption. The population risk estimate also assumes that exposed individuals would be drinking contaminated ground water during the 70 years that constituent concentrations are at their highest.

(B) *Fish and shellfish ingestion.* Wastes from surface protection processes can be carried into streams and rivers located near potentially regulated sawmills through soil runoff. The Agency assumed that dioxins, which tend to bind with soil, would be present in the runoff.

Risks from fish ingestion were estimated using a five step process.

First, the Agency estimated the expected soil concentrations of dioxins that would be released through cross contamination. Second, it estimated constituent concentrations in stream sediment resulting from erosion of contaminated soils based on erosion rates for the entire drainage basin in which the sawmill is located. Third, using fish-to-sediment bioaccumulation factors, the concentrations of constituents in fish tissue were estimated. Fourth, human exposure to contaminants were estimated based on assumptions about consumption of freshwater and estuarine fish and shellfish. Finally, the carcinogenic slope factor for TCDD was multiplied by the rate of ingestion of TCDD to estimate risk of cancer from ingestion of contaminated fish.

Based on data from the Department of Agriculture 1977–1978 National Food Consumption Survey (NFCS), it was assumed that each person in the US consumes freshwater and estuarine fish and shellfish at a rate of 5.9 grams per day. It was further assumed that consumption of fish would occur for 25,550 days (70 years). The excess lifetime cancer risk from individuals eating contaminated fish was estimated to range from 9.6×10^{-11} to 4.4×10^{-9}, depending upon analytical approach. The Agency's best estimate for this pathway is 8.0×10^{-10}.

Because sawmills are located in the drainage basins that drain into the primary areas for freshwater and estuarine commercial fishing and because commercial fish landings are marketed nationally, it was assumed that the total population of the US would be exposed to contaminated fish and that 24 percent of the commercial fish and shellfish would be contaminated. (The 24 percent figure is based on the assumptions that sawmills which surface protect are located in 40 percent of the drainage basins and that 60 percent of those sawmills will be affected by the rule.) Thus, to estimate population risk, the general population risk was multiplied by the estimated population of the US (250 million).

(C) *Soil ingestion.* Direct human ingestion of contaminated soil, usually by young children, is another potential exposure route. Such exposure would most likely occur under a scenario in which the land on which the sawmill is located is converted to residential use, without significant cleanup of the contaminated soil. Again, the Agency assumed that dioxins would be present in the soil, while PCP would not. The Agency assumed that all facilities would be converted to residential use and that remediation of soil contamination would not take place prior to construction of the residential units. The excess lifetime cancer risk to children eating contaminated soil was estimated to range from 1×10^{-7} to 2×10^{-6}, depending on the analytical approach. The Agency's best estimate for this pathway is 7×10^{-7}.

In estimating population risk, it was assumed that 540 children would be exposed over a 70 year period. The derivation of this population estimate is lengthy and is discussed in the risk assessment background document for today's proposal.

b. Results

EPA estimated the expected decrease in the number of cancer cases that would result from implementation of the proposed rule for each exposure pathway. The best estimate for risks from the ingestion of fish and shellfish (0.2 cancer cases) are substantially higher than risks from ground water and soil ingestion. The results are shown in Table 1 below.

TABLE 1.—ESTIMATED INCREMENTAL CANCER CASES AVOIDED AS A RESULT OF THE PROPOSED RULE

Exposure pathway	Estimated statistical cancer cases avoided over 70 year lifetime
Ground water ingestion	0.005
Fish and shellfish ingestion (general population)	0.200
Soil ingestion	0.0004
Total	0.2054

E. Cost Effectiveness Analysis

a. Results

One measure EPA uses to determine the cost-effectiveness of its regulations is the cost per cancer case avoided. The proposed rule would lead to reduction of an estimated 0.2054 cancer cases (this is a statistical estimate and therefore does not have to be a whole number) at a total cost ranging from $2.3 to $4.5 million. Thus, the cost per cancer case avoided ranges from $10.2 to $21.8 million, using the Agency's best estimate for the fish and shellfish pathway. Alternative analytical approaches for determination of the fish and shellfish pathway result in a cost effectiveness range from $2.1 to $152.4 million. The soil ingestion and ground water pathways have a very minor impact on overall cost effectiveness.

b. Caveats

The cost-effectiveness estimate is very sensitive to the assumptions used to estimate the benefits of the proposed rule. The primary factor leading to overestimation of benefits is that the analysis assumes that *all* of the contaminants remaining in the surface protection equipment will be eliminated as a result of the proposed F033 listing. However, this is likely not to be the case because:

(i) The performance test measures PCP not dioxin, the constituent of concern in the fish and shellfish pathway. Facilities that pass the PCP test may still have small amounts of dioxin remaining in the equipment.

(ii) Facilities would not be required to dispose of the wastes from the cleaning process as F033 hazardous waste prior to the effective date of the final rule. As such, facilities can legally avoid the costs of disposing of any cleanup wastes as F033 hazardous wastes. The Agency believes, however, that facilities will choose to manage wastes from the cleaning process as Subtitle C wastes prior to the effective date of the rule, as reflected in the cost analysis. The Agency recognizes the possibility that this listing determination could, in some cases, actually expedite the contamination process, not prevent it, should facilities choose to discard wastes on-site prior to the effective date of the rule.

The results of the analysis may also underestimate the benefits of the proposed rule, and thus the cost-effectiveness. The primary factor leading to a potential underestimate is the fact that all potential exposure pathways were not included in the final benefits estimate. Exposure pathways not estimated include fish ingestion by subsistence fishers whose intake may be much higher than the general population.

XII. Regulatory Requirements

A. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 et. seq.) requires that whenever an agency publishes a notice of rulemaking, it must prepare a Regulatory Flexibility Analysis (RFA) that describes the effect of the rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). EPA has prepared such an analysis and a copy is in the public docket for this notice. A brief summary of the analysis follows.

1. Definition of Small Entity

For the purposes of this analysis, EPA has defined a small entity as a sawmill

VOL 58 ISS 79 AP 27 1993 UMI

that produces less than 100 million board feet of lumber annually. No other small organizations or governmental jurisdictions are believed to be affected by the proposed rule. The definition is designed to be consistent with the classifications used in the cost analysis and as inclusive as possible.

2. Sales Test

One way the Agency determines whether regulatory impacts are significant is to conduct a sales test. Facilities are assumed to pass this test if compliance costs are projected to be less than one percent of their annual gross sales. The compliance costs used are the same as those in the EA. Sales are estimated by multiplying the number of board feet produced by $0.20 per board foot, a low-end estimate of the price of lumber. All potentially regulated facilities pass the sales test. According to the analysis, the most adversely affected facilities would be those that own dip tanks and produce less than five million board feet per year. These facilities are estimated to incur cost impacts of approximately 0.89 percent of sales.

3. Profits Test

A second way the Agency determines whether regulatory impacts are significant is to conduct a profits test. Facilities are assumed to pass this test if compliance costs are projected to be less than 10 percent of average annual profits. Profits were assumed to be 1.8 percent of sales based on data from Robert Morris Associates, an often used source of such information.

Facilities producing over five million board feet per year pass the profits test. Those producing less than five million, approximately 400 facilities, nationwide, do not. Compliance costs could be equivalent to as much as 55% of annual profits for some of these entities.

It should be noted that in practice small businesses may not be as adversely affected as the analysis suggests because both estimates of compliance costs and sales are considered conservative. In addition, compliance costs would be incurred only in the first-year, rather than on an annual basis.

B. Paperwork Reduction Act

The information collection requirements in today's proposed rule has been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act, 44 U.S.C. 3501 et. seq. An Information Collection Request document has been prepared by EPA (ICR No. 1638.1) and a copy may be obtained from Sandy Farmer, Information Policy Branch, EPA, 401 M Street, SW., (PM–223Y), Washington, DC 20460 or by calling (202) 260–2740.

A revised public reporting burden for this collection of information is estimated to average between six and twenty-six hours per facility, including time for reviewing instructions, searching existing data sources, gathering and maintaining the required data, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM–223Y, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA."

List of Subjects

40 CFR Part 260

Administrative practice and procedure, Confidential business information, Hazardous waste, Incorporation by reference.

40 CFR Part 261

Hazardous materials, Waste treatment and disposal, Recycling.

40 CFR Part 264

Hazardous materials, Packaging and containers, Reporting requirements, Security measures, Surety bonds, Waste treatment and disposal.

40 CFR Part 265

Air pollution control, Hazardous materials, Packaging and containers, Reporting requirements, Security measures, Surety bonds, Waste treatment and disposal, Water supply.

40 CFR Part 270

Administrative practice and procedure, Confidential business information, Hazardous materials transportation, Hazardous waste, Reporting and recordkeeping requirements.

40 CFR Part 302

Air pollution control, Chemicals, Emergency Planning and Community Right-to-Know Act, Extremely hazardous substances, Hazardous chemicals, Hazardous materials, Hazardous materials transportation, Hazardous substances, Hazardous wastes, Intergovernmental relations, Natural resources, Pesticides and pests, Reporting and recordkeeping requirements, Superfund, Waste treatment and disposal, Water pollution control, Water supply.

Dated: March 31, 1993.

Carol M. Browner,

Administrator.

For the reasons set out in the preamble, it is proposed to amend title 40 of the Code of Federal Regulations as follows:

PART 260—HAZARDOUS WASTE MANAGEMENT SYSTEM: GENERAL

1. The authority citation for part 260 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921–6927, 6930, 6934, 6935, 6937, 6938, 6939, and 6974.

Subpart B—Definitions

2. Section 260.11 is amended by revising the "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods" reference of paragraph (a) to read as follows:

§ 260.11 References.

(a) • • •

"Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication SW–846 (Third Edition (November, 1986), as amended by Updates I, II and IIA). The Third Edition of SW–846 and Updates I, II, and IIA (document number 955–001–00000–1) are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

• • • • • •

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

3. The authority citation for part 261 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, 6922, 6934, and 6938.

4. In § 261.31, in the table in paragraph (a), add the F033 listing, as follows:

§ 261.31 Hazardous wastes from non-specific sources.

(a) • • •

Industry and EPA hazardous waste No.	Hazardous waste	Hazard code
•	•	•
F033	Process residuals, wastewaters that come in contact with protectant, discarded spent formulation, and protectant drippage from wood surface protection processes at operations that use surface protection chemicals having an in-process formulation concentration of pentachlorophenate [expressed as pentachlorophenol during analysis) exceeding 0.1 ppm.	(T)
•	•	•

5. Add the following entries in numerical order to appendix VII of part 261:

APPENDIX VII TO PART 261—BASIS FOR LISTING HAZARDOUS WASTE

EPA hazardous waste No.	Hazardous constituents for which listed
•	•
F033	Pentachlorophenol, 2,3,4,6-tetrachlorophenol, 2,4,6-trichlorophenol, tetra-, penta-, hexa-, heptachlorodibenzo-p-dioxins, tetra-, penta-, hexa-, heptachlorodibenzofurans.
•	•

6. Add the following hazardous constituents (with CAS Numbers) in alphabetical order, to appendix VIII of part 261:

APPENDIX VIII TO PART 261—HAZARDOUS CONSTITUENTS

Common name	Chemical abstracts name	Chemical abstracts No.	Hazardous waste No.
•	•	•	•
Octachlorodibenzofuran	Same	39001–02–0	
Octachlorodibenzo-p-dioxin	Same	3268–87–9	
Potassium pentachlorophenate	Pentachlorophenol, potassium salt	7778–73–6	
2,3,4,6-tetrachlorophenol, potassium salt	Potassium tetrachlorophenate	53535–27–6	
Sodium pentachlorophenate	Pentachlorophenol, sodium salt	131–52–2	
2,3,4,6-tetrachlorophenol, sodium salt	Sodium tetrachlorophenate	25567–55–9	
•	•	•	•

PART 264—STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE, AND DISPOSAL FACILITIES

7. The authority citation for part 264 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6924, and 6925.

8. Add subpart T to part 264 to read as follows:

Subpart T—Surface Protection Plants

Sec.

264.560 Applicability.
264.561 Formulation analysis and recordkeeping requirements.
264.562 Operating requirements.

Subpart T—Surface Protection Plants

§ 264.560 Applicability.

(a) Owners and operators of wood surface protection operations using in-process protectant formulations that contain (by design or cross-contamination) a pentachlorophenate concentration equal to or less than 0.1 ppm and who do not handle their wastes as F033 wastes are subject to § 264.561.

(b) Owners and operators of wood surface protection operations using in-process protectant formulations that contain (by design or cross-contamination) a pentachlorophenate concentration greater than 0.1 ppm are subject to § 264.562 and are required to manage their wastes in accordance with the requirements of either subpart J or subpart W of this part.

VOL 58 ISS 79 AP 27 1993 UMI

§ 264.561 Formulation analysis and recordkeeping requirements.

(a) Owners and operators must sample and test their surface protectant formulations to determine the concentration of pentachlorophenate (expressed as pentachlorophenol during analysis) contained therein, using a method found in EPA Publication SW–846. The formulation sample to be tested must be taken immediately following operation. Such testing must be conducted by a qualified analytical laboratory. If analysis shows that the concentration of pentachlorophenate in an operation's formulation is equal to or less than 0.1 ppm, the owner/operator must sign the following certification:

I certify, under penalty of law, that the surface protection formulation used by [insert name of operation] has been sampled and tested using a method found in EPA Publication SW–846 and the samples analyzed by [insert name of laboratory and address]. The results of this analysis indicated that the concentration of pentachlorophenate (expressed as pentachlorophenol during analysis) in the in-process surface protection formulation is [insert the results of the analysis]. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment.

This certification may be provided by a responsible official of the operation or by a registered, professional engineer.

(b) Owners and operators must maintain records on-site until operations cease. These records must include the following:

(1) A description of the method used for sampling and testing;

(2) Results of the analysis conducted in accordance with § 264.561(a); and

(3) A copy of the signed certification required under § 264.561(a).

§ 264.562 Operating requirements.

(a) Owners and operators must hold newly treated wood in the process area after treatment to allow excess drippage of surface protectant to cease and to allow all entrained liquids (from dipping operations) to be removed prior to transfer of the wood to the storage yard. Treated wood must not be removed from the process area until all free liquid drainage has ceased.

(b) Owners and operators of surface protection operations that store treated wood in areas unprotected from precipitation must cover the tops of the wood bundles prior to a precipitation event to prevent precipitation from mobilizing pentachlorophenol constituents into the environment.

(c) Owners and operators of surface protection operations must develop and maintain a contingency plan for immediate response to protectant drippage in the storage yard. In the event of storage yard drippage, the owner/operator must implement this contingency plan by:

(1) Cleaning up the drippage;

(2) Documenting the cleanup and retaining this documentation for three years; and

(3) Managing the contaminated media in accordance with all applicable RCRA regulations.

PART 265—INTERIM STATUS STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE, AND DISPOSAL FACILITIES

9. The authority citation for part 265 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6924, 6925, and 6935.

10. Add Subpart T to part 265 to read as follows:

Subpart T—Surface Protection Plants

Sec.
265.435 Applicability.
265.436 Formulation analysis and recordkeeping requirements.
265.437 Operating requirements.

Subpart T—Surface Protection Plants

§ 265.435 Applicability.

(a) Owners and operators of wood surface protection operations using in-process protectant formulations that contain (by design or cross-contamination) a pentachlorophenate concentration equal to or less than 0.1 ppm and who do not handle their wastes as F033 wastes are subject to § 265.436.

(b) Owners and operators of wood surface protection operations using in-process protectant formulations that contain (by design or cross-contamination) a pentachlorophenate concentration greater than 0.1 ppm are subject to § 265.437 and are required to manage their wastes in accordance with the requirements of either subpart J or subpart W of this part.

§ 265.436 Formulation analysis and recordkeeping requirements.

(a) Owners and operators must sample and test their surface protectant formulations to determine the concentration of pentachlorophenate (expressed as pentachlorophenol during analysis) contained therein, using a method found in EPA Publication SW–846. The formulation sample to be tested must be taken immediately following operation. Such testing must be conducted by a qualified analytical laboratory. If analysis shows that the concentration of pentachlorophenate in an operation's formulation is equal to or less than 0.1 ppm, the owner/operator must sign the following certification:

I certify, under penalty of law, that the surface protection formulation used by [insert name of operation] has been sampled and tested using a method found in EPA Publication SW–846 and the samples analyzed by [insert name of laboratory and address]. The results of this analysis indicated that the concentration of pentachlorophenate [expressed as pentachlorophenol during analysis] in the in-process surface protection formulation is [insert the results of the analysis]. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment.

This certification may be provided by a responsible official of the operation or by a registered, professional engineer.

(b) Owners and operators must maintain records on-site until operations cease. These records must include the following:

(1) A description of the method used for sampling and testing;

(2) Results of the analysis conducted in accordance with § 265.436(a); and

(3) A copy of the signed certification required under § 265.436(a).

§ 265.437 Operating requirements

(a) Owners and operators must hold newly treated wood in the process area after treatment to allow excess drippage of surface protectant to cease and to allow all entrained liquids (from dipping operations) to be removed prior to transfer of the wood to the storage yard. Treated wood must not be removed from the process area until all free liquid drainage has ceased.

(b) Owners and operators of surface protection operations that store treated wood in areas unprotected from precipitation must cover the tops of the wood bundles prior to a precipitation event to prevent precipitation from mobilizing pentachlorophenol constituents into the environment.

(c) Owners and operators of surface protection operations must develop and maintain a contingency plan for immediate response to protectant drippage in the storage yard. In the event of storage yard drippage, the owner/operator must implement this contingency plan by:

(1) Cleaning up the drippage;

(2) Documenting the cleanup and retaining this documentation for three years; and

(3) Managing the contaminated media in accordance with all applicable RCRA regulations.

PART 270—EPA ADMINISTERED PERMIT PROGRAMS: THE HAZARDOUS WASTE PERMIT PROGRAM

11. The authority citation for part 270 continues to read as follows:

Authority: 42 U.S.C., 6905, 6912, 6924, 6925, 6927, 6939, and 6974.

Subpart B—Permit Application

12. Section 270.6 (a) is revised to read as follows:

§ 270.6 References.

(a) When used in part 270 of this chapter, the following publications are incorporated by reference:

"Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication SW–846 [Third Edition (November, 1986), as amended by Updates I, II, and IIA]. The Third Edition of SW–846 and Updates I, II, and IIA (document number 955–001–00000–1) are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

* * * * *

PART 302—DESIGNATION, REPORTABLE QUANTITIES, AND NOTIFICATION

13. The authority citation for part 302 continues to read as follows:

Authority: 42 U.S.C. 9602, 9603, and 9604; 33 U.S.C. 1321 and 1361.

14. Section 302.4 is amended by adding an entry for F033 in Table 302.4 to read as follows. The appropriate footnotes to Table 302.4 are republished without change.

§ 302.4 Designation of hazardous substances.

* * * * *

TABLE 302.4.—LIST OF HAZARDOUS SUBSTANCES AND REPORTABLE QUANTITIES

Hazardous substance	CASRN	Regulatory synonyms	Statutory			Proposed RQ	
			RQ	Code †	RCRA waste No.	Category	Pounds (Kg)
*	*	*	*	*	*	*	*
F033 Process residuals, wastewaters that come in contact with protectant, discarded spent formulation, and protectant drippage from wood surface protection processes at operations that use surface protection chemicals having an in-process formulation concentration of pentachlorophenate [expressed as pentachlorophenol during analysis] exceeding 0.1 ppm. (T).	.....	.....	1*	4	F033	X	1(0.454)
*	*	*	*	*	*	*	*

† Indicates the statutory source as defined by 1, 2, 3, 4 or below.

[4] Indicates that the statutory source for designation of this hazardous substance under CERCLA is RCRA Section 3001.
[1]* Indicates that the 1-pound RQ is a CERCLA statutory RQ.

UMI

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Tribal Consultation on Indian Education Topics

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of Tribal Consultation Meetings.

SUMMARY: Notice is hereby given that the Bureau of Indian Affairs (BIA) will conduct consultation meetings to obtain oral and written comments concerning potential issues in Indian education programs. The potential issues which will be set forth in a tribal consultation booklet to be issued prior to the meetings are as follows:

1. Programs available for American Indian and Alaska Native students funded by the Bureau of Indian Affairs and other Federal Agencies, including school operations.
2. Tribal Consultation Dates.
3. Inclusion of Indian School Equalization Program and tribally Controlled Community College funds in Tribal Self-Governance Compacts.
4. The Indian School Equalization Program (ISEP) Formula.

DATES: July 26, 28, & 30, 1993, for all locations listed below, except, Anchorage, AK, which will be held May 27, 1993. Scheduling of an earlier date for the Alaska meeting is in response to requests of tribal participants at previous consultation meetings in Anchorage. All meetings will begin at 8 a.m. and continue until 3 p.m. (local time) on the dates scheduled. Written comments concerning the consultation meeting items must be received no later than August 23, 1993.

ADDRESSES:

Location	Local contact	Telephone
May 27, 1993		
1. Alaska, Anchorage	Robert Pringle	907/271–4115
July 26, 1993		
1. Nevada, Las Vegas	Fayetta Babby	916/978–4680
2. New Mexico, Gallup	Larry Holman	505/786–6150
3. Minnesota, Mahmomen	Betty Walker	612/373–1090
4. Oklahoma, Tulsa	Jim Baker	405/945–6051
July 28, 1993		
1. Washington, Seattle	Van Peters	503/230–5682
2. New Mexico, Albuquerque	Val Cordova	505/966–3034
3. Virginia, Arlington	Lena Mills	703/235–3233
4. South Dakota, Rapid City	Jim Davis	701/477–6471
July 30, 1993		
1. Arizona, Phoenix	Beverly Mestes	602/562–3557
2. Montana, Billings	Larry Parker	406/657–6375

Written comments should be mailed, to be received, on or before August 23, 1993, to the Bureau of Indian Affairs, Office of Indian Education Programs, MS 3512 MIB, 1849 C Street, NW., Washington, DC 20240, Attn: Dr. John Tippeconnic; or may be hand delivered to room 3512 at the same address.

FOR FURTHER INFORMATION CONTACT: John Tippeconic or Jim Martin at the above address or call 202/208–6123 or 208–3550.

SUPPLEMENTARY INFORMATION: The meetings are a followup to similar twice-a-year meetings conducted by the BIA since 1990. The purpose of the consultation, as required by 25 U.S.C. 2010(b), is to provide Indian tribes, school boards, parents, Indian organizations and other interested parties with an opportunity to comment on potential issues raised during previous consultation meetings or being considered by the BIA regarding Indian education programs. A consultation booklet for the July meetings is being distributed to Federally recognized Indian tribes, Bureau Area and Agency Offices and Bureau-funded schools. The booklets will also be available from local contact persons and at each meeting.

Dated: April 16, 1993.

Eddie F. Brown,

Assistant Secretary, Indian Affairs.

RIN 1018–AB56

Endangered and Threatened Wildlife and Plants; Endangered Status Determined for the Cave Crayfish Cambarus Aculabrum

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines the cave crayfish, *Cambarus aculabrum*, to be an endangered species under the authority of the Endangered Species Act of 1973, as amended (Act). This freshwater crayfish is currently known from two caves in Benton County, Arkansas. Groundwater pollution represents the major threat to the species. This determination implements the protection of the Act for *Cambarus aculabrum*.

EFFECTIVE DATE: May 27, 1993.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the Jackson Field Office, U.S. Fish and Wildlife Service, 6578 Dogwood View Parkway, suite A, Jackson, Mississippi 39213.

FOR FURTHER INFORMATION CONTACT: Paul Hartfield at the above address (telephone 601/965–4900).

SUPPLEMENTARY INFORMATION:

Background

Cambarus aculabrum was described from two cave streams in Benton County, Arkansas by H.H. Hobbs, Jr. and A.V. Brown (1987). It is a small, white, obligate cave-dwelling (troglobitic) crayfish with an overall body length reaching about 48 millimeters (1.8 inches). This species is distinguished from related surface species by a total lack of pigment, and by reduced eyes. It is distinguished from its closest troglobitic relatives by an acute or subacute apex of the anteromedian lobe of the epistome (mouthpart). First form males (those with fully formed and hardened first pleopods, or reproductive appendages) are further separated from the closely related troglobitic species, *Cambarus setosus* and *C. tartarus*, by the absence of a transverse groove separating the proximolateral lobe from the shaft on the fist pleopod. It differs from first form males of another closely related cave species, *C. zophanastes*, by a longer central projection of the first pleopod that also has a shallow subapical notch (Hobbs and Brown 1987). Recent studies indicate that *Camabrus aculabrum* is genetically distinct from the other cave crayfish species (Koppelman 1990).

The type locality, Logan Cave, is an Ozarkian solution channel located in the Mississippian cherty-limestone Boone Formation of the Springfield Plateau (Hobbs and Brown 1987). A stream flows through the entire length of the cave, approximately 2000 meters (m) [6000 feet(ft)]. Logan Cave also contains a lake approximately 200 m (600 ft) long, 2–6 m (6–18 ft) wide, and 2–3 m (6–9 ft) deep that was formed by the collapse of the cave roof. Water exits the cave approximately 300 m (900 ft) from the lake. *Cambarus aculabrum* is usually observed along the walls of the pool, or along the stream edges. Population numbers appear to be very small in Logan Cave. As many as six crayfish have been seen during one survey, but often none are evident (Hobbs and Brown 1987). In 14 visits to the cave, Brown observed crayfish on only three occasions (Brown *in litt.*, 1987). During a 1990 search of the cave lake and stream by Service biologists, only three *Cambarus aculabrum* were seen, one of which was dead. The U.S. Fish and Wildlife Service purchased 123.9 acres at Logan Cave, including the property that contains the cave's entrances, in 1989. The cave's recharge area covers 30.15 square kilometers (11.64 square miles), most of which is privately owned (Aley and Aley 1987).

Cambarus aculabrum is also known from Bear Hollow Cave, located approximately 38 kilometers (23 miles) from Logan Cave. Bear Hollow Cave is also a solution tunnel in the Boone Formation and contains a small stream approximately 200 m (600 ft) long and 0.2 m (8 inches) deep (Hobbs and Brown 1987). Although there is less available habitat in Bear Hollow Cave than in Logan Cave, as many as nine crayfish have been seen during a single visit (Hobbs and Brown 1987). As in Logan Cave, however, numbers of crayfish observed may vary dramatically between visits. In the Service's 1990 survey, only a single crayfish was found in the Bear Hollow Cave stream. The extent of the Bear Hollow Cave recharge area is unknown. The cave's entrance and surrounding property are privately owned.

In general, very little is known about the ecology and natural history of cave crayfish, and only limited observations have been made of this species. First form males have been collected during the months of January, February, October and December. Females carrying eggs and young *C. aculabrum* have not been observed.

On July 15, 1988, the Service was petitioned by Dr. Arthur Brown, the University of Arkansas, to list *Cambarus aculabrum* as an endangered species. A finding of insufficient information to indicate the petitioned action was warranted was published by the Service in the Federal Register (53 FR 52745) on December 28, 1988. The finding noted that at the time of the petition there were 29 caves within the Springfield Plateau that were known to harbor cave crayfish, and in only seven of these had the species of crayfish been determined. Recent cave crayfish surveys (Smith 1984, Figg and Lister 1990) and an electrophoretic investigation (Koppelman 1990) have resulted in the identification of these cave crayfish populations, and confirmed the restricted distribution of *Cambarus aculabrum*. The proposed rule to list the cave crayfish, *Cambarus aculabrum*, as an endangered species was published on May 26, 1992 (57 FR 21929).

Summary of Comments and Recommendations

In the May 26, 1992, proposed rule and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice was published in The Northwest Arkansas Times, Fayetteville, Arkansas, on June 14, 1992.

A total of 13 individuals, agencies or organizations commented on the proposed rule: 3 were opposed to the listing action; 4 were in support; 1 stated no objection to the listing; and 5 expressed no position. The Missouri Department of Conservation supported the listing, and noted that groundwater pollution is a threat to many cave organisms. The Arkansas Game and Fish Commission expressed no objection to the listing action.

Opposing comments of a similar nature or point have been grouped into several general issues. These issues and the Service's response to each are discussed below:

Issue 1: Cave waters are poliuted by bat waste, not poultry and swine waste.

Response: A large colony of bats occupy Logan Cave during the summer months. The areas where they roost are very localized within the cave. Some of the roosts are over water, some are not. Water quality may be affected locally and for a distance below a bat roost over water. However, bats and bat guano are a natural component of the cave ecosystem. Bat guano provides an energy source within a cave environment and a foundation for bacterial and fungal growth. Crayfish and other cave organisms can move within and around guano piles and exploit the organisms associated with them for food. While water quality may be locally affected by bat guano, areas of higher water quality are also available for reproduction and other essential life history functions. However, the improper disposal of animal waste can result in water degradation throughout the aquifer which may result in the mortality or impaired reproduction of cave crayfish (see Factor A, below).

Issue 2: Two commenters noted that there are currently eight swine and poultry operations within the immediate recharge area of Logan Cave, not 85 as cited in the proposed rule. They believe that operations peripheral to the recharge area should not be considered as a threat. They consider the contamination potential from poultry and swine farms within the recharge area of Logan Cave to be minimal.

Response: The proposed rule's source for the number of animal confinement areas is Aley and Aley (1987). This document considered individual buildings, not operations, that were used to confine swine or poultry as potential point sources of water contamination. Operations within the recharge area were known to have from one to 12 swine and poultry confinement areas, and a total of 85 confinement buildings were identified from 1980 aerial photographs. While these numbers have probably changed since 1980, indications are that the number of confinement areas are likely to have increased. In fact, one commenter noted that five new poultry confinement areas have been recently constructed, and five others are under construction in the vicinity.

Swine and poultry operations outside of the recharge area are not considered as point source contamination areas. However, wastes from these operations may be applied to agricultural land within the recharge area as fertilizer, and contribute to non-point source contamination.

The Service considers poultry and swine operations in the vicinity of the Logan Cave recharge area as a principal potential source for both point and non-point source groundwater contamination. However, proper waste management, which includes strict adherence to Arkansas Department of Pollution Control and Ecology regulations for the application of animal wastes, can significantly reduce the threat of contamination.

Issue 3: Subterranean habitat for the crayfish is likely to exist that is inaccessible for surveying. Therefore, the size and scope of the species' population and habitat has not been adequately assessed to warrant listing as endangered.

Response: While inaccessible subterranean habitat does occur in the vicinity of the two known populations, this habitat will be affected by the same factors impacting accessible cave habitat. The cave surveys cited in the rule, as well as more recent unpublished survey efforts by Service, State, and private agencies and individuals, support the rarity and restricted distribution of *Cambarus aculabrum*. Although the existence of an unknown population is possible, such a discovery would not offset the magnitude of the activities that threaten the species.

Issue 4: One commenter noted that a 1988 Service response to a petition to list *Cambarus aculabrum* as an endangered species found insufficient evidence to warrant listing. The commenter expressed an opinion that this was still the case.

Response: The Service's finding of insufficient evidence to list *Cambarus aculabrum* was based on a lack of information. The finding noted that at the time of the petition there were 29 caves within the Springfield Plateau that were known to harbor cave crayfish, and in only seven of these had the species of crayfish been determined. Additional survey work since the petition, however, has resulted in the identification of these unknown populations, none of which were determined to be *Cambarus aculabrum* (see Background, above). This new information supported the restricted distribution of *Cambarus aculabrum* as presented in this rule.

Issue 5: One commenter questioned the reliability of the Aley and Aley (1987) study cited in the proposed rule that delineated the Logan Cave recharge area, as well as the competence of the principal investigator, Thomas Aley.

Response: Thomas Aley has performed a number of groundwater drainage studies throughout the country and is widely recognized for his competence and professionalism.

Issue 6: The proposed rule did not document a decline of the species, or provide other proof that the cave crayfish is endangered. There is insufficient evidence that listing is warranted.

Response: While a decline in the species has not been demonstrated, the Service considers endangered status warranted for *Cambarus aculabrum* due to the existence of only two known populations and the immediacy and severity of threats facing both populations.

Issue 7: Service studies on the Ozark cavefish in Logan Cave may threaten *Cambarus aculabrum*.

Response: The Ozark cavefish study in Logan Cave was designed to minimize risk to *Cambarus aculabrum*. Fish drift traps that were used for a short period of time within the cave stream are no longer in use. Drift nets in the stream below the cave entrance are set every two weeks for a 48 hour period. These are checked every 24 hours for cave organisms. No cave crayfish have been taken in these traps.

Issue 8: Listing would result in undue economic hardship for poultry and swine producers. The economic impact of listing *Cambarus aculabrum* should be considered.

Response: The Service is required to base decisions regarding endangered or threatened status solely on biological information and is prohibited from allowing economic or nonbiological factors to affect such decisions. However, the actual extent and limits of listing effects on socioeconomic conditions are usually not as great as many people fear. For example, the Ozark cavefish is a threatened species that also occurs in the Logan Cave drainage. It is unlikely that any additional restrictions will be placed on poultry and swine producers within the recharge drainage as a result of listing *Cambarus aculabrum* that are not already enforced due to the presence of the Ozark cavefish.

Issue 9: Listing may cause rerouting of the proposed U.S. Highway 412, causing increased taxpayer expense.

Response: As noted above, economic factors may not be considered during the listing process. However, since the publication of the proposed rule, the Arkansas Highway and Transportation Department has selected an alternative route for U.S. Highway 412 that will avoid impact to Logan Cave and its recharge area.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the cave crayfish, *Cambarus aculabrum*, should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and

VOL 58 ISS 79 AP 27 1993 UMI

regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the cave crayfish, *Cambarus aculabrum*, are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

Water quality degradation represents the major threat to *Cambarus aculabrum*. Crayfish must have dissolved oxygen in the water for respiration. Severe water contamination by sewage, animal waste, gasoline, or a number of other materials results in seriously depleted oxygen concentrations and suffocation of cave crayfish. Contamination by toxic compounds, including heavy metals, many organic chemicals, and pesticides can destroy aquatic cave fauna, including crayfish. Sedimentation damages or destroys breeding habitat and invertebrates upon which crayfish feed.

The discrete recharge area of Logan Cave has been delineated (Aley and Aley 1987), and the principal point sources of water contamination within the recharge area have been identified as poultry and hog operations. Using 1980 aerial photos, Aley and Aley identified 85 hog or poultry confinement areas (buildings) adjacent to, or within the cave groundwater recharge area. Sixty-three of these pollution sources were in high to extremely high hazard areas (lands known or presumed to lie within the cave groundwater recharge area, or lands that contribute water exclusively to the cave spring). Since their study, one additional poultry operation has been constructed within a few hundred meters of the cave's sinkhole entrance, and a hog confinement area has become operational within one kilometer of the cave. The principal non-point source of water contamination identified by the Aley and Aley study (1987) was the use of liquid animal waste from the livestock operations to fertilize pasture lands in the Logan Cave recharge area. Runoff from improper applications of liquid waste, or heavy precipitation following applications, can rapidly enter the groundwater and result in oxygen depletion.

The Aley and Aley study (1987) also identified residential development as a potential source of water contamination in the Logan Cave aquifer. Although the Logan Cave recharge area is lightly populated at the present, 8 of 11 springs sampled indicated contamination by sewage. In view of the rapid population growth of Benton County, Arkansas, future residential land development represents a potential threat to Logan Cave water quality.

A well has been recently drilled in the immediate recharge area of Logan Cave for agricultural purposes. Water withdrawal through this well could affect flows in the cave during late summer low flow conditions. Exploitation of this portion of the aquifer for future agricultural expansion, commercial or residential development would significantly effect the cave stream flows and the cave crayfish.

Site selection alternatives for the Northwest Arkansas Regional Airport in Benton County include a location within the Logan Cave recharge area. Airport construction activities and airport operation would threaten this population through construction activities, siltation, fuel and oil spills, storm runoff, sewage treatment, and development of associated service industries.

Residential development is the primary threat to the Bear Hollow Cave crayfish population. Residential development may cause water quality degradation in caves due to leakage from sewage disposal systems and solid waste landfills, sedimentation, increased storm runoff, lawn fertilizers, herbicides, and pesticides. Residential growth also attracts secondary developments such as roads and gasoline stations, which contribute to water quality degradation (Aley and Aley 1987).

Bear Hollow Cave lies on the northern edge of Bella Vista Village, a large retirement development. The cave entrance is a large sinkhole at the base of a ridge, and surface runoff in the vicinity of the cave drains into the sinkhole. The hills above the cave entrance have been subdivided for residential use, but many of the lots including those adjacent to the cave have not yet been developed. Currently, the population of Bella Vista Village is approximately 9000. Sewage disposal is by septic tanks. Although current impact to the cave aquifer is not known, the potential impact is significant. Over 36,000 lots have been sold in the community, including all of the lots in the subdivisions adjacent to, or in the vicinity of, Bear Hollow Cave, and the population is expected to increase by 1000/year into the foreseeable future (Jim Medin, General Manager, Property Owners Association, Bella Vista Village, Arkansas, pers. comm., 1990).

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

The species is currently not of commercial value; however, albinistic cave species are often viewed as items of curiosity and intrigue. Bear Hollow Cave is heavily used by humans, as evidenced by a well-marked trail, extensive graffiti on the cave walls, and a large amount of litter inside the cave. The crayfish population of Bear Hollow Cave is subject to take from human curiosity and for aquarium pets. The entrances to Logan Cave have been purchased by the Service, and access is restricted.

C. Disease or Predation

Diseases are not known for cave crayfish. Predation of crayfish by the Ozark cavefish has been documented by Poulson (1961). The Ozark cavefish occurs in Logan Cave, but is not known from Bear Hollow Cave. Predation by naturally occurring predators is a normal aspect of the population dynamics of a species, and is not considered a threat to an otherwise healthy population of *Cambarus aculabrum*.

D. The Inadequacy of Existing Regulatory Mechanisms

Arkansas requires a scientific collecting permit for collecting any species, except taking for fish bait under other State regulations. Troglobitic species are further protected from possession and sale by Arkansas State law. This affords very limited protected owing to the difficulty of apprehending violators and limited resources for law enforcement. The species is not recognized or protected by any other existing Federal or State regulation.

E. Other Natural or Manmade Factors Affecting its Continued Existence

The limited distribution of *Cambarus aculabrum*, with only two known populations, leaves the species vulnerable to localized environmental degradation. Population numbers in both caves are likely to be very small. The maximum number of crayfish observed from either cave at a single sighting has been 19. Small troglobitic crayfish population size appears to result from food limitation in cave habitats (Culver 1982). Other adaptations that have been noted in cave crayfish and other troglobitic species include lower metabolic rates, increased longevity, delayed maturity and reproduction, and decreased fecundity. One cave crayfish's life span has been estimated from 37 to 176 years, and sexual maturity was reached in 35 years on average (Culver 1962). The life span and other population parameters of *Cambarus aculabrum* are unknown, but it is likely they follow those known for other cave species. These characteristics would make the populations of *Cambarus aculabrum* more vulnerable to environmental pollution, bioaccumulation of toxins, and take, and limit the species' ability to recover from, or adapt to, environmental impacts.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list the cave crayfish, *Cambarus aculabrum*, as endangered. Endangered status is appropriate because of the species' limited distribution and the vulnerability and isolation of the only two known populations. An endangered species, as defined by the Act, is threatened with extinction throughout all or a significant portion of its range. Critical habitat is not being designated for reasons discussed below.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered or threatened. The Service's regulations (50 CFR 424.12(a)) state that designation of critical habitat is not prudent when one or both of the following situations exist: (1) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of such threat to the species; or, (2) such designation of critical habitat would not be beneficial to the species. The Service finds that designation of critical habitat is not prudent for reasons discussed below.

Section 7 of the Act requires Federal agencies to consult with the Service if any action they authorize, fund or conduct is likely to jeopardize the continued existence of a listed species or result in destruction or adverse modification of critical habitat, if designated. The primary benefit of designating critical habitat lies in the protection of portions of a species' habitat that may be destroyed or adversely modified without the survival of the species being jeopardized. This crayfish, however, is only known to occur in two caves, and has never been reported from any other cave systems despite substantial surveys. With such a limited range, any activity that would destroy or adversely modify either of these caves' habitats would also jeopardize the continued existence of the species. In addition, Logan Cave is owned and protected by the Service as a part of the National Refuge System. Designation of this cave as critical habitat would not afford any additional increment of protection not already afforded by Service ownership. Bear Hollow Cave is privately owned and is easily accessed by the public. The crayfish population in this cave is extremely vulnerable to any vandalism that may occur from its designation as critical habitat. The Service believes that no appreciable benefits would accrue from critical habitat designation that are not afforded by the jeopardy standard and by the protection already afforded to Logan Cave by Service ownership. Protection will be afforded through the section 7 jeopardy standard and by prohibitions against take in section 9. Therefore, it is now prudent to designate critical habitat for *Cambarus aculabrum*.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify any designated critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

Federal involvement is expected to include the Environmental Protection Agency through the Clean Water Act's provisions for pesticide registration and waste management actions. The Corps of Engineers will include this species in project planning and operation and during the permit review process. The Federal Highway Administration will consider impacts of bridge and road construction when known habitat may be impacted. Continuing urban development within the drainage basins may involve the Farmers Home Administration and their loan programs. The Soil Conservation Service will consider the species under their farmer's assistance programs.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. In some instances, permits may be issued for a specified time to relieve undue economic hardship that would be suffered if such relief were not available. Since this species is not in trade, no permits are expected.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

50 CFR Part 17

RIN 1018–AB83

Endangered and Threatened Wildlife and Plants; Endangered or Threatened Status for Seven Central Florida Plants

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines endangered status pursuant to the Endangered Species Act of 1973 as amended (Act) for the following five plants: *Cladonia perforata* (Florida perforate cladonia), *Crotalaria avonensis* (Avon Park harebells), *Nolina brittoniana* (Britton's beargrass), *Polygala lewtonii* (Lewton's polygala), and *Polygonella myriophylla* (sandlace). The Service determines threatened status for two plants: *Clitoria fragrans* (pigeon wings) and *Eriogonum longifolium* var. *gnaphalifolium* (scrub buckwheat). All seven plants are found in Highlands and Polk Counties in central Florida; four of the species range farther to the north or east, into Hernando, Lake, Osceola, Orange, and Marion Counties. One plant occurs on a barrier island in Okaloosa County, northwest Florida. Loss of habitat, mainly to citrus groves and residential development, is the primary threat to these species. This rule extends the Act's protection and recovery provisions to these seven species.

EFFECTIVE DATE: May 27, 1993.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the Jacksonville Field Office, U.S. Fish and Wildlife Service, 3100 University Boulevard South, suite 120, Jacksonville, Florida 32216.

FOR FURTHER INFORMATION CONTACT: Michael M. Bentzien, Assistant Field Supervisor, at the above address (telephone: 904–232–2580).

SUPPLEMENTARY INFORMATION:

Background

The seven plants determined to be endangered or threatened inhabit dry upland vegetation (including scrub, high pine, or intermediate "turkey oak barrens") in central peninsular Florida; one, the lichen *Cladonia perforata*, also occurs in coastal scrub in northwestern Florida.

Scrub is "a xeromorphic shrub community dominated by a layer of evergreen, or nearly evergreen oaks * * * or Florida rosemary (*Ceratiola ericoides*), or both, with or without a pine overstory, occupying well drained, infertile, sandy soils" (Myers 1990, pp. 154–155). The usual pine species in scrub is sand pine (*Pinus clausa*). Scrub is the habitat of the Florida scrub jay (*Aphelocoma coerulescens coerulescens*), a threatened species. Scrub occurs on dune ridges along Florida's Gulf and Atlantic coasts and on older inland sand ridges. Endemic plant species (species with limited geographic distributions) occur in scrub in various parts of Florida, with the largest concentration of endemics on the southernmost high interior ridge, the Lake Wales Ridge, northwest of Lake Okeechobee. Plants endemic to the Lake Wales Ridge are concentrated in scrub dominated by Florida rosemary on sites where the sand is apparently particularly devoid of nutrients; sites with slightly better nutrient status usually have dense stands of oaks, hickory, and sand pines (Myers 1990).

The scrub ecosystem is maintained by infrequent high intensity fires, with fires occurring as often as once a decade to less than once a century in sparsely-vegetated rosemary scrub (Myers 1990).

High pine (also called sandhills vegetation) is the other major type of natural vegetation on dry uplands in central Florida. It once was a very widespread forest type in the southeastern United States from Virginia to Texas (Myers 1990, citing several authors). High pine is longleaf pine forest with an open, grassy understory of wiregrass (*Aristida stricta*) and other grasses, numerous herbs, and deciduous turkey oaks (*Quercus laevis*) or bluejack oaks (*Q. incana*) that tolerate being burned to the ground. Frequent low-intensity fires maintained the grassy understory and prevented hardwoods from becoming canopy trees. In central Florida, high pine is intermingled with scrub; and "turkey oak barrens," intermediate between the two types of vegetation, exist in Polk and Highlands Counties (Christman 1988). Most of the "barrens" that are in evidence today may represent the results of logging of longleaf pine, followed by fire suppression, which allowed turkey oaks to reach tree size, and allowed evergreen oaks to invade, but Christman considers some of the barrens to be much older.

On central Florida's Lake Wales Ridge, the great majority of high pine was converted to citrus groves many years ago. Today, scrub is being converted to groves. Urban development is also destroying large areas of upland vegetation. Of approximately 546,800 acres of xeric upland vegetation originally in Highlands and Polk Counties, only approximately 15% remains intact (S. Freidman and J. Fitzpatrick 1992).

Because scrub and high pine in central Florida have many endemic plant taxa (species, subspecies, and varieties) Muller et al. 1989), the Service has responded by listing 13 plants from this region (50 FR 45616, Nov. 1, 1985; 52 FR 2227, Jan. 21, 1987; 52 FR 42068, Nov. 2, 1987). The Service has also listed scrub animals, two lizards (52 FR 42658, Nov. 6, 1987) and the Florida scrub jay (52 FR 20715, June 3, 1987). Other plant species are candidates for listing, including: *Schizachyrium niveum* (scrub bluestem), a species whose northern range limit is imperfectly known; it has been collected as far north as Aluchua County, Florida; *Calamintha ashei* (Ashe's savory, a mint) which has an unusual distribution, occurring in central Florida and southeast Georgia; and *Panicum abscissum* (cutthroat grass) which inhabits moist seeps near scrub and high pine.

Conservation measures that are underway to conserve the central Florida upland flora include:

(1) The State of Florida's Conservation and Recreation Lands program (CARL) is buying land in Highlands and Polk Counties. A completed acquisition, the Arbuckle State Forest and Park (13,700 acres), includes excellent examples of scrub vegetation. Acquisitions in progress in Polk County include Catfish Creek (1,100 acres acquired, 5,200 remaining) and Saddle Blanket Lakes (78 acres acquired, 800 remaining); and in Highlands County, Placid Lakes (negotiations underway). In these two counties, a massive Lake Wales Ecosystems proposal now under consideration incorporates most of the intact scrub and high pine in reasonably large tracts on the Lake Wales Ridge, totalling 32,000 acres (FL Dept. Natural Resources 1992).

(2) The Nature Conservancy has acquired preserves at Tiger Creek and Lake Apthorpe. This private organization has also purchased land at other locations, is assisting State and Federal land projects, and is working on fire management and other management issues for biological preserves.

(3) The Fish and Wildlife Service has proposed to create a Lake Wales Ridge National Wildlife Refuge, totalling about 10,000 acres, for endangered species that inhabit scrub vegetation. The 12 sites that might be acquired overlap with those in State projects. A large tract at Carter Creek (Sebring Highlands subdivision), Highlands County, is tentatively a high priority for acquisition, if funds become available.

Further information on conservation of these plants is provided below, under "Available Conservation Measures".

Discussion of the Seven Species

Cladonia perforata (Florida perforate cladonia) is a conspicuous lichen, "forming large dense clusters 20–60 mm (0.8–2.5 inches) tall" (Hilsenbeck and Muller 1991). *Cladonia* and similar lichens (family Cladoniaceae) are probably the most commonly collected lichens (Evans 1952). *Cladonia subtenuis* or *Cladonia evansii* are used as miniature shrubbery in architectural models and floral arrangements. The latter species is characteristic of scrub (T. Hendrickson, pers. comm., 1992).

The branches of *Cladonia* lichens differ from those of other branched (fruticose) lichens in that the *Cladonia* branches (podetia) are developmentally derived from spore-producing structures, rather than from the vegetative body (thallus) of the fungus that makes up the basic structure of a typical lichen. For *Cladonia perforata*, the vegetative body is not in evidence, and "the podetia, which grow in intricate tufts, are pale yellowish grey, and the surface appears more or less glossy. Individual podetia are mostly 40–60 mm. (1–1.5 inches) in height and their larger axes measure 3–6 mm. in diameter" (Evans 1952, p. 326). The podetia branch dichotomously (i.e., they fork), or they form whorls (splitting into three or more branches). "Wherever a branching takes place a circular opening is formed in the axil (just above the branch), and the larger of these openings measure 1–1.5 mm (0.06 inches) in diameter" (Evans 1952). Toward the top of the plant, where the branches are smaller, the openings are smaller, too. The surfaces of the podetia are uniform. The podetial wall's interior surface, facing the central canal, consists of loosely woven hyphae (fungal strands). "This species is also one of the few lichens that produces the *para*-depside squamatic acid. Although no medicinal or other useful properties for squamatic acid are currently known, this natural product has not been studied in this regard. (Other lichen products *do* have medicinal applications). Squamatic acid is found in nature only in lichens and there only in a few species * * *" (W.L. Culberson, Duke University, *in litt.*, Nov. 1992).

Cladonia unicialis, which is very similar to *Cladonia perforata*, has podetial surfaces with more or less distinct greenish areolae, rather than appearing uniform. *Cladonia uncialis* does not have a perforation in every axil, and its podetial walls have a solid layer of cartilaginous tissue on the interior (Evans 1952). Although Evans reported *C. uncialis* from southwestern Florida, Moore (1968) did not find it in Florida.

Cladonia leporina, which is common in Florida, is very similar to *Cladonia perforata* except that it has no holes in the podetia and the podetia have red tips consisting of spore-producing tissue (apothecia). *Cladonia perforata* has larger, more regularly branched podetia, with perforations. *Cladonia perforata* is illustrated in Hale (1983, p. 18) and in Buckley and Hendrickson (1988).

Cladonia perforata was first collected by George Llano in 1945 on Santa Rosa Island, and was named by Evans (1952). Llano and Evans both stated the site was in Escambia County, but Wilhelm and Burkhalter (1990) showed that the site was really in Okaloosa County, and had been paved over sometime between 1945 and the mid 1950's, when Llano revisited the area. The lichen was not collected again until Moore (1968)

found it in Highlands County, central Florida during her massive survey of Florida lichens in which she examined nearly 6,000 specimens, most of them collected by herself from 1964 through 1967. Buckley and Hendrickson (1988) relocated the remnants of Moore's population, and searched the surrounding area, including Archbold Biological Station, whose well-mapped vegetation contains 84 "rosemary balds", small hills of excessively drained sand (Archbold soil series) occupied by Florida rosemary, an array of smaller vascular plants (many of them endemic, including *Hypericum cumulicola* and *Eryngium cuneifolium*), and often a blanket of reindeer lichens. Buckley and Hendrickson (1988) found *Cladonia perforata* on six rosemary balds, and they report that ecologist Ann Johnson found the lichen on a seventh bald. They extended the search beyond Archbold Biological Station, but could find *Cladonia perforata* only in a six square mile area south and west of the station.

Wilhelm and Burkhalter (1990) relocated the lichen near its original locality on Santa Rosa Island (Eglin Air Force Base, Okaloosa County) but could not find it elsewhere on the barrier islands in an extensive search from Gulf Shores, Alabama, to Grayton Beach, Florida (Wilhelm and Burkhalter 1990).

By 1989, *Cladonia* and similar lichens had been collected throughout Florida; both Evans and Moore had conducted a great deal of field work. The Alexander W. Evans Herbarium is now at the Smithsonian Institution. It contains the type specimen of *Cladonia perforata* and more recent collections by Barbara Moore, Ann Buckley, Theodore Hendrickson, Gerould Wilhem and James Burkhalter, and a recent voucher specimen from Eglin Air Force Base made by Lt. Col. Douglas Ripley. The Smithsonian has no specimens from localities other than those reported above, and this indirect evidence suggested that "the range and occurrences of this lichen are truly limited" (Mason E. Hale, Jr. and Sherry K. Pittam, Botany, Smithsonian Institution, *in litt.*, Dec. 1989).

Hilsenbeck and Muller (1991) with several collaborators conducted a survey for *Cladonia perforata*, searching rosemary scrub at 111 sites throughout Florida. They enlisted James Allison and Thomas Patrick (Georgia Freshwater Wetlands and Heritage Inventory) to search similar areas in southeast Georgia (15 sites in 8 counties). Separately, as part of coastal inventories for the Florida Natural Areas Inventory, Ann Johnson and collaborators searched coastal scrubs along the lower east coast of Florida (Martin, Palm Beach, and St. Lucie Counties).

Hilsenbeck and Muller assembled the existing data to show that the lichen had been found at only 12 sites (including 6 on Archbold Biological Station). Earlier estimates of up to 15 sites were mistaken. In Okaloosa County, they confirmed the two known sites on Santa Rosa Island. They found that one site had recently been destroyed in Highlands County, but failed to find any new sites. They concluded that the lichen is indeed rare, with an estimated total of at least 26,000 individuals: 17,000 on one private site, 3,000 on another private site, 4,400 on Archbold Biological Station, and only 1,300 individuals on Santa Rosa Island. The largest site with *Cladonia perforata* is protected by its private owner; neither State nor Federal acquisition of the two private sites is presently contemplated.

In addition to the sites reported by Hilsenbeck and Muller, the Lake Apthorpe Preserve in Highlands County, owned by The Nature Conservancy, has *Cladonia perforata* (G. Babb, The Nature Conservancy, pers. comm., 1991; voucher specimen by Eric Menges at Archbold Biological Station). In January 1993, a biologist with the Archbold Biological Station discovered an additional population near the coast in southeast Florida in Martin County.

Both the central and panhandle Florida habitats of *Cladonia perforata* are rich in endemic vascular plant species that are associated with Florida rosemary. Several species or pairs of closely-related species have disjunct distributions between the two areas, much like *Cladonia perforata*. They include: *Lupinus aridorum* and *L. westianus*, *Paronychia chartacea*, and *Conradina brevifolia* and *C. canescens*.

Clitoria fragrans (pigeon wings) (Fanz 1979) is a member of the pea family (Fabaceae or Leguminosae). It is one of three species of the genus occurring in the southeastern states. The others are the butterfly pea, *Clitoria mariana*, and a species escaped from cultivation, *C. ternata*.

Clitoria fragrans is an erect perennial herb, 15–50 cm (6–20 inches) tall, with one or a few stems growing from a thick horizontal root that may be more than 2 m (6 feet) long. The stems are wiry (1–2 mm or 0.04–0.08 inch thick) and somewhat zigzag. The leaves have 3 rather leathery leaflets. Leaflets of the upper leaves are linear (lower leaves somewhat wider) and are obtuse (blunt) at the tip. The leaflets of *Clitoria mariana* are wider and are acute (pointed) at the tip.

Clitoria fragrans has two types of flowers: chasmogamous (showy insect pollinated) and cleistogamous (small, lacking petals, self-pollinating). Chasmogamous flowers are usually borne in pairs. The flowers are inverted so that the anthers and stigma touch the backs of visiting insects (the only other legume genus with inverted flowers is *Centrosema*, with two species in central Florida). The corolla has one large petal, the standard petal, 3.5–4.5 cm (1.5–2 inches) long (Fanz 1977) or 4.5–5 cm long (Isely 1990), colored lilac. The keel is small and white. The common name, pigeon wings, refers to the appearance of the flower. It was suggested by McFarlin on a herbarium specimen and adopted by Fanz (1979). Flowers with petals appear from May to June, with a few petalless (cleistogamous) flowers borne as late as September. Small thought the flowers were fragrant. Fanz (1977) detected only a very faint fragrance, but noted a heavy scent of flowering saw palmettos at the locality where Small collected the plant. The seed pod is borne on a stipe (stalk) that projects from the dried calyx (Isely 1990, p. 153; Fanz 1977, pp. 696–698; Mabberley 1987, p. 131).

Clitoria fragrans is easily distinguished from *C. mariana* by its purplish, glaucous stems, non-twining habit (it is an upright herb, not a vine), narrower leaflets, smaller flowers, and long-stipitate fruits (Fanz 1977, p. 702). The flowers of *Centrosema* differ from those of *Clitoria* by having shorter calyx tubes. *Centrosema arenicola* is restricted to much the same habitats as *Clitoria fragrans*, but has a somewhat larger range.

Clitoria fragrans was described by J.K. Small (1926) from specimens he collected near Sebring, Highlands County. McFarlin applied the name *Clitoria pinetorum* to specimens he collected, but he never published the name (Fanz 1977). Small (1933, p. 722) transferred the North American species of *Clitoria* to a new genus, *Martiusia*, but Fanz (1977) returned them to *Clitoria*.

Clitoria fragrans is distributed mainly on the Lake Wales Ridge in Highlands and Polk Counties (Fanz 1977, Wunderlin et al. 1980a, Christman 1988). On the Ridge, it is protected at Arbuckle State Forest and Park, Archbold Biological Station (private), Lake Apthorpe and Tiber Creek (The Nature Conservancy), and at Saddle Blanket Lakes (State acquisition project). It is also present at several sites that may be acquired by the State and/or Fish and Wildlife Service, including Carter Creek (Sebring Highlands) and a tract south of Lake Placid. It is reported to occur at the Avon Park Air Force Range (on the Bombing Range Ridge, a separate landform from the Lake Wales Ridge) (Florida Natural Areas Inventory). It can be considered protected there. Fanz (1977) notes a collection made in Leesburg, Lake County in 1910, and a 1964 collection from Osceola County, 12 miles south of Holopaw via US 441. This site is on one of a series of low ridges with scrub vegetation in ranching country.

Clitoria fragrans occurs in scrub vegetation, turkey oak barrens, and at least at the edges of high pine (Christman and Judd 1990); it appears to have habitat preferences similar to *Eriogonum longifolium* var. *gnaphalifolium* and *Polygala lewtonii*, although its range does not extend as far north as these species. Fanz (1979) considers it a species of white sand soils, while the other two species tend to occur on yellow sand. Christman (pers. comm., 1992) considers it a species of yellow sand.

Crotalaria avonensis (Avon Park harebells) is also a member of the pea family. It was first collected by Ray Garrett of Avon Park in 1950; his specimen was assigned to *Crotalaria maritima* (=*C. rotundifolia*) by D.B. Ward in 1967. This specimen was not examined by Windler (1974) for his revision of the genus. Subsequently, K. DeLaney collected the plant in 1986 and, with R. Wunderlin, described it as a new species distinct from *Crotalaria rotundifolia*, a variable species that ranges from Virginia to Panama (DeLaney and Wunderlin 1989).

Crotalaria avonensis is a perennial herb. A vertical tap root produces flowering stems that originate as much as 10 cm (4 inches) below the surface, grow upright for only a few centimeters above the surface, and terminate in flowering racemes. The leaves are roughly 1–2 cm (0.5–1 inch) long, rounded, somewhat succulent, and coated with white or yellowish-white hairs. The racemes are both terminal and on short secondary branches opposite leaves. The flower, shaped like a typical pea flower, has a yellow corolla about 8–9 mm (0.3–0.4 inch) long. The keel petal (at the bottom of the corolla) is shorter than the wing petals (in *C. rotundifolia*, the wing petals are shorter). The seed pods are inflated, tan to gray to maroon, hairless or nearly so, 14–25 mm (.56–1.0 inch) long, and contain up to 18 seeds per pod. The pods can be nearly as long as the upright flower stalks that hold them in place. Flowering begins in mid-March and continues profusely until June. After flowering, the plants enter a vegetative phase, forming clusters of stems that give a clumped or rosette appearance. The plants are dormant from late fall or early winter until March. *Crotalaria rotundifolia* does not have a pronounced reproductive cycle, flowering most of the year (DeLaney and Wunderlin 1989).

Crotalaria avonensis is one of the most narrowly distributed of the Lake Wales Ridge endemics, currently known only from three sites, including the Saddle Blanket Lakes and Carter Creek tracts that might be protected through acquisition (K. DeLaney, *in litt.*, 1991). It typically grows in full sun on bare white sand or in association with clumps of reindeer lichens of the genus *Cladonia*, but many individuals occur in partial shade of other plants (DeLaney and Wunderlin 1989).

Scrub buckwheat is in the genus *Erigonum*, included in the Polygonaceae (jointweed family). This genus lacks the sheathing stipules (ocreae) that are typical of the family. *Eriogonum* includes about 150 species, mostly in western North America. Florida has only two species, both native to high pine: *Eriogonum tomentosum* is common throughout the northern part of the state, as far south as Highlands County. The second species, named *Eriogonum floridanum* by J.K. Small (1903), is restricted to central Florida (Small 1933, p. 445). Subsequent publications on Florida's flora have consistently adopted Small's treatment of *E. floridanum* as a full species (Kral 1983, p. 445; Ward 1979, p. 86; Wunderlin 1982, p. 169). This is a reasonable approach because *E. floridanum* is separated by hundreds of miles from the most similar taxa. However, James Reveal (1968), the expert on the genus, prefers an alternative approach. He treats the Florida plants as a variety of *Eriogonum longifolium*, a widespread, variable species that is represented east of the Mississippi by var. *harperi* (a candidate for Federal listing) in northern Alabama, Tennessee, and Kentucky (Kral 1983 and Kentucky heritage program data), and by *Eriogonum longifolium* var. *gnaphalifolium* Gandoger. Gandoger's (1906) name for the plant was based on a specimen collected near Eustis, Florida by "Hitchcock", evidently the eminent grass systematist A.S. Hitchcock. The Service accepts Reveal's taxonomic treatment in recognition of his expertise in this complex genus, while acknowledging that there are differences of opinion among botanists as to how to apply nomenclatural ranks to geographically isolated, morphologically distinguishable plant populations.

Scrub buckwheat is a perennial herb with a single stem that grows from a stout, woody root. Most of the leaves are at the base of the stem. They are 15–20 cm (6–8 inches) long, narrowly oblanceolate, entire, and green or bronze-green above, densely white-wooly beneath. Leaves on the stem are smaller and arranged alternately. The stem is erect, up to 1 m (3 feet) tall, and terminates in an open panicle. Each branch of the panicle ends in a cup-shaped involucre, with 5–8 teeth about 5 mm (0.2 inch) long. Within each involucre, 15–20 flowers form a cluster, with the stalk of each flower starting out erect, then reflexing so the flower hangs down below the involucre. Each flower is 6–8 mm (0.2–0.3 inch) long, with 6 linear sepals. The involucre and flowers are silvery, silky-pubescent. The only other species of *Eriogonum* in Florida, *E. tomentosum*, has leafy bracts in the racemes and the flowering stem has opposite leaves (Ward 1979, Wunderlin 1982). Both plants are illustrated in Rickett (1967). Because scrub buckwheat is a large, conspicuous plant that can not be mistaken for any other, its distribution is accurately known.

Scrub buckwheat "occurs in habitats intermediate between scrub and sandhills [high pine], and in turkey oak barrens from Marion County to Highlands County" (Christman 1988, p. 136). Other plants, including *Polygala lewtonii*, *Chionanthus pygmaeus*, and *Prunus geniculata*, occur in the same places. The northern range limit for scrub buckwheat is in Ocala National Forest and areas of mixed scrub and high pine south of Ocala in Marion County; suitable habitat and possibly the plant extend south into northern Sumter County. Scrub buckwheat historically occurred near Eustis in Lake County (there are no recent records), and it still occurs near Clermont in remnants of high pine with *Polygala lewtonii* and several endangered plant species. Scrub buckwheat occurs at other scattered localities, including Southwest Orange county, the northwest corner of Osceola County, and on the Lake Wales Ridge in Polk and Highlands Counties, as far south as Archbold Biological Station, south of Lake Placid. Most of the recent records for the species are from Polk and Highlands Counties, partly because intensive biological surveys of scrub vegetation have been conducted in those counties (Christman 1988; pers. comm. by K. DeLaney and E. Menges, 1991). Scrub buckwheat may once have occurred in the Tampa area, if a specimen cited by Gandoger as the type specimen of "*E. longifolium* var. *floridana*" should be assigned to this variety. An upland in southern Marion County where this species occurs

extends into Sumter County, and the plant's range may extend into Sumter, too.

Scrub buckwheat is protected in the Ocala National Forest, Lake Arbuckle State Forest and State Park, and Nature Conservancy preserves at Tiger Creek and Lake Apthorpe. Scrub buckwheat is likely to be protected at Catfish Creek and several other tracts if State or Federal land acquisition occurs as planned.

Nolina brittoniana (scrub beargrass) was collected and described by G.V. Nash (1895). H.H. Bartlett (1909) reviewed the genus in the Southeast and described the only other species of *Nolina* in Florida, *Nolina atopocarpa*, a candidate for Federal listing that occurs in the panhandle and in the peninsula from St. Augustine south to Charlotte County. The genus *Nolina* belongs to the Agavaceae (agave family), which includes century plants and yuccas. The genus is centered in southwestern North America (Mabberley 1987). The Agavaceae are often included in the Liliaceae (lily family), in the broad sense.

Nolina brittoniana is a perennial growing from a short, thick, fleshy, bulblike rootstock. The leaves are 1–2 meters long (3–6 feet) and 6–13 mm (0.2–0.5 inch) wide, forming a rosette with the youngest leaves upright and the oldest lying nearly flat on the ground. The flowering stem, usually solitary, grows at least 2 meters (6 feet) high from the rosette in April. The inflorescence is a panicle with about 6 branches; when in bloom, the branches are covered with small white six-parted flowers, making the plant very conspicuous (Kral 1983, Wunderlin et al. 1980b). Individual plants appear to usually have all male or all female flowers. The plants bear abundant seed, which is easily germinated, and the plant is not difficult to propagate (S. Wallace, Bok Tower Gardens, pers. comm., 1990). In nature, this species occurs as scattered specimens, and rarely if ever forms large colonies. *Nolina atopocarpa*, a species of dry flatwoods, may occur in the vicinity of *Nolina brittoniana*; this species has shorter leaves, greenish flowers, and asymmetric fruits (*N. brittoniana* has symmetrical fruits, triangular in cross section).

Nolina brittoniana occurs in scrub, high pine, and even occasionally in hammocks (Christman 1988). Its range is from the south end of the Lake Wales Ridge in Highlands County north to Orange County (Orlando) and northern Lake County. An apparently isolated locality was reported from Hernando County, north of Tampa.

On the Lake Wales Ridge, *Nolina brittoniana* occurs in both Highlands and Polk Counties, where it occurs in most of the tracts that are targeted for acquisition by the State or by the Fish and Wildlife Service. Northeast of Polk County, *Nolina brittoniana* occurred in the northwest corner of Osceola County and western Orange County (where it was collected in 1958). The plant probably still exists in Orange County, but remaining habitat is being destroyed very rapidly. In Lake County, *Nolina brittoniana* occurs in remnants of high pine on hills west of Lake Apopka, near Clermont. Also in Lake County, the type specimens of *Nolina brittoniana* were collected near Eustis in 1894, and the plant was collected near Tavares in 1941. Robert McCartney (pers. comm., 1990), a knowledgeable field worker, considers the northern range limit for *Nolina brittoniana* to be northern Lake County; however, to the north, a specimen was collected on "low ground" near Belleview, Marion County in 1928. Christman (1988) doubts this locality, but suitable habitat does exist in the vicinity. The plant was collected in a "much disturbed, old white sand scrub with hardwood intrusion" north of Tampa in Hernando County, in 1961. Larger scrubs in the same area have probably not been searched for rare plants.

Polygala lewtonii (Lewton's polygala) is a member of the Polygalaceae (milkwort family). It was first collected near Frostproof, Florida by F.L. Lewton in 1894, and was named by Small (1898). Further information on plants named by Small is provided in Austin 1987. The status of *Polygala lewtonii* as a distinct species was affirmed by Blake (1924) and James (1957). The genus has since been reviewed by Miller (1970) and Saulmon (1971).

Polygala lewtonii is a perennial with a taproot. Each plant produces one to several annual stems, which are spreading, upward-curving, or erect, and are often branched. The leaves are small, sessile, rather succulent, broader toward the tip, and are borne upright, tending to overlap along the stem, like shingles. The normally opening flowers are in erect, loosely flowered racemes up to 1.5 cm (0.6 inch) long. They are about 0.5 cm long and bright pink (Wunderlin et al. 1981) or "attractive purplish-red" (Ward and Godfrey 1979). Each flower is about 3.5 mm (0.14 inch) long. Two of the five sepals are enlarged and wing-like, between which the largest of the three petals forms a keel that ends in a tuft of finger-like projections (Ward and Godfrey 1979). This species is closely related to *Polygala polygama*, a widespread species that tends to form larger clumps and has a longer root, narrower leaves, and differently shaped wing sepals. *Polygala polygama* has short branches that hug the ground, bearing inconspicuous self-pollinating (cleistogamous) flowers. *Polygala lewtonii* is inferred to have similar cleistogamous flowers (James 1957 cited in Ward and Godfrey 1979), but Wunderlin et al. (1981) are not clear that they have been observed.

Polygala lewtonii occurs most frequently in habitats intermediate between high pine and scrub (turkey oak barrens), as well as in both habitats (Christman 1988, Wunderlin et al. 1981). It has been collected in Highlands, Polk Osceola, Lake, and Marion Counties. In Highlands County, it was collected at two sites near Sebring in 1945 and 1955, but was not seen again (Wunderlin et al. 1981) until recently, when it was found in turkey oak barrens northeast of Sebring (J. Fitzpatrick, Archbold Biological Station, pers. comm., 1992).

In Polk County, *Polygala lewtonii* is currently known to occur in Arbuckle State Forest and Park, the State's Catfish Creek land acquisition project (G. Babb, The Nature Conservancy, *in litt.*, 1991), The Nature Conservancy's Tiger Creek Preserve (Wunderlin et al. 1981), at a site near Davenport that was partly bulldozed in 1991, and in the Poinciana residential development (N. Bissett, *in litt.*, 1991). It also occurs at a site with the endangered Florida ziziphus (*Ziziphus celata*) (DeLaney et al. 1989).

In Osceola County, *Polygala lewtonii* was collected in 1974 at the northwest corner of the county, on a dry prairie above Lake Davenport. In Lake County, the plant has been collected in scrub four miles north of Astatula and from at least five sites in the hills between Lake Apopka and Clermont. These hills were once covered with high pine that had a significant number of scrub plant species, including the endangered *Prunus geniculata* (scrub plum), *Nolina brittoniana* (Wunderlin et al. 1981), and *Warea amplexifolia* (wide-leaf mustard) (Judd 1980). *Polygala lewtonii* was collected once near Eustis (James 1957, cited in Wunderlin et al. 1981). The plant was collected from Ocala National Forest (Marion County) in firebreaks near Juniper Springs, 1949, and apparently not again until 1991, when it was found in scrub (C. Greenberg, Univ. of FL, pers. comm., 1992).

Polygonella myriophylla, a member of the Polygonaceae (jointweed family), was first collected by J.K. Small and DeWinkler on a scrub ridge south of Frostproof, Polk County, Florida. Small (1924) described it as a new species, *Dentoceras myriophylla*. Horton (1963) combined two of Small's genera with the genus *Polygonella*, making this species *Polygonella myriophylla*. The common name of sandlace comes from Christman (1988); other possibilities are Small's jointweed (Florida Natural Areas Inventory) or woody wireweed (Wunderlin 1982).

Polygonella myriophylla is a sprawling shrub that, as G.L. Webster noted on a herbarium specimen, has the habit of the popular landscaping plant creeping juniper, *Juniperus horizontalis* (cited in Wunderlin et al. 1980c). The shrub's many branches zigzag along the ground and root at the nodes, forming low mats. The lower parts of the creeping branches have reddish-brown bark that cracks and partly separates in long, flat, interlacing strips. The short lateral branches are upright, leafy, and end in flowering racemes. *Polygonella myriophylla* has the distinctive sheathing stipules (ocreae and ocreolae) typical of the jointweed family. The leaves are needle-like, fleshy, 3–10 mm (0.1–0.4 inch) long. The small flowers have white (or pink or yellow) petal-like sepals up to 3–4 mm (0.1 inch) long. Because this shrub's appearance is so unique, information on its distribution and abundance is particularly complete and accurate.

Polygonella myriophylla is, curiously, absent from the southern tip of the Lake Wales Ridge. Its range extends from Archbold Biological Station northward along the Lake Wales Ridge to the Davenport-Poinciana area in northern Polk County. Further northeast, it occurs at one site in Osceola County and three in western Orange County where it occurs with the endangered scrub lupine *Lupinus aridorum* (Wunderlin 1984). The Orange County sites are at Vineland, a rapidly developing portion of the Orlando metropolitan area. A report of *Polygonella myriophylla* from Lake County was based on a misidentification (Wunderlin et al. 1980c, Christman 1988). Kral's (1983) distribution map places this plant in DeSoto County, based on a specimen collected by J.K. Small and J.B. DeWinkler in 1919, before Highlands County was created in 1921 (specimen cited in Wunderlin et al. 1980c).

Polygonella myriophylla occurs within scrubs that cover about 25,000 acres (Christman 1988). It is currently protected at Archbold Biological Station (where it is rare), Saddle Blanket Lakes and Catfish Creek (State acquisition projects), and Lake Apthorpe (The Nature Conservancy). It is abundant in several tracts that are proposed for acquisition by the State or the Service.

Previous Federal Action

Federal government actions on four of the seven plants began as a result of section 12 of the Endangered Species Act of 1973, which directed the Secretary of the Smithsonian Institution to prepare a report on plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94–51, was presented to the Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the report as a petition in the context of section 4(c)(2) (now section 4(b)(3)) of the Act, as amended, and of its intention to review the status of the plant taxa contained within. *Nolina brittoniana, Polygala lewtonii, and Polygonella myriphylla* were included in these documents as endangered species, and *Clitoria frangrans* as a threatened species.

On June 16, 1976, the Service published a proposal in the **Federal Register** (42 FR 24523) to determine approximately 1,700 vascular plant species to be endangered species pursuant to section 4 of the Act. This proposal included *Nolina brittoniana, Polygala lewtonii*, and *Polygonella myriophylla*. General comments on the 1976 proposal were summarized in an April 26, 1978, **Federal Register** publication (43 FR 17909). The Endangered Species Act Amendments of 1978 required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to those proposals already more than 2 years old. In the December 10, 1979, **Federal Register** (44 FR 70796), the Service published a notice of withdrawal of the June 16, 1976, proposal.

On December 15, 1980, the Service published a notice of review for plants (45 FR 82480). This notice included *Clitoria fragrans, Eriogonum longifolium* var. *gnaphalifolium* (under the name *Eriogonum floridanum*), and *Polygala lewtonii* as category 1 candidates, and *Nolina brittoniana* and *Polygonella myriophylla* as category 2 candidates. Category 1 candidates are those for which the Service currently has on file substantial information on biological vulnerability and threats to support preparation of listing proposals, while category 2 candidates are those for which data in the Service's possession indicate listing is possibly appropriate, but for which substantial data on biological vulnerability and threats are not currently known or on file to support proposed rules. On November 28, 1983, the Service published in the **Federal Register** a supplement to the notice of review (48 FR 53640); the notice changed *Eriogonum longifolium* var. *gnaphalifolium* to a category 2 species. Another updated notice of review published September 27, 1985 (50 FR 39526), changed *Polygonella myriophylla* to a category 3C species (no longer a candidate for Federal listing), based on a status survey that gave the impression that the plant was secure because it is locally abundant. Christman (*in litt.* 1987, 1988) pointed out that this was a mistake: *Polygonella myriophylla* is "much rarer, and more endangered, than several federally-listed scrub species, including *Paronychia chartacea, Chionanthus pygmaeus, Polygonella basiramia, Prunus geniculata*, for example."

On February 21, 1990 (55 FR 6184), the plant notice was again revised, assigning category 1 candidate status to all five plants that had previously been candidates, based on an abundance of new survey information. The 1990 notice assigned category 2 status to *Crotalaria avonensis* and to *Cladonia perforata*. Since then, a status survey on *Cladonia perforata* has been completed and further information on *Crotalaria avonensis* has been received from Mr. Kris Delaney, qualifying these species for category 1 status.

Based on the Service's system for ranking candidate species for listing, which has a range of 1 to 12, the listing priority number for each of the five endangered species in this rule was 2. *Clitoria fragrans* and *Eriogonum longifolium* var. *gnaphalifolium*, the two threatened species, were assigned a listing priority number of 8 and 9, respectively. A complete explanation of the Service's listing and recovery priority guidelines was published in the **Federal Register** of September 21, 1983 (48 FR 43098).

Petitions

The Service was petitioned to list the lichen *Cladonia perforata* by Ms. Ann Buckley in a letter received June 5, 1989. The Service found the action requested by the petition to be warranted, but precluded by work on other species having higher priority for listing (55 FR 31610, August 3, 1990). An administrative finding of "warranted but precluded" was repeated in October 1991, as discussed below, in connection with the Service's annual review of recycled petitions.

Section 4(b)(3)(B) of the Act, as amended in 1982, requires the Secretary to make findings on certain pending petitions within 12 months of their receipt. Section 2(b)(1) of the 1982 Amendments further requires that all

VOL
58
ISS
79
AP
27
19 93
UMI

petitions pending on October 13, 1982, be treated as having been newly submitted on that date. This was the case for *Clitoria fragrans, Nolina brittoniana, Polygala lewtonii,* and *Polygonella myriophylla* because the Service had accepted the 1975 Smithsonian report as a petition. In each October from 1983 through 1991, the Service found that the petitioned listing of these species was warranted but precluded by other listing actions of a higher priority, and that additional data on vulnerability and threats were still being gathered. Publication of a listing proposal on September 30, 1992 (57 FR 45020) constituted the final petition finding for these five species. The September 30, 1992, proposal also included *Eriogonum longifolium* var. *gnaphalifolium* and *Crotalaria avonensis,* for which no petition had been received.

Summary of Comments and Recommendations

In the September 30, 1992, proposed rule and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice which invited general public comment was published on October 18, 1992, in the Sebring News-Sun newspaper (Highlands County) and on October 20, 1992, in the Hernando Times (Hernando County), Daily Commercial (Leesburg, Lake County), Ocala Star-Banner (Marion County), Daily News (Fort Walton Beach, Okaloosa County), The Orlando Sentinel (Orange County), and the Highlander (Lake Wales, Polk County). Comments were received from a member of the Polk County Board of County Commissioners and seven individuals. All commenters supported the proposal.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that *Cladonia perforata, Crotalaria avonensis, Nolina brittoniana, Polygala lewtonii,* and *Polygonella myriophylla* should be classified as endangered species, and that *Clitoria fragrans* and *Eriogonum longifolium* var. *gnaphalifolium* should be classified as threatened species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Cladonia perforata* A.W. Evans (Florida perforate cladonia), *Clitoria fragrans* Small (pigeon wings), *Crotalaria avonensis* DeLaney & Wunderlin (Avon Park harebells), *Eriogonum longifolium* Nuttall var. *gnaphalifolium* Gandoger (=*Eriogonum floridanum* Small) (scrub buckwheat), *Nolina brittoniana* Nash (Britton's beargrass), *Polygala lewtonii* Small (Lewton's polygala), and *Polygonella myriophylla* (Small) Horton (sandlace) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

All seven plants have already suffered serious loss of habitat to agriculture (citrus groves and pastures) and residential development, and all are threatened by future development. The Lake Wales Ridge in Polk and Highlands Counties originally had 250,000 acres of xeric upland vegetation (scrub and high pine), of which 27,500 acres remain. Because the plant species endemic to scrub or high pine in central Florida had much narrower local distributions within the Ridge (each species is likely to be found in only a fraction of seemingly suitable habitat), the loss of habitat for particular species has often been more severe than the overall figures indicate.

Citrus groves are being expanded rapidly on the southern Lake Wales Ridge because the area escaped the worst effects of severe freezes during the 1980's, especially December 1989. Development of a citrus grove recently caused the destruction of one population of *Cladonia perforata,* and other significant recent losses of scrub habitat have been documented from aerial photography by scientists at Archbold Biological Station. Property taxation in most Florida counties favors agricultural land use and penalizes leaving land "idle" in native vegetation. These policies may change; Polk County already has "preservation" zoning to protect natural vegetation.

The population of the Lake Wales Ridge is increasing as retirees and other immigrants to Florida, as well as retirees from within Florida, are attracted to areas with low costs of living and the perception of few urban problems. It is anticipated that immigration into central Florida will continue. This threatens the seven plants because most of them (*Cladonia perforata* and *Polygala lewtonii* appear to be exceptions) occur in subdivisions with unimproved lots without streets or utilities. The lack of streets discouraged building; the divided ownerships of these subdivisions and the high prices for which lots were originally sold discouraged the conversion of these subdivisions to citrus. As a result, these subdivisions have unintentionally protected the native vegetation, and several may be acquired as biological preserves, despite the difficulty of purchasing land on a lot-by-lot basis. There may be little time available to begin land acquisition at the largest subdivision under consideration for acquisition, Sebring Highlands (Carter Creek), where assessments collected from landowners have built up to a large enough sum to pave the main road through the subdivision. An electric line has already been built, so with the road paved, widespread construction of houses can be anticipated.

Funding for State or Federal land acquisition to conserve central Florida plants is not yet assured. Existing land acquisition plans by the Service focus on purchasing and managing scrub rather than high pine; this leaves *Eriogonum longifolium* var. *gnaphalifolium* and *Polygala lewtonii* unprotected. The State intends to purchase high pine, but funding for land management could be limited.

The largest populations of the lichen *Cladonia perforata* are on private land; the principal landowner intends to protect the lichen, but it is necessary to be cautious about the long-term conservation of this area.

In the counties north of Highlands and Polk, the pressures of residential development are generally severe, and historic populations of plants in the Orlando (Orange County area), as well as Eustis and Clermont (Lake County) areas, are known to have disappeared.

Clitoria fragrans occurs on Avon Park Air Force Range and has been collected on a low ridge with scrub in southern Osceola County, in a region of large ranches. The plant's habitat is appropriately managed on the Air Force Range, and conservations with range conservationists with the Soil Conservation Service indicate that scrub is quite likely to remain intact on ranches. Similarly, *Eriogonum longifolium* var. *gnaphalifolium* and *Polygala lewtonii* are probably secure in Ocala National Forest, although evaluation is needed of the distribution and management of these two species in the Forest. The relative security of these two species in parts of their range is the primary reason for classifying them as threatened rather than endangered.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

There is little commercial trade in these seven plants, although *Nolina brittoniana* and *Polygonella myriophylla* are propagated and sold on a limited scale (Association of Florida Native Nurseries 1989). Commercial trade in these species should not adversely affect them, provided that nursery operators abide by State law and the Florida Native Plant Society's policy on transplanting native plants from the wild (Schwartz and Young 1992).

C. Disease or Predation

Not applicable.

D. The Inadequacy of Existing Regulatory Mechanisms

Nolina brittoniana and *Polygala lewtonii* are listed as endangered species, and *Clitoria fragrans* and *Eriogonum longifolium* var. *gnaphalifolium* are listed as threatened species under the Preservation of Native Flora of Florida law (section 581.185–187, Florida Statutes), which regulates taking, transport, and sale of plants but does not provide habitat protection. The Endangered Species Act will provide additional protection through the consultation requirements of section 7, recovery planning, and the prohibitions of section 9, which include the Act's additional penalties for taking of plants in violation of Florida law. The Florida law provides for automatic addition of federally listed plants to the State's list as endangered species.

Efforts by the Service to protect the threatened Florida scrub jay may benefit other plants and animals of the scrub. The scrub jay inhabits much of the scrub vegetation on the Lake Wales Ridge. The Endangered Species Act's prohibition against take of listed animals (section 9(a)(1)(B)) means that landowners seeking to destroy scrub habitat upon which scrub jays depend run the risk of a "taking" violation unless they obtain a section 10(a)(2) permit, which the Service can issue only if the landowner submits or participates in an acceptable conservation plan for the scrub jay.

As explained in the background section, 13 plant species from central Florida scrub and high pine habitat are already federally listed and recovery plans have been prepared (Fish and Wildlife Service 1987a, 1990). A final rule is in preparation to list a fourteenth species, the shortleaved rosemary *Conradina brevifolia.* Efforts already underway to conserve the 13 plants should benefit most of the species in this rule.

E. Other Naturol or Manmade Factors Affecting Its Continued Existence

Fire occurs in scrub vegetation at irregular intervals. For all of the plants listed in this rule, other than the lichen *Cladonia perforata,* fire is probably beneficial. For the lichen, however, fire seems to be entirely destructive. The largest populations of the lichen are in the largest existing rosemary balds, which seem to have been affected by fires at extremely long intervals; the area "supports an uneven-aged stand of sand pines, with the oldest trees approaching 100 years" (Myers 1990). At the neighboring Archbold Biological Station, *Cladonia perforata* probably benefited from many years of fire suppression, which also left the Station grounds susceptible to wildfire. Today, the Station is implementing a prescribed fire program that probably offers the best long-term chance to maintain rosemary balds with *Cladonia* lichens, but there is a real possibility that lichen populations may be harmed by fires.

Human activities, including off road vehicle use, trash dumping, and inadvertent trampling during outdoor recreation activities, threaten most of these plants. The lichen *Cladonia perforata* appears to be vulnerable to public use on Eglin Air Force Base, Santa Rosa Island.

Hurricane storm surges may wash over the lichen populations on Santa Rosa Island.

The limited geographic distribution of each of the seven species, the fragmentation of remaining habitat into small segments isolated from each other, and the small sizes of populations of some species, especially *Cladonia perforata* and *Polygala lewtonii,* exacerbate the threats faced by these species.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Crotalaria avonensis, Nolina brittoniana, Polygala lewtonii,* and *Polygonella myriophylla* as endangered species, and *Clitoria fragrans* and *Eriogonum longifolium* var. *gnaphalifolium* as threatened. Each of the species listed as endangered is likely to become extinct in a significant portion of its range within the foreseeable future, meeting the Act's requirements for listing as an endangered species. The two species listed as threatened are likely to become endangered species if effective conservation measures are not taken, meeting the Act's definition of threatened species.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not presently prudent for these species. Except for the relatively few protected sites with one or more of these species, the populations of these species are on unprotected private land where they would gain no added protection from designation of critical habitat, and where such a designation might motivate landowners to extirpate the plants. Designation of critical habitat might also attract persons wishing to collect plants for horticultural purposes, with or without the written permission of the landowner that is required by Florida law. For these reasons, it would not be prudent to determine critical habitat for the seven plant species. The State and The Nature Conservancy are working to acquire lands to conserve these plants. Many private owners of scrub habitat occupied by the threatened Florida scrub jay have been, or will be, contacted by the Service as part of its efforts to prevent take of the bird without permit (including destruction of nests or of occupied habitat). As a result, these landowners are aware of the importance of scrub habitat, if not of individual plant species. Protection of the plant species will be addressed through the recovery process and through the section 7 consultation process. For these reasons, the Service considers designation of critical habitat not to be prudent.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibition against certain activities involving listed plants are discussed, in part, below.

VOL 58 ISS 79 AP 27 1993 UMI

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

Conservation of *Eriogonum longifolium* may require ensuring that use of herbicides in forestry or road right-of-way maintenance does not jeopardize this plant. It is not clear whether restrictions on herbicide use would be necessary to protect *Clitoria fragrans*, which occurs on grazing lands. The other species appear not to occur in situations where herbicide restrictions would be warranted. Implementation of any such restrictions would involve the Environmental Protection Agency (EPA).

Cladonia perforata occurs on a Gulf barrier island that is part of Eglin Air Force Base; *Clitoria fragrans* occurs on Avon Park Air Force Range, and *Eriogonum longifolium* var. *gnaphalifolium* occurs in the Ocala National Forest. The Service is currently aware of no ongoing or pending Federal actions (except for possible EPA involvement noted above) either on these lands or elsewhere that would affect these plants.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 for endangered species, and 17.71 and 17.72 for threatened species, set forth a series of general prohibitions and exceptions that apply to all listed plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61 and 17.71, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell or offer for sale these species in interstate or foreign commerce, or to remove and reduce to possession these species from areas under Federal jurisdiction. Seeds from cultivated specimens of threatened plant species are exempt from these prohibitions provided that a statement of "cultivated origin" appears on their containers. In addition, for endangered plants, the 1988 amendments (Pub. L. 100–478) to the Act prohibit the malicious damage or destruction on Federal lands and the removal, cutting, digging up, or damaging or destroying of endangered plants in knowing violation of any State law or regulation, including State criminal trespass law. Section 4(d) of the Act allows for the provision of such protection to threatened species through regulations. This protection may apply to threatened plants once revised regulations are promulgated. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62, 17.63, and 17.72 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered and threatened species under certain circumstances.

It is anticipated that few trade permits will be sought or issued because the seven plant species are of limited horticultural interest, and only two (*Nolina brittoniana* and *Polygonella myriophylla*) may be in commerce across state lines. Requests for copies of the regulations on listed plants and inquiries regarding prohibitions and permits may be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, room 432, Arlington, Virginia 22203 (703/358–2104).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Regulations Promulgation

PART 17—[AMENDED]

Accordingly, part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, is amended as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. Amend § 17.12(h) by adding the following, in alphabetical order, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

* * * * *

(h) * * *

Species		Historic range	Status	When listed	Critical habitat	Special rules
Scientific name	Common name					
Agavaceae—Agave family:

50 CFR Part 17

RIN 1018–AB33

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for Three Puerto Rican Plants

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines *Aristida chaseae, Lyonia truncata* var. *proctorii* and *Vernonia proctorii* to be endangered species pursuant to the Endangered Species Act (Act) of 1973, as amended. These plants, including two shrubs and one grass species, are endemic to Puerto Rico, and all are restricted to the southwestern part of the island. With the exception of one site on the Cabo Rojo National Wildlife Refuge, the habitat of all three species is threatened with modification and loss due to various types of development. *Aristida chaseae* may also be affected by competition from introduced grass species. This final rule will implement the Federal protection and recovery provisions afforded by the Act for *Aristida chaseae, Lyonia truncata* var. *proctorii* and *Vernonia proctorii*.

EFFECTIVE DATE: May 27, 1993.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours, at the Caribbean Field Office, U.S. Fish and Wildlife Service, P.O. Box 491, Boquerón, Puerto Rico 00622; and at the Service's Southeast Regional Office, suite 1282, 75 Spring Street, SW., Atlanta, Georgia 30303.

FOR FURTHER INFORMATION CONTACT: Ms. Susan Silander at the Caribbean Field Office address (809/851–7297) or Mr. Dave Flemming at the Atlanta Regional Office address (404/331–3580).

SUPPLEMENTARY INFORMATION:

Background

Aristida chaseae (no common name) was discovered by Agnes Chase near Boquerón in 1913. It was known only from the type collection for many years, until it was discovered by Paul McKenzie in 1987 on the Cabo Rojo National Wildlife Refuge. This new population, which contains from 150 to 175 plants, is approximately 8 km to the south of the type locality. The species apparently has been eliminated from the type location, possibly as a result of competition from vigorous, introduced grass species (McKenzie et al. 1989; Proctor 1991).

Later in 1987, McKenzie and Dr. George Proctor located a third population on the rocky, exposed upper slopes of Cerro Mariquita in the Sierra Bermeja, a range of hills also found within the municipality of Cabo Rojo. This range of hills is the oldest geologic formation in Puerto Rico and is known for its high plant endemism. Additional localities on ridges to the west within the Sierra Bermeja were found in 1988. In these hills, it occurs at elevations between 150 and 300 meters (McKenzie et al. 1989; Proctor 1991).

Aristida chaseae is a perennial grass with densely tufted, wide-spreading culms which may reach from 50 to 60 cm in length. The leaf blades are involute, 2 to 3 mm wide and 10 to 15 mm long. The panicles are narrow and may be from 10 to 15 cm in length. The glumes are equal, 10 to 13 mm long and acuminate or awn-tipped. The lemma is approximately 12 mm long, narrowed at the summit but scarcely beaked and scaberulous of the upper half. The callus is 1 mm long and densely pilose. The awns are equal, somewhat

VOL 58 ISS 79 AP 27 1993 UMI

divergent, flat at the base, not contorted except with age and approximately 2 cm long.

Lyonia truncata var. *proctorii* was discovered in September of 1987 by Dr. George Proctor and described by Dr. Walter Judd in 1990 (Judd 1990). It is only known from the type locality, the upper slopes and summits of Cerro Mariquita (elevations of 250 to 300 m) in the Sierra Bermeja. Approximately 63 individual plants have been reported from two locations: 18 to the northwest of the summit and 45 just to the east of the summit (Proctor 1991).

Lyonia truncata var. *proctorii* is an evergreen shrub which may reach up to 2 meters in height. The leaves are alternate, elliptic to ovate, coriaceous, and from 0.9 to 4.5 cm long and 0.4 to 2.3 cm wide. The leaf margins may be toothed and the lower surface is sparsely to moderately lepidote and moderately to densely pubescent. The inflorescences are fasciculate with from 2 to 15 flowers. Pedicels are from 2 to 5 mm in length and sparsely pubescent. Flowers are small (0.7 to 1.6 mm in length), white, and urn-shaped. The fruit is a dry capsule, 3 to 4.5 mm in length and 2.5 to 4 mm in width, sparsely pubescent, and contain seeds approximately 2.5 mm in length.

Vernonia proctorii was discovered in September of 1987 by Dr. George Proctor, Dr. Horst Haneke and Paul McKenzie. It is known to occur only on the summit of Cerro Mariquita in the Sierra Bermeja of southwestern Puerto Rico at elevations between 270 and 300 meters. Plants are scattered throughout a scrub woodland which covers several acres. The population has been estimated at approximately 950 individual plants at this one known location (Proctor 1991).

Vernonia proctorii is a small erect shrub which may reach a height of 1.5 meters. The stems and trunk are densely pubescent with silvery uniseriate hairs and with a knobby appearance due to the persistent petiole bases. Leaves are alternate, ovate to orbicular, subsessile or with the petioles appressed to the stem, and from 1.5 to 3.5 cm long and 1.0 to 2.6 cm wide. The upper blade surface is green to olive-green and moderately strigose with scattered glistening globular trichomes. The lower surface is grayish-green, sometimes becoming rusty with age, and densely sericeous. The leaf margins are densely ciliate with silvery hairs. Flowers are borne in terminal clusters of 2 to 5 heads, each approximately 3 mm in length, and bright purple in color. Achenes are from 2 to 3 mm long and sericeous with silvery hairs.

Aristida chaseae, *Lyonia truncata* var. *proctorii* and *Vernonia proctorii* were recommended for listing by Dr. George Proctor during a September 1988 meeting concerning the revision of the candidate plant species list in Puerto Rico and the U.S. Virgin Islands. They were subsequently included as category 1 species (species for which the Service has substantial information supporting the appropriateness of proposing to list them as endangered or threatened) in the notice of review for plants published February 21, 1990 (55 FR 6184). A proposal to list the three species as endangered was published in the **Federal Register** of September 3, 1992 (57 FR 40429).

Summary of Comments and Recommendations

In the September 3, 1992, proposed rule and associated notifications, all interested parties were requested to submit factual reports of information that might contribute to the development of a final rule. Appropriate agencies of the Commonwealth of Puerto Rico, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice inviting general comment was published in the San Juan Star on September 20, 1992, and in El Día on October 2, 1992. Nine letters of comment were received and are discussed below. A public hearing was neither requested nor held.

The Cabo Rojo National Wildlife Refuge, Fish and Wildlife Service, supported the listing of the three species. The Refuge biologist indicated that *Aristida chaseae*, found on the Refuge, was apparently suffering from the effects of competition from exotic vegetation.

Four letters were received from different areas within the Puerto Rico Department of Natural Resources that supported the listing of the three species. The Forest Service area of the Department expressed interest in the propagation of the species. Two letters originating from the Research area recommended that *Aristida chaseae* and *Lyonia truncata* var. *proctorii* be listed as threatened rather than endangered. The Department's primary response, however, emphasized the threat to the species' habitat, stating that the high scenic value of the area would attract developers and that current zoning regulations did not provide strong protection to the range of hills. The Service believes that development is a significant threat and that considering the highly restricted distribution of these species, a classification of endangered is more appropriate than threatened.

The Department of Biology of the University of Puerto Rico, Mayaguez Campus, supported the listing of the three species, emphasizing the threat that development poses to the Sierra Bermeja. Both the "Servicios Cientificos y Tecnicos" of Puerto Rico (Scientific and Technical Services), in two letters, and The Conservation Agency in Rhode Island provided letters of support for the listing of the species as endangered. The latter also recommended the designation of critical habitat. The Service's reasons for not designating critical habitat are discussed in detail under a subsequent section of this rule.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that these species should be classified as endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be endangered or threatened due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Aristida chaseae* Hitchcock, *Lyonia truncata* Urban var. *proctorii* Judd, and *Vernonia proctorii* Urbatsch are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

All three species are found on privately owned land currently subject to intense pressure for agricultural, rural and tourist development. The land is currently being cleared for grazing by cattle and goats. Adjacent land is being subdivided for sale in small farms, some destined for tourist and urban developments. Only *Aristida chaseae* occurs outside of the Sierra Bermeja, on the nearby Cabo Rojo National Wildlife Refuge, where the population occurs within and along a little used roadway.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Taking for these purposes has not been a documented factor in the decline of these species.

C. Disease or Predation

Disease and predation have not been documented as factors in the decline of these species.

D. The Inadequacy of Existing Regulatory Mechanisms

The Commonwealth of Puerto Rico has adopted a regulation that recognizes and provides protection for certain Commonwealth listed species. However, *Aristida chaseae*, *Lyonia truncata* var. *proctorii* and *Vernonia proctorii* are not yet on the Commonwealth list. Federal listing would provide immediate protection and, if the species are ultimately placed on the Commonwealth list, enhance their protection and possibilities for funding needed research.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

One of the most important factors affecting the continued survival of these species is their limited distribution. Because so few individuals are known to occur in a limited area, the risk of extinction is extremely high. Wildfires are a frequent occurrence in this extremely dry portion of southwestern Puerto Rico. McKenzie et al. (1989) indicate that *Aristida chaseae* may have once extended throughout sandy coastal areas and rocky hillsides in southwestern Puerto Rico, but that competition from vigorous, introduced grasses such as *Brachiaria subquadripara* may have eliminated the species from the majority of this area.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Aristida chaseae*, *Lyonia truncata* var. *proctorii* and *Vernonia proctorii* as endangered. *Lyonia truncata* var. *proctorii* and *Vernonia proctorii* are known to occur only on the upper slopes and ridges of the Sierra Bermeja. *Aristida chaseae* is currently known from only two areas. Deforestation for rural, agricultural, and tourist development are imminent threats to the survival of the species. *Aristida chaseae* appears to be threatened also by competition from introduced grasses. Therefore, endangered rather than threatened status seems an accurate assessment of the species' condition. The reasons for not proposing critical habitat for these species are discussed below in the "Critical Habitat" section.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time the species is proposed to be endangered or threatened. The Service's regulations (50 CFR 424.12(a)) state that designation of critical habitat is not prudent when one or both of the following situations exist: (1) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of such threat to the species, or (2) such designation of critical habitat would not be beneficial to the species.

The Service finds that designation of critical habitat is not prudent for these species. The number of individuals of *Aristida chaseae*, *Lyonia truncata* var. *proctorii* and *Vernonia proctorii* is sufficiently small that vandalism and collection could seriously affect the survival of the species. Taking is an activity that is difficult to control, and it is only regulated by the Act with respect to endangered plants in cases of (1) removal and reduction to possession of these plants from lands under Federal jurisdiction, or their malicious damage or destruction on such lands; and (2) removal, cutting, digging up, or damaging or destroying these plants in knowing violation of any State law or regulation, including State criminal trespass law. Publication of critical habitat descriptions and maps in the **Federal Register** would only increase the likelihood of such activities and would not provide offsetting benefits. No Federal involvement outside of the Cabo Rojo National Wildlife Refuge is known or anticipated at this time. The Service believes that any future Federal involvement in the areas where these plants occur can be identified without the designation of critical habitat. All involved parties and landowners have been notified of the location and importance of protecting these species' habitat. Protection of these species' habitat will also be addressed through the recovery process and through the section 7 jeopardy standard.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, Commonwealth, and private agencies, groups and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the Commonwealth, and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. No critical habitat is being proposed for these three species, as discussed above. Federal involvement is anticipated only for the population of *Aristida chaseae* located on the Cabo Rojo National Wildlife Refuge.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general prohibitions and exceptions that apply to all endangered plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export any endangered plant, transport it in interstate or foreign commerce in the course of commercial activity, sell or offer it for sale in interstate or foreign commerce, or remove it from areas under Federal jurisdiction and reduce it to possession. In addition, for endangered plants, the 1988 amendments (Pub. L. 100–478) to the Act prohibit the malicious damage or destruction on Federal lands and the removal, cutting, digging up, or damaging or destroying of endangered plants in knowing violation of any Commonwealth law or regulation, including Commonwealth criminal trespass law. Certain exceptions can apply to agents of the Service and Commonwealth conservation agencies.

The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. It is anticipated that few trade permits for these three species will ever be sought or issued, since the species are not known to be in cultivation and are uncommon in the wild. Requests for

VOL 58 ISS 79 AP 27 1993 UMI

copies of the regulations on listed plants and inquiries regarding prohibitions and permits should be addressed to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, room 432, Arlington, Virginia 22203 (703/358–2104).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for the Duskytail Darter, Palezone Shiner and Pygmy Madtom

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The U.S. Fish and Wildlife Service determines endangered status for three fishes—the duskytail darter (*Etheostoma* (*Catonotus*) sp.), palezone shiner (*Notropis* sp., cf. *procne*), and pygmy madtom (*Noturus stanauli*)—under the Endangered Species Act of 1973, as amended (Act). The duskytail darter is presently known to inhabit only five short stream reaches—the Little River, Blount County, Tennessee; Citico Creek, Monroe County, Tennessee; Big South Fork Cumberland River, Scott County, Tennessee; and Copper Creek and Clinch River, Scott County, Virginia. Two other historic duskytail darter populations are extirpated. The palezone shiner is presently known from only two stream

reaches—the Paint Rock River, Jackson County, Alabama, and the Little South Fork Cumberland River, Wayne and McCreary Counties, Kentucky. Two other historic palezone shiner populations are extirpated. The pygmy madtom has been collected from only two short river reaches—the Duck River, Humphreys County, Tennessee, and the Clinch River, Hancock County, Tennessee. The madtom may no longer exist in the Duck River. All three fishes presently coexist with other federally listed species in all stream reaches, except the Duck River. All these fishes and their habitats are impacted by deteriorated water quality, primarily resulting from poor land use practices. The limited distribution of these fishes also makes them very vulnerable to toxic chemical spills.

EFFECTIVE DATE: May 27, 1993.

ADDRESSES: The complete file of this rule is available for inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Asheville Field Office, 330 Ridgefield Court, Asheville, North Carolina 28806.

FOR FURTHER INFORMATION CONTACT: Mr. Richard G. Biggins at the above address (704/665–1195, Ext. 228).

SUPPLEMENTARY INFORMATION:

Background

The duskytail darter (*Etheostoma* (*Catonotus*) sp.) is being scientifically described by Robert Jenkins (Roanoke College, *in litt.*, 1992).This small (2-inch) fish, which coexists with other federally listed species in all stream reaches it inhabits, is straw to olivaceous in color. It inhabits rocky areas in gently flowing shallow pools and eddy areas of large creeks and moderately large rivers in the Tennessee and Cumberland River systems (Starnes and Etnier 1980; Burkhead and Jenkins, in press; Layman, in press; Clyde Voigtlander, Tennessee Valley Authority, *in litt.*, 1991). Historically, the duskytail was likely more widespread. However, it presently has a very fragmented distribution (Etnier and Starnes, in press; Jenkins and Burkhead, in press). The Tennessee Wildlife Resources Agency and the Tennessee Heritage Program of the Tennessee Department of Environment and Conservation recognize this fish as a threatened species (Starnes and Etnier 1980). The species is recognized as an endangered species by the Virginia Department of Game and Inland Fisheries (Sue Bruenderman, Virginia Department of Game and Inland Fisheries, *in litt.*, 1992).

Although the fish fauna of the Tennessee and Cumberland River systems has been extensively surveyed, the duskytail has been collected from only seven short river reaches—Little River, Blount County, Tennessee; Citico Creek, Monroe County, Tennessee; Big South Fork Cumberland River, Scott County, Tennessee; Abrams Creek, Blount County, Tennessee; South Fork Holston River, Sullivan County, Tennessee; and Copper Creek and Clinch River, Scott County, Virginia. The duskytail is apparently extirpated from Abrams Creek and South Fork Holston River, as it has not been found in either area in recent years (Jenkins and Burkhead, in press).

The Little River population inhabits about 9 river miles (Layman, in press). Layman (in press) stated that the duskytail in the lower reaches of the Little River was undoubtedly lost when the area was impounded. This population is potentially threatened by water withdrawal and increasing residential and commercial development in the watershed (Clyde Voigtlander, *in litt.*, 1991).

The duskytail exists downstream of U.S. Forest Service lands in about 0.5 river mile of Citico Creek (Peggy Shute, Tennessee Valley Authority, personal communication, 1991). Although the majority of the Citico Creek watershed is controlled by the Forest Service, much of the populated reach is privately owned, and stream-side habitat destruction has been observed in the area (Clyde Voigtlander, *in litt.*, 1991).

The duskytail inhabits about 17 river miles of Copper Creek. Although the duskytail is characterized as generally rare or uncommon in Copper Creek (Burkhead and Jenkins, in press), this creek may support the largest population of the fish (Clyde Voigtlander, *in litt.*, 1991). According to the Virginia Department of Game and Inland Fisheries (Bud Bristow, *in litt.*, 1991), this population is threatened by siltation, riparian erosion, and agricultural pollution. Jenkins (Roanoke College, *in litt.*, 1992) stated that, during three visits to Copper Creek in 1992, the fish was very rare at sites where the largest numbers were found in the early 1970s. He further stated, "This doesn't look good for the species or Copper Creek."

One duskytail specimen was collected from the Clinch River in 1980, about 1 river mile below the mouth of Copper Creek (Burkhead and Jenkins, in press). This area has been well sampled since 1980, but not additional specimens have been encountered. This one fish may represent periodic downstream movement from Copper Creek, and a viable dusktail population may not exist in the Clinch River.

Duskytail darters have been taken from only one site on the Big South Fork of the Cumberland River. Although other collections have been made in the Big South Fork, no other populations have been found (Jack Collier, National Park Service, personal communication, 1990; Melvin Warren, Southern Illinois University, personal communication, 1990). This population, although within the Big South Fork National Recreational Area (BSFRA), is potentially threatened by runoff from coal mines in the upper watershed above the BSFRA (Jack Collier, personal communication, 1990).

The duskytail darter populations are threatened by the general deterioration of water quality resulting from siltation and other pollutants from poor land use practices, coal mining, and waste discharges. Etnier and Starnes (in press) stated that this darter "* * * and other darters dependent upon silt-free, rocky pools in large streams and rivers, such as the ashy darter, have apparently suffered more from the effects of siltation than have darters typical of swift riffles."

The palezone shiner (*Notropis* sp., cf. *procne*) is being scientifically described by Melvin Warren (personal communication, 1990). This small (2-inch), slender fish, which coexists with other federally listed species in all stream reaches it inhabits, has a translucent and straw-colored body with a dark midlateral stripe. It occurs in large creeks and small rivers in the Tennessee and Cumberland River systems and inhabits flowing pools and runs with sand, gravel, and bedrock substrates (Warren and Burr 1990).

The fish is listed by the Kentucky State Nature Preserves Commission (Kentucky State Nature Preserves Commission 1991) as an endangered species. In Alabama, the species is considered threatened (Pierson 1990). Although the species is believed to be extirpated from Tennessee, the Tennessee Wildlife Resources Agency and the Tennessee Heritage Program of the Tennessee Department of Environment and Conservation recognize this fish as a species in need of management (Starnes and Etnier 1980).

Although numerous and extensive fish collections have been made in the Tennessee and Cumberland River systems, the palezone shiner has been taken from only four rivers—the Paint Rock River, Jackson County, Alabama; the Little South Fork Cumberland River, Wayne and McCreary Counties, Kentucky; Marrowbone Creek,

VOL 58 ISS 79 AP 27 1993 UMI

Cumberland County, Kentucky; and Cove Creek, Clinch River drainage, Campbell County, Tennessee (Starnes and Etnier 1980; Warren and Burr 1990; Richard Hannan, Kentucky State Nature Preserves Commission, *in litt.*, 1990). Based on the results of a recent status survey (Warren and Burr 1990), only two palezone populations remain. No palezone shiners were found in either Marrowbone or Cove Creek. However, the fish still exists in about 3 river miles of the Paint Rock River and in about 30 river miles of the Little South Fork Cumberland River.

The palezone shiner's distribution has apparently been reduced by such factors as impoundments and the general deterioration of water quality from siltation and other pollutants contributed by coal mining, poor land use practices, and waste discharges. Richard Hannan (*in litt.*, 1990) stated that the palezone possibly inhabited the main stem of the Cumberland River in Kentucky prior to impoundment. Warren and Burr (1990) reported that diversity and density of the benthic fish community in the Little South Fork of the Cumberland River has been severely reduced. Anderson (1989) found that nearly all freshwater mussels in the lower third of the South Fork were eliminated in the 1980s; he attributed the loss to toxic runoff from surface coal mines. Warren and Burr (1990) stated, "The limited distribution of the species in the Paint Rock River definitely appears correlated with increasing agriculture and associated increase in stream siltation * * *" Clyde Voigtlander (*in litt.*, 1992) stated that the Tennessee Valley Authority (TVA) had identified that the Paint Rock River palezone shiner population was in the timber-sourcing area for three proposed wood-chip mills. He further stated, "Subsequent analysis of potential effects of large-scale timber harvesting (clear-cutting) led us (TVA) to conclude that the palezone shiner would likely experience population-level effects, i.e., effects on individuals and populations of the species, but not the species as a whole."

The pygmy madtom (*Noturus stanauli*) was described by Etnier and Jenkins (1980). This species, which is known from two populations separated by about 600 river miles, was once likely more widespread (O'Bara 1991). However, like some other catfish in the genus *Noturus*, the pygmy madtom is presently rare and has a fragmented distribution (Etnier and Jenkins 1980). The pygmy madtom is the smallest (maximum length 1.5 inches) of the known madtoms (Etnier and Jenkins 1980). It has a very distinctive pigmentation pattern; it is very dark above the body midline and light below. The species is found in moderate to large rivers on shallow pea-size gravel shoals with moderate to strong current. The Tennessee Wildlife Resources Agency and the Tennessee Heritage Program of the Tennessee Department of Environment and Conservation recognize this fish as a threatened species (Starnes and Etnier 1980).

The fish fauna of the Tennessee River valley has been extensively surveyed (O'Bara 1991); however, the pygmy madtom has been collected from only two short river reaches. It has been taken from the Duck River, Humphreys County, Tennessee, and from the Clinch River, Hancock County, Tennessee. Based on the results of recent surveys (O'Bara 1991), the fish still exists in the Clinch River, and it is possibly extirpated from the Duck River. Five specimens were taken at one of the two known historic sites in the Clinch River by O'Bara (1991) in the fall of 1990. O'Bara (1991) did not find the species in the Duck River during his 1990 survey and reported that the species had not been taken from the Duck River since 1974.

Etnier and Jenkins (1980), in their description of this species, report that it has been taken in only about one-half of the collections made at the Clinch River sites and only about one-fourth of the collections at the Duck River site. Thus, although the species has not been taken in recent years in the Duck River, it may still survive there.

The pygmy madtom, which coexists with other federally listed species in the Clinch River, is threatened by the general deterioration of water quality from siltation and other pollutants associated with poor land use practices and waste discharges. The section of the Duck where the species has historically been taken is being seriously threatened by stream-bank erosion. The aquatic resources of the Clinch River are potentially threatened by increased urbanization, coal mining, and poorly managed agricultural practices. Because the pygmy madtom may exit in only one short river reach, this population could easily be lost from a single toxic chemical spill.

In the Service's notice of review for animal candidate species, published in the Federal Register of January 6, 1989 (56 FR 58840), September 18, 1985 (50 FR 37958), and December 30, 1982 (47 FR 58454), the palezone shiner and pygmy madtom were indicated to be category 2 candidates. A category 2 species is one that is being considered for possible addition to the Federal lists of endangered and threatened wildlife and plants, but for which conclusive data on biological vulnerability and threat are not currently available to support a proposed rule. During October and November of 1990, the Service mailed 138 notification letters to potentially affected government agencies and interested individuals requesting comments regarding the possible listing of these three fishes. None of the commenters expressed opposition, and some provided additional information on the species' status and distribution. In early 1991, based on all available information, the Service concluded that each of these fishes qualified as a category 1 species, with the palezone shiner and pygmy madtom being assigned a listing priority of 2, and the duskytail darter a priority of 5 (see Federal Register of September 21, 1983 (48 FR 43098) for a discussion of the Service's listing priority guidelines). All three species were proposed for listing as endangered in the Federal Register of July 8, 1992 (57 FR 30191).

Summary of Comments and Recommendations

In the July 8, 1992, proposed rule and associated notifications, all interested parties were requested to submit factual reports and information that might contribute to the development of a final rule. Appropriate Federal and State agencies, county governments, scientific organizations, and interested parties were contacted by letter dated July 14, 1992, and requested to comment. Legal notices were published in the following newspapers: News-Democrat, Waverly, Tennessee, July 24, 1992; Huntsville Times-News, Huntsville, Alabama, July 24, 1992; Kingsport Times-News, Kingsport, Tennessee, July 26, 1992; McCreary Record, Whitley, Kentucky, July 28, 1992; and The Morning Daily Times, Maryville, Tennessee, July 28, 1992.

Five written comments were received. Four were from various government agencies (Tennessee Valley Authority, Virginia Department of Game and Inland Fisheries, Kentucky State Nature Preserves Commission, and Tennessee Wildlife Resources Agency), and one was from an individual. None expressed opposition to the proposed rule. All additional pertinent information provided by these commenters has been incorporated into the final rule.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the duskytail darter, palezone shiner and pygmy madtom should be classified as endangered species. Procedures found a section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be endangered or threatened due to one or more of the five factors described in section 4(a)(1). These factors and their application to the duskytail darter (*Etheostoma* (*Catonotus*) sp.), palezone shiner (*Notropis* sp., cf. *procne*), and the pygmy madtom (*Noturus stanauli*) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

The Tennessee and Cumberland Rivers previously supported one of the world's richest assemblages of temperate freshwater river fishes (Starnes and Etnier 1986), but these rivers are now two of our most severely altered river systems. Most of the main stem of both rivers and many of the tributaries are impounded (over 2,300 river miles, or about 20 percent, of the Tennessee River and its tributaries with drainage areas of 25 square miles or greater are impounded (Tennessee Valley Authority 1971)). In addition to the loss of riverine habitat within impoundments, most impoundments also seriously alter downstream aquatic habitat.

Coal mining-related siltation and associated toxic runoff have adversely impacted many stream reaches. Numerous streams have experienced fish kills from toxic chemical spills, and poor land use practices have fouled many waters with silt. The runoff from large urban areas has degraded water and substrate quality. Because of the extent of habitat destruction, the aquatic faunal diversity in many of the basins' rivers has declined significantly. Many species that once existed throughout major portions of these basins now exist only as isolated remnant populations (Neves and Angermeier 1990). Because of this destruction of riverine habitat, 8 fishes and 24 mussels in the Tennessee and Cumberland River basins have already required Endangered Species Act protection, and numerous other aquatic species in these two basins are currently considered candidates for Federal listing.

The fish fauna of the Tennessee and Cumberland River systems have been extensively surveyed (Ronald Cicerello, Kentucky State Nature Preserves Commission; David Etnier, University of Tennessee; Robert Jenkins, Roanoke College; Christopher O'Bara, Tennessee Technological University; Charles Saylor, Tennessee Valley Authority; Melvin Warren and Brooks Burr, Southern Illinois University; personal communications, 1990). Yet, only a few isolated populations of the duskytail darter, palezone shiner, and pygmy madtom remain (see "Background" section for a discussion of the current and historic distribution of and threats to the remaining populations). These fishes have been and are presently adversely impacted by the factors described above. Unless steps are taken to protect these fishes, the number and size of their populations are expected to decline.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

The specific areas inhabited by these fishes are presently unknown to the general public. As a result, their overutilization has not been a problem. However, vandalism could pose a problem, especially if the specific inhabited reaches were to be revealed, such as through the designation of critical habitat. Most of the stream reaches inhabited by these fishes are extremely short and could easily be lost through the act of vandals using readily available toxic chemicals. Although scientific collecting is not presently identified as a threat, take by private and institutional collectors could pose a threat if left unregulated. Federal protection of these species will help to minimize illegal or inappropriate take.

C. Disease or Predation

Although these fishes are undoubtedly consumed by predators, there is no evidence that predation is a threat to them.

D. The Inadequacy of Existing Regulatory Mechanisms

States within these species' ranges prohibit the taking of fishes and wildlife for scientific purposes without a State collecting permit. However, the species are generally not protected from other threats. Federal listing will provide additional protection for the species under the Endangered Species Act by requiring Federal permits to take the species and by requiring Federal agencies to consult with the Service when projects they fund, authorize, or carry out may adversely affect the species.

E. Other Natural or Manmade Factors Affecting Its Continued Existence

Because the existing duskytail darter, palezone shiner, and pygmy madtom populations inhabit short river reaches, they are vulnerable to extirpation from accidental toxic chemical spills. As the populated stream reaches of all three fish species are isolated from each other by impoundments, recolonization of any extirpated population would not be possible without human intervention. The absence of natural gene flow among populations of these fishes leaves the long-term genetic viability of these isolated populations in question.

Additionally, several madtom species have, for still unexplained reasons, been extirpated from portions of their range. Etnier and Jenkins (1980) speculated that this may "* * * in addition to visible habitat degradation, be related to their being unable to cope with olfactory 'noise' being added to riverine ecosystems in the form of a wide variety of complex organic chemicals that may occur only in trace amounts." If madtoms are adversely impacted by increased concentrations of complex organic chemicals, an increase in these materials could be a problem for the pygmy madtom.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these three fishes in determining to make this rule final. Based on this evaluation, the preferred action is to list the duskytail darter (*Etheostoma* (*Catonotus*) sp.), palezone shiner (*Notropis* sp., cf. *procne*), and pygmy madtom (*Noturus stanauli*) as endangered. Presently, the duskytail darter inhabits only five short stream reaches, the palezone shiner is known from only two stream reaches, and the pygmy madtom possibly occurs in only one short stream reach. All three fishes and their habitat have been and continue to be impacted by water quality deterioration resulting from poor land use practices and by water pollution. The limited distribution of these fishes also makes them vulnerable to toxic chemical spills. Because of the restricted nature of these populations and their vulnerability, endangered status appears to be the most appropriate classification for the species. (See **Critical Habitat** section for a discussion of why critical habitat is not being designated for these fishes.)

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered or threatened. Section 7(a)(2) of the Act, and regulations codified at 50 CFR part 402, require Federal agencies to insure, in

VOL
58
ISS
79
AP
27
19 93
UMI

consultation with and with the assistance of the Service, that activities they authorize, fund or conduct are not likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of critical habitat, if designated. The Service's regulations (50 CFR 424.12(a)(1)) state that designation of critical habitat is not prudent when one or both of the following situations exist: (1) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of such threat to the species; or (2) such designation of critical habitat would not be beneficial to the species. Such a determination would result in no known benefit to these three species.

As part of the development of this final rule, Federal and State agencies were notified of these fishes' distributions, and they were requested to provide data on proposed Federal actions that might adversely affect the species. Should any future project be proposed in areas inhabited by these fishes, the involved Federal agency will already have the distributional data needed to determine if the species may be impacted by their action. Each of these species occupies a very limited range, and any adverse modification of any inhabited river reach would likely jeopardize the species' continued existence. Therefore, habitat protection for these species can be accomplished through the section 7 jeopardy standard and the section 9 prohibitions against take. Thus, no additional benefits would accrue from critical habitat designation that would not also accrue from the listing of these species.

In addition, as these species are very rare, with populations restricted to extremely short stream reaches, unregulated taking for any purpose could threaten their continued existence. The publication of critical habitat maps in the **Federal Register** and local newspapers, and other publicity accompanying critical habitat designation, could increase the collection threat and increase the potential for vandalism, especially during the often controversial critical habitat designation process. (See the "Summary of Factors Affecting the Species" section, Part B, "Overutilization for commercial, recreational, scientific, or educational purposes," for a further discussion of threats to the species from vandals.) The locations of populations of these species have consequently been described only in general terms in this final rule. Precise locality data are available to appropriate Federal, State, and local government agencies and individuals from the Service office described in the "**ADDRESSES**" section.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals The Endangered Species Act provides for possible land acquisition and cooperation with the States, and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

The Service notified Federal agencies that might have programs affecting these species. Three projects that could impact the palezone shiner were identified. Three wood-processing companies have applied to the Nashville District, U.S. Army Corps of Engineers (Corps), for permits under section 10 of the Rivers and Harbors Act and section 404 of the Clean Water Act and to TVA for shoreline leases and section 26–A permits to construct and operate wood-chip mills located between Bridgeport, Alabama, and New Hope, Tennessee. The construction of the facilities will not impact the palezone shiner. However, the potential timber-harvest area for the wood-chip mills encompasses the reach of the Paint Rock River that is populated by the palezone shiner (TVA 1992). The Service has recently conducted a formal conference with TVA and the Corps regarding the potential impact of the wood-chip mills to the palezone shiner. The Service concluded that harvesting logs for the wood-chip mills in the Paint Rock River watershed would likely jeopardize the continued existence of the palezone shiner. However, the Service offered a reasonable and prudent alternative involving controls on timber-harvest methods that would avoid the likelihood of jeopardy to the palezone shiner.

Additional Federal activities that could occur and impact the species include, but are not limited to, the carrying out or the issuance of permits for hydroelectric facility construction and operation, coal mining, reservoir construction, stream alterations, wastewater facility development, pesticide registration, and road and bridge construction. It has been the experience of the Service, however, that nearly all section 7 consultations can be resolved so that the species is protected and the project objectives are met.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are found at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. In some instances, permits may be issued for a specified time to relieve undue economic hardship that would be suffered if such relief were not available. These species are not in trade, and such permit requests are not expected.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an environmental assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

33 CFR Part 168

[CGD 91-202a]

RIN 2115-AE-10

Escort Requirements for Vessels in the Navigable Waters of the United States

AGENCY: Coast Guard, DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: In this advance notice of proposed rulemaking (ANPRM), the Coast Guard seeks comment on where an escort should be required for vessels navigating in the waters of the United States and which vessels should be required to comply with an escort rule. Recommendations are also sought on what the escort vessel should be expected to do.

DATES: Comments must be received on or before June 28, 1993.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G-LRA/3406) (CGD 91-202a), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001 or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: Captain Gerald T. Willis, Project Manager, Oil Pollution Act (OPA 90) Staff, (202) 267-6732.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD XX-XXX) and the specific section of this proposal to which each comment applies, and give the reason for each comment. The Coast Guard requests that all comments and attachments be submitted in an unbound format suitable for copying and electronic filing. If not practical, a second copy of any bound materials is requested. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period and any late comments to the extent practicable. It may change this proposal in view of the comments.

Drafting Information

The principal persons involved in drafting this document are Captain Gerald T. Willis, Project Manager, and Ms. Joan Tilghman, Project Counsel, OPA 90 Staff.

Background and Purposes

The Coast Guard has been delegated broad authority to control vessel movement in the navigable waters of the United States under the Ports and Waterways Safety Act of 1972 (PWSA) (Pub. L. 92-340) as amended by the Port and Tanker Safety Act of 1978 (Pub. L. 95-474), found at 33 U.S. Code 1221-1236. Under section 1223(a)(4), the Coast Guard may control vessel traffic in areas determined to be hazardous by, among other things, establishing vessel size, speed, and draft limitations and vessel operating conditions. In accordance with section 1224, prior to imposing such controls, various factors, including the following, are to be considered:

1. The scope and degree of the risk or hazard involved;
2. Vessel traffic characteristics and trends, including traffic volume, sizes and types of vessels involved, and the presence of unusual cargoes;
3. Port and waterway configurations and variations in local conditions of geography, climate, and other similar factors;
4. Environmental factors; and
5. Economic impact.

Specific, but limited, authority regarding escort of certain tankers also exists in the Oil Pollution Act of 1990 (OPA 90) (Pub. L. 101-380). Section 4116(c) of OPA 90 requires the Coast Guard, as delegated by the Secretary of Transportation, to define areas where single hull tankers over 5,000 gross tons (GT) transporting oil in bulk must be escorted by at least two towing vessels, or by some other vessel which the Secretary considers appropriate. These defined areas must include Prince William Sound, Alaska, and Rosario Strait and Puget Sound, Washington (including those portions of the Strait of Juan de Fuca east of Port Angeles, Haro Strait, and the Strait of Georgia subject to United States jurisdiction). On July 7, 1992, the Coast Guard proposed a rule to implement section 4116(c) in Prince William Sound and Puget Sound (57 FR 30058). The comment period was reopened on March 26, 1993, to obtain additional information 958 FR 16391).

In the NPRM, the Coast Guard sought comment on whether to extend the applicability of the OPA 90 escort rule to other areas and to other kinds of vessels, and stated that there would be a separate rulemaking to address these issues. An option presented for expanding an escort rule beyond section 4116(c) of OPA 90 was to use Coast Guard authority under the PWSA.

This ANPRM solicits further comment on applying an escort rule to other areas of the navigable waters of the U.S. and other vessels. Before it can issue workable and effective national escort rules, the Coast Guard must decide what the escort vessels are expected to accomplish, so that the regulatory approach results in reducing the risk of harm in the event of a vessel casualty. To establish a sensible approach, it is necessary to assess what existing escort vessels can do, given current technological capability and design of the escort vessel and the characteristics of the vessel being escorted.

Why there is a need for providing escorts for certain vessels. A principal focus of OPA 90 is reducing the risk of spills of oil and hazardous substances, and the injury to human health and damage to the environment resulting from such spills. The PWSA focuses on broad preventive measures to improve vessel navigation in U.S. waterways to reduce the risk of collision or grounding. With the introduction of supertankers, as well as the increased shipment of hazardous substances by vessel, the risk of a serious pollution incident as the result of a marine casualty has increased. Traffic volumes in confined harbors and narrow channels has increased; larger vessels are less maneuverable than smaller ones used in earlier years.

Although OPA 90 focuses on minimizing the risks of casualties from vessels carrying oil as cargo, oil tankers are not the only types of vessels which may pose a substantial risk of collisions or groundings, with resultant environmental damage. Many other vessels pose a risk of high-consequence environmental or public health incidents because of the quantity of bunker oil (fuel) they carry, or the vessel's transit near congested areas, sensitive environmental areas, or in confined waterways. Vessels carrying hazardous materials, hazardous substances, or other dangerous cargo also pose a potential risk of harm from spills, and a vessel which itself does not pose a risk may be the cause of a spill from an oil tanker or other vessel carrying dangerous cargo.

Which vessels should require an escort. Several comments to the NPRM suggested that the Coast Guard include the following vessels in the escort rule: All single or double-hull oil tankers, irrespective of tonnage; all vessels over 5,000 gross tons (GTs); and all ships over 10,000 long tons displacement. Some comments stated that the Coast Guard should consider the character of the area the vessel is transiting in determining whether to require an escort. For example, any ship transiting an area defined as a "marine sanctuary" would require an escort.

The Coast Guard seeks further comment on the criteria it should use to determine if any vessels, in addition to those covered by section 4116(c) of OPA 90, should have an escort. Should the type of cargo carried, the vessel size or configuration, the proximity to areas where serious consequences may result from a spill, or a combination of these factors, determine which vessels must be escorted? Is there some other principle which should be applied to make this determination?

What should an escort vessel be expected to do. A paramount question is what should an escort vessel be expected to do. In making this decision, the Coast Guard must decide what it means "to escort," and whether there are vessels in service that are capable of escorting.

The meaning of "escort." Tugboats (tugs) have traditionally been used in ship handling to assist larger vessels when maneuvering at slow speeds in confined waters, such as during berthing. OPA 90 contemplates that escorts should be required when oil tankers are transiting in more open waters at higher speeds.

The demands placed on escort vessels have increased commensurately. There are expectations that in the event of a casualty on the vessel being escorted, the escorting vessel will be able to control the movement of the escorted vessel sufficiently to avoid a collision or grounding, as well as the traditional assistance in berthing. Some newer tugs are highly maneuverable and can perform these services for escorted vessels at speeds higher than that achievable by a conventional tug. In addition, there are expectations that the escorting vessel should be capable of assisting in spill containment and cleanup and possibly have firefighting capability.

The question arises whether providing an escort means: being available to facilitate transit through narrow or confined waterways at other than slow speeds and berth a vessel; steer or tow the vessel in the event of a propulsion or steering failure, either running free or made fast to the vessel; and provide spill mitigation and firefighting in the aftermath of a casualty. The Coast Guard envisions that in the most basic definition, "escorting" must encompass the ability to render timely assistance to a disabled ship to prevent a grounding or collision, as well as perform the traditional services of facilitating slow speed transit and berthing.

In some circumstances, a timely response must be accomplished in minutes (e.g., a steering gear failure at a critical moment when the vessel is negotiating a narrow channel). In this situation, a timely response may be possible only if the escorted ship is traveling at a relatively slow speed and the escort vessel already is tethered to the ship.

In other circumstances, an assist may take hours and still be satisfactory (e.g., a propulsion failure in the middle of Prince William Sound thirty miles from the nearest shore). In that circumstance, an escort vessel might be free-running nearby or ready to get underway from a strategic location within the sound.

In any event, the question must be addressed concerning which tugs can render service in an emergency to prevent a grounding or collision. A conventional tug, with forward and astern propulsion thrust, generally has stability characteristics to tolerate only moderate transverse towline forces. Further, the amount of force it can generate is largely proportionate to its horsepower and propeller configuration. Horsepower and tug configuration are factors in setting the speed at which the tug escort can travel safely relative to the speed of the ship it escorts. Because it maneuvers with some difficulty in close quarters at speeds greater than 6 knots, a conventional tug may be incapable of providing the type of emergency service which the Coast Guard believes is inherent in all phases of "escorting."

Tractor tugs have a propulsion configuration which allows these vessels to thrust throughout 360 degrees from the tug's fore and aft axis. In addition to the traditional duties of straight ahead pushing or pulling, tractor tug design offers another potential advantage. The hull form and stability characteristics permit the vessel to operate with high transverse towline forces.

Should the Coast Guard prescribe specifications for escort service? If so, should they be design or performance specifications? Alternatively, should the Coast Guard set forth specific items for vessel owners or operators to consider when selecting an escort? Are there simulator programs which could aid in verifying escort vessel performance? How should weather and sea conditions be accounted for in setting specifications for escorts? Should the performance or design requirements for escort vessels be tailored to the environment in which the vessel will serve? Should the escort vessels be subject to any type of inspection for verification of physical capabilities such as towing gear, hull attachments, horsepower, stability, or other operating parameters? What other factors should be considered in setting specifications for the escort vessel?

Should vessels subject to escort regulations be required to have specific towing connections? The Coast Guard published proposed rules concerning removal equipment requirements in the **Federal Register** on September 29, 1992 (57 FR 44912), which would require that certain tankers entering U.S. waters be fitted with an emergency towing arrangement. Which, if any, of the vessels not subject to the removal equipment requirements proposed regulation, should be required to have similar equipment? Should the regulations require that these vessels be able to deploy an emergency towline from a "dead ship" with minimal crew member assistance? Should these vessels be required to conduct periodic emergency towing drills?

Other than Prince William Sound, Alaska, and Puget Sound, Washington, in what areas should the Coast Guard require escorts? An approach the Coast Guard has considered is to require escorts in areas designated as "environmentally sensitive" by Area Committees established under OPA 90. However, there are other approaches that could be used. Comments to the NPRM suggested defining escort areas by the volume of traffic carrying hazardous cargo, the amount of tanker and barge traffic, or the presence of single hull tankers transporting bulk oil or vessels transporting chemicals. Are there other approaches for determining where to require escorts? What is the relative merit of the various approaches? Is there a single standard for defining other areas or should each waterway be assessed individually? Which of the various factors contained in section 1224 of the PWSA are relevant?

Comments to both the NPRM and this ANPRM will be considered during development of any rule. Commenters to this notice are requested to address in which specific areas of the United States, other than Prince William Sound and Puget Sound, tug escorts should be required and the rationale for those

VOL
58
ISS
79
AP
27
1993
UMI

requirements. Comments should be as specific as possible on why tug escorts are needed for each geographic area. What is the expected benefit for that particular area? The discussion should include hazards, sensitive areas, economic benefits or disadvantages and any other factors considered appropriate for the Coast Guard to consider.

Regulatory Evaluation

The Coast Guard anticipates that any proposed rule would be non-major under Executive Order 12291 and would not be significant under the "Department of Transportation Regulatory Policies and Procedures" (44 FR 11040; February 26, 1979); however, the Coast Guard cannot quantify the economic impact at this stage of the process, because it has yet to choose an option.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether the proposed rule, if adopted, will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). Because the ANPRM is not proposing any particular rules, considering small entity impacts is premature. However, the Coast Guard welcomes preliminary information and data on the expected small entity impact of any of the options discussed.

Collection of Information

There have been no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) identified at this stage of the rulemaking.

Federalism

The Coast Guard has analyzed this ANPRM under the principles and criteria contained in Executive Order No. 12612. It does not have enough information to determine whether this proposal has sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard has concluded that it is premature to make an assessment of the environmental impact of any rules that might be adopted, because there is no action proposed right now. The Coast Guard will conduct any required assessment under the National Environmental Policy Act if it develops a notice of proposed rulemaking.

Dated: April 21, 1993.

A. Cattalini,

Captain, U.S. Coast Guard, Acting Chief, Office of Navigation Safety and Waterway Services.

Title 3—

The President

Executive Order 12846 of April 25, 1993

Additional Measures With Respect to the Federal Republic of Yugoslavia (Serbia and Montenegro)

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*), the National Emergencies Act (50 U.S.C. 1601 *et seq.*), section 5 of the United Nations Participation Act of 1945, as amended (22 U.S.C. 287c), and section 301 of title 3, United States Code, in view of United Nations Security Council Resolution No. 757 of May 30, 1992, No. 787 of November 16, 1992, and No. 820 of April 17, 1993, and in order to take additional steps with respect to the actions and policies of the Federal Republic of Yugoslavia (Serbia and Montenegro) and the national emergency described and declared in Executive Order No. 12808 and expanded in Executive Order No. 12810 and No. 12831,

I, WILLIAM J. CLINTON, President of the United States of America, hereby order:

Section 1. Notwithstanding the existence of any rights or obligations conferred or imposed by any international agreement or any contract entered into or any license or permit granted before the effective date of this order, except to the extent provided in regulations, orders, directives, or licenses which may hereafter be issued pursuant to this order:

(a) All property and interests in property of all commercial, industrial, or public utility undertakings or entities organized or located in the Federal Republic of Yugoslavia (Serbia and Montenegro), including, without limitation, the property and interests in property of entities (wherever organized or located) owned or controlled by such undertakings or entities, that are in the United States, that hereafter come within the United States, or that are or hereafter come within the possession or control of United States persons, including their overseas branches, are hereby blocked;

(b) All expenses incident to the blocking and maintenance of property blocked under Executive Order Nos. 12808, 12810, 12831 or this order shall be charged to the owners or operators of such property, which expenses shall not be met from blocked funds. Such property may also be sold or liquidated and the proceeds placed in a blocked interest-bearing account in the name of the owner;

(c) All vessels, freight vehicles, rolling stock, aircraft and cargo that are within or hereafter come within the United States and are not subject to blocking under Executive Order Nos. 12808, 12810, 12831 or this order, but which are suspected of a violation of United Nations Security Council Resolution Nos. 713, 757, 787 or 820, shall be detained pending investigation and, upon a determination by the Secretary of the Treasury that they have been in violation of any of these resolutions, shall be blocked. Such blocked conveyances and cargo may also be sold or liquidated and the proceeds placed in a blocked interest-bearing account in the name of the owner;

(d) No vessel registered in the United States or owned or controlled by United States persons, other than a United States naval vessel, may enter the territorial waters of the Federal Republic of Yugoslavia (Serbia and Montenegro); and

(e) Any dealing by a United States person relating to the importation from, exportation to, or transshipment through the United Nations Protected Areas in the Republic of Croatia and those areas of the Republic of Bosnia-Hercegovina under the control of Bosnian Serb forces, or activity of any kind that promotes or is intended to promote such dealing, is prohibited.

Sec. 2. The Secretary of the Treasury, in consultation with the Secretary of State, is hereby authorized to take such actions, including the promulgation of rules and regulations, and to employ all powers granted to the President by the International Emergency Economic Powers Act and the United Nations Participation Act as may be necessary to carry out the purposes of this order. The Secretary of the Treasury may redelegate the authority set forth in this order to other officers and agencies of the Federal Government, all agencies of which are hereby directed to take all appropriate measures within their authority to carry out the provisions of this order, including suspension or termination of licenses or other authorizations in effect as of the date of this order.

Sec. 3. Nothing in this order shall apply to activities related to the United Nations Protection Force, the International Conference on the Former Yugoslavia, and the European Community Monitor Mission.

Sec. 4. The definitions contained in section 5 of Executive Order No. 12810 apply to the terms used in this order.

Sec. 5. Nothing contained in this order shall create any right or benefit, substantive or procedural, enforceable by any party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

Sec. 6. This order shall not affect the provisions of licenses and authorizations issued pursuant to Executive Order Nos. 12808, 12810, 12831 and in force on the effective date of this order, except as such licenses or authorization may hereafter be terminated, modified or suspended by the issuing federal agency.

Sec. 7. (a) This order shall take effect at 12:01 a.m. Eastern Daylight Time, April 26, 1993.

(b) This order shall be transmitted to the Congress and published in the **Federal Register.**

William J. Clinton

THE WHITE HOUSE,
April 25, 1993.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 58 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 12 and June 15 at 9:00 am
WHERE: Office of the Federal Register, 7th Floor Conference Room, 800 North Capitol Street NW, Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202-523-4538

PHILADELPHIA, PA

WHEN: May 25, at 1:00 pm
WHERE: William J. Green, Jr. Federal Building, Conference Room 6306-10, 600 Arch St. Philadelphia, PA
RESERVATIONS: Federal Information Center 1-800-347-1997

Rules and Regulations

Federal Register
Vol. 58, No. 80
Wednesday, April 28, 1993

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 200 and 240

[Release No. 34-32191]

RIN 3235-AF44

Risk Assessment Rules

AGENCY: Securities and Exchange Commission.

ACTION: Final rule and technical amendments.

SUMMARY: The Securities and Exchange Commission (the "Commission") is amending Rule 30-3 of the Rules of Practice and Investigations to delegate authority to the Director of the Division of Market Regulation to designate Reporting Brokers or Dealers and to grant or deny exemptions from Rules 17h-1T and 17h-2T. The amendments are intended to conserve the resources of the Commission and will expedite the handling of requests by broker-dealers to be designated as Reporting Brokers or Dealers. This document also contains a correction to the risk assessment rules that were published on July 21, 1992 (57 FR 32159).

EFFECTIVE DATE: The amendments become effective on April 28, 1993.

FOR FURTHER INFORMATION CONTACT: Michael A. Macchiaroli, (202) 272-2904 or Roger G. Coffin, (202) 272-7375, Division of Market Regulation, 450 Fifth Street, NW., 20549.

SUPPLEMENTARY INFORMATION:

I. Introduction

On July 16, 1992, the Commission adopted Rules 17h-1T and 17h-2T under the Securities Exchange Act of 1934 (the "Exchange Act"), which together with Form 17-H, establish a risk assessment recordkeeping and reporting system for registered broker-dealers concerning certain of their associated persons.[1] The Rules were adopted pursuant to the authority granted to the Commission by the Market Reform Act of 1990,[2] and are designed to provide the Commission with information concerning the financial and securities activities of those associated persons of the broker-dealer whose business activities are reasonably likely to have a material impact on the registered broker-dealer.

Rule 17h-1T is a recordkeeping rule, which sets forth the records and other information broker-dealers are required to maintain with respect to their Material Associated Persons. Rule 17h-2T is a reporting rule, which requires broker-dealers to file a quarterly summary of the information required to be kept by Rule 17h-1T with the Commission on Form 17-H.

In this release, the Commission is by order designating 58 broker-dealers as Reporting Brokers or Dealers under the risk assessment rules, and conditionally exempting two other broker-dealers.[3]

II. Delegation of Authority to the Director of the Division of Market Regulation

Paragraph (d)(4) of Rule 17h-1T and paragraph (b)(4) of Rule 17h-2T state that the Commission may, upon written application by a Reporting Broker or Dealer, exempt any of its affiliated brokers or dealers, either unconditionally or on specified terms and conditions. The Commission also has the authority, under Section 17(h) of the Exchange Act, to exempt, by rule or by order, broker-dealers from the Rules. In the absence of a delegation of authority, the Commission would be required to issue an order as to each exemptive request.

Therefore, Rule 30-3 of the Rules of Fair Practice and Investigations (17 CFR 200.30-3), will be amended to delegate the authority to perform these functions to the Director of the Division of Market Regulation (the "Director"). A delegation of authority to the Director to grant or deny exemptions and to designate Reporting Brokers or Dealers will conserve the resources of the Commission and will expedite the handling of these requests. Notwithstanding these delegations of authority, the Division will bring any requests for exemptions that raise serious questions to the Commission for consideration.

Therefore, the Commission is amending Rule 30-3 by adding new paragraph (a)(52) to Rule 30-3, which delegates authority under section 17(h) of the Exchange Act to the Director to: (1) Designate broker-dealers as Reporting Brokers or Dealers under paragraph (d)(4) of Rule 17h-1T and paragraph (b)(4) of Rule 17h-2T; (2) grant or deny exemptions from the risk assessment rules pursuant to section 17(h) of the Exchange Act; and (3) determine to withhold information in such exemptive orders from the public pursuant to section 17(h) of the Exchange Act.[4]

The Commission finds, in accordance with section 553(b)(A) of the Administrative Procedure Act,[5] that this amendment relates solely to agency organization, procedure, or practice, and does not relate to a substantive rule. Accordingly, notice and opportunity for public comment are unnecessary, and publication of the amendment 30 days before its effective date is also unnecessary.

III. Technical Amendment

The Commission is adopting one technical amendment to the Rules. A cross-reference in paragraph (a)(1) of Rule 17h-1T to the exemptive provision in Rule 17h-1T is being changed from "paragraph (c)" to "paragraph (d)".

IV. Statutory Analysis

Pursuant to the Securities Exchange Act of 1934 and particularly section 17 thereof, 15 U.S.C. 78q, the Commission is adopting amendments to §§ 240.17h-1T and 240.17h-2T, to title 17 of the Code of Federal Regulations in the manner set forth below.

List of Subjects

17 CFR Part 200

Administrative practice and procedure; Authority delegations

[1] Securities Exchange Act Release No. 30929, (July 15, 1992), 57 FR 32159, (July 21, 1992).

[2] Market Reform Act of 1990, Pub. L. 101-432, § 4, 104 Stat. 963, 966-973 (1990).

[3] With respect to the orders being issued herein pursuant to section 17(h) of the Exchange Act, the Commission has determined that the identifying information in the orders should be withheld from the public.

[4] Consistent with the Commission's practice in this regard, the Director would have delegated authority to make similar determinations.

Text of the Amendments

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is amended as follows:

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Subpart A—Organization and Program Management

1. The general authority citation for part 200, subpart A, continues to read, in part, as follows:

Authority: 15 U.S.C. 77s, 78d–1, 78d–2, 78w, 78*ll*(d), 79t, 77sss, 80a–37, 80b–11, unless otherwise noted.

* * * * *

2. Section 200.30–3 is amended by adding paragraph (a)(52) to read as follows:

§ 200.30–3 Delegation of authority to Director of Division of Market Regulation.

* * * * *

(a) * * *

(52) Pursuant to Rules 17h–1T and 17h–2T of the Act (§§ 240.17h–1T and 240.17h–2T of this chapter):

(i) To designate certain broker-dealers as Reporting Brokers or Dealers; *or and*

(ii) To grant or deny an exemption, conditionally or unconditionally, to a broker or dealer pursuant to section 17(h) of the Act.

* * * * *

PART 240—GENERAL RULES AND REGULATIONS, SECURITY EXCHANGE ACT OF 1934

3. The authority citation for part 240 continues to read, in part as follows:

Authority: 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78d, 78i, 78j, 78*l*, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 78*ll*(d), 79q, 79t, 80a–20, 80a–23, 80a–29, 80a–37, 80b–3 80b–4, and 80b–11, unless otherwise noted.

* * * * *

Section 240.17h–1T also issued under 15 U.S.C. 78q.

§ 240.17h–1T [Amended]

4. In § 240.17h–1T, paragraph (a)(1) is amended by replacing the phrase "paragraph (c)" with the phrase "paragraph (d)".

Dated: April 22, 1993.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

Fiscal Service

31 CFR Part 251

RIN 1510–AA23

Payment of Unclaimed Interest on Certain Awards of the Mixed Claims Commission, United States and Germany

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: This document removes the regulation governing the payment of unclaimed interest on awards of the Mixed Claims Commission. This regulation is obsolete. No applications for payments have been filed against this fund in at least 5 years by the awardholders or their successors in interest. The effect of this document is to remove an unnecessary regulation.

EFFECTIVE DATE: May 28, 1993.

FOR FURTHER INFORMATION CONTACT: Mia Abeya, 202–874–8740.

SUPPLEMENTARY INFORMATION:

Background

This regulation was issued pursuant to the Settlement of War Claims Act of 1928, 45 Stat. 254, as amended, to establish a trust fund for unclaimed interest on awards of the Mixed Claims Commission. No claims have been made against this fund for at least 5 years by awardholders or their successors in interest. Therefore, this regulation is no longer necessary.

The notice of proposed rulemaking was published November 27, 1992 (57 FR 56292). No comments were received during the 30 day comment period. There are no substantive differences between the proposed and final rules.

It has been determined that this document is not a major regulation as defined in E.O. 12291 and a regulatory impact analysis is not required. The removal of this unused regulation will have little or no effect on the economy or consumers. It is hereby certified that removal of this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. The removal of this unused regulation will have little or no effect on small entities.

This final rule is issued in accordanre with 31 U.S.C. 321(b)(1), which describes the Secretary of Treasury's power to issue regulations.

RIN 1510–AA24

Payment Under the Act of Congress Approved August 30, 1962, on Unpaid Balances of Awards of Philippine War Damage Commission

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: This document removes the regulation governing payment of unpaid balances of awards of the Philippine War Damage Commission. This regulation is obsolete. The time for applying for payment, and making the payment, have passed. The effect of this document is to remove an unnecessary regulation.

EFFECTIVE DATE: May 28, 1993.

FOR FURTHER INFORMATION CONTACT: Mia Abeya, 202–874–8740.

SUPPLEMENTARY INFORMATION:

Background

This regulation was issued pursuant to the Act of August 30, 1962, Public Law 87–616, 76 Stat. 412, as amended, to govern disbursal of payments directed by the Foreign Claims Settlement Commission, which was evaluating unpaid balances of awards made by the Philippine War Damage Commission under Title I of the Philippine Rehabilitation Act of 1946. Under section 2 of Public Law 87–616, applications for payment were to be filed by October 30, 1963, and the Foreign Claims Settlement Commission was to take final action by October 30, 1964. No directions for disbursal are currently outstanding, and none are expected. Therefore, this regulation's guidelines for payment are no longer necessary.

The notice of proposed rulemaking was published November 27, 1992. No

comments were received during the 30 day comment period. There are no substantive differences between the proposed rule and final rule. This action is in accordance with § 253.2, which authorizes the withdrawal or amendment of any or all of the provisions of the regulations in this part.

It has been determined that this document is not a major regulation as defined in Executive Order 12291 and a regulatory impact analysis is not required. The removal of this unused regulation will have little or no effect on the economy or consumers. It is hereby certified that removal of this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. The removal of this unused regulation will have little or no effect on small entities.

RIN 1510–AA25

Payments on Account of Awards and Appraisals in Favor of Nationals of the United States on Claims Against the Government of Mexico

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: This document removes this regulation governing payments to United States nationals on their claims against the Government of Mexico. This regulation is obsolete. No claims have been made in more than 5 years and all efforts to contact all awardholders have been exhausted. The effect of this notice is to remove an unnecessary regulation.

EFFECTIVE DATE: May 28, 1993.

FOR FURTHER INFORMATION CONTACT: Mia Abeya, 202–874–8740.

SUPPLEMENTARY INFORMATION:

Background

The regulations governing payments of awards and appraisals due American nationals on their claims against the Mexican government were issued under authority contained in section 161 of the Revised Statutes (5 U.S.C. 22), the act of April 10, 1935 (49 Stat. 149), the Joint Resolution of August 25, 1937 (50 Stat. 783), and the Settlement of Mexican Claims Act of 1942 (56 Stat. 1058; 22 U.S.C. 661–672).

This program has been ongoing since 1943, and all efforts to contact awardholders have been exhausted. Approximately 97 percent of the awardholders have been paid out of the amount that was available for distribution and no payments have been made in more than 5 years. Awards that remain unpaid are to individuals whose whereabouts are unknown. The notice of proposed rulemaking was published November 27, 1992 (57 FR 56293). No comments were received during the 30 day comment period. There are no substantive differences between the proposed rule and final rule. This action is in accordance with § 254.6 which authorizes the revocation or amendment of any part of the current rules at any time.

It has been determined that this document is not a major regulation as defined in E.O. 12291 and a regulatory impact analysis is not required. The removal of this unused regulation will have little or no effect on the economy or consumers. It is hereby certified that removal of this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. The removal of this unused regulation will have little or no effect on small entities.

RIN 1510–AA27

Loans to Public or Private Agencies Under the Refugee Relief Act of 1953

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Final rule.

SUMMARY: This document removes the regulation governing loans to public and private agencies of the United States under the Refugee Relief Act of 1953. This regulation is obsolete because the terms of the Act require the loans to mature not later than June 30, 1963. The effect of this notice is to remove an unnecessary regulation.

EFFECTIVE DATE: May 28, 1993.

FOR FURTHER INFORMATION CONTACT: Mia Abeya, 202–874–8740.

SUPPLEMENTARY INFORMATION: This regulation was issued pursuant to section 16 of the Refugee Relief Act of 1953 ("Act"), 67 Stat. 406 (August 7, 1953), and E.O. 10487 (September 22, 1953). The Act authorized issuance of special nonquota immigrant visas. It also authorized the Department of the Treasury to make loans to public and private agencies of the United States for use in paying the immigrants' transportation from ports of entry within the United States to their places of resettlement. The loans were restricted to those immigrants with visas issued under the Act. The loans were to mature not later than June 30, 1963. Therefore, this regulation is no longer necessary.

The notice of proposed rulemaking was published November 27, 1992 (57 FR 56294). No comments were submitted during the 30 day comment period. There are no substantive differences between the proposed and final rule. This action is in accordance with § 290.7(c) which authorizes the withdrawal or amendment of any or all of the provisions of the regulations in this part.

It has been determined that this document is not a major regulation as defined in E.O. 12291 and a regulatory impact analysis is not required. The removal of this unused regulation will have little or no effect on the economy or consumers. It is hereby certified that removal of this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. The removal of this unused regulation will have little or no effect on small entities.

40 CFR Part 52

Approval and Promulgation of Implementation Plans; Knox County: Approval of Revision to Add Prevention of Significant Deterioration (PSD) Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA approves a revision to the Knox County portion of the Tennessee State Implementation Plan (SIP). The State of Tennessee, through the Tennessee Department of Conservation, submitted revisions to the Knox County portion of the SIP on January 29, 1992, and June 15, 1992. This revision adds a new section, Regulation 45.0—Prevention of Significant Deterioration (PSD), to the Knox County portion of the SIP.

DATES: This action will be effective June 28, 1993, unless notice is received by May 28, 1993, that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Copies of the material submitted by the State of Tennessee may be examined during normal business hours at the following locations:

Public Information Reference Unit, ATTN: Jerry Kurtzweg (AN 443), Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Region IV Air Programs Branch, Environmental Protection Agency, 345 Courtland Street, Atlanta, Georgia 30365.

Division of Air Pollution Control, Tennessee Department of Conservation and Environment, L&C Annex, 9th Floor, 401 Church Street, Nashville, Tennessee 37243-1531.

Knox County Department of Air Pollution Control, City/County Building, Suite 459, 400 Main Avenue, Knoxville, Tennessee 37902.

FOR FURTHER INFORMATION CONTACT: Joey LeVasseur, of the EPA Region IV Air Programs Branch at 404-347-2864 and at the above address.

SUPPLEMENTARY INFORMATION: The Clean Air Act Amendments of 1977 required states to include in their SIPs permit regulations for PSD. The Knox County Air Pollution Control Board provided a draft submission of Knox County Air Pollution Control Regulation 45.0, Prevention of Significant Deterioration, on May 31, 1991. This regulation was reviewed and found to have many deficiencies. Comments were made and incorporated before the official submittal by the State. The Tennessee Department of Environment and Conservation submitted this regulation for inclusion in the Knox County portion of the SIP on January 29, 1992. A letter from Douglas Neeley to Harold Hodges on March 13, 1992, identified deficiencies in the proposed Knox County regulation. The Tennessee Department of Conservation resubmitted the revisions on June 15, 1992, that corrected all the deficiencies in the January 29, 1992, submittal.

A brief description of the added regulation follows. This regulation is more fully discussed in the official SIP submittal that is available at the Region IV office listed under the "**ADDRESSES**" section of this notice.

Section 45.0, Prevention of Significant Deterioration, was added to provide permitting requirements for attainment areas where existing air quality is better than the National Ambient Air Quality Standards (NAAQS). This Section meets all of the PSD requirements of 40 CFR part 51.

Final Action

EPA is today approving Section 45.0, Prevention of Significant Deterioration, of the Knox County regulations. This action is being taken without prior proposal because the changes are noncontroversial and EPA anticipates no significant comments on them. The public should be advised that this action will be effective June 28, 1993. However, if notice is received by May 28, 1993, that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 28, 1993. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214-2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any State Implementation Plan. Each request for revision to the State Implementation Plan shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not for profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and Subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256-66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

List of Subjects in 40 CFR Part 52

Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Editorial Note: This document was received by the Office of the Federal Register on April 23, 1993.

Dated: February 23, 1993.

Donald Guinyard,

Acting, Regional Administrator.

Part 52 of chapter I, Title 40 of the *Code of Federal Regulations*, is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42.U.S.C. 7401-7671q.

Subpart—RR

2. Section 52.2220 is amended by adding paragraph (c)(109) to read as follows:

§ 52.2220 Identification of plan.

* * * * *

(c) * * *

(109) Addition of Section 45, Prevention of Significant Deterioration to the Knox County portion of the Tennessee SIP, submitted and revised on January 29, 1992 and June 15, 1992, respectively.

(i) Incorporation by reference.

(A) Amendments to Section 45.0 of the Knox County regulations were adopted on June 10, 1992.

(ii) Other material. None.

40 CFR Part 52

Approval and Promulgation of Implementation Plans; Knox County: Approval of Revisions to the Volatile Organic Compound (VOC) Regulations

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA approves revisions to the Knox County portion of the State Implementation Plan (SIP) which corrects the deficiencies identified in the November 1989 SIP call. On January 4, 1991, January 29, 1992, and June 15, 1992, the State of Tennessee submitted revisions to the Knox County portion of the SIP regarding Volatile Organic Compounds (VOCs). The revisions were submitted in response to the November 1989 SIP call to areas in Tennessee which were not achieving the National Ambient Air Quality Standards (NAAQS) for ozone and carbon monoxide.

DATES: This action will be effective on June 28, 1993 unless notice is received by May 28, 1993 that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Copies of the material submitted by the State of Tennessee may be examined during normal business hours at the following locations:

Public Information Reference Unit, ATTN: Jerry Kurtzweg (AN 443), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Division of Air Pollution Control, Tennessee Department of Conservation and Environment, L&C Annex, 9th Floor, 401 Church Street, Nashville, Tennessee 37243-1531.

Knox County Department of Air Pollution Control, City/County Building, Suite 459, 400 Main Avenue, Knoxville, Tennessee 37902.

FOR FURTHER INFORMATION CONTACT: Joey LeVasseur, of the EPA Region IV Air Programs Branch at 404-347-2864 and at the above address.

SUPPLEMENTARY INFORMATION: The Clean Air Act Amendments of 1977 provided that states should attain the ozone and carbon monoxide National Ambient Air Quality Standards (NAAQS) by December 31, 1982. However, states could seek an extension of the attainment date to as late as December 31, 1987. When the ambient air quality data was reviewed at the end of 1988 for all areas, it was determined that Knoxville had violated the ozone standard in the summer of 1988. Under the 1977 Act, EPA designated Knoxville as an attainment area. However, Tennessee adopted statewide Reasonably Available Control Technology (RACT) rules applicable to attainment, as well as, nonattainment areas. The Knox County Department of Air Pollution Control then adopted VOC RACT rules applicable to the Knox County attainment area. Subsequently, the Governor of Tennessee was notified by EPA on November 8, 1989, that Knox County was not attaining the standard. A December 5, 1989, letter from Bruce Miller to Terry Harris identified several VOC deficiencies in the Knox County regulations. Three sets of revisions to the Knox County regulations were submitted in response to the SIP call letter. A January 4, 1991, submittal addressed some, but not all of the deficiencies. The agency was notified on September 5, 1991, of the remaining

VOL 58 ISS 80 AP 28 1993 UMI

deficiencies in the Knox County regulations. Together, the January 4, 1991, January 29, 1992, and March 19, 1992, submittals correct all of the deficiencies.

On November 15, 1990, the Clean Air Act Amendments of 1990 (CAAA) were enacted. Pub. L. 101–549, 101 Stat. 2399, codified at 42 U.S.C. 7401–7671q. The amended Act superseded the SIP call and established the RACT requirements for nonattainment areas. Under the amended Act, marginal areas that were pre-enactment nonattainment areas are required to correct their RACT rules to include RACT as required by the pre-amended Act. In addition, areas that were designated nonattainment as of enactment and that were not classified under section 181 are required to adopt RACT rules pursuant to section 172(c)(1) of the amended Act. Knoxville was classified as a new marginal nonattainment area under section 181. EPA believes that the amended Act does not require any additional RACT requirements for areas that are newly designated as marginal ozone nonattainment areas under the amended Act. Therefore no RACT requirements beyond those pursuant to the 1989 SIP call are applicable to Knox County. (See 57 FR 13498, 13503 (April 16, 1992).) Although Knoxville was not subject to the requirements of section 182(a)(2)(A), to correct RACT as it was required under pre-amended section 172(b), these revisions are consistent with pre-enactment guidance.[1]

EPA is approving the following revisions to the Knoxville portion of the Tennessee SIP. These revisions are more fully discussed in the official SIP submittal that is available at the Region IV office listed under the "ADDRESSES" Section of this notice.

Section 26.5–B, Monitoring, Recording, and Reporting of Source Emissions, was amended to require explicitly that sources keep records needed to assess compliance for the time frame specified in the rule. It also gives reporting schedules and reporting formats.

Section 27.2, Source Sampling and Analysis, was amended to incorporate language stating that the Director may specify or approve, in specific cases, the use of a reference method with minor changes in methodology and that only the EPA Administrator can approve equivalent or alternative methods.

Section 13.15, Definitions, and Section 46.4–B.7, Alternate Emission Standard, were amended and added, respectively, to state that VOC emission limit equivalency calculations will be performed on a solids applied basis.

Section 27.2–A, Source Sampling and Analysis, was amended to add Reference Method 23 and Reference Method 26.

Section 28.1–A.4, Variances—General, was amended to state that any cross-line averaging must be submitted as a source specific SIP revision and must meet the provisions of EPA's December 4, 1986, Emissions Trading Policy Statement (ETPS).

Section 46.1–B, Purpose and General Provisions, was added to allow the Director and a source to mutually agree to establish an emission limit more restrictive than otherwise specified in this Section.

Section 46.2–A.7, Definitions, was amended to make it clear that coating lines that do not contain bake ovens are not exempt.

Section 46.2–A.34, Definitions, was amended to revise the definition of VOC to exempt those organic compounds identified by the Administrator as compounds which do not participate in atmospheric photochemical reactions. This Section was also amended to include VOC measuring methods for purposes of determining compliance with emission limits.

Section 46.4–B.8, Alternate Emission Standard, and Section 46.11–B.5, Surface Coating of Miscellaneous Metal Parts and Products, were added to clarify that exempt solvents, as well as water, are excluded from compliance calculations.

Section 46.4–I, Alternate Emission Standard, was added to state that any cross-line averaging must be submitted as a source specific SIP revision and must meet the provisions of EPA's December 4, 1986, Emissions Trading Policy Statement (ETPS).

Section 46.4–B.9, Alternate Emission Standard, Section 46.6–D.8, Petroleum Liquid Storage in External Floating Roof Tanks, and Section 46.8–B.1.d, Bulk Gasoline Terminals, were added to revise Director's Discretion clauses approving alternate control systems to specify that the alternate means of control is comprised solely of hardware.

Section 46.6–D.7, Petroleum Liquid Storage in External Floating Roof Tanks, was amended to state that records were to be maintained as specified in new Section 46.20.

Section 46.11–B.6, Surface Coating of Miscellaneous Metal Parts and Products, was added to specify a compliance time frame associated with the emission limit.

Section 46.17–D, General Provisions for Test Methods and Procedures, was amended to specify that all alternate compliance plans must be submitted to EPA for approval as a source specific SIP revision unless the alternate means of control is comprised solely of hardware.

Section 46.19, Compliance Certification, Recordkeeping, and Reporting Procedures for Coating Sources, and Section 46.20, Compliance Certification, Recordkeeping, and Reporting Procedures for Non-Coating Sources, were added to clarify methods of recordkeeping, reporting, and compliance certification.

Section 46.21, was added to make it clear that any existing controls on VOC sources, required by any section of the Knox County Air Pollution Control Regulations, must be retained unless otherwise approved by EPA.

The Approval of these revisions completes the correction of all identified deficiencies in the Knoxville VOC regulations. The revisions are consistent with Agency policy and guidance.

Final Action: EPA is today approving the aforementioned revisions to the Knoxville VOC regulations. This action is being taken without prior proposal because the changes are noncontroversial and EPA anticipates no adverse comments on them.

The public should be advised that this action will be effective on June 28, 1993. However, if notice is received by May 28, 1993 that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 28, 1993. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Nothing in this action shall be construed as permitting or allowing or establishing a precedent for any future request for a revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical economic and environmental factors and in relation to relevant statutory and regulatory requirements.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and Subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. Section 7410(a)(2).

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Particulate matter, Reporting and recordkeeping requirements.

Dated: March 22, 1993.

Patrick M. Tobin,

Acting Regional Administrator.

Part 52 of chapter I, title 40 of the Code of Federal Regulations, is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7671q.

Subpart—RR

2. Section 52.2220 is amended by adding paragraph (c)(110) to read as follows:

§ 52.2220 Identification of plan.

* * * * *

(c) * * *

(110) Revisions to the VOC portion of the Knox County portion of the Tennessee SIP to correct deficiencies, which were submitted on January 4, 1991, January 29, 1992, and June 15, 1992, respectively.

(i) Incorporation by reference.

(A) Amendments to the following Sections of the Knox County regulations—13.15, 46.1–B, 46.4–B.7, 46.4–B.8, 46.4–B.9, 46.4–I, 46.6–D.6, 46.8–B.1.d, 46.11–B.5, 46.11–B.6—were adopted on December 13, 1990.

(B) Amendments to the following Sections of the Knox County regulations—27.2–A and 46.2—were adopted on November 13, 1991.

(C) Amendments to the following Sections of the Knox County regulations—26.5–B, 27.2, 28.1–A.4, 46.2–A.7, 46.2–A.34, 46.8–D.7, 46.17–D, 46.19, 46.20, and 46.21—were adopted on June 10, 1992.

(ii) Other material.

(A) Letter of January 4, 1991, from the Tennessee Department of Conservation and Environment.

(B) Letter of January 29, 1992, from the Tennessee Department of Conservation and Environment.

(C) Letter of June 15, 1992, from the Tennessee Department of Conservation and Environment.

40 CFR Part 180

[OPP–300274A; FRL–4576–5]
RIN 2070–AB78

Sodium Bisulfate; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document establishes an exemption from the requirement of a tolerance for residues of sodium bisulfate (CAS Registry No. 7681-38-1) when used as an inert ingredient (acidifying/buffering agent) in pesticide formulations applied to growing crops only. This regulation was requested by the American Cyanamid Co.

EFFECTIVE DATE: This regulation becomes effective April 28, 1993.

ADDRESSES: Written objections, identified by the document control number, [OPP–300274A], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, rm. M3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Connie Welch, Registration Support Branch, Registration Division (H7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: 2800 Crystal Drive, North Tower, 6th Floor, Arlington, VA 22202, (703)-308-8320.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 17, 1993 (58 FR 8729), a document was issued giving notice that the American Cyanamid Co., Agricultural Research Division, P.O. Box 400, Princeton, NJ 08540, had submitted pesticide petition (PP) 2E4160 to EPA requesting that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(e), propose to amend 40 CFR 180.1001(d) by establishing an exemption from the requirement of a tolerance for residues of sodium bisulfate (CAS Reg. No. 7681-38-1) when used as an inert ingredient (acidifying/buffering agent) in pesticide formulations applied to growing crops only.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

As part of the EPA policy statement on inert ingredients published in the

[1] Among other things, the pre-amendment guidance consists of the VOC RACT portions of the Post-87 policy, 52 FR 45044 (Nov. 24, 1987); the Bluebook, "Issues Relating to VOC Regulation Cutpoints, Deficiencies and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** Notice" (of which notice of availability was published in the **Federal Register** on May 25, 1988); and the existing CTGs.

VOL 58 ISS 80 AP 28 1993 UMI

Federal Register of April 22, 1987 (52 FR 13305), the Agency established data requirements which will be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. Exemptions from some or all of the requirements may be granted if it can be determined that the inert ingredient will present minimal or no risk.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance exemption will protect the public health. Therefore, the tolerance exemption is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above (40 CFR 178.20). The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections (40 CFR 178.25). Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: April 12, 1993.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1001(d) table is amended by adding and alphabetically inserting the inert ingredients, to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

Ethoxylated Polyarylalkylphenols; Tolerance Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document establishes exemptions from the requirement of a tolerance for residues of certain ethoxylated polyarylalkylphenols when used as inert ingredients (surfactants) in pesticide formulations applied to growing crops only. This regulation was requested by Rhone-Poulenc, Inc.

EFFECTIVE DATE: This regulation becomes effective April 28, 1993.

ADDRESSES: Written objections, identified by the document control number, [OPP-300271A], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, rm. M3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Connie Welch, Registration Support Branch, Registration Division (H7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: 6th Floor, North Tower, 2800 Crystal Drive, Arlington, VA 22202, (703)-308-8320.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 17, 1993 (58 FR 8728), a document was issued giving notice that Rhone-Poulenc, Inc., CN 7500, Cranbury, NJ 08512-7500, had submitted pesticide petition (PP) 1E4003 to EPA requesting that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(e), propose to amend 40 CFR 180.1001(d) by establishing an exemption from the requirement of a tolerance for residues of alpha-[2,4,6-tris[1-(phenyl)ethyl]phenyl]-omega-hydroxy poly(oxyethylene); alpha-[2,4,6-tris[1-(phenyl)ethyl]phenyl]omega-hydroxy poly(oxyethylene), mixture of monohydrogen and dihydrogen phosphate esters and the corresponding ammonium, calcium, magnesium, potassium, sodium and zinc salts; alpha-[2,4,6-tris[1-(phenyl)ethyl]phenyl]-omega-hydroxy poly(oxyethylene) sulfate, and the corresponding ammonium, calcium, magnesium, potassium, sodium, and zinc salts; and alpha-[2,4,6-tris[1-(phenyl)ethyl]phenyl]-omega-hydroxy poly(oxyethylene) poly(oxypropylene) copolymer, when used as inert ingredients (surfactants) in pesticide formulations applied to growing crops only.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305), the Agency established data requirements which will be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. Exemptions from some or all of the requirements may be granted if it can be determined that the inert ingredient will present minimal or no risk.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance exemptions will protect the public health. Therefore, the tolerance exemptions are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above (40 CFR 178.20). The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections (40 CFR 178.25). Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Acrylic Acid-Sodium Acrylate-Sodium-2-Methylpropanesulfonate Copolymer; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document establishes an exemption from the requirement of a tolerance for residues of acrylic acid-sodium acrylate-sodium-2-methylpropanesulfonate copolymer (CAS No. 97953-25-8) when used as an inert ingredient (dispersing agent) in pesticide formulations applied to growing crops only. This regulation was requested by the Petrolite Corp.

EFFECTIVE DATE: This regulation becomes effective April 28, 1993.

ADDRESSES: Written objections, identified by the document control number, [OPP-300276A], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, Rm. M3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Connie Welch, Registration Support Branch, Registration Division (H7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: 6th Floor, North Tower, 2800 Crystal Drive, Arlington, VA 22202, (703)-308-8320.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of March 3, 1993 (58 FR 12199), a document was issued giving notice that the Petrolite Corp., 369 Marshall Ave., St. Louis, MO 63119-1897, had submitted a request that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(e), propose to amend 40 CFR 180.1001(d) by establishing an exemption from the requirement of a tolerance for residues of acrylic acid-sodium acrylate-sodium-2-methylpropanesulfonate copolymer when used as an inert ingredient (dispersing agent) in pesticide formulations applied to growing crops only.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305), the Agency established data requirements which will be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. Exemptions from some or all of the requirements may be granted if it can be determined that the inert ingredient will present minimal or no risk.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance exemption will protect the public health. Therefore, the tolerance exemption is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above (40 CFR 178.20). The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections (40 CFR 178.25). Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: April 12, 1993.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1001(d) table is amended by adding and alphabetically inserting the inert ingredients, to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

RIN 2070-AB78

Spod-X Bioinsecticide; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document establishes an exemption from the requirement of a tolerance for residues of the microbial pest control agent *Spodoptera exigua* nuclear polyhedrosis virus in or on all raw agricultural commodities. The product Spod-X is an insecticidal virus product containing the polyhedral inclusion bodies of *Spodoptera exigua* nuclear polyhedrosis virus (Family: Baculoviridae). This exemption was requested by Crop Genetics International. This rule eliminates the need to establish a maximum permissible level for residues of *Spodoptera exigua* nuclear polyhedrosis virus.

EFFECTIVE DATE: Effective on April 28, 1993.

ADDRESSES: Written objections, identified by the document control number [PP 2F4040/R1178], may be submitted to the Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708M, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Philip O. Hutton, Product Manager (PM) 18, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 213, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-305-7690.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of March 11, 1992 (57 FR 8658), EPA issued a notice that announced Espro, Inc., (subsequently acquired by Crop Genetics International, 7170 Standard Drive, Hanover, MD 21076), had submitted pesticide petition (PP) 2F4040 to EPA under section 408(d) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(d), proposing that 40 CFR part 180 be amended by establishing an exemption from the requirement of a tolerance for residues of the insecticide Spod-X containing the polyhedral inclusion bodies of *S. exigua* nuclear polyhedrosis virus in or on all raw agricultural commodities when used to control the beet armyworm.

There were no comments or requests for referral to an advisory committee received in response to the notice of filing.

Residue Chemistry Data and Toxicology Data

Although Spod-X bioinsecticide will be applied on a variety of vegetable and floriculture crops at rates varying from 2 to 50 grams per acre, residue chemistry data were not required. Such data were determined to be necessary only if the submitted toxicology studies indicated that additional Tier II or III toxicology data would be required as specified in 40 CFR 158.165(e). The submitted toxicology data for this use indicated that the product is of low mammalian toxicity; therefore, Tier II or III data were not required.

The toxicological data considered in support of this exemption from the requirements of a tolerance included an acute oral toxicity/pathogenicity study in the rat, an acute pulmonary toxicity/pathogenicity study in the rat, an acute intraperitoneal toxicity/pathogenicity study in the rat, and a primary eye irritation study in the rabbit. A dermal toxicty study was submitted and considered supplemental data. The results of the toxicity/pathogenicity studies showed no toxic, pathogenic, or adverse effects.

Reference Dose (RfD) and maximum permissible intake (MPI) considerations are not relevant to this petition because of the low toxicity and lack of pathogenicity or infectivity observed in the submitted studies.

Based on the information cited above, the Agency has determined that the potential acute toxicity/pathogenicity of *Spodoptera exigua* nuclear polyhedrosis virus is sufficiently low to support the proposed exemption from the requirements of a tolerance on all raw agricultural commodities. Thus, a tolerance for the active ingredient *Spodoptera exigua* nuclear polyhedrosis virus is not necessary to protect the public health. Therefore, 40 CFR part 180 is amended as set forth below.

Any person adversely affected by this regulation may, within 30 days after the date of publication of this document in the **Federal Register**, file written objections and/or a request for a hearing with the Hearing Clerk at the address given above. 40 CFR 178.20. The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections. 40 CFR 178.25. Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on each such issue, and a summary of any evidence relied upon by the objector. 40 CFR 178.27. A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: there is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested. 40 CFR 178.32.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291. Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or food additive regulations or raising tolerance levels or food additive regulations or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

VOL 58 ISS 80 AP 28 1993 UMI

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: April 8, 1993.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. In part 180:

a. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

b. In subpart D, by adding new § 180.1118, to read as follows:

§ 180.1118 Spodoptera exigua nuclear polyhedrosis virus; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for the microbial pest control agent *Spodoptera exigua* nuclear polyhedrosis virus when used as a pesticide control agent on all raw agricultural commodities.

BILLING CODE 6560-50-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 431, 483

[BPD-661-CN]

RIN 0938-AE49

Medicare and Medicaid Programs; Preadmission Screening and Annual Resident Review

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule; correction.

SUMMARY: In the November 30, 1992 issue of the **Federal Register**, we established requirements for preadmission and annual review of individuals with mental illness or mental retardation who are applicants to or residents of nursing facilities that are certified for Medicaid. We also established an appeals system for individuals who may be transferred or discharged from facilities or who wish to dispute a determination made in the preadmission screening and annual review process. This notice corrects typographical errors made in that document.

EFFECTIVE DATE: This correction notice is effective on January 29, 1993.

FOR FURTHER INFORMATION CONTACT: Jan Earle, (410) 966-0103.

SUPPLEMENTARY INFORMATION: The final rule, Preadmission Screening and Annual Resident Review, published in the **Federal Register** on November 30, 1992 at 57 FR 56450, contained several typographical errors, as indicated below:

§ 431.206 [Corrected]

1. On page 56505, in column two, § 431.206(c)(2), line three, "his" is corrected to read "his or her".

§ 431.213 [Corrected]

2. On page 56505, in column three, § 431.213(h), line three, the cross-reference to "§ 483.12(a)(4)(ii)" is revised to read "§ 483.12(a)(5)(ii)", and the cross-reference to "§ 483.12(a)(4)(i)." in line five is corrected to read "§ 483.12(a)(5)(i)."

§ 431.621 [Corrected]

3. On page 56506, in column two, § 431.621(c)(4), the cross-reference to "§§ 431.112(c) and 483.114(c)" in the fourth line of the subparagraph is corrected to read, "§§ 483.112(c) and 483.114(c)".

§ 483.102 [Corrected]

4. We make the following corrections to § 483.102:

a. On page 56507, in column one, § 483.102(a) is corrected by removing the phrase "and regardless of the source of payment for the NF services," in lines seven and eight of that paragraph.

b. On page 56507, in column two, § 483.102(b)(2), line five, "Revised" is corrected to read "revised".

§ 483.106 [Corrected]

5. We make the following corrections to § 483.106:

a. On page 56508, in column one, § 483.106(d) introductory text, line four, "requires," is corrected to read "requires".

b. On page 56508, in column two, § 483.106(e)(3), line two, "MR" is corrected to read "MI".

c. On page 56508, in column two, § 483.106(e)(3), line twelve, a period is added at the end of the sentence.

§ 483.110 [Corrected]

6. On page 56508, in column three, § 483.110(a), line eight, the cross-reference to "§ 431.52(b)(1)." is corrected to read "§ 431.52(b)."

§ 483.128 [Corrected]

7. On page 56510, in column three, § 483.128(i)(3), line five, the cross-reference to "paragraph (g)(4)" is corrected to read "paragraph (i)(5)".

§ 483.130 [Corrected]

8. We make the following corrections to § 483.130:

a. On page 56511, in column two, § 483.130(d)(3), line eleven, "active treatment;" is corrected to read "specialized services;".

b. On page 56511, in column three, § 483.130(f), line seven, the cross-reference to "§ 483.120(d)(4)–(6)." is corrected to read "§ 483.130(d)(4)–(6)."

§ 483.136 [Corrected]

9. On page 56513, in column three, § 483.136(c)(2) introductory text, lines ten and eleven, "State mental health authority" is corrected to read "State mental retardation authority".

§ 483.204 [Corrected]

10. On page 56514, column two, § 483.204(b), line four, "subchapter." is corrected to read "chapter."

BILLING CODE 4120-01-P

Proposed Rules

Federal Register

Vol. 58, No. 80

Wednesday, April 28, 1993

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

GENERAL ACCOUNTING OFFICE

Personnel Appeals Board

4 CFR Parts 27 and 28

Procedural Regulations

AGENCY: General Accounting Office Personnel Appeals Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The General Accounting Office Personnel Appeals Board is proposing to revise its procedural regulations. The changes are intended to clarify the meaning of some sections, to fine-tune certain procedures, to correct a few errors in the prior regulations and to bring the regulations into conformity with the Civil Rights Act of 1991.

DATES: Comments must be submitted on or before June 30, 1993.

ADDRESSES: All comments concerning these regulations should be addressed to Dora Patton, Clerk of the Board, Personnel Appeals Board, U.S. General Accounting Office, Union Center Plaza II, suite 830, 441 G St., NW., Washington, DC 20548.

FOR FURTHER INFORMATION CONTACT: Dora Patton, Clerk of the Board, 202-512-6137.

SUPPLEMENTARY INFORMATION: The General Accounting Office Personnel Appeals Board hears and decides cases brought by GAO employees concerning various personnel matters including adverse or performance-based actions, claims of discrimination, alleged prohibited personnel practices and labor-management relations. The Board's current procedural regulations appear at 4 CFR parts 27 and 28. The Board is proposing to revise and reissue these regulations. The changes are intended to clarify the meaning of some sections, to fine-tune certain procedures, to correct a few errors in the prior regulations and to bring the regulations into conformity with the Civil Rights Act of 1991. Since the Board's jurisdiction is confined to personnel practices at the General Accounting Office (GAO), the Board is distributing copies of its proposed regulations, along with an explanation of the proposed changes, directly to employee groups and management officials within GAO. The text of the proposed regulations is not being published in the **Federal Register** because it is not likely to be of interest outside of the GAO community. However, any individual or group interested in receiving a copy of the Board's proposed regulations, along with an explanation of the proposed changes, may do so by contacting the Clerk of the Board at the address and telephone number listed above. All comments on the proposed regulations must be received by the Clerk of the Board (address above) on or before June 30, 1993. The full text of the final revised regulations will be published in the **Federal Register** prior to the effective date of the new regulations.

List of Subjects

4 CFR Part 27

Government employees, organization and functions (government agencies).

4 CFR Part 28

Administrative practice and procedure, equal employment opportunity, government employees, labor-management relations.

Authority: 31 U.S.C. 753(d).

Alan S. Rosenthal,

Chairman, Personnel Appeals Board, U.S. General Accounting Office.

BILLING CODE 1610-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1150

[DA-93-09]

Dairy Promotion Program; Notice of Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of referendum.

SUMMARY: This document announces that a referendum will be held to determine whether milk producers favor the continuation of the National Dairy Promotion Program, which was established by the Dairy and Tobacco Adjustment Act of 1983. This action is in response to a request by a large number of producers for the opportunity to vote on the producer-funded program. In order for it to be continued, the Promotion Program must be approved by a majority of the producers who vote in the referendum.

DATES: The referendum will be held during August 1993.

FOR FURTHER INFORMATION CONTACT: Eugene Krueger, Referendum Agent, USDA/AMS/Dairy Division, room 2968 South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 690-4128.

SUPPLEMENTARY INFORMATION: This document announces that a referendum will be conducted among producers for the purpose of determining whether the Dairy Promotion and Research Order should be continued. Pursuant to section 116(b) of the Dairy and Tobacco Adjustment Act of 1983, such order shall remain in effect if the Secretary determines that continuance of the order is favored by a majority of the producers voting in a referendum who during a representative period (as determined by the Secretary) were engaged in the production of milk for commercial use.

The month of April 1993 is hereby determined to be the representative period for the conduct of such referendum.

Eugene Krueger is hereby designated as the agent of the Secretary to conduct such referendum in accordance with the procedure for the conduct of referenda in connection with the Dairy Promotion and Research Order (7 CFR 1150.200 *et seq.*).

Such referendum shall be held during the month of August 1993.

BILLING CODE 3410-02-M

VOL 58 ISS 80 AP 28 1993 UMI

Rural Electrification Administration

7 CFR Part 1788

REA Fidelity and Insurance Requirements for Electric and Telephone Borrowers

AGENCY: Rural Electrification Administration, USDA.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: As part of its ongoing program of updating and streamlining its regulations, the Rural Electrification Administration (REA) is considering revising its regulation concerning the fidelity and insurance requirements for electric and telephone borrowers. To assist the Agency in this endeavor, comments are requested concerning any aspect covered by the regulation.

DATES: Written comments and recommendations must be received by REA by June 28, 1993.

ADDRESSES: Written comments should be addressed to F. Lamont Heppe, Jr., Deputy Director, Program Support Staff, Rural Electrification Administration, room 2234, 14th and Independence Avenue, SW., Washington, DC 20250–1500. REA requires a signed original and three copies of all comments (7 CFR 1700.30(e)). All comments received will be made available for public inspection at room 2234-S (address as above) during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: F. Lamont Heppe, Jr., Deputy Director, Program Support Staff, room 2234-S, at the above address. Telephone: (202) 720–0736.

SUPPLEMENTARY INFORMATION: Advance notice is given that REA is considering the revision of 7 CFR part 1788, REA Fidelity And Insurance Requirements For Electric And Telephone Borrowers. Interested parties are invited to submit written comments concerning this advance notice. The submittal of comments from other lenders which have made loans to REA borrowers is particularly desired.

Background

Part 1788 was published in 1986 and has never been amended or revised. REA is interested in ensuring that the regulation remains current and compatible with industry practice. Consequently, comments will be considered on any issue covered by the regulation. REA is particularly interested in information on the insurance requirements of other lenders serving electric and telephone utilities.

Authority: 7 U.S.C. 901 *et seq.*, 7 U.S.C. 1921 *et seq.*

Dated: April 22, 1993.

Robert Peters,

Acting Under Secretary, Small Community and Rural Development.

BILLING CODE 3410–15–F

Animal and Plant Health Inspection Service

9 CFR Part 112

[Docket No. 92–098–1]

Viruses, Serums, and Toxins and Analogous Products; Packaging and Labeling

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the regulations pertaining to packaging and labeling of veterinary biological products by prohibiting final containers of product packaged at licensed establishments in cartons or other containers from being repackaged for sale or distribution. The proposed rule also clarifies that, unless otherwise authorized, labeling may only be performed at a licensed establishment and amends the "Applicability" statement to clarify its intent.

The proposed action is necessary in order to assure that, because of incomplete, unclear, misleading, or inappropriate labeling, veterinary biological products are not rendered worthless, contaminated, dangerous, or harmful. The effect of the proposed rule would be to prohibit the repackaging, for sale or distribution, of final containers of veterinary biological products that are packaged in multiple container cartons or other containers.

DATES: Consideration will be given only to comments received on or before June 28, 1993.

ADDRESSES: Please send an original and three copies of your comments to Chief, Regulatory Analysis and Development Staff, PPD, APHIS, USDA, room 804, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refer to Docket No. 92–098–1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. David A. Espeseth, Deputy Director, Veterinary Biologics, BBEP, APHIS, USDA, room 838, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, telephone number (301)–436–8245.

SUPPLEMENTARY INFORMATION:

Background

The Virus-Serum-Toxin Act (21 U.S.C. 151–159; hereinafter the Act), as amended by 1985 Food Security Act, prohibits the shipment of veterinary biological products anywhere in or from the United States that are worthless, contaminated, dangerous or harmful. It also prohibits such shipment of products unless they are prepared pursuant to USDA regulations in an establishment licensed by USDA. The term "preparation", as it is defined in the regulations, includes packaging and labeling. The 1985 amendments granted additional rulemaking authority to implement the requirements of the Act. Under the Act and regulations, the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture grants licenses for veterinary biological products which are pure, safe, potent, and efficacious when used according to label instructions. Complete labeling (either on the product or accompanying the product) must be reviewed and approved by APHIS in accordance with 9 CFR 112.5 prior to their use.

Recently, it has come to APHIS' attention that certain licensed veterinary biological products have been repackaged and sold after they had been removed from the licensed establishment where they were produced. This repackaging has resulted in products being sold without accompanying USDA approved labeling which was applied or included as part of product preparation. Such repackaging raises the issue of the safety and efficacy of the licensed product and of its use. It is also contrary to the statutory requirement that veterinary biological products must be "prepared" in a USDA licensed establishment.

There has been at least one recent case of the death and injury of dogs as a result of the use of such repackaged veterinary biological products.

Recent examples of repackaging which has resulted in false and misleading labeling which rendered the licensed product worthless and harmful are (1) the use of product labels for a product that were intended or approved for another licensed product; (2) the deletion or omission of approved directions for use, indications, warnings, or cautions from repackaged labels; (3) the alteration of directions for use on repackaged labels which rendered vaccination ineffective; and (4) the preparation of an unlicensed combination product resulting from the unauthorized repackaging of two licensed products from different manufacturers.

Part 112 of the regulations prohibits labeling which is false or misleading in any particular (see 9 CFR 112.1(a)). Section 112.1(c) states that biological products shall be withheld from the market if such labels have been altered, mutilated, destroyed, obliterated, or removed. Section 112.2(a)(5) requires full label instructions for the proper use of the product, including vaccination schedules, warnings, cautions, and the like. Section 112.4 further requires that labels used by distributors comply with requirements for review, approval, and filing of labels used for licensed biological products distributed and sold by licensees.

The current regulations, however, do not address directly the issue of repackaging of licensed veterinary biologics, except for poultry products in § 112.6(c)(1–4). The rationale for prohibiting repackaging of poultry products was to ensure that 1,000 dose packages of poultry product remained intact with the appropriate amount of diluent for use with automatic vaccinating systems which dispense large numbers of doses over a relatively short period of time. Prohibiting the repackaging of such a product assures that the proper amount of diluent is supplied with the multiple dose product for use with automatic dispensers and minimizes the loss of potency that would occur with time after reconstitution with diluent were the product to be administered manually as individual doses. These regulations, however, do not directly address the current safety and efficacy issues posed by the repackaging of multiple container cartons of other veterinary biological products.

In order to assure the safety and efficacy of biological products after they have been shipped from a licensed establishment, APHIS is proposing to amend its regulations by adding § 112.6 (e) and (f) which would prohibit the repackaging of final containers of product which had been packed in multiple container cartons or other containers by the licensee unless each final container of product has affixed thereto, or is accompanied by, complete approved labeling applied or included by the producer during preparation of the product. Repackaging after a product has been shipped from a licensed establishment has led, in many cases, to removal and alteration of approved label instructions. Such actions can render the product worthless, contaminated, dangerous, or harmful and result in product preparation that is in violation of the Act and regulations (see 21 U.S.C. 151). APHIS thus proposes to prohibit the repackaging of final containers of product (either single or multiple dose containers) packed in multiple container cartons if the carton label or enclosure is required to complete the labeling for the container.

Proposed paragraphs (a) through (d) of § 112.1 of the regulations would clarify that preparation, which includes labeling, of veterinary biological products shall only be done in a licensed establishment (see proposed § 112.1(a)), and that labeling which is altered, mutilated, destroyed, obliterated, or removed at any time prior to marketing of the product would render the veterinary biological product in violation of the regulations (see proposed § 112.1(c)). The regulations under proposed paragraphs (a) through (d) of § 112.1 would be applicable generally to any person and would not be restricted to licensees.

Proposed § 112.4 (introductory paragraph) would be revised to indicete that labeling used by subsidiaries, divisions, distributors, and permittees shall be prepared only in a licensed establishment and affixed by the licensee.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this proposed rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, it has been determined that this proposed rule would have an effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, and would not have a significant adverse effect on competition, employment, investment , productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The proposed rule would prohibit the repackaging of multiple container cartons of veterinary biological products which would result in (1) preparation, including labeling, of a veterinary biological product in violation of the Act and regulations; and (2) the removal or alteration of approved labeling, thereby compromising the safety and efficacy of the biological product. In the absence of approved labeling, the safe and effective use of the veterinary biological product cannot be assured. The proposed action would benefit users in that it would assure that users are provided with a product that is properly labeled with approved directions, indications, and cautions for use.

The intent of the action is to provide greater assurance to consumers that licensed veterinary biological products are prepared only with approved labeling with adequate directions for use. The prohibition against repackaging outside of licensed facilities would ensure that cases involving unapproved labeling of biological products such as those which resulted in the recent death and injury of dogs are avoided in the future. Given limited resources, APHIS believes that safety to animal health can best be assured by restricting to licensed facilities the preparation, which includes packaging and labeling, of veterinary biological products.

Distributors who are currently in the business of breaking apart multiple container cartons and repackaging them for sale as individual final containers of product would be provided notice that their actions are in violation of the Act and regulations. Distributors would still be able to purchase from licensed manufacturers products that are already individually packaged and labeled in accordance with part 112 rather than purchasing multiple container cartons that must be broken apart and repackaged to provide a single dose final container package for distribution. This action would not prohibit the distribution of "private label" products as long as the product was produced in a licensed establishment under an approved Outline of Production with approved labeling. Thus persons currently repackaging and distributing a licensed product could seek to have a licensee produce the product for distribution under a distributor label.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12778

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. It is not intended to have retroactive effect. This rule will not preempt State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative proceedings which must be exhausted prior to any judicial challenge to the provisions of this rule.

VOL 58 ISS 80 AP 28 1993 UMI

Paperwork Reduction Act

The proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials (see 7 CFR part 3015, subpart V).

List of Subjects in 9 CFR Part 112

Animal biologics.

Accordingly, 9 CFR part 112 is amended as follows:

PART 112—PACKAGING AND LABELING

1. The authority citation for 9 CFR part 112 continues to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.17, 2.51, and 371.2(d).

2. Section 112.1 would be revised to read as follows:

§ 112.1 General.

(a) Unless otherwise authorized or directed by the Administrator, each biological product prepared at a licensed establishment or imported shall be packaged and labeled as prescribed in this part before it is removed from the licensed establishment or presented for importation: *Provided*, That biological products to be imported for research and evaluation shall be subject to packaging and labeling requirements in § 112.9. *Provided further*, That unless otherwise exempted, all preparation, including packaging and labeling, of biological products shall only be done in a licensed establishment under an approved Outline of Production.

(b) No person shall apply or affix to or include with, or cause to be applied or affixed to or included with, any carton or final container of a biological product, any label, stamp, mark or statement that is false or misleading in any particular, is not in compliance with the regulations, or is not approved by APHIS.

(c) No person shall alter, mark or remove any approved labeling affixed to or included with any biological product prior to selling or otherwise distributing such product. In addition, no person shall mark any carton, other container, or final container of a biological product so as to falsify the labeling, make it misleading, or cause it to be illegible.

(d) Labels that are stamped, printed or glued directly on cartons, other containers, or final containers shall be legible throughout the dating period. Biological products bearing labels, which have been altered, mutilated, destroyed, obliterated or removed, shall be withheld from the market.

3. In § 112.4, the introductory paragraph is revised to read as follows:

§ 112.4 Subsidiaries, divisions, distributors, and permittees.

Labels used by subsidiaries, divisions, distributors, and permittees shall be affixed by the licensee in a licensed establishment where the product is produced. Such labels shall comply with requirements for their review, approval, and filing as provided in this section.

* * * * *

4. In § 112.6, new paragraphs (e) and (f) are added to read as follows:

§ 112.6 Packaging biological products.

* * * * *

(e) Final containers of biological product packaged at a licensed establishment in cartons or other containers shall not be removed from such cartons or containers and repackaged for sale or distribution unless each final container bears or is accompanied by complete and approved labeling which is affixed to or included with each container by the licensed establishment producing the product.

(f) Labels which are affixed to or included with a biological product shall not be removed or altered in any manner.

Done in Washington, DC, this 21st day of April 1993.

Kenneth C. Clayton,

Acting Assistant Secretary, Marketing and Inspection Services.

[FR Doc. 93–9889 Filed 4–27–93; 8:45 am]

BILLING CODE 3410–34–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

Schedules of Controlled Substances; Proposed Placement of Methcathinone Into Schedule I

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice of proposed rulemaking is issued by the Administrator of the Drug Enforcement Administration (DEA) to place methcathinone into Schedule I of the Controlled Substances Act (CSA). This proposed action by the DEA Administrator is based on data gathered and reviewed by the DEA. If finalized, this proposed action would impose the regulatory control mechanisms and criminal sanctions of Schedule I on the manufacture, distribution and possession of methcathinone.

DATES: Comments must be submitted on or before May 28, 1993.

ADDRESSES: Comments and objections should be submitted to the Administrator, Drug Enforcement Administration, Washington, DC 20537, Attention: DEA Federal Register Representative.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug and Chemical Evaluation Section, Drug Enforcement Administration, Washington, DC 20537. Telephone: (202) 307–7183.

SUPPLEMENTARY INFORMATION: On May 1, 1992, the Administrator of the DEA published a final rule in the **Federal Register** (57 FR 18824) temporarily placing methcathinone into Schedule I of the CSA using the temporary scheduling provisions of the CSA (21 U.S.C. 811(h)). This final rule, which became effective on the date of publication, was based on a finding by the Administrator that the temporary scheduling of methcathinone was necessary to avoid an imminent hazard to the public safety. Section 201(h)(2) of the CSA (21 U.S.C. 811(h)(2)) requires that the temporary scheduling of a substance expires at the end of one year from the effective date of the order. However, if proceedings to schedule a substance pursuant to 21 U.S.C. 811(a)(1) have been initiated and are pending, the temporary scheduling of a substance may be extended for up to six months. Under this provision, the temporary scheduling of methcathinone which would expire on May 1, 1993, may be extended to November 1, 1993. This extension is being ordered by the DEA Administrator in a separate action.

The DEA has gathered and reviewed the available information regarding the actual base and relative potential for abuse for methcathinone. The DEA, in conjunction with the National Institute on Drug Abuse (NIDA), has provided for the synthesis and biological testing of methcathinone. By letter, the Administrator has submitted data which the DEA has gathered regarding methcathinone to the Assistant Secretary for Health, Department of Health and Human Services. In accordance with 21 U.S.C. 811(b), the DEA Administrator also requested a

scientific and medical evaluation and a scheduling recommendation for methcathinone from the Assistant Secretary for Health.

Methcathinone has a chemical structure and pharmacological profile similar to that of methamphetamine and cathinone. All forms of methamphetamine have been controlled in Schedule II of the CSA since 1971. As a result of prior control of cathinone in Schedule I of the 1971 Convention on Psychotropic Substances and in response to a recommendation received by the Administrator from the Assistant Secretary for Health and Human Services, cathinone was placed into Schedule I of the CSA on February 14, 1993.

In preclinical studies, methcathinone hydrochloride produces pharmacological effects and appears to have an abuse potential similar to that of psychomotor stimulants such as the amphetamines. In a manner similar to that of other amphetamines, methcathinone hydrochloride increases spontaneous rodent locomotor activity, potentiates the release of radiolabelled dopamine from dopaminergic nerve terminals in the brain and causes appetite suppression. In drug discrimination studies, methcathinone hydrochloride evokes either (+)-amphetamine or cocaine induced appropriate responding. When examined in particular pharmacological assays for psychomotor stimulant-like activity, both the d and the l enantiomeric forms of methcathinone hydrochloride have been found to be pharmacologically active. In these assays, the l-form of methcathinone is more active than either d-methcathinone or (+)-amphetamine. Racemic methcathinone hydrochloride is intravenously self-addressed by baboons, thus indicating that methcathinone produces reinforcing effects in this laboratory animal and suggesting that this drug has a potential for abuse in the human population.

To date, the distribution and abuse of methcathinone has been documented in Michigan and Wisconsin. Abuse of methcathinone has been known since at least January 1991. Since that time, the abuse of methcathinone has increased substantially in the upper peninsula of Michigan and, more recently, in Wisconsin. The principal form of methcathinone distributed and abused is the hydrochloride salt of the 1-enantiomer, which exists as a white to off-white, chunky powdered material. It is usually sold as itself under such street names as "Cat" and "Goob". Less often it is passed off as methamphetamine under such names as "Crank" or "Speed". The most common route of administration is via nasal insufflation. Other routes of administration include oral ingestion, intravenous injection and smoking. Methcathinone is abused in binges lasting two to six days. During this time, methcathinone is repeatedly administered, resulting in the daily administration of amounts surpassing one or two grams. The methcathinone binge resembles amphetamine binges in that the abuser does not sleep or eat and takes in little in the way of liquids. The methcathinone binge is followed by a "crash" characterized by long periods of sleep, excess eating and possibly depression.

Methcathinone is abused for its psychomotor stimulant effects. It is reported by abusers to produce such effects as a "burst of energy", "headrush", "bodyrush", a "speeding of the mind", an "increased feeling of self-confidence" and "euphoria". Abusers have also reported that methcathinone produces unpleasant effects such as paranoia, hallucinations, anxiety, tremor, insomnia, malnutrition, weight loss, dehydration, sweating, stomach pains, noise bleeding and body aches. Following the crash, some individuals have experienced depression with or without thoughts of suicide.

Methcathinone hydrochloride is produced for street distribution in clandestine laboratories. Between June, 1991 and February, 1993, 19 active or clandestine methcathinone laboratories were seized by Federal, state and local law enforcement officials in Michigan. In August 1991 a clandestine methcathinone laboratory was seized in Seattle, Washington. Since January, 1993, at least two clandestine methcathinone laboratories have been encountered in Wisconsin.

Methcathinone has been encountered by law enforcement officials in Michigan and Wisconsin. Michigan State Police obtained the first street sample of methcathinone in February 1991. Since that time there have been over 50 encounters of methcathinone by Federal, state and law enforcement officials in Michigan. Methcathinone was first encountered in Wisconsin in March 1992. Since October 1992, there have been more than twenty Federal, state or local law enforcement encounters of methcathinone in Wisconsin. With the exception of the seizure of a single clandestine methcathinone laboratory in Washington, the DEA is not aware of any other law enforcement encounters of methcathinone within the United States, other than those in Michigan and Wisconsin.

Health officials in Michigan and Wisconsin have encountered abusers of methcathinone. There have been a number of documented emergency room cases involving the purported abuse of methcathinone. Drug abuse treatment centers in Marquette and Iron Mountain, Michigan, as well as several psychiatric treatment centers in Wisconsin have reported encounters with methcathinone abusers.

Sigma Chemical Company is the only known commercial manufacturer and supplier of methcathinone in the United States. The Food and Drug Administration (FDA) has notified the DEA that there are no exemptions or approvals in effect under section 505 of the Federal Food, Drug and Cosmetic Act for methcathinone. A search of the scientific and medical literature revealed no indications of current medical use of methcathinone in the United States.

The DEA Administrator, based on the information gathered and reviewed by his staff and after consideration of the factors in 21 U.S.C. 811(c), believes that sufficient data exists to propose and to support that methcathinone be placed into Schedule I of the CSA pursuant to 21 U.S.C. 811(a). The specific findings required pursuant to 21 U.S.C. 811 and 812 for a substance to be placed into Schedule I are as follows:

(1) The drug or other substance has a high potential for abuse.

(2) The drug or other substance has no currently accepted medical use in treatment in the United States.

(3) There is a lack of accepted safety for use of the drug or other substance under medical supervision.

Before issuing a final rule in this matter, the DEA Administrator will take into consideration the scientific and medical evaluation and scheduling recommendation of the Secretary of the Department of Health and Human Services in accordance with 21 U.S.C. 811(b). The recommendations of the Secretary regarding scientific and medical matters are binding on the Administrator and if the Secretary recommends that a substance should not be controlled, the DEA Administrator will not control it. The Administrator will also consider relevant comments from other concerned parties.

Interested persons are invited to submit their comments, objections or requests for a hearing in writing with regard to this proposal. Requests for a hearing should state with particularity the issues concerning which the person desires to be heard. All correspondence regarding this matter should be submitted to the Administrator, Drug

VOL 58 ISS 80 AP 28 1993 UMI

Enforcement Administration, Washington, DC 20537, Attention: DEA Federal Register Representative. In the event that comments, objections or requests for a hearing raise one or more issues which the Administrator finds warrant a hearing, the Administrator shall order a public hearing by notice of the **Federal Register**, summarizing the issues to be heard and setting the time for hearing.

The Administrator of the DEA hereby certifies that the proposed placement of methcathinone into Schedule I of the CSA will have no significant impact upon entities whose interests must be considered under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* This action involves the control of a substance with no currently approved medical use or manufacture in the United States.

This proposed rulemaking is not a major rule for the purposes of Executive Order 12291 (46 FR 13193) of February 17, 1981. It has been determined that drug scheduling matters are not subject to review by the Office of Management and Budget (OMB) pursuant to the provisions of Executive Order 12291. Accordingly, this drug scheduling action is not subject to the provisions of Executive Order 12778 which are contingent upon review by OMB.

This action has been analyzed in accordance with the principles and criteria in Executive Order 12612, and it has been determined that this proposed rulemaking does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

Under the authority vested in the Attorney General by section 201(a) of the CSA (21 U.S.C. 811(a)), and delegated to the Administrator of the DEA by Department of Justice regulations (28 CFR 0.100), the Administrator hereby proposes that 21 CFR part 1308 be amended as follows:

PART 1308—[AMENDED]

1. The authority citation for 21 CFR part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871b, unless otherwise noted.

2. Section 1308.11 is amended by adding paragraph (f)(6) to read as follows:

§ 1308.11 Schedule I.

* * * * *

(f) * * *

(6) Methcathinone (Some other names: 2-(methylamino)-propiophenone, alpha (methylamino)-propiophenone, 2-(methylamino)-1-phenylpropan-1-one, alpha-N-methylaminopropiophenone, monomethylpropion, ephedrone, N-methylcathinone, methycathinone, AL-464, AL-422, AL-463 and UR1431) its salts, optical isomers and salts of optical isomers . . . 1237.

3. § 1308.11 is further amended by removing and reserving paragraph (g)(3).

Dated: April 22, 1993.

Robert C. Bonner,

Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

21 CFR Part 1308

Schedules of Controlled Substances Proposed Transfer of Levo-alphacetylmethadol From Schedule I into Schedule II

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Administrator of the Drug Enforcement Administration (DEA) is issuing this notice of proposed rulemaking to transfer the Schedule I narcotic, levo-alphacetylmethadol (LAAM), to Schedule II of the Controlled Substances Act (CSA) in accordance with 21 U.S.C. 801 *et seq.* This action is initiated upon receipt of a letter from the Acting Assistant Secretary for Health, Department of Health and Human Services (DHHS), recommending that LAAM be transferred from Schedule I to Schedule II upon approval of a New Drug Application (NDA) for LAAM. As a result of this proposed rule, if finalized, the regulatory controls and criminal sanctions of Schedule II will be applicable to the manufacture, distribution, importation and exportation of LAAM. Additionally, the use of LAAM for the treatment of narcotic addiction will be subject to compliance with the requirements of the Narcotic Addict Treatment Act of 1974 and regulations concerning narcotic treatment programs.

DATES: Comments must be submitted on or before May 28, 1993.

ADDRESSES: Comments should be submitted to the Administrator, Drug Enforcement Administration, Washington, DC 20537, Attention: DEA Federal Register Representative/CCR.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug and Chemical Evaluation Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 307-7183.

SUPPLEMENTARY INFORMATION: On March 12, 1993, the Acting Assistant Secretary for Health, on behalf of the Secretary of the DHHS, sent the Administrator of the DEA a letter recommending that levo-alphacetylmethadol be transferred to Schedule II of the CSA once it is approved for marketing. Enclosed with the letter was a document prepared by the Food and Drug Administration (FDA) entitled "Basis for the Recommendation for Transferring of Levo-alpha-acetylmethadol (LAAM) from Schedule I to II of the Controlled Substances Act." The document contained a review of the factors which the CSA requires the Secretary to consider (21 U.S.C. 811(b) and 811(c)) and the summarized recommendations regarding the transfer of LAAM. The factors considered by the Acting Assistant Secretary for Health with respect to LAAM are:

(1) Its actual or relative potential for abuse;

(2) Scientific evidence of its pharmacological effects, if known;

(3) The state of the current scientific knowledge regarding the drug or other substance;

(4) Its history and current pattern of abuse;

(5) The scope, duration, and significance of abuse;

(6) What, if any, risk there is to the public health;

(7) Its psychic or physiological dependence liability; and

(8) Whether the substance is an immediate precursor of a substance already controlled under this title.

The FDA has received and reviewed substantial evidence on the effectiveness and safety of LAAM. The FDA's scientific and medical evaluation shows that LAAM has a potential for abuse and physical and psychological dependence liability similar to other μ-opioid agonists which are in Schedule II of the CSA. Upon approval of the NDA for treatment of narcotic addiction, LAAM will have met DEA's criteria for currently accepted medical use in treatment in the United States. These criteria were discussed at length in the matter of the Marijuana Rescheduling Petition, 57 FR 10499, 10503-10507 (1992). This transfer will apply to the *levo* isomer of alphacetylmethadol while all other isomers of alphacetylmethadol will remain in Schedule I.

Interested persons are invited to submit their comments or objections in writing regarding this proposal. If a person believes that one or more issues warrant a hearing, the reasons for such belief should be stated and summarized. If the Administrator finds that the written responses to this proposal warrant a hearing, the Administrator will order a public hearing. A notice of the hearing will be published in the **Federal Register** summarizing the issues to be heard and setting a time for the hearing that will be at least 30 days after the publication of the notice. If no objections presenting grounds for a hearing on this proposal are received within the time limitation or if interested parties waive or are deemed to have waived their opportunity for a hearing or to participate in a hearing, the Administrator, after giving consideration to written comments and objections, will issue his final order pursuant to 21 CFR 1308.46 without a hearing. DEA's final decision concerning the relative abuse potential of LAAM will take into account the Acting Assistant Secretary's recommendation and any information received in response to this proposal.

Pursuant to 5 U.S.C. 605(b), the Administrator certifies that the transfer of LAAM, as proposed herein, will have no significant impact upon small businesses or other entities whose interests must be considered under the Regulatory Flexibility Act (Pub. L. 96-354). Many of the regulatory requirements imposed on Schedule II substances are similar to those imposed on Schedule I substances. Additionally, substances in Schedule II may be used in medical treatment in the United States.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this matter does not have sufficient federalism implications to require the preparation of a Federalism Assessment.

In accordance with the provisions of 21 U.S.C. 811(a), this proposel to transfer LAAM from Schedule I to Schedule II is a formal rulemaking "on the record after opportunity for hearing." Such proceedings are conducted pursuant to the provisions of 5 U.S.C. 556 and 557 and as such have been exempted from the consultation requirements for Executive Order 12291 (46 FR 13193).

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs, Reporting and Record keeping requirements.

Based on the scientific and medical evaluation and the recommendation of the Acting Assistant Secretary for Health, the Administrator of the DEA, pursuant to 21 U.S.C. 811(a) and 811(b), finds that:

(1) Based on all available information, LAAM has a high potential for abuse.

(2) LAAM, upon final approval of a NDA by the FDA, will meet the criteria for currently accepted medical use in treatment in the United States.

(3) Abuse of this substance may lead to severe psychological or physical dependence.

Therefore, under the authority vested in the Attorney General (21 U.S.C. 811(a)) and delegated to the Administrator of the DEA by the Department of Justice regulations (28 CFR 0.100), the Administrator hereby proposes that 21 CFR Part 1308 be amended as follows:

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

1. The authority citation for 21 CFR part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b) unless otherwise noted.

2. Section 1308.11 is proposed to be amended by revising paragraph (b)(4) to read as follows:

§ 1308.11 Schedule I.

* * * * *

(b) * * *

(4) Alphacetylmethadol (except Levo-alphacetylmethadol (LAAM))—9603

* * * * * *

3. Section 1308.12 is proposed to be amended by redesignating the existing paragraphs (c)(11) through (c)(25) as (c)(12) through (c)(26) respectively and adding a new paragraph (c)(11) to read as follows:

§ 1308.12 Schedule II.

* * * * *

(c) * * *

(11) Levo-alphacetylmethadol (LAAM)—9648

* * * * * *

Dated: April 22, 1993.

Robert C. Bonner,

Administrator of Drug Enforcement.

RIN 1545-AQ23

Exports of Chemicals That Deplete the Ozone Layer; Special Rules for Certain Medical Uses of Chemicals That Deplete the Ozone Layer; Hearing Cancellation

AGENCY: Internal Revenue Service, Treasury.

ACTION: Cancellation of notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of cancelletion of a public hearing on proposed regulations relating to taxes imposed on exports of chemicals that deplete the ozone layer, taxes imposed on ozone-depleting chemicals used as medical sterilants or propellants in metered-dose inhalers, and floor stocks taxes on ozone-depleting chemicals.

DATES: The public hearing originally scheduled for Thursday, May 27, 1993, beginning at 10 a.m. is cancelled.

FOR FURTHER INFORMATION CONTACT: Carol Savage of the Regulations Unit, Assistant Chief Counsel (Corporate), (202) 622-8452 or (202) 622-7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 4681 and 4682 of the Internal Revenue Code. A notice of proposed rulemaking and public hearing appearing in the **Federal Register** for Friday, January 15, 1993, (58 FR 4625), announced that the public hearing on the proposed regulations would be held on Thursday, May 27, 1993, beginning at 10 a.m., in the Commissioner's Conference Room, room 3313, Internal Revenue Service Building, 1111 Constitution Avenue, NW., Washington, DC.

The public hearing scheduled for Thursday, May 27, 1993, has been cancelled.

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

RIN No. 2070-AC18

Cross-Linked Polyurea-Type Encapsulating Polymer; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that an exemption from the requirement of a tolerance be established for residues of cross-linked polyurea-type encapsulating polymer when used as an inert ingredient (encapsulating agent) in pesticide formulations applied to growing crops only. This regulation replaces the current exemption for cross-linked polyurea-type encapsulating polymer when used as an encapsulating material in pesticide formulations applied prior to planting under 40 CFR 180.1039. This proposed regulation was requested by ICI Americas, Inc.

DATES: Comments, identified by the document control number [OPP-300281], must be received on or before May 28, 1993.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 1132, Crystal Mall Bldg. #2, 1921 Jefferson Davis Highway Arlington, VA 22202. Information submitted as a comment concerning this document may be claimed confidential by marking any part of all of that information as "Confidential Business Information" (CBI).

Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential will be included in the public docket by EPA without prior notice. The public docket is available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Connie Welch, Registration Support Branch, Registration Division (H7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: 2800 Crystal Drive, North Tower, Arlington, VA 22202, (703)-308-8320.

SUPPLEMENTARY INFORMATION: ICI Americas, Inc., Wilmington, DE 19897, has submitted pesticide petition (PP) 2E4146 to EPA requesting that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(e), propose to amend 40 CFR 180.1001(d) by establishing an exemption from the requirement of a tolerance for residues of cross-linked polyurea-type encapsulating polymer when used as an inert ingredient (encapsulating agent) in pesticide formulations applied to growing crops only. This regulation replaces the current exemption from the requirement of a tolerance for this chemical under 40 CFR 180.1039. Because neither the amount nor the use in the formulation has any bearing on the exemption, reference to a specific amount has been dropped.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

The data submitted in support of the current exemption and also the data submitted in this petition have been evaluated. As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305), the Agency established data requirements which will be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. Exemptions from some or all of the requirements may be granted if it can be determined that the inert ingredient will present minimal or no risk. The Agency has decided that any additional data normally required to support the proposed tolerance exemption for cross-linked polyurea-type encapsulating polymer will not need to be submitted. The rationale for this decision is described below:

In the case of certain chemical substances which are defined as "polymers," the Agency has established a set of criteria which identify categories of polymers that present low risk. These criteria (described in 40 CFR 723.250) identify polymers that are relatively unreactive and stable compared to other chemical substances as well as polymers that typically are not readily absorbed. These properties generally limit a polymer's ability to cause adverse effects. In addition, these criteria exclude polymers about which little is known. The Agency believes that polymers meeting the criteria noted above will present minimal or no risk. Cross-linked polyurea-type encapsulating polymer conforms to the definition of a polymer given in 40 CFR 723.250(b)(11) and meets the following criteria which are used to identify low-risk polymers:

1. The minimum average molecular weight of the above-mentioned polymer is 5×10^{13}. Substances with molecular weights greater than 400 are generally not readily absorbed through the intact skin and substances with molecular weights greater than 1,000 are generally not absorbed through the intact gastrointestinal (GI) tract. Chemicals not absorbed through the skin or GI tract are generally incapable of eliciting a toxic response.

2. The above-mentioned polymer is not a cationic polymer, nor is it reasonably anticipated to become a cationic polymer in a natural aquatic environment.

3. The above-mentioned polymer does not contain less than 32.0 percent by weight of the atomic element carbon.

4. The above-mentioned polymer contains as an integral part of its composition the atomic elements carbon, hydrogen, nitrogen, and oxygen.

5. The above-mentioned polymer does not contain as an integral part of its composition, except as impurities, any elements other than those listed in 40 CFR 723.250(d)(3)(ii).

6. The above-mentioned polymer is not a biopolymer, a synthetic equivalent of a biopolymer, or a derivative or modification of a biopolymer that is substantially intact.

7. The above-mentioned polymer is not manufactured from reactants containing, other than as impurities, halogen atoms or cyano groups.

8. The above-mentioned polymer does not contain reactive functional groups that are intended or reasonably anticipated to undergo further reaction.

9. The above-mentioned polymer is not designed or reasonably anticipated to substantially degrade, decompose, or depolymerize. Based upon the above information and review of its use, EPA has found that, when used in accordance with good agricultural practice, this ingredient is useful and a tolerance is not necessary to protect the public health.

Therefore, EPA proposes that the exemption from the requirement of a tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [OPP-300281]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic effect on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: April 8, 1993.

Lawrence E. Culleen,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

Part 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1001(d) table is amended by adding and alphabetically inserting the inert ingredient, to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(d) * * *

Inert ingredients	Limits	Uses
. . .	. . .	. . .
Cross-linked polyurea-type encapsulating polymer		Encapsulating agent
. . .	. . .	. . .

* * * * *

§ 180.1039 [Removed]

3. By removing § 180.1039 *Cross-linked polyurea-type encapsulating polymer; exemption from the requirement of a tolerance.*

BILLING CODE 6560-50-F

40 CFR Part 82

[FRL-4618-9]

Extension of the Deadline for Submission of Comments on the Amended Schedule for the Phaseout of Ozone-Depleting Substances and Request for Comment on the Allowance Level for 1995 of Class I, Group I Substances

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; extension of comment period and request for comment.

SUMMARY: Through this action, EPA is extending the deadline for the submission of comments on the proposed regulation on the amended schedule on the phaseout of ozone-depleting substances. Further, EPA is specifically seeking comment on the 1995 reduction level in allowable production and consumption of class I, group I substances proposed on March 18, 1993.

DATES: This action extends the deadline for the submission of comments on the proposed rule published on March 18, 1993 at (58 FR 15014) to May 18, 1993. Comments on this proposed rule should be submitted to EPA no later than May 18, 1993.

ADDRESSES: Comments on the notice of proposed rulemaking and on this notice should be submitted in duplicate to the attention of Air Docket No. A-92-13 at: U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC, 20460. A copy should also be sent to Peter Voigt at the address indicated below. The Docket is located in room M-1500, First Floor Waterside Mall.

FOR FURTHER INFORMATION CONTACT: Peter Voigt, U.S. EPA, Stratospheric Protection Division, Office of Atmospheric Programs, Office of Air and Radiation, 6205J, 401 M Street SW., Washington, DC, 20460, (202) 233-9185.

SUPPLEMENTARY INFORMATION:

Background

On March 18, 1993, EPA issued a proposed rule affecting the phaseout of a number of ozone-depleting substances (58 FR 15014). Specifically, the notice proposes to amend the phaseout schedule for specified ozone-depleting substances under section 606 of the Clean Air Act Amendments, responds to several petitions submitted to EPA under section 602, and proposes to implement amendments and adjustments to the Montreal Protocol agreed to by the Parties at their November 1992 meeting. EPA held a public hearing on the proposal on April 2, 1993. At that hearing, the Methyl Bromide Working Group (MBWG) requested that EPA extend the public comment period and provide for a second public hearing after ninety days from the date of the proposal. This would effectively extend the public comment period to 120 days, since the comment period must remain open for thirty days following a public hearing

VOL 58 ISS 80 AP 28 1993 UMI

under the Clean Air Act section 307(d)(5). The MBWG confirmed this request in a letter to the docket dated April 6, 1993, and referred to the reasons for the request provided at the public hearing. At the public hearing, the MBWG explained that it needs the additional time to assemble and evaluate pertinent scientific and economic information and to prepare its written comments; that 45 days is an inadequate period of time for these tasks; that a public meeting to be held after submission of the written comments; that 45 days is an inadequate period of time for these tasks; that a public meeting to be held after submission of these written comments will allow interested parties to address issues others have raised; and that there is no compelling reasons for the Agency to promulgate a final rule listing methyl bromide at the expense of informed public review and comment.

In response to the MBWG's request, EPA has decided to allow an additional fifteen days for public comment. The comment period for this proposed rule will now close on May 18, 1993. EPA believes that this comment period of 60 days is adequate time for interested parties to prepare comments on this proposed rule. EPA notes that the MBWG has been aware of the petition filed with EPA to list methyl bromide for more than a year prior to the proposal. Further, EPA believes that the interested parties had sufficient opportunity at the April 2 public hearing or in their own written comments to address the issues others have raised in written comments. Therefore, EPA does not believe that a second public hearing is warranted.

As a part of the proposal on the phaseout of ozone-depleting substances, EPA had specified an interim reduction of 85 percent of the allowable baseline of production and consumption for class I, group I substances (CFCs) for the control period beginning on January 1, 1995. Comments received by EPA have raised concerns regarding the viability of the 85 percent interim reduction and EPA is specifically seeking comment on the advantages and disadvantages of changing this reduction to 75 percent of the allowable baseline. This would allow greater availability prior to the complete phaseout. Comments on this issue should also be submitted to the Agency prior to the close of the comment period on May 18, 1993.

Dated: April 22, 1993.

Michael H. Shapiro,

Acting Assistant Administrator, Office of Air and Radiation.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 73 and 74

[MM Docket No. 93-114, FCC 93-187]

Radio Broadcast Services; Low Power Television Service; Application Acceptance Standard; Definition of Major Changes; Four-letter Call Signs

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission, by this Notice of Proposed Rulemaking (Notice) seeks comments on proposals to amend the rules governing the low power television (LPTV) service in three respects. The Notice first solicits comment on proposals to relax the strict acceptance standard for new and major change applications including the expansion of the waiver policy regarding terrain shielding. Second, the Notice solicits comment on a proposal to narrow the definition of a major change. Last, in response to a Petition for Rulemaking filed by the Community Broadcasters Association, the Notice seeks comment on two proposals for making licensed low power television stations eligible to apply for conventional four-letter call signs.

DATES: Comments are due by June 18, 1993, and reply comments are due by July 16, 1993.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Keith A. Larson, Mass Media Bureau, Video Services Division, Low Power Television Branch, (202) 632-3894.

SUPPLEMENTAL INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rulemaking in MM Docket. No. 93-114, adopted on April 9, 1993, and released on April 22, 1993. The complete text of this Notice of Proposed Rulemaking is available for inspection and copying during normal business hours in the FCC Reference Center, room 239, at the Federal Communications Commission, 1919 M Street, NW., Washington, DC, 20554, and may also be purchased from the Commission's copy contractor, International Transcription Service, at (202) 857-3800, 2100 M Street, NW., suite 140, Washington, DC 20037.

Synopsis of the Notice of Proposed Rulemaking

1. Since the inception of the LPTV service in 1982, the Commission has employed a strict approach known as the "complete and sufficient" acceptance standard for new and major change LPTV and TV translator applications. See 47 CFR 73.3564(a). Under this approach applications must be letter perfect at the time they are filed and are subject to dismissal for minor defects and omissions. The Commission adopted a strict standard at the time in order to process an extremely large number of pending applications on file. However, the backlog of pending LPTV applications has since decreased; at the same time the quality of the applications received has increased. Therefore, the Commission believes it may now be possible to relax the application acceptance standard without causing an undue delay in processing applications or in authorizing service to the public.

2. Accordingly, the Commission proposes to employ the "substantially complete" acceptance standard, used in full service television, for new and major change applications filed in the LPTV service. Under this proposed standard, an application would be dismissed with no opportunity for reinstatement only if it were patently defective. A determination of substantially incomplete is made when an application, viewed as a whole, cannot be processed. Under this proposed approach, applications found to be substantially complete, but containing minor defects or omissions other than those related to fee matters or the timeliness of an application, would not be returned. Rather, applicants would be sent a deficiency letter and afforded a 30-day opportunity to cure all defects specified in the letter.[1] Corrective amendments would have to be minor amendments and otherwise acceptable in all respects.

3. The Notice also proposes an alternative mid-level acceptance standard which, while not as lenient as substantially complete, would be less strict than the present complete and sufficient standard. Under this hybrid approach, not only would applications be returned for deficiencies which would fail the substantial completeness test, but applications would also be subject to dismissal, without an

[1] Consistent with this approach, applicants could submit corrective amendments to eliminate predicted interference.

opportunity for a corrective amendment, for certain specified defects. Adoption of this approach would require specification of the defects which would be considered so serious or time-consuming that correction should not be allowed.

4. The Commission seeks comment on its proposals to modify its LPTV acceptance standards. Further, the Notice also solicits comment on the practicality of permitting corrective amendments for applications that are defective due to predicted interference and whether there are alternatives to the approaches outlined therein that would be consistent with the twin goals of application quality and processing efficiency.

5. Further, for the same reasons which permit consideration of relaxing the application acceptance standard, the Commission proposes removing the current restrictions regarding the acceptance of waiver requests based on terrain shielding. Pursuant to Commission Policy Regarding Terrain Shielding ("Policy Statement"), 53 FR 15557, May 2, 1988, *recon. granted in part*, 54 FR 1174, January 12, 1989, the Commission waives its interference protection rules when it is apparent that, due to intervening terrain, interference to another facility would not be caused by an applicant's proposed operation. However, under the present policy, the Commission limits consideration of terrain shielding waivers to applications that are not mutually exclusive with any other application submitted during the same filing window.[2] The Notice proposes to no longer limit consideration of applications with terrain shielding waivers to those which are not mutually exclusive.

6. Under the Commission's proposal, applicants whose proposed operations are predicted to cause interference to another application filed during the same filing window could submit detailed terrain profiles prepared in the manner specified in the Policy Statement demonstrating that terrain shielding would prevent actual interference. Further, the proposal also provides that, in accordance with the Policy Statement permitting applicants to submit letters of assent from potentially affected stations stating that interference would not occur due to terrain shielding, applicants could resolve mutual exclusivity among themselves by agreement. In addition, the Notice proposes to consider terrain shielding when raised for the first time by applicants in amendments responding to deficiency letters issued under the proposed new acceptance standard. The Notice seeks comments on the Commission's proposal to extend its terrain shielding waiver policy.

7. Next, the Commission's rules define certain modifications to authorized facilities as major changes. See 47 CFR 73.3572(a). In the case of LPTV and TV translator stations, major changes generally include changes in frequency (output channel), operating power, transmitting antenna system, antenna height and antenna location exceeding 200 meters. However, such changes are not considered major if the resulting signal range of the station would not increase in any horizontal direction. In other words, changes in facilities are considered to be "minor", provided that the station's protected service contour, as modified, lies completely within its unmodified service contour. Major changes were defined in a broad manner when the service was established. The Commission's experience, however, leads it to believe that a more precise definition of the rule can be devised which could enhance the ability of LPTV and TV translator operators to make necessary modifications to their facilities without causing an undue burden upon the staff. The Commission believes that the modifications it is proposing to allow are minor with respect to the rights of other operators and the public.

8. Accordingly, the Commission proposes that any modification to an existing authorization, other than a change in channel be considered a minor change, provided that three conditions are met. First, the proposal must be in compliance with the low power television interference protection rules. Second, the application must not be mutually exclusive with any previously filed application. Third, the protected contour resulting from the modification must be entirely enclosed by a circle, centered at the previously authorized site coordinates, and of radius equal to the largest distance between those coordinates and the protected contour resulting from the existing authorization. The Notice proposes to limit this proposal to authorized facilities and, therefore, not to extend it to pending applications.

9. Under this proposal, stations using directional antennas would be permitted to increase the extent of their footprints in particular directions. In these cases, the LPTV interference protection standards would subsequently be applied to the larger service contour due to the minor change; the bounding circle itself would not be protected against interference. As a result, situations could arise where minor change applications, which may be filed outside of filing windows, might become entangled in interference conflicts with later-filed applications; for example, "new and major change" applications tendered in a filing window. In order to continue authorizing minor changes relatively quickly, the Commission wishes to prevent such applications from being mutually exclusive and involved in the lottery process. Therefore, the Notice proposes to consider minor change applications cutoff on the date filed.

10. The Commission recognizes that this policy could adversely affect some prospective applicants whose later-filed application proposals might conflict with, and be considered untimely filed to, a minor change application having cut off status. Moreover, prospective applicants for new facilities might design a proposed operation to avoid prohibited signal contour overlap within the existing protected contour overlap of another facility, but would not anticipate such overlap with the latter facility's slightly larger protected contour resulting from its pending minor change application. However, the Commission believes that the relatively few instances in which these situations are likely to occur could be resolved through minor amendments. Nevertheless, the Notice proposes to delay implementation of the broader allowance for minor changes until after the close of the first LPTV filing window following adoption of these proposals. Additionally, the Notice proposes to permit minor change applications to be filed during filing windows. However, those applications which increase a station's protected contour in a horizontal direction and are found to be mutually exclusive with other applications in that window would be reclassified as major change applications and processed accordingly.

11. The Commission seeks comment on whether the present distinction between major and minor changes should be modified, including our suggested approach, and whether there are alternatives that could accomplish the Commission's objective. Further, the Notice asks for comment on the proposal to cut off minor change applications on the date filed, as well as whether the proposal to broaden the definition of a minor change should be limited to authorized facilities.

12. Finally, in its Petition for rulemaking (RM-7772), the Community Broadcasters Association (CBA) stated

[2] The Commission accepts new and major change applications only during designated filing windows.

VOL 58 ISS 80 AP 28 1993 UMI

that the difficulty low power television stations already face in making ADI-wide ratings report due to their smaller coverage area, is exacerbated by the fact that ratings services generally have difficulty determining the audience levels that view these stations.[3] Accordingly the Commission believes that the assignment of four-letter call signs to low power television stations may benefit an industry struggling to reach sufficient audience share levels to be economically viable, by more readily enabling viewers to recognize the low power stations as television stations.

13. Therefore, the Commission proposes to allow licensed low power television stations to apply for four-letter call signs. The Notice sets forth two options for implementing this proposal. Under the first option, as suggested by the CBA, only low power television stations which operate a minimum number of hours, provide a certain amount of locally originated programming and abide by the nonengineering rules for conventional television stations would be eligible to receive four-letter call signs. Under the second option, which the Commission tentatively favors, all licensed low power television stations would be entitled to apply for four-letter call signs, irrespective of the nature or extent of their programming.

14. The Notice seeks comment on these two proposals, and whether low power television licensees, in general, should be eligible to apply for four-letter call signs. Further, the Commission is interested in what effect, if any, this proposal would have on full service television broadcasters and any other suggestions which might assist it in implementing this proposal.

Administrative Matters

Initial Regulatory Flexibility Analysis

Pursuant to the Regulatory Flexibility Act of 1980, the Commission finds:

15. *Reason for the Action:* The Commission is initiating this rulemaking to consider whether to make its low power television and television translator rules more lenient with respect to: The acceptance and amendment of defective applications; the definition of major change applications; and the assignment of four-letter call signs. Consideration of these changes is prompted by recent favorable changes in the quality and quantity of these applications and in response to a petition for rulemaking by the Community Broadcasters Association.

16. *Objective of the Action:* The Commission seeks public comment on its tentative conclusions that the strict complete and sufficient processing procedures are no longer necessary; that a relaxes definition of major changes will allow operators increased flexibility to make facilities changes without having to await a filing window, and thereby expedite service to the public; and that four-letter call signs will be beneficial to the LPTV industry by enhancing viewer recognition.

17. *Legal Basis:* Authority for the actions proposed in the Notice may be found in sections 4, 301 and 303 of the Communications Act of 1934, as amended, 47 CFR 154, 301 and 303.

18. *Reporting, Recordkeeping, and Other Compliance Requirements:* The Notice proposes no new requirements.

19. *Federal Rules Which Overlap Duplicate or Conflict With the Proposed Rule:* None.

20. *Description, Potential Impact and Number of Small Entities Involved:* The Commission believes that the adoption of the proposals set forth in this Notice would benefit small entities interested in acquiring new low power television and television translator licenses and small entities already licensed for low power television and television translator facilities who wish to modify their current authorizations. This proposal would also allow such applicants a limited opportunity to amend defective applications to correct errors.

21. *Any Significant Alternatives Minimizing the Impact on Small Entities and Consistent With the Stated Objectives:* The purpose of the Notice is to seek comment on issues including alternatives that would minimize the impact on small entities.

22. As required by section 603 of the Regulatory Flexibility Act, the Commission has prepared an initial regulatory flexibility analysis (IFRA) of the expected impact of these proposed policies and rules on small entities. Written public comments are requested on the IFRA. These comments must be filed in accordance with the same filing deadlines as comments on the rest of the Notice, but they must have a separate and distinct heading designating them as responses to the regulatory flexibility analysis. The Secretary shall cause a copy of the Notice, including the initial regulatory flexibility analysis, to be sent to the Chief Counsel for Advocacy of the Small Business Administration in accordance with Section 603(a) of the Regulatory Flexibility Act, Pub. L. No. 96–354, 94 Stat. 1164, 5 U.S.C. Section 601 *et seq.* (1981).

Ex Parte

23. This is a non-restricted notice and comment rulemaking proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in the Commission's rules. See generally 47 CFR 1.1202, 1.1203 and 1.1206(a).

Comments

24. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before June 18, 1993, and reply comments on or before July 16, 1993. To file formally in this proceeding, you must file an original plus four copies of all comments, reply comments, and supporting comments. If you want each Commissioner to receive a personal copy of your comments, you must file an original plus nine copies. You should send comment and reply comments to the Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center, room 239, Federal Communications Commission, 1919 M. Street, NW., Washington, DC 20554.

DEPARTMENT OF AGRICULTURE

Forest Service

Newspapers To Be Used for Publication of Legal Notice of Appealable Decisions for Southern Region; Alabama, Kentucky, Georgia, Tennessee, Florida, Louisiana, Mississippi, Virginia, West Virginia, Arkansas, Oklahoma, North Carolina, South Carolina, Texas, Puerto Rico

AGENCY: Forest Service, USDA.

ACTION: Notice.

SUMMARY: Deciding Officers in the Southern Region will publish notice of decisions subject to administrative appeal under 36 CFR part 217 in the legal notice section of the newspapers listed in the **SUPPLEMENTARY INFORMATION** section of this notice. As provided in 36 CFR 217.5(d), the public shall be advised, through **Federal Register** notice, of the principal newspaper to be utilized for publishing legal notices of decisions. Newspaper publication of notices of decisions is in addition to direct notice of decisions to those who have requested notice in writing and to those known to be interested in or affected by a specific decision.

DATES: Use of these newspapers for purpose of publishing legal notices of decisions subject to appeal under 36 CFR part 217 shall begin on or after the date of this publication.

FOR FURTHER INFORMATION CONTACT: Jean Paul Kruglewicz, Regional Appeals Coordinator, Southern Region, Planning and Budget, 1720 Peachtree Road, NW., Atlanta, Georgia 30367–9102, Phone: 404–347–4867.

SUPPLEMENTARY INFORMATION: Deciding Officers in the Southern Region will give legal notice of decisions subject to appeal under 36 CFR part 217 in the following newspapers which are listed by Forest Service administrative unit. Where more than one newspaper is listed for any unit, the first newspaper listed is the principal newspaper that will be utilized for publishing the legal notices of decisions. Additional newspapers listed for a particular unit are those newspapers the Deciding Officer expects to use for purposes of providing additional notice. The timeframe for appeal shall be based on the date of publication of the legal notice of the decision in the principal newspaper.

Southern Regional Forester Decisions affecting National Forest System lands in more than one state of the 13 states of the Southern Region and the Commonwealth of Puerto Rico.

Atlanta Journal, published daily in Atlanta, GA

BILLING CODE 3410–11–M

Suitability Study for Nine Streams and Rivers Being Considered for National Wild and Scenic River Status, Tahoe National Forest, Placer, Yuba, Eldorado, Sierra, and Nevada Counties, CA

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service, USDA, will prepare a legislative environmental impact statement (EIS) and wild and scenic river study report to determine the suitability or non-suitability of the approximately 70 miles of nine eligible streams and rivers on the Tahoe National Forest and the Lake Tahoe Basin Management Unit for inclusion in the National Wild and Scenic Rivers System. In addition, the agency gives notice of the environmental analysis and decisionmaking process that will occur on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATES: Comments concerning the suitability of these rivers must be received by May 31, 1993.

ADDRESSES: Submit written comments and suggestions to Terry B. Randolph, Planning Team Leader, P.O. Box 640, Carson City, Nevada 89701.

VOL 58 ISS 80 AP 28 1993 UMI

FOR FURTHER INFORMATION CONTACT:

Terry Randolph, Planning Team Leader, P.O. Box 640, Carson City, Nevada 89701 or telephone (702) 882–3436.

SUPPLEMENTARY INFORMATION: The Tahoe National Forest Plan and the Lake Tahoe Basin Management Unit Forest Plan determined the eligibility of the approximately 70 miles of the rivers located within the Tahoe Basin and the Truckee River drainage. The eligible rivers are:

1. Upper Truckee River from its headwaters below Carson Pass to Christmas Valley near the south shore of Lake Tahoe
2. Truckee River from Tahoe City to Truckee
3. Martis Creek
4. Cold Stream
5. Alder Creek
6. Sagehen Creek
7. Perazzo Creek
8. Little Truckee River
9. Upper Independence Creek

The planned EIS completes considering these streams and rivers for inclusion in the wild and scenic rivers system.

The suitability study and EIS will consider approximately 70 miles of the nine eligible rivers. The area of consideration for each river is a minimum of ¼ mile from each bank for the entire length of the eligible portion of the river within the Tahoe National Forest and Lake Tahoe Basin Management Unit boundaries.

Public participation will be especially important at several points during the analysis. The first point is the scoping process (40 CFR 1501.7). The Forest Service has and is seeking information, comments, and assistance from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preparation of the draft environmental impact statement.

Informal open houses will be held at Truckee, Tahoe City, and South Lake Tahoe, California in the early stages of the analysis to inform the public of the analysis process and to provide for public participation and involvement. Federal, State, and local agencies, user groups, and other organizations who would be interested in the study will be invited to participate in scoping the issues that should be considered.

The comment period on this draft environmental impact statement will be 90 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register**. It is very important that those interested in the suitability of the streams for inclusion in the National Wild and Scenic Rivers system participate at this time.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp* v. *NRDC*, 435 U.S. 519, 533 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Suppl. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 90-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points. After the comment period ends on the draft EIS, the comments will be analyzed and considered by the Forest Service in preparing the final environmental impact statement.

John Skinner, Forest Supervisor, Tahoe National Forest, P.O. Box 6003, Nevada City, California 95959–6003, and Robert Harris, Forest Supervisor, Lake Tahoe Basin Management Unit, 870 Emerald Bay Road, Suite 1, South Lake Tahoe, California 96150 are the responsible officials for the suitability study. Michael Epsy, Secretary of Agriculture, U.S. Department of Agriculture, room 200–A, Adm. Bldg., Washington, DC 20250, is the responsible official for recommendations for wild and scenic river designation.

The draft environmental impact statement is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by December 31, 1993. At that time the EPA will publish a notice of availability of the draft EIS in the **Federal Register**.

Dated: April 20, 1993.

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Action Affecting Export Privileges

In the Matter of: Reza Zandian, also known as Golamreza Zandianjazi, with addresses at—

5 Hillsborough, Newport Beach, California 92660
and
c/o Iran Business Machines, USA, 600 Anton Boulevard, Costa Mesa, California 92626
Charles Robert Reger, 9582 Erskine Drive, Huntington Beach, California 92646
Iran Business Machines, No. 50 Molla Sadra Avenue, 14357 Tehran, Iran
Iran Business Machines, USA, 600 Anton Boulevard, Costa Mesa, California 92626
Lucach Corporation, and its division, Computerworld North America, also known as Computer World, 17526–B Von Karman, Irvine, California 92714
and
Computerworld Europe, also known as Computer World and C.E.P.A.T., Rue Jean-Grandel, BP 12–95102 Argenteuil, France,
Respondents.

Order Modifying Temporary Denial Order

On April 16, 1993, pursuant to the provisions of § 788.19 of the Export Administration Regulations (currently codified at 15 CFR parts 768–799 (1992)) (the Regulations), issued pursuant to the Export Administration Act of 1979, as amended (currently codified at 50 U.S.C.A. app. §§ 2401–2420 (1991, Supp. 1992, and Pub. L. No. 103–10)) (the Act), I issued an order temporarily denying all United States export privileges of Reza Zandian, also known as Golamreza Zandianjazi (Zandian); Charles Robert Reger (Reger); Iran Business Machines; Iran Business Machines, USA; Lucach Corporation and its division, Computerworld North America, also known as Computer World (Lucach); and Computerworld Europe, also known as Computer World and C.E.P.A.T. (Computerworld Europe) (hereinafter collectively referred to as respondents). In addition to denying respondents' U.S. export privileges for a period of 180 days from the date of issuance,[1] the Order also named several companies, including Optima Technology Corporation, 17526 Von Karman, Irvine, California 92714 (Optima), as persons related to one or more of the respondents. Accordingly, Optima and the other named related persons were made subject to the provisions of the Order as related persons.

The Office of Export Enforcement, Bureau of Export Administration, U.S. Department of Commerce (Department), and Optima have jointly moved, based on evidence presented to the Department by Optima, to modify the temporary denial order by deleting Optima as a person related to one or more of the respondents.

Based on the submission by the Department and Optima, I hereby grant the motion to modify the temporary denial order. Accordingly, the temporary denial order entered against respondents on April 16, 1993, is modified to read as follows:

Accordingly, *it is hereby Ordered:*

I. All outstanding individual validated licenses in which any of the respondents appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of respondents' privileges of participating, in any manner or capacity, in any special licensing procedures, including, but not limited to, distribution licenses, are hereby revoked.

II. For a period of 180 days from the date of entry of this order, Reza Zandian, also known as Golamreza Zandianjazi, with addresses at 5 Hillsborough, Newport Beach, California 92660 and c/o Iran Business Machines, USA, 600 Anton Boulevard, Costa Mesa, California 92626; Charles Robert Reger, 9582 Erskine Drive, Huntington Beach, California 92646; Iran Business Machines, No. 50 Molla Sadra Avenue, 14357 Tehran, Iran; Iran Business Machines, USA, 600 Anton Boulevard, Costa Mesa, California 92626; Lucach Corporation, and its division, Computerworld North America, also known as Computer World, 17526–B Von Karman, Irvine, California 92714; and Computerworld Europe, also known as Computer World and C.E.P.A.T., Rue Jean-Grandel, BP 12–95102 Argenteuil, France, and all their successors, assignees, officers, partners, representatives, agents, and employees, hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving any commodity or technical data exported or to be exported from the United States, in whole or in part, and subject to the Regulations. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Department; (ii) in preparing or filing with the Department any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining from the Department or using any validated or general export license, reexport authorization, or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported or to be exported from the United States, in whole or in part, and subject to the Regulations; and (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. After notice and opportunity for comment as provided in § 788.3(c), any person, firm, corporation, or business organization related to respondents by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order. Based on the showing made by the Department, I have determined that the following companies are related to one or more of the respondents by affiliation, ownership, or control in the conduct of trade and related services and, accordingly, are hereby made subject to this Order:

Optima Technology Europe, also known as O.T.E., Rue Jean-Grandel, BP 12–95102 Argenteuil, France
Optima Technology Middle East, also known as O.T.M.E., 132 Felestin Avenue, Tehran, Iran
Computerworld Middle East, No. 50 Molla Sandra Avenue, 14357 Tehran, Iran
AS/TEQ Corporation, 17526 Von Karman, Irvine, California 92714
U.S. Business Machines Corporation, 17526 Von Karman, Irvine, California 92714
RISQ Technology Corporation, 17526 Von Karman, Irvine, California 92714
and
ICSAA Trade Company with addresses at—
7502 Mar Avenue, La Jolla, California 92037
and
P.O. Box 27082, 1395 Marine Drive, West Vancouver, British Columbia, V7T2X8 Canada

IV. As provided by § 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Export Licensing, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity: (i) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate: (a) In any transaction which may involve any commodity or technical data exported or to be exported from the United States; (b) in any reexport thereof; or (c) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

V. In accordance with the provisions of § 788.19(e) of the Regulations, any respondent may, at any time, appeal this temporary denial order by filing with the Office of the Administrative Law Judge, U.S. Department of Commerce/Export Control, room H–4017, 14th Street and Constitution Avenue, NW., Washington, DC 20230, a full written statement in support of the appeal. Any related person may appeal the finding that it is related to one or more of the denied parties, but may not appeal the underlying issuance of the temporary denial order.

VI. This amended order is effective immediately and shall remain in effect until October 13, 1993.

VII. In accordance with the provisions of § 788.19(d) of the Regulations, the Department may seek renewal of this temporary denial order by filing a written request not later than 20 days before the expiration date. Any respondent may oppose a request to renew this temporary denial order by filing a written submission with the Assistant Secretary for Export Enforcement, which must be received not later than seven days before the expiration date of this order.

[1] The temporary denial order is effective until October 13, 1993, which is 180 days from April 16, 1993.

VOL 58 ISS 80 AP 28 1993 UMI

A copy of this order shall be served on each respondent and each named related person. This order shall be published in the **Federal Register**.

Dated: April 23, 1993.

Douglas E. Lavia,

Acting Assistant Secretary for Export Enforcement.

[FR Doc. 93-10057 Filed 4-27-93; 8:45 am]

BILLING CODE 3510-DT-M

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Opportunity to Request Administrative Review of Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation.

Background: Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspension of investigation, an interested party as defined in section 771(9) of the Tariff Act of 1930, as amended, may request, in accordance with section 353.22 or 355.22 of the Commerce Regulations, that the Department of Commerce ("the Department") conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

Opportunity to Request a Review: Not later than May 31, 1993, interested parties may request administrative review of the following orders, findings, or suspended investigations, with anniversary dates in May for the following periods:

	Period
Antidumping Duty Proceedings	
Argentina: Light-Wall Welded Rectangular Carbon Steel Tubing (A-357-802)	05/01/92-04/30/93
Brazil: Certain Carbon Steel Butt-Weld Pipe Fittings (A-351-602)	05/01/92-04/30/93
Brazil: Certain Iron Construction Castings (A-351-503)	05/01/92-04/30/93
Brazil: Frozen Concentrated Orange Juice (A-351-605)	05/01/92-04/30/93
Dominican Republic: Portland Cement, Other Than White, Nonstaining Portland Cement (A-247-003)	05/01/92-04/30/93
France: Ball Bearings, Cylindrical Roller Bearings, Spherical Plain Bearings, and Parts Thereof (A-427-801)	05/01/92-04/30/93
Germany: Ball Bearings, Cylindrical Roller Bearings, Spherical Plain Bearings, and Parts Thereof (A-428-801)	05/01/92-04/30/93
India: Certain Welded Carbon Steel Standard Pipes and Tubes (A-533-502)	05/01/92-04/30/93
Italy: Ball Bearings, Cylindrical Roller Bearings, and Parts Thereof (A-475-801)	05/01/92-04/30/93
Japan: Ball Bearings, Cylindrical Roller Bearings, Spherical Plain Bearings, and Parts Thereof (A-588-804)	05/01/92-04/30/93
Japan: Impression Fabric (A-588-066)	05/01/92-04/30/93
Japan: Portable Electric Typewriters (A-588-087)	05/01/92-04/30/93
Japan: Gray Portland Cement and Clinker (A-588-815)	05/01/92-04/30/93
Romania: Ball Bearings and Parts Thereof (A-485-801)	05/01/92-04/30/93
Singapore: Ball Bearings and Parts Thereof (A-559-801)	05/01/92-04/30/93
Sweden: Ball Bearings, Cylindrical Roller Bearings, and Parts Thereof (A-401-801)	05/01/92-04/30/93
Taiwan: Certain Circular Welded Carbon Steel Pipes and Tubes (A-583-008)	05/01/92-04/30/93
Taiwan: Malleable Cast-Iron Pipe Fittings, Other Than Grooved (A-583-507)	05/01/92-04/30/93
Thailand: Ball Bearings and Parts Thereof (A-549-601)	05/01/92-04/30/93
The People's Republic of China: Certain Iron Construction Castings (A-570-502)	05/01/92-04/30/93
The Republic of Korea: Malleable Cast Iron Pipe Fittings, Other Than Grooved (A-580-507)	05/01/92-04/30/93
The United Kingdom: Ball Bearings, Cylindrical Roller Bearings, and Parts Thereof (A-412-801)	05/01/92-04/30/93
Turkey: Welded Carbon Steel Standard Pipe and Tube Products (A-489-501)	05/01/92-04/30/93
Countervailing Duty Proceedings	
Brazil: Certain Heavy Iron Construction Castings (C-351-504)	01/01/92-12/31/92
Mexico: Ceramic Tile (C-201-003)	01/01/92-12/31/92
Singapore: Antifriction Bearings (Other Than Tapered Rollered Bearings) and Parts Thereof (C-559-802)	01/01/92-12/31/92
Sweden: Viscose Rayon Staple Fiber (C-401-056)	01/01/92-12/31/92
Thailand: Ball Bearings and Parts Thereof (C-549-802)	01/01/92-12/31/92

In accordance with sections 353.22(a) and 355.22(a) of the Commerce regulations, an interested party may request in writing that the Secretary conduct an administrative review of specified individual producers or resellers covered by an order, if the requesting person states why the person desires the Secretary to review those particular producers or resellers. If the interested party intends for the Secretary to review sales of merchandise by a reseller (or a producer if that producer also resells merchandise from other suppliers) which was produced in more than one country of origin, and each country of origin is subject to a separate order, then the interested party must state specifically which reseller(s) and which countries of origin for each reseller the request is intended to cover.

Seven copies of the request should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B-099, U.S. Department of Commerce, Washington, DC 20230. The Department also asks parties to serve a copy of their requests to the Office of Antidumping Compliance, Attention: Thomas Futtner, in room 3069-A of the main Commerce Building. Further, in accordance with section 353.31(g) or 355.31(g) of the Commerce Regulations, a copy of each request must be served on every party on the Department's service list.

The Department will publish in the **Federal Register** a notice of "Initiation of Antidumping (Countervailing) Duty Administrative Review", for requests received by May 31, 1993.

If the Department does not receive, by May 31, 1993, a request for review of entries covered by an order or finding listed in this notice and for the period identified above, the Department will instruct the Customs Service to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute, but is published as a service to the international trading community.

Dated: April 21, 1993.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

BILLING CODE 3510-DS-M

[A-201-802]

Gray Portland Cement and Clinker From Mexico; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On January 26, 1993, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on gray portland cement and clinker from Mexico. The review covers two manufacturers/exporters of the subject merchandise to the United States and the review period April 12, 1990, through August 31, 1991.

We gave interested parties an opportunity to comment on our preliminary results. Based on our analysis of the comments received and the correction of certain clerical errors, we have revised the preliminary rates. The final dumping margins range from 30.44 percent to 53.26 percent.

EFFECTIVE DATE: April 28, 1993.

FOR FURTHER INFORMATION CONTACT: Marina McClelland, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482-4852.

SUPPLEMENTARY INFORMATION:

Background

On January 26, 1993, the Department of Commerce (the Department) published in the **Federal Register** (58 FR 6113) the preliminary results of its administrative review of the antidumping duty order on gray portland cement and clinker from Mexico (August 19, 1990, 58 FR 6113). The Department has now completed that review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of Review

The products covered by this review are gray portland cement and clinker. Gray portland cement is a hydraulic cement and the primary component of concrete. Clinker, an intermediate material product produced when manufacturing cement, has no use other than of being ground into finished cement.

Gray portland cement is currently classifiable under the Harmonized Tariff Schedule (HTS) item number 2523.29, and cement clinker is currently classifiable under number 2523.10. Gray portland cement has also been entered under number 2523.90 as "other hydraulic cements." The HTS subheadings are provided for convenience and U.S. Customs Service purposes only. The written description remains dispositive as to the scope of the product coverage.

The review covers two manufacturers/exporters of the subject merchandise to the United States and the period April 12, 1990 through August 31, 1991. One manufacturer/exporter, Apasco, S.A. de C.V. (Apasco), made no shipments during the period of review (POR). As a result, the Department has retained as the cash deposit for Apasco the margin percentage calculated for Apasco in the final determination of sales at less than fair value.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. We received written comments from the Ad Hoc Committee of AZ-NM-TX-FL Producers of Gray Portland Cement and the National Cement Company of California (the petitioners), and one respondent, CEMEX, S.A. (CEMEX). On March 19, 1993, we held a public hearing.

Comment 1: Relying on section 773(a)(5) of the Act of 1930, as amended, petitioners allege that through different movements in the prices of Types I and II cement in the home market, CEMEX created a fictitious market in order to reduce or eliminate the dumping margin on Type II cement. Petitioners state that the foreign market value (FMV) of Type II cement decreased while the FMV of Type I increased slightly after the issuance of the antidumping duty order on Mexican cement. Petitioners add that although Type I and Type II cement are interchangeable for most purposes, the relative quantities of Type I and Type II cement sold changed little during the period of the pricing movements.

In making this allegation, petitioners insist that the price movements relevant to a fictitious market are the movements of net, ex-factory price or FMV, rather than movements in gross price or delivered price. Moreover, petitioners argue that the statute does not require that the sales evidencing a fictitious market be non-bona fide sales.

Petitioners explain that because CEMEX sells primarily Type I cement and relatively little Type II cement in the home market, the lowering of FMV of Type II cement does not measurably affect home market revenue, while it does decrease CEMEX's financial burden of exporting goods which are assessed a large antidumping duty. Consequently, petitioners argue, the Department should reject CEMEX's home market sales of Type II cement as the basis for FMV and should instead use home market sales of Type I cement to calculate FMV. Petitioners add that under the statute, CEMEX's "plausible business reasons" are no defense against an allegation of a fictitious market.

CEMEX asserts that petitioners erroneously base their fictitious market allegation on net prices (*i.e.*, FMV). CEMEX argues that the petitioners must prove their claim of fictitious market by showing the existence of non-bona fide Type II cement sales in the home market. CEMEX also insists that the statute requires the Department to examine only the price paid by the customer, minus discounts and rebates.

VOL 58 ISS 80 AP 28 1993 UMI

CEMEX states that these principles are clearly stated in the statute and its legislative history and are reflected in the Department's approach to previous fictitious market allegations.

CEMEX argues that there is no evidence in the record of any non-bona fide sales. In addition, CEMEX maintains that any conceivable anomaly in price movements vanishes when the price paid by the customer is examined.

CEMEX further argues that petitioners have not made any realistic challenge to CEMEX's claim that its pricing behavior resulted from good faith decision-making both before and after the antidumping duty order was issued. According to CEMEX, following the relocation of production of Type II cement to northern Mexico and an increase in rail freight rates, CEMEX made a business decision to assume responsibility for, rather than pass on, much of the resulting additional freight costs in order to retain its Type II cement customers. In addition, CEMEX decided to lower its prices of Type II cement near Chihuahua, Mexico, due to new U.S. cement competition resulting from the Mexican Government's elimination of duties on cement imported into Mexico from the United States. Therefore, CEMEX claims that any theoretical anomaly in Type II cement FMV resulted from CEMEX's legitimate business decisions to retain Type II cement customers in Mexico.

Department's Position: We disagree with petitioners' contention that the Department should disregard Type II cement sales as the basis for FMV under section 773(a)(5) of the Tariff Act. In our preliminary results of review, we found that the evidence in the record was not sufficient to establish that CEMEX had created a fictitious market (see Gray Portland Cement and Clinker from Mexico; Preliminary Results of Antidumping Duty Administrative Review, 58 FR 6113 (January 26, 1993)). After reviewing the case and rebuttal briefs, the Department continues to hold that the evidence does not warrant the finding of a fictitious market.

In reaching this conclusion, the Department does not accept CEMEX's argument that petitioners must show non-bona fide Type II cement sales. Prior to 1988, section 773(a)(1) of the Act was the only provision in the statute addressing fictitious markets. Under that provision, the analysis the Department was to undertake arguably focused only on the existence of non-bona fide sales, as the required examination addressed only the existence of pretended sales or offers for sale, or sales or offers for sale intended to establish a fictitious market. See *Monsanto v. United States*, 698 F. Supp. 275, 279 (CIT 1988); H.R. Conf. Rep. No. 79, 67th Cong., 1st Sess. at 11 (1921). However, with the addition of section 773(a)(5) to the statute in 1988, language was added to the statute expressly allowing for examination of the price movements of different forms of the subject merchandise when assessing the existence of a fictitious market. As a result, the Department clearly need not require the existence of non-bona fide sales in establishing the existence of a fictitious market. Rather, accepting all sales as legitimate, the Department can look at the price movements of the multiple forms of the subject merchandise and, depending on the nature of those price movements, find that a respondent has established a fictitious market (see Tubeless Steel Disc Wheels from Brazil; Final Results of Antidumping Duty Administrative Review, 56 FR 14083, 14085 (April 5, 1991) (Steel Wheels from Brazil); Cyanuric Acid and its Chlorinated Derivatives from Japan; Final Results of Antidumping Duty Administrative Review, 55 FR 1690, 1691 (January 18, 1990) (Cyanuric Acid from Japan); S. Rep. No. 71, 100th Cong., 1st Sess. at 126 (1987)).

In fact, section 773(a)(5) of the Act states that in determining the existence of a fictitious market, the Department may consider evidence of movements in the prices at which different forms of the subject merchandise are sold after the issuance of an antidumping duty order. The Department examines the prices paid by the customers and determines what effect the movements of those prices have on the FMV of the subject merchandise. If the price movements appear to reduce the amount by which the FMV of the merchandise exceeds the United States price (USP) of the merchandise, the Department may consider the price movements to be evidence of a fictitious market. As the legislative history of section 773(a)(5) explains:

> It has come to the Committee's attention that fictitious markets may be created relatively easily when merchandise is produced and sold in multiple forms. If a foreign manufacturer or producer exports only one of such forms to the United States and has been found to be dumping that form, he may artificially set his home market prices of the different forms to reduce the amount by which the foreign market value of the identical merchandise exceeds the U.S. price of such merchandise. If only sales of the identical merchandise are used in determining the foreign market value, the net effect of such artificial pricing may be to eliminate any finding of dumping even though the average home market price of the different forms of the merchandise may still exceed the U.S. price of the imported merchandise.
>
> For example, a chemical product may be produced and sold in powder and granular forms, both of which have similar uses and production costs. If a foreign manufacturer who produces and sells both products in his home market is found to be dumping the powder product in the United States, the only form that the manufacturer exports, he can minimize any antidumping duties finally assessed, and avoid a finding of sales at less than fair value during any review under section 751, by lowering his home market price for the powder product while maintaining or raising his home market price for the granular product.

See S. Rep. No. 71, 100th Cong., 1st Sess. at 126 (1987). See also Steel Wheels from Brazil and Cyanuric Acid from Japan.

However, contrary to petitioners' assertions, the existence of a fictitious market is not necessarily established merely on the basis of price movements without regard to the reasons that may have caused those price movements. The presence of commercial factors other than the existence of an antidumping duty order is relevant in determining whether a fictitious market exists. Thus, we have found it appropriate to consider the business justifications offered by the respondent in determining whether a fictitious home market exists. In Cyanuric Acid from Japan, the Department considered the respondent's "plausible reasons" for the price movements at issue and rejected the petitioner's fictitious market allegation.

In this case, the POR is April 12, 1990 through August 31, 1991. The Department published the antidumping duty order on August 19, 1990. After issuance of the order, and until the end of the POR, the price to the customer of CEMEX's Type I and Type II cement followed similar patterns, increasing only with the rate of inflation. However, while the FMV of Type I cement meanwhile remained steady, increasing only with the rate of inflation, the FMV of Type II cement decreased twice after issuance of the order. The net effect of the decrease in the FMV for Type II cement was a reduction in the amount by which the FMV of the merchandise exceeded the USP of this merchandise.

The decrease of the FMV of Type II cement resulted in large part from a business decision made by CEMEX not to pass on to its Type II customers certain transportation expenses that CEMEX incurred upon consolidating its Type II production. The changes in the FMV of Type II cement coincided generally with the relocation of CEMEX's production of Type II cement to a single plant in northern Mexico and a general increase in rail cargo rates. Before the issuance of the antidumping duty order, CEMEX planned to consolidate its production of Type II cement to a plant in northern Mexico. This plant is not only more efficient, but it also better facilitates sales to the United States, CEMEX's largest Type II cement market. In the spring of 1990, CEMEX began to move production of Type II cement to its northern Mexico plant. The freight charges associated with sales to most Type II customers in Mexico rose because the physical distances between plant and customer increased. In addition, in October of 1990, there was a fifteen percent increase in rail cargo rates which increased further the freight expenses for Type II cement sales.

The price of Type I cement was less affected by the general rail freight increase because CEMEX continued to produce Type I cement in all regions of the country. With many production sites, CEMEX does not depend as heavily on rail transportation of its Type I cement sales as it does for its Type II cement sales. As a result, the FMV of Type I cement was not significantly affected by the general increase in rail freight rates.

Rather than risk losing its Type II customers, CEMEX decided to assume responsibility for much of the increased freight costs resulting from the relocation of the production of Type II cement to northern Mexico and the increase in rail rates. CEMEX therefore increased only slightly the price paid by its Type II cement customers.

In addition, the FMV of Type II cement decreased as a result of CEMEX's efforts to meet the added competition in Chihuahua from U.S. exporters of Type II cement. This increase in U.S. competition resulted from the Mexican government elimination of duties on cement imported into Mexico from producers on the U.S. side of the frontier zone.

Given these facts, and in the absence of information to rebut them, the Department accepts the business reasons offered by CEMEX in this case as an explanation of the different movements of prices, unrelated to establishing a fictitious market. We do not find that CEMEX's pricing of Type I and II cement has resulted in a fictitious market.

Comment 2: Addressing the Department's cost of production (COP) calculation, petitioners contend that only the interest income specifically recorded in CEMEX's short-term interest income account should be allowed as an offset to CEMEX's interest expense; other financial income should not be allowed as an offset since it cannot be tied to short-term investments.

CEMEX contends that because of the fungibility of interest income, such income should be treated symmetrically (i.e., netted) with interest expense. Accordingly, the Department should not disregard any financial income. If, however, the Department decides to disregard CEMEX's long-term interest income, CEMEX argues that the Department should continue to disregard the monetary losses associated with that income.

Department's Position: We agree with petitioners. The Department has a well-established practice of disallowing long-term interest income offsets to interest expense because such activities are generally considered by the Department to be income-producing activities unrelated to the product under review (See Department's Position to Comment 9, Television Receivers, Monochrome and Color, from Japan; Final Results of Antidumping Duty Administrative Review, 56 FR 56189, 56192 (November 1, 1991)); see also Final Determination of Sales at Less Than Fair Value; Steel Wire Rope from Korea, 58 FR 11029, 11035 (February 23, 1993)). However, the Department typically allows short-term interest income offsets to interest expense if that income can be attributed to the production of the product under review. Because CEMEX's sub-account 6421 was the only portion of interest income that we verified to be short-term, we disallowed all of CEMEX's other interest income. Given that the disallowance of long-term interest income affected the monetary correction adjustment to CEMEX's corporate financial expense, we made a corresponding adjustment to CEMEX's reported monetary correction (see our response to Comment 4 for explanation of monetary correction).

Comment 3: Petitioners contend that in calculating the cost of production, it is the Department's established practice to adjust corporate financial expense only for foreign exchange gains and losses specifically related to the cost of manufacturing the subject merchandise. Petitioners argue that because foreign exchange gains realized by certain CEMEX subsidiaries are not related to the manufacture of the subject merchandise, such gains should not be permitted to offset CEMEX's foreign exchange losses.

CEMEX contends that the Department correctly offset CEMEX's interest expense with all of CEMEX's foreign exchange gains.

Department's Position: We agree with petitioners and have made the appropriate changes in our final results. The Department has long upheld the position that foreign exchange gains and losses not specifically incurred as a cost of producing the subject merchandise should not be allowed as an offset to cost of manufacture (see Certain Stainless Steel Cooking Ware from the Republic of Korea, 58 FR 9560, 9561 (February 22, 1993)); see also Final Results of Antidumping Duty Administrative Review; Color Television Receivers, Except for Video Monitors, from Taiwan, 56 FR 31378, 31385 (July 10, 1991) and Final Determination of Sales at Less Than Fair Value: Certain Small Business Telephone Systems and Subassemblies Thereof from Korea, 54 FR 53141, 53149 (December 27, 1989)).

CEMEX's foreign exchange gains and losses largely resulted from foreign-held monetary assets and liabilities. Although many of these assets and liabilities were held by CEMEX to finance the company's general cement-producing operations, the gains and losses were not attributable to production inputs of products under review and, as such, have been disallowed in our final results. Given that the disallowance of foreign exchange gains and losses affected the monetary correction adjustment to CEMEX's corporate financial expense, we made a corresponding adjustment to CEMEX's reported monetary correction (see Comment 4 below for explanation of monetary correction.)

Comment 4: Citing Steel Wheels from Brazil, 52 FR 8947 (March 20, 1989), Paint Filters and Strainers from Brazil, 52 FR 19181, 19183 (May 21, 1987), and Frozen Concentrated Orange Juice from Brazil, 52 FR 8324, 8329 (March 17, 1987), petitioners contend that a monetary correction adjustment due to inflation should not be made to CEMEX's reported corporate financial expense because such an adjustment is contrary to Departmental precedent, would distort CEMEX's actual cost of production during the period of review, and largely results from related party transactions.

Petitioners also argue that an adjustment for monetary correction should be rejected because such an adjustment violates both Mexican and United States generally accepted accounting principles (GAAP). For example, petitioners contend that an adjustment for monetary correction violates the "matching principle" in which costs incurred during a particular period are matched with their associated revenues. Although petitioners concede that Bulletin B–10 of Mexican GAAP requires Mexican companies to report the effects of

VOL 58 ISS 80 AP 28 1993 UMI

inflation on their monetary assets and liabilities, petitioners contend that Bulletin B–10's monetary correction provision should not be applied in this review since its purpose is to facilitate year-to-year comparisons of financial statements, not to calculate production costs. Likewise, petitioners contend that Financial Accounting Standards Board Statement of Financial Accounting Standard 89 (FASB–89), promulgated under U.S. GAAP, excludes purchasing power gains and losses from income from continuing operations.

Alternatively, petitioners argue that if the Department departs from its past practice and allows an adjustment for monetary correction to interest expense, only the portion of monetary position gain attributable to the cost of producing the subject merchandise should be allowed to offset interest expense.

CEMEX contends that the Department correctly included monetary gains and losses in the calculation of net financing expenses. CEMEX contends that the Department's adjustment for monetary position gains and losses due to inflation (*i.e.*, monetary correction) is consistent with Departmental policy and accurately reflects CEMEX's actual cost of financing in a non-distortive manner. CEMEX also contends that CEMEX's adjustment for monetary correction is consistent with the cost/revenue matching principle and is not a result of related-party transactions.

Department's Position: We disagree with petitioners and agree with respondent. The Department has a well-established practice of recognizing the effects of inflation on companies' reported costs. In Brazil, for example, a country the Department considers to be hyperinflationary, Brazilian GAAP recognizes the effects of inflation by requiring companies to index their debt principal. We also reflect the effects of inflation by calculating monthly costs of production. Our use of monthly current costs, however renders further monetary correction unnecessary.

This is not the case with Mexico. Because we do not consider Mexico to have been hyperinflationary during the period of review, we have not used monthly current costs of production in our final results. Nonetheless, Mexico did experience significant inflation during the period of review. Given that monetary correction under Mexican GAAP pertains solely to the holding of monetary assets and liabilities, not accounting for the effects of inflation, which are recognized by CEMEX's adjustment for monetary correction, would distort CEMEX's corporate financial expense and income.

Petitioners have cited the first administrative review of Porcelain-on-Steel Cookware from Mexico (Cookware), 55 FR 39186 (September 25, 1990), as precedent for disallowing adjustments for monetary correction. While the Department denied the respondent an adjustment for monetary correction in the first administrative review of Cookware, the Department accepted the adjustment in the second and third reviews. An adjustment for monetary correction was also a factor in our decision to initiate the sales-below-cost investigation of CEMEX in this review.

Citing New Minivans from Japan; Final Determination of Sales at Less Than Fair Value, 57 FR 21937 (May 26, 1992), petitioners contend that the Department does not always rely on the respondent country's GAAP when calculating cost of production. Although we agree with petitioners that the Department sometimes deviates from another country's GAAP, such deviations are usually made when adherence to that country's GAAP materially distorts a respondent's actual production costs. Given the significant inflation experienced by Mexico during the period of review, we believe that deviating from Mexican GAAP by not allowing for the monetary correction would lead to distortions in CEMEX's costs of production.

We disagree with petitioners' contention that an adjustment for monetary correction violates the "matching" of CEMEX's costs and revenues. Contrary to petitioners' assertion, the monetary correction is not simply a year-end adjustment to CEMEX's corporate financial expense. Rather, it is the sum of all corrections to financial expenses made throughout the year. Accordingly, it is an integral component of CEMEX's corporate financial expense which, if not reflected in CEMEX's corporate financial expense, would lead to distortions in CEMEX's reported cost of production.

We also disagree with petitioners' alternative assertion that monetary position gains should be limited to the portion that can be specifically tied to the cost of producing the subject merchandise. The Department has long upheld the position that financing expenses are fungible. Accordingly, consistent with past Departmental practice, we do not distinguish whether interest expense is related or unrelated to the merchandise under review (see Final Determination of Sales at Less Than Fair Value; Steel Wire Rope from Korea, 58 FR 11035 (February 23, 1993)). Therefore, we have adjusted CEMEX's interest expense for monetary correction and allocated the adjustment amount over the cost of goods sold for all products.

Petitioners' assertion that CEMEX's monetary gains result largely from related party transactions is incorrect. The financial statement footnotes to which petitioners refer apply to CEMEX's unconsolidated corporate financial statements. In accordance with Department practice, we used CEMEX's consolidated corporate financial statements in determining corporate financial expense. As stated in the footnotes to CEMEX's consolidated financial statements, all intercompany related party transactions have been eliminated.

Comment 5: CEMEX argues that the Department incorrectly adjusted the home market price for sales that CEMEX termed "anticipated" sales by adding an imputed credit revenue. These sales included a minimal number of home market sales for which CEMEX was paid in advance of shipment. CEMEX argues that the Department has had a practice of not recognizing "opportunity benefits" in USP and FMV calculations and should, therefore, reject this additional imputed credit revenue. CEMEX cites Carbon Steel Wire Rod from Brazil; Final Determination of Sales at Less than Fair Value, 48 FR 43202, 43204 (September 22, 1983), and Certain Steel Pipes and Tubes from Japan; Preliminary Determination of Sales at Less than Fair Value, 47 FR 37263, 37265 (August 25, 1982).

Petitioners claim that CEMEX financially benefitted, at the annual rate of short-term investments, from these advance payments. Therefore, petitioners argue, the Department correctly determined the number of days between receipt of payment and shipment of the cement, and then multiplied this number by CEMEX's reported home market interest rate, in order to derive an imputed credit revenue.

Department's Position: We disagree with the respondent. The Department's current practice is to recognize "opportunity benefits" in FMV calculations (see, *e.g.*, Fuel Ethanol from Brazil; Final Results of Sales at Less than Fair Value, 51 FR 5,572, 5,576 (February 14, 1986)). In Large Power Transformers from Italy; Final Results of Antidumping Duty Administrative Review, 52 FR 46806 (December 10, 1987), for example, the Department determined that if a respondent manufacturer receives payment before shipping the merchandise, the credit calculation should reflect a credit income because the respondent had use of the money prior to shipment.

Similarly, in this case, CEMEX had use of the pre-paid money prior to shipment. Therefore, the Department determines that it correctly adjusted FMV for credit revenue on pre-paid sales.

Comment 6: Petitioners argue that the Department should not deduct CEMEX's pre-sale freight expenses from its plant to its terminals in calculating FMV. Petitioners disagree with the Department's policy of deducting pre-sale freight costs from FMV. Petitioners explain that while the statute requires the Department to deduct pre-sale freight expenses from USP in both purchase price (PP) and exporter's sales price (ESP) sales, the statute contains no similar provision authorizing such deductions in the calculation of FMV.

CEMEX argues that the Department correctly followed its policy of deducting pre-sale freight expenses. CEMEX points out that this policy recently was approved by the Court of International Trade (CIT) in *Ad Hoc Committee of AZ-NM-TX-FL Producers of Gray Portland Cement* v. *United States*, 787 F. Supp. 208, 213 (CIT 1992), which concerned the Department's final determination in the investigation of this case.

Department's Position: We disagree with petitioners. Since the final determination in the investigation in this case, we have followed a policy of deducting home market pre-sale freight expenses when calculating FMV for PP sales or ESP sales. This ensures an apples-to-apples comparison. See Gray Portland Cement and Clinker from Mexico; Final Determination of Sales at Less than Fair Value, 55 FR 29244 (July 18, 1990), Tapered Roller Bearings, Four Inches or Less in Outside Diameter, and Certain Components Thereof, from Japan; Final Results of Antidumping Duty Administrative Review, 56 FR 26054 (June 6, 1991); Red Raspberries from Canada; Final Results and Termination in Part of Antidumping Duty Administrative Reviews, 56 FR 677 (January 8, 1991). Further, as CEMEX notes, in the appeal of the final determination of the investigation in this case, the CIT approved the Department's policy of deducting pre-sale freight expenses when calculating FMV for PP sales.

Comment 7: Petitioners contend that it was appropriate for the Department to calculate cost of production on a monthly basis. However, because of aberrations in CEMEX's December 1990 costs of manufacture for Type II cement, best information available should be used for that month's costs.

CEMEX contends that, as verified by the Department, its December 1990 costs of manufacture for Type II cement are accurate. However, CEMEX contends that the Department should calculate CEMEX's cost of production on an annual basis rather than a monthly basis.

Department's Position: We agree with respondent. During our verification of CEMEX, we determined that the "aberrations" referred to by petitioners were the result of normal year-end adjustments recorded in CEMEX's December accounting records. Our use of monthly costs of production in our preliminary results caused the December 1990 costs for some of CEMEX's facilities to appear aberrational. We have calculated and used annual 1990 and 1991 cost of production figures in our final results.

Comment 9: Petitioners argue that the Department should apply the "arm's length test" described in Certain Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina; Preliminary Determination of Sales at Less Than Fair Value (Steel Flat-Rolled Products from Argentina), 58 FR 7066, 7069 (Appendix II, Section A) (February 4, 1993), in determining whether to accept related party sales for purposes of calculating FMV. According to petitioners, when that test is applied in this case, some sales made by CEMEX to related parties must be disregarded. Petitioners apply the test by disregarding sales where the weighted-average net price for an individual related party for a particular month is not equal to or greater than all unrelated customer weighted-average net prices for that month.

CEMEX disagrees with the petitioners' proposed treatment of related party transactions in the calculation of FMV. CEMEX argues that petitioners' comparison of a specific net prices of sales to a related party to an average net prices of sales to all unrelated parties from all terminals is not a valid comparison. Further, CEMEX argues that there is no legal basis for selective exclusion of related-party transactions when the sales to a particular related party are excluded in one month and then included in the next month. CEMEX asserts that the established practice by the Department is either to find all sales to a particular related party to be unreliable and exclude them all from FMV calculations, or to accept the arms-length nature of the sales to that party and include them all in the calculations. CEMEX argues finally that if petitioners had compared net prices on a terminal-specific basis and had not analyzed the sales on a monthly basis, petitioners would have discovered that net prices of sales to related customers are, on the whole, equal to or greater than the unrelated customer net prices.

Department's Position: We disagree with petitioners. The Department is currently accepting comments from interested parties on the application of the "arm's length" test described in the preliminary determination of Steel Flat-Rolled Products from Argentina. Due to the preliminary nature of the "arm's length" test used in Steel Flat-Rolled Products from Argentina, the Department used a test based on our past practice. See Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts thereof from France; Final Results of Antidumping Duty Administrative Reviews, 57 FR 28393 (June 24, 1992). Upon examination, we used sales to related customers only where we determined such sales were made at arm's length, *i.e.*, at prices comparable to prices at which the firm sold identical merchandise to unrelated customers.

Comment 10: Petitioners argue that best information available (BIA) should be used to account for invoice No. CA–1528 because CEMEX incorrectly instructed the Department prior to verification to delete this invoice from the U.S. sales data base. Petitioners contend that this sale should have been included in the U.S. sales data base because the record shows that it is an ESP sale and that this sale occurred during the POR.

CEMEX argues that BIA should not be used because CEMEX reported all requested data and merely pointed out to the Department that the sale at issue should not legally be included in the antidumping calculation. CEMEX further explains that liquidation of the entry for this sale had not been suspended by the U.S. Customs Service. CEMEX states that the statute makes it clear that entries whose liquidation had not been suspended are not subject to an administrative review.

Department's Position: The Department has examined the information pertaining to the entry which was prematurely liquidated. Although the entry was liquidated, we have decided that inclusion of the sale in our analysis is appropriate in order to determine the estimated antidumping duty (cash deposit) for CEMEX. Therefore, we have included this transaction in our calculations, using the information CEMEX provided to determine the appropriate classification and adjustments.

Comment 11: Petitioners assert that certain sales reported as purchase price sales should be treated as ESP sales, because there is no evidence that these sales were made prior to the date of

VOL 58 ISS 80 AP 28 1993 UMI

importation. According to the statute, a purchase price sale is identified as a sale that occurs prior to importation. An ESP sale may occur either before or after importation into the United States depending on certain factors. Petitioners claim that because the cement was shipped from Mexico well in advance of the reported dates of sale and CEMEX did not report the date of importation, importation likely occurred prior to the reported dates of sale and the sales, therefore, must be considered ESP sales.

CEMEX argues that the sales were correctly classified as PP sales, and that petitioners' argument is evidentiary in nature. According to CEMEX, petitioners can, at most, establish that the sales were made after exportation, but that, in itself, provides no evidence of whether a sale is ESP. CEMEX asserts that petitioners would have to show that the sales were made after importation. Without that evidence, CEMEX insists that the Department should accept CEMEX's representation, through CEMEX's classification of these sales as PP sales, that these sales were made prior to importation. CEMEX adds that petitioners' argument is based on an assumption rather than factual evidence.

Department's Position: We agree in part with petitioners. In order for the Department to determine the classification of the sales in question, the Department requested that CEMEX provide the entry documents for those sales. CEMEX provided the requested information. Upon evaluation of this and other information in the record, the Department determines that some of the sales recorded as PP sales are ESP sales because the date of importation occurred before the date of sale. Consequently, for those sales misclassified as PP sales, the Department has treated them as ESP sales. Further, because the Department does not have adequate information on which to determine the correct adjustments for these ESP sales, we have used BIA as the basis for the deductions. Treating CEMEX essentially as a cooperative respondent, the Department used a weighted-average of the ESP expenses reported in the original ESP response as BIA for these ESP sales. We purposely did not attempt to alter these expenses when analyzing the re-classified ESP sales.

Comment 12: CEMEX states that the "roller chain" principle should be applied to sales where less than 1% of the value of the product sold in the United States is of the imported merchandise.

Petitioners state that the "roller chain" principle is not applicable to any U.S. sales of cement during the period of review. Further, petitioners argue that the principle should not extend to any U.S. sales for which the Department uses BIA to calculate U.S. price.

Department's Position: We agree with petitioners. Under the so-called "roller chain" principle, the Department eliminates the assessment of duties on a product if the imported product forms less than 1 percent of the value of the further manufactured product sold in the United States. The Department articulated this approach in Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts thereof from France, 57 FR 28360 (June 24, 1992), and Roller Chain, Other than Bicycle, from Japan, 48 FR 51801 (November 14, 1983). In this case, the value of the product imported in both BIA and non-BIA further manufactured sales exceeds 1 percent. Accordingly, the Department will not apply the "roller chain" principle in this case.

Comment 13: CEMEX argues that the Department incorrectly added the adjustment for uncollected taxes to the U.S. net price in calculating the profit on U.S. further manufactured sales. According to CEMEX, the home market value added tax, real or imputed, bears no relationship to CEMEX's profit on sales of concrete in the United States, and the Department's further manufacturing methodology does not make use of the adjustment for uncollected home market taxes. CEMEX cites to the methodology used by the Department in New Minivans from Japan; Final Determination of Sales at Less than Fair Value (57 FR 21937, 21939, May 26, 1992), as an example to calculate profit on further manufactured sales in the United States.

Department's Position: We agree with CEMEX. In New Minivans from Japan, in calculating the profit on U.S. further manufactured sales, the Department deducted all value added to the minivan after importation, pursuant to section 772(e)(3) of the Act. The value added consisted of the portion of the minivan further manufactured in the United States as well as a proportional amount of profit attributable to the value added. Profit was calculated by deducting from the sales price of the minivan all production and selling costs which the company incurred with respect to the minivan. The resulting profit (or loss) amount was then allocated proportionally to all components of cost, and then only the profit (or loss) attributable to the value added was deducted in arriving at the profit (or loss) on the U.S. further manufactured sales. Consistent with this methodology, the Department does not increase the profit on a further manufactured transaction by the amount of uncollected taxes because those taxes do not contribute to the increased value resulting from further processing in the United States. Accordingly, we made the appropriate changes for our final results.

Comment 14: Petitioners contend that inventory carrying costs should not be added to home market prices when determining sales below cost.

Department's Position: We agree with petitioners and have made the appropriate change in our final results.

Comment 15: Petitioners contend that, as a result of CEMEX's refusal to provide profit data on pozzolanic cement, the Department should use BIA in calculating the profit to be used in constructed value.

CEMEX contends that the Department did not require the company to report home market sales of pozzolanic cement, that pozzolanic cement was specifically excluded from the scope of petitioners' antidumping petition, and that including profit from pozzolanic cement is irrelevant since the Department does not have to resort to constructed value in determining its final results.

Department's Position: Because we never resorted to constructive value (CV) for model match purposes, this issue is not relevant to this case.

Comment 16: Petitioners contend that the Department should use a more adverse BIA for the 1991 concrete materials costs at Sunward Materials's Tucson Division. Petitioners maintain that CEMEX misled the Department in failing to notify it that it did not calculate product-specific costs for its 1991 Tucson Division concrete materials costs. Petitioners contend that the appropriate BIA to be used for such costs should be based on the highest calculated materials cost from Sunward's Phoenix Division.

CEMEX contends that the Department's application of BIA for added material cost was unnecessary, erroneous, and excessive. CEMEX also contends that the adverse BIA proposed by petitioners is inappropriate because it is based on the costs of another division. CEMEX also contends that the approach taken by the Department in the preliminary results whereby the Tucson Division's 1990 concrete materials costs were used as BIA for 1991 Tucson Division concrete materials is already sufficiently adverse.

Department's Position: We disagree with both petitioners and respondent. CEMEX's U.S. subsidiary, Sunward Materials, did not calculate product-specific costs for any products

manufactured at Sunward's Tucson Division during 1991. Instead, respondent applied a single adjustment factor to the 1990 Tucson Division product-specific costs to reflect changes in cost from 1990 to 1991.

Respondent also did not calculate product-specific materials costs for certain types of concrete at Sunward's Tucson and Phoenix Divisions. Rather, Sunward calculated product-specific materials costs for the majority of concrete products manufactured at those two divisions and used an average cost for the remaining products at each division, respectively.

As in our preliminary results, we have had to use BIA for all products for which Sunward did not report product-specific materials costs. For the Phoenix Division, BIA was based on the highest individually calculated materials costs from the Phoenix Division. The same approach was applied to those costs not specifically calculated at the Tucson Division (*i.e.*, the Tucson Division's highest calculated cost was used). Petitioners' contention that we should apply the highest calculated cost from the Phoenix Division to the 1991 costs at the Tucson Division could be distortive in that the Phoenix Division's cost experience would not necessarily have any relation to the Tucson Division's cost experience. Accordingly, we have not changed our application of BIA to materials cost for these final results.

Comment 17: Respondent contends that the Department erred in disregarding all sales found to be below cost of production without considering whether CEMEX recovers its costs over a reasonable period of time. Respondent also contends that its home market sales were profitable during the period of review and that the costs of specific below-cost sales were recovered.

Petitioners point out that CEMEX concedes that below-cost sales were made over an extended period of time and in substantial quantities. Moreover, petitioners contend that CEMEX did not recover its costs on Type II sales.

Department's Position: We agree that CEMEX's sales below cost were made over an extended period of time without fully recovering cost. Section 773(b) of the Act provides that the Department will determine whether sales are made at less than the cost of producing the subject merchandise. If such sales are not at prices which permit recovery of all costs within a reasonable period of time, such sales shall be disregarded in the determination of FMV. Review of the legislative history regarding this provision indicates that Congress recognized that certain industries have enormous start-up costs which might cause initial sales to be below the COP. These industries, such as the commercial airliner industry mentioned in the House and Senate reports, may incur large research and development or technology costs which are not immediately recovered by sales (see, *e.g.*, House Report No. 571, 93rd Cong., 1st Sess. 71 (1973)). However, because it is clear that these costs benefit future sales, Congress would not have the Department disregard the below-cost sales if the costs would be recovered, by those future sales, in a reasonable period of time.

The Mexican cement industry is a mature industry, and CEMEX is an established manufacturer. We determined through our analysis that between 10% and 90% of CEMEX's home market sales were made at prices below cost. Given the lack of information on record to support a belief that CEMEX experienced high start-up costs, or other unusually high expenses in the review period, which would have been recovered by, and benefitted, future sales, we eliminated from our analysis those sales found to be below cost over an extended period of time.

Comment 18: CEMEX argues that inventory carrying expenses should not be subtracted in the calculation of net U.S. purchase price.

Petitioners state that this issue is moot because all sales reported by CEMEX as PP sales are actually ESP sales.

Department's Position: We agree with CEMEX. For those sales determined to be PP sales, the Department has corrected the net PP calculation, excluding inventory carrying costs from the final calculation.

Comment 19: CEMEX argues that the Department incorrectly removed handling and packing revenues from home market prices for comparison to the cost of production in the Department's sales-below-cost test.

Petitioners assert that the Department was correct in excluding handling and packing revenues from the sales-below-cost equation because handling and packing revenues were not included in the cost of production calculation. Consequently, handling and packing revenues are properly not part of the home market net price equation.

Department's Position: We agree with CEMEX. The equation for home market net price used in the preliminary results contained a clerical error. Unlike imputed revenue, handling and packing revenues are properly part of the home market net price equation because they represent actual revenues derived from sales. Accordingly, we have made the appropriate changes for our final results.

Comment 20: CEMEX claims that the Department incorrectly subtracted, rather than added the field SPECIALE in both the profit and the net U.S. price calculations. Because the field SPECIALE represents actual income realized from Sunward's further manufactured sales, CEMEX contends that it should be added to, rather than subtracted from, price to reach net price.

Petitioners argue that the Department was correct to subtract the field SPECIALE in calculating net U.S. price and profit on sales by Sunward because CEMEX failed to explain in the record what is included in the field SPECIALE and how it should be treated in calculating Sunward's net U.S. price and profit.

Department's Position: We agree with CEMEX. The Department examined the field SPECIALE during its verification of sales made by Sunward. The field SPECIALE represents extra income realized for special charges for coloring, Sunday deliveries, etc. Therefore, the Department has made the necessary correction in the final results.

Uncollected Taxes: On March 19, 1993, the United States Court of Appeals for the Federal Circuit, in affirming the decision in *Zenith Electronics Corp.* v. *United States* (*Zenith Electronics* v. *United States*), Appeals 92–1043, –1044, –1045, –1046 (Fed. Cir. March 19, 1993), ruled that section 772(d)(1)(C) of the Act provides for an addition to U.S. price to account for taxes which the exporting country would have assessed on the merchandise had it been sold in the home market, and that section 773(a)(4)(B) of the Act does not allow circumstance-of-sale adjustments to FMV for differences in taxes. Accordingly, we have chenged our practice and will no longer calculate a hypothetical tax on the U.S. product, but will, for the time being, add to the U.S. price the absolute amount of tax on the comparison merchandise sold in the country of exportation. By adding the amount of home market tax to U.S. price, absolute dumping margins are not inflated or deflated by differences between taxes included in FMV and those added to U.S. price.

In addition, we will propose a change in 19 CFR 353.2(f)(2) to provide that we will calculate weighted-average dumping margins by dividing the aggregated dumping margins, calculated as described above, by the aggregated U.S. prices net of taxes. This change would result in weighted-average dumping margin rates which are neither inflated nor deflated on account of our

VOL 58 ISS 80 AP 28 1993 UMI

methodology of accounting for taxes paid in the home market but rebated or not collected by reason of exportation. We are in the process of drafting this proposed change, and we will begin the rule making process as soon as possible.

Clerical Errors: The Department corrected certain clerical errors which petitioners and respondent noted, as well as clerical errors the Department identified in completing its final results.

Final Results of Review

As a result of our review, we determine the weighted-average dumping margins for the period April 12, 1990, through July 31, 1991, to be:

Company	Margin Percentage
CEMEX, S.A.	30.44
Apasco, S.A. de C.V	[1]53.26

[1]For the period April 12, 1990 – July 31, 1991, Apasco, S.A. de C.V. made no shipments. In the final determination of sales at less than fair value, the Department determined a margin percentage of 53.26% for Apasco, S.A. de C.V.

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between USP and FMV may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service.

Furthermore, the following deposit requirements will be effective upon publication of these final results of administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse for consumption, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for the reviewed companies will be the rates as listed above; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be the "all other" rate of 30.74 percent. This rate represents the highest rate for any firm with shipments in this review, other than those firms receiving a rate based entirely on best information available.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Failure to comply is a violation of the APO.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: April 21, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

National Oceanic and Atmospheric Administration

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of receipt of applications for four scientific research and enhancement permits (P503E,F,G,H).

Notice is hereby given that the Idaho Department of Fish and Game (IDFG) has applied in due form for scientific research and enhancement permits to take endangered and threatened species as authorized by the Endangered Species Act (ESA) of 1973 (16 U.S.C. 1531–1543) and the National Marine Fisheries Service (NMFS) regulations governing endangered fish and wildlife permits (50 CFR Parts 217–227). These applications involve the artificial propagation of Pacific salmon species listed under the ESA.

Artificial Propagation of Pacific Salmon Under the ESA

In determining whether to issue Pacific salmon enhancement permits, NMFS will rely heavily on its Interim Policy on Artificial Propagation of Pacific Salmon under the ESA (58 FR 17573). The policy provides guidance on the use of artificial propagation in the conservation of listed Pacific salmon species. The use of artificially propagated Pacific salmon in recovery programs depends on available information regarding the similarity of the naturally and artificially propagated fish in genetic, phenotypic, and life-history traits, and in habitat characteristics. Artificial propagation of listed salmon species for recovery must attempt to avoid risks by preserving the genetic and ecological distinctiveness of the listed species. Artificial propagation of a listed salmon species is not a substitute for eliminating the factors causing or contributing to the species' decline.

Use of Hatchery Population Under ESA Enhancement Permits

Whether a natural population is considered distinct and hence a "species" under the ESA is determined solely by the two criteria that define an evolutionarily significant unit (ESU)—its reproductive isolation and its contribution to the biological species' evolutionary legacy. Genetic resources important to the species' evolutionary legacy may reside in hatchery fish as well as in natural fish, in which case the hatchery fish can be considered part of the biological ESU in question.

If available information indicates that existing hatchery fish can be considered part of the biological ESU, then these hatchery fish could be considered for use in recovery efforts. In this case, integration of natural broodstock of the listed species into the existing hatchery population is possible under an enhancement permit. If the hatchery population is managed for purposes other than ESA recovery efforts, directed take of natural fish from the listed species for broodstock would be prohibited.

If available information indicates that either: (1) The hatchery population in question is of a different genetic lineage than the listed natural populations, (2) artificial propagation has produced appreciable changes in the hatchery population in characteristics that are believed to have a genetic basis, or (3) there is substantial uncertainty about the relationship between existing hatchery fish and the natural population, the existing hatchery fish will not be considered part of the biological ESU. In this case, direct take of fish from the listed species for broodstock would not be permitted.

Summary of Applications

The IDFG requests authorization to conduct four (4) one-year hatchery programs in the Snake River Basin involving research on and enhancement of Snake River spring/summer chinook salmon: (1) Pahsimeroi River summer chinook salmon at Pahsimeroi Fish Hatchery (FH) (P503E); (2) South Fork of the Salmon River summer chinook salmon at McCall Fish Hatchery (P503F); (3) East Fork Salmon River (EFSR) spring chinook salmon at Sawtooth Fish Hatchery (P503G); and (4) Headwaters of the Salmon River spring chinook salmon at Sawtooth Fish Hatchery (P503H).

NMFS has made a preliminary determination that the Pahsimeroi River hatchery population cannot be considered part of the biological ESU and therefore cannot be considered for use in enhancement programs (Schiewe, 1993). NMFS has also made a preliminary determination that the South Fork Salmon River stock of spring/summer chinook salmon held at McCall FH, the headwaters of the Salmon River stock of spring/summer salmon held at Sawtooth FH, and the EFSR stocks of spring/summer chinook salmon held at Sawtooth FH, can be considered part of the biological ESU and therefore can be considered for use in enhancement programs (Schiewe, 1993). However, NMFS notes that there is considerable controversy regarding the return rate of Sawtooth FH fish. NMFS believes it is likely that this program has adversely affected the natural population by taking broodstock to support an unsuccessful hatchery operation. However, monitoring and evaluation efforts have not been adequate to fully resolve this issue. It is essential that this be remedied if further artificial propagation under the ESA is contemplated for Sawtooth FH (Schiewe, 1993).

IDFG estimates adult broodstock takes for enhancement (mitigation production) of listed Snake River spring/summer chinook salmon as follows: 570 for Pahsimeroi FH, 760 for McCall FH, 5 for Sawtooth FH (EFSR), and 21 for Sawtooth FH (headwaters of Salmon River). In addition, as part of the research (supplementation studies), IDFG proposes to release a certain percentage of the returns to the weirs upstream to spawn naturally, 33 percent in the Pahsimeroi FH, McCall FH, and Sawtooth FH (headwaters of Salmon River) programs and 50 percent in the Sawtooth FH (EFSR) program. Proposals to release progeny of the broodstock will be submitted separately.

Written data or views, or requests for a public hearing on these applications, should be submitted to the Director, Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., room 8268, Silver Spring, MD 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on any of these particular applications would be appropriate. The holding of such hearings is at the discretion of the Assistant Administrator for Fisheries.

Documents submitted in connection with the above applications, the NMFS Interim Policy on Artificial Propagation under the ESA (58 FR 17573), and NMFS' preliminary determinations on the relationship of the hatchery populations to the natural population in the ESU of the listed species (Schiewe, 1993) are available for review by interested persons in the following offices by appointment:

Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., suite 8268, Silver Spring, MD 20910 (301/713–2322); and

Environmental and Technical Services Division, National Marine Fisheries Service, 911 North East 11th Ave., room 620, Portland, OR 97232 (503/230–5400).

Dated: April 22, 1993.

Herbert W. Kaufman,

Acting Director, Office of Protected Resources, National Marine Fisheries Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–22–M

Endangered Species; Modification to Scientific Research Permit No. 777; Coastal Ecology Group, Environmental Laboratory, Waterways Experiment Station, U.S. Army Corps of Engineers

Notice is hereby given that pursuant to the provisions of the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) (ESA) and the regulations governing endangered fish and wildlife (50 CFR parts 217–222), and the Conditions hereinafter set out, Scientific Research Permit No. 777, issued to the U.S. Army Corps of Engineers' Coastal Ecology Group, on April 27, 1992 (57 FR 15286), has been modified to add an increased number of takes of those species previously authorized, in order to conduct telemetric studies.

This modification grants authority for an increased directed take of up to 15 loggerhead sea turtles and 5 Kemp's ridleys to be fitted with backpack-mounted satellite tags for the purpose of monitoring the turtles' seasonal movements into and out of U.S. East coast channels coast via the ARGOS satellite. Two-hundred-fifty loggerhead and twenty-five Kemp's ridley sea turtles may be taken by trawler, equipped with radio and depth sensitive sonic tags, and monitored to assess the baseline behavior and the relocation behavior of sea turtles in dredged channels of the Southeastern United States. Trawling tests for determining sea turtle abundance in channels will be evaluated concurrently.

This modification became effective upon signature.

Documents pertaining to this Modification and the original Permit are available for review in the following offices:

Office of Protected Resources, National Marine Fisheries Service, 1335 East West Hwy., room 7324, Silver Spring, Maryland 20910; and

Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Blvd., St. Petersburg, FL 33702.

Dated: April 22, 1993.

William W. Fox, Jr.,

Dirctor, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Endangered Species; Permits

AGENCY: National Marine Fisheries Service, (NMFS) NOAA, Commerce.

ACTION: Issuance of Permit; Oregon Department of Fish and Wildlife (P211C).

On September 14, 1992, notice was published (57 FR 41921) that an application had been filed by Oregon Department of Fish and Wildlife, to take listed spring/summer chinook salmon (*Oncorhynchus tshawytscha*) for the purposes of scientific research as authorized by the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531–1543) and the NMFS regulations governing listed fish and wildlife (50 CFR parts 217–222).

Notice is hereby given that on April 22, 1993, as authorized by the provisions of the ESA (16 U.S.C. 1531–1543), NMFS issued Permit Number 818 for the above taking subject to certain conditions set forth therein.

Issuance of this Permit, as required by the ESA, was based on a finding that such Permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the listed species which is the subject of this Permit; (3) is consistent with the purposes and policies set forth in Section 2 of the ESA. This Permit was also issued in accordance with and is subject to Parts 217–222 of Title 50 CFR, the NMFS regulations governing listed species permits.

VOL 58 ISS 80 AP 28 1993 UMI

The application, Permit, and supporting documentation are available for review by interested persons in the following offices by appointment:

Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Highway, Suite 8268, Silver Spring, MD 20910 (301/713–2322); and

Environmental and Technical Services Division, National Marine Fisheries Service, 911 North East 11th Ave., Room 620, Portland, OR 97232 (503/230–5400).

Dated: April 22, 1993.

William W. Fox, Jr.,

Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Receipt of Application for a Scientific Research Permit (P394C).

Notice is hereby given that Glacier Bay National Park and Preserve, P.O. Box 140, Gustavus, AK 99826–0140, Alaska 99603, requests authorization to approach, up to 15 times each, up to 200 humpback whales (*Megaptera novaeangliae*) annually over a five-year period during the course of photo-identification studies in Alaskan waters. Authorization is also being requested to conduct opportunistic photographic identification of approximately 20 minke whales (*Balaenoptera acutorostrata*) and 200 killer whales (*Orcinus orca*) during the proposed humpback whale studies.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, NOAA, 1335 East-West Hwy., room 7324, Silver Spring, MD 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in this application are summaries of those of the applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review by interested persons in the following offices (by appointment):

BILLING CODE 3510–22–M

COMMODITY FUTURES TRADING COMMISSION

Financial Products Advisory Committee; Fourth Renewal

The Commodity Futures Trading Commission has determined to renew for a period of two years its advisory committee designated as the "Commodity Futures Trading Commission Financial Products Advisory Committee." As required by section 14(a)(2)(A) of the Federal Advisory Committee Act, 5 U.S.C. app. 2, section 14(a)(2)(A), and 41 CFR 101–6.1007 and 101–6.1029, the Commission has consulted with the Committee Management Secretariat of the General Services Administration, and the Commission certifies that the renewal of the advisory committee is in the public interest in connection with duties imposed on the Commission by the Commodity Exchange Act, 7 U.S.C. 1, *et seq.*, as amended.

The objectives and scope of activities of the Financial Products Advisory Committee are to conduct public meetings and submit reports and recommendations on issues concerning individuals and industries interested in or affected by financial markets regulated by the Commission.

Commissioner Sheila C. Bair serves as Chairman and Designated Federal Official of the Financial Products Advisory Committee. The Committee's membership represents a cross-section of interested and affected persons and groups including representatives of newer institutional market participants, such as broker-dealers, pension sponsors and investment companies; traditional market participants, such as futures commission merchants, commodity pool operators and commodity trading advisors; and representatives of the academic, legal and accounting communities and other appropriate public participants.

Interested persons may obtain information or make comments by writing to the Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581.

Issued in Washington, DC, on April 23, 1993, by the Commission.

Jean A. Webb,

Secretary of the Commission.

[FR Doc. 93–9924 Filed 4–27–93; 8:45 am]

BILLING CODE 6351–01–M

Agricultural Advisory Committee Meeting

This is to give notice, pursuant to section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. app. 2, Section 10(a) and 41 CFR 101–6.1015(b), that the Commodity Futures Trading Commission's Agricultural Advisory Committee will conduct a public meeting in the Hearing Room on the basement level of the Commission's Washington, DC headquarters, 2033 K Street, NW., Washington, DC on May 17, 1993, beginning at 8:30 a.m. and lasting until 1:30 p.m. The agenda will consist of:

Agenda

I. Introductory remarks, Commissioner Joseph B. Dial;
II. Discussion of delivery issues, points, and specifications;
III. Discussion of contracts under consideration and/or being discussed by various industry groups (weaned calf, boxed beef, dairy);
IV. Discussion of speculative position limits;
V. Discussion of CFTC reauthorization issues;
VI. Enforcement presentation—investigation of futures trading;
VII. Discussion of single regulator theory;
VIII. Discussion of *Arkonsas Best*;
IX. Discussion of a Risk Management Symposium for 1995;
X. Other Committee Business; and
XI. Closing Remarks by Commissioner Joseph B. Dial.

The purpose of this meeting is to solicit the views of the Committee on the above-listed agenda matters. The Advisory Committee was created by the Commodity Futures Trading Commission for the purpose of receiving advice and recommendations on agricultural issues. The purposes and objectives of the Advisory Committee are more fully set forth in the May 6, 1991 fourth renewal charter of the Advisory Committee.

The meeting is open to the public. The Chairman of the Advisory Committee, Commissioner Joseph B. Dial, is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Advisory Committee should mail a copy of the statement to the attention of: the Commodity Futures Training Commission Agricultural Advisory Committee c/o Kimberly N. Griles, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, before the meeting. Members of the public who wish to make oral statements should also inform Ms. Griles in writing at the foregoing address at least three business days before the meeting. Reasonable provision will be made, if time permits, for an oral presentation of no more than five minutes each in duretion.

Issued by the Commission in Washington, DC on April 22, 1993.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 6351–01–M

DEPARTMENT OF DEFENSE

Department of the Army

Privacy Act of 1974; Amend Systems of Records

AGENCY: Department of the Army, DOD.

ACTION: Amend systems of records.

SUMMARY: The Department of the Army is amending five systems of records notices in its existing inventory of records system subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: This proposed action will be effective without further notice on May 28, 1993, unless comments are received which result in a contrary determination.

ADDRESS: U.S. Army Information Systems Command, ATTN: ASOP-MP, Fort Huachuca, AZ 85613–5000.

FOR FURTHER INFORMATION CONTACT: Ms. Pat Turner at (602) 538-6856 or DSN 879-6856.

SUPPLEMENTARY INFORMATION: The Department of the Army systems of records notices subject to the Privacy Act of 1974, (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address above.

The specific changes to the records systems being amended are set forth below followed by the notices, as amended, published in their entirety. The proposed amendments are not within the purview of the provision of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of new or altered system reports.

Dated: April 20, 1993.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

AMENDMENTS

A0040–66aDASG

SYSTEM NAME:

Medical Staff Credentials File *(February 22, 1993, 58 FR 10063).*

CHANGES:

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

Add 'and medical malpractice case files' after 'clinical performance.'

* * * * *

RETENTION AND DISPOSAL:

Add 'Medical malpractice case files are destroyed after 10 years' to entry.

* * * * *

A0040–66aDASG

SYSTEM NAME:

Medical Staff Credentials File.

SYSTEM LOCATION:

Medical treatment facilities at Army commands, installations and activities. Official mailing addresses are published as an appendix to the Army's compilation of record systems notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals performing clinical practice in medical treatment facilities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Documents reflecting delineation of clinical privileges and clinical performance and medical malpractice case files.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 1071; and E.O. 9397.

PURPOSE(S):

To determine and assess capability of practitioner's clinical practice.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In specific instances, clinical privileged information from this system

VOL 58 ISS 80 AP 28 1993 UMI

of records may be provided to civilian and military medical facilities, Federation of State Medical Boards of the United States, State Licensure Authorities and other appropriate professional regulating bodies for use in assuring high quality health care.

The 'Blanket Routine Uses' set forth at the beginning of the Army's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders.

RETRIEVABILITY:

By individual's surname.

SAFEGUARDS:

Records are maintained in areas accessible only to the medical treatment facility commander and credentials committee members.

RETENTION AND DISPOSAL:

Records are retained in medical treatment facility of individual's last assignment. Records of military members are transferred to individual's Military Personnel Records Jacket upon separation or retirement. Records on civilian personnel are destroyed 5 years after employment terminates.

Medical malpractice case files are destroyed after 10 years.

SYSTEM MANAGER(S) AND ADDRESS:

Office of the Surgeon General, Headquarters, Department of the Army, 5109 Leesburg Pike, Falls Church, VA 22041–3258.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the commander of the medical treatment where practitioner provided clinical service. Official mailing addresses are published as an appendix to the Army's compilation of record systems notices.

For verification purposes, the individual should provide the full name, Social Security Number, and signature.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this record system should address written inquiries to the commander of the medical treatment where practitioner provided clinical service. Official mailing addresses are published as an appendix to the Army's compilation of record systems notices.

For verification purposes, the individual should provide the full name, Social Security Number, and signature.

CONTESTING RECORD PROCEDURES:

The Army's rules for accessing records, contesting contents, and appealing initial determinations are contained in Army Regulation 340–21; 32 CFR part 505; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Interviewer, individual's application, medical audit results, other administrative or investigative records obtained from civilian or military sources.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

A0040–905DASG

SYSTEM NAME:

Privately Owned Animal Record Files *(February 22, 1993, 58 FR 10066).*

CHANGES:

* * * * *

SYSTEM LOCATION:

Delete entry and replace with 'Veterinary service at medical facilities on Army installations and activities. Official mailing addresses are published as an appendix to the Army's compilation of systems of records notices.'

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Delete entry and replace with 'Persons who own animals authorized medical care, i.e., persons enrolled in the Defense Enrollment/Eligibility Reporting System (DEERS).'

CATEGORIES OF RECORDS IN THE SYSTEM:

Delete entry and replace with 'Name, Social Security Number, home address and telephone number of animal's owner; record of treatment of animal; and related information.'

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Delete entry and replace with '10 U.S.C. 3010, 5013, and 8013; and E.O. 9397'.

PURPOSE(S):

Change 'Veterinary Animal Disease Prevention and Control Facility in connection with the Veterinary Preventive Medicine and Zoonotic Disease Control Program.' to read 'Veterinary Treatment Facility.

Add a new paragraph 'Used by veterinarians and health care authorities to identify the animal, verify ownership, record history, and to insure veterinary care, treatment and immunizations provided to animals of authorized owners is recorded; to compile statistical data; conduct research; teach; assist in law enforcement, to include investigation and litigation; and evaluate the care provided.'

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Delete entry and replace with 'The information may be disclosed to aid in preventive health and communicable disease control programs, report medical conditions required by law to Federal, state, and local agencies.'

* * * * *

STORAGE:

Add 'and other computerized or machine readable media' after 'folders'.

RETRIEVABILITY:

Add 'and Social Security Number' after 'name'.

* * * * *

RETENTION AND DISPOSAL:

Delete entry and replace with 'Destroy upon death of the animal, transfer of owner, or 2 years after last entry in the record.'

SYSTEM MANAGER(S) AND ADDRESS:

Delete entry and replace with 'Office of the Surgeon General, Headquarters, Department of the Army, ATTN: DASG-VCS, 5109 Leesburg Pike, Falls Church, VA 22041–3258.'

* * * * *

A0040–905DASG

SYSTEM NAME:

Privately Owned Animal Record Files.

SYSTEM LOCATION:

Veterinary service at medical facilities on Army installations and activities. Official mailing addresses are published as an appendix to the Army's compilation of systems of records notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons whose privately owned animals receive veterinary care.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, Social Security Number, home address and telephone number of animal's owner; record of treatment of animal; and related information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 3010, 5031 and 8012; and E.O. 9397.

PURPOSE(S):

To record registration, vaccination, and/or treatment of animals; to compile statistical data; and to identify animals registered with the Veterinary Treatment Facility.

Used by veterinarians and health care authorities to identify the animal, verify ownership, record history, and to insure veterinary care, treatment and immunizations provided to animals of authorized owners is recorded; to compile statistical data; conduct research; teach; assist in law enforcement, to include investigation and litigation; and evaluate the care provided.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information may be used to aid in preventive health and communicable disease control programs, report medical conditions required by law to Federal, state, and local agencies.

The 'Blanket Routine Uses' set forth at the beginning of the Army's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders and other computerized or machine readable media.

RETRIEVABILITY:

By name and Social Security Number of the animal's owner.

SAFEGUARDS:

Records are maintained in buildings which are locked when unattended and are accessed only by authorized personnel having an official need-to-know.

RETENTION AND DISPOSAL:

Destroy upon death of the animal, transfer of owner, or 2 years after last entry in the record.

SYSTEM MANAGER(S) AND ADDRESS:

Office of the Surgeon General, Headquarters, Department of the Army, ATTN: DASG-VCS, 5109 Leesburg Pike, Falls Church, VA 22041–3258.

NOTIFICATION PROCEDURE:

Individuals seeking to determine if information about themselves is contained in this record system should address written inquiries to the veterinary facility at the installation where the animal was treated or euthanized. Official mailing addresses are published in the Army's compilation of record systems notices.

Animal owner should provide the full name, Social Security Number, home address and telephone number and the animal's rabies vaccination number.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this record system should address written inquiries to the veterinary facility at the installation where the animal was treated or euthanized. Official mailing addresses are published in the Army's compilation of record systems notices.

Animal owner should provide the full name, Social Security Number, home address and telephone number and the animal's rabies vaccination number. Personal visits may be made to the veterinary facility where animal was treated. Owner must provide personal identification such as a valid military identification card or driver's license.

CONTESTING RECORD PROCEDURES:

The Army's rules for accessing records, contesting contents, and appealing initial determinations are contained in Army Regulation 340–21; 32 CFR part 505; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

From the animal owner, veterinarian reports, and similar or related documents.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

A0095–1TRADOC

SYSTEM NAME:

Individual Flight Records Folder *(February 22, 1993, 58 FR 10073).*

CHANGES:

* * * * *

SYSTEM IDENTIFIER:

Change system identifier to 'A0095–1aTRADOC'.

SYSTEM LOCATION:

Delete entry and replace with 'Records are located at flight operations sections and contractor facilities at fixed Army airfields and other aviation units for all personnel on whom flight records are maintained. Including activities who approve contractor aircraft flight and ground operations procedures or use contractor personnel who operate aircraft for the government.

In addition to above locations, copies of individual flight records are maintained for active Army and Army Reserve officers at U.S. Total Army Personnel Command, ATTN: TAPC-OPE-V, 200 Stovall Street, Alexandria, VA 22332–0400;

Active Army warrant officers at U.S. Total Army Personnel Command, ATTN: TAPC-OPW-AV, 200 Stovall Street, Alexandria, VA 22332–0400;

Active Army Medical Service Corps (MSC) officers at Headquarters, Department of the Army (HQDA), ATTN: DASG-HCO-A, Skyline Place, Building 6, Falls Church, VA 22041–3258.

Army reservists not on extended active duty at U.S. Army Reserve Personnel Center, St. Louis, MO 63132–5200; National Guard Personnel at the National Guard Bureau, Aberdeen Proving Grounds, MD 21005–5000; Contractor personnel by the designated Government Flight Representative (GFR) at the contractor facility.'

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

Delete entry and replace with 'DA Forms 759 and 759–1 (Individual Flight and Flight Certificate Army, Section I, II, and III); DA Form 4186 (Medical Recommendation for Flying Duty); DA Form 4507 (Standard Evaluation/Training Gradeslip); DD Form 1821 (Contractor - Crewmember Record); Name, Social Security Number, home address, date of birth, security clearance data, education, waivers, qualifications, disqualifications, re-qualifications, training, proficiency, and experience data, medical and physiological data, approvals to operate Government aircraft, requests for approval of contractor flight crewmember and contractor qualification training, and similar relevant documents.'

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Add 'Army Regulation 95–20, Contractor Flight Operations'.

PURPOSE(S):

Add at end of sentence 'and to monitor and manage individual contractor flight and ground personnel records.'

STORAGE:

Delete entry and replace with 'Paper records in file folders, notebooks, and selected data automated on computer tapes and discs for management purposes.'

RETRIEVABILITY:

Delete entry and replace with 'Manual records are retrieved by individual surname.

Automated records are retrieved by name, plus any numeric identifier such as date of birth, Social Security Number, or Army serial number.'

VOL 58 ISS 80 AP 28 1993 UMI

SAFEGUARDS:

Add at end of sentence 'Automated systems employ computer hardware/software safeguard features and controls which meet the administrative, physical, and technical safeguards of Army Regulation 380–19, Information Systems Security.'

RETENTION AND DISPOSAL:

Delete entry and replace with 'Active paper records are retained by the Flight Operations Facility until individual is transferred or separated. The records are transferred with the military personnel records jacket or civilian personnel folders, as appropriate.

Upon separation or retirement of individual, the records are retired to the National Personnel Records Center (Civilian Personnel Records), 111 Winnebago Street, St Louis, MO 63118 and U.S. Army Personnel Center (Military Personnel Records), and U.S. Army Reserve Components Personnel and Administration Center (Reserve Personnel), 9700 Page Boulevard, St. Louis, MO 63132–5200; retained for 75 years after date of birth or 60 years after date of earliest document in the folder if date of birth cannot be ascertained.

If determined by the contracting officer, contractor flight personnel records with definite legal and administrative value to or required by the Army will be preserved with Army records to which they pertain and destroyed when no longer needed. Automated management information at system locations is retained until no longer needed for current operations.'

* * * * *

NOTIFICATION PROCEDURE:

Delete entry and replace with 'Individuals seeking to determine if information about themselves is contained in this record system should send written inquiries to the Flight Operations Section of their current unit or contractor facility; if not on active duty, send written inquiries to addresses listed in 'system location' or to Commander, U.S. Army Aviation Center, ATTN: ATZQ-ESO, Fort Rucker, AL 36362–5000.

Individual should provide the full name, Social Security Number, details which will help locate the records, current address, and signature.'

RECORD ACCESS PROCEDURES:

Delete entry and replace with 'Individuals seeking access to records about themselves contained in this record system may visit or send written inquiry to the Flight Operations Section of their current unit or contractor facility; if not on active duty, send written inquiries to addresses listed in 'system location' or to Commander, U.S. Army Aviation Center, ATTN: ATZQ-ESO, Fort Rucker, AL 36362–5000.

Individual should provide the full name, Social Security Number, details which will help locate the records, current address, and signature.'

* * * * *

A0095–1aTRADOC

SYSTEM NAME:

Individual Flight Records Folder.

SYSTEM LOCATION:

Records are located at flight operations sections and contractor facilities at fixed Army airfields and other aviation units for all personnel on whom flight records are maintained. Including activities who approve contractor aircraft flight and ground operations procedures or use contractor personnel who operate aircraft for the government.

In addition to above locations, copies of individual flight records are maintained for active Army and Army Reserve officers at U.S. Total Army Personnel Command, ATTN: TAPC-OPE-V, 200 Stovall Street, Alexandria, VA 22332–0400;

Active Army warrant officers at U.S. Total Army Personnel Command, ATTN: TAPC-OPW-AV, 200 Stovall Street, Alexandria, VA 22332–0400;

Active Army Medical Service Corps (MSC) officers at Headquarters, Department of the Army (HQDA), ATTN: DASG-HCO-A, Skyline Place, Building 6, Falls Church, VA 22041–3258.

Army reservists not on extended active duty at U.S. Army Reserve Personnel Center, St. Louis, MO 63132–5200;

National Guard Personnel at the National Guard Bureau, Aberdeen Proving Grounds, MD 21005–5000;

Contractor personnel by the designated Government Flight Representative (GFR) at the contractor facility.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Army aviators who are members of the Active and Reserve Components and qualified and current in the aircraft to be flown; civilian employees of Government agencies and Government contractors who have appropriate certifications or ratings, flight surgeons or aeromedical physicians' assistants in aviation service, enlisted crew chief/crew members, aerial observers, personnel in non-operational aviation positions, and those restricted or prohibited by statute from taking part in aerial flights.

CATEGORIES OF RECORDS IN THE SYSTEM:

DA Forms 759 and 759–1 (Individual Flight and Flight Certificate Army (Sections I, II, and III); DA Form 4186 (Medical Recommendations for Flying Duty), DA Form 4507 (Standard Evaluation/Training Gradeslip), DD Form 1021 (Contractor - Crewmember Record); Name, Social Security Number, home address, date of birth, security clearance data, education, waivers, qualifications, disqualifications, re-qualifications, training, proficiency, and experience data, medical and physiological data, approvals to operate Government aircraft, requests for approval or contractor flight crewmember and contractor qualification training, and similar relevant documents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301; 10 U.S.C. 3013; E.O. 9397; and Army Regulation 95–20, Contractor Flight Operations.

PURPOSE(S):

To record the flying experience and qualifications data of each aviator, crew member, and flight surgeon in aviation service; and to monitor and manage individual contractor flight and ground personnel records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information may be disclosed to the Federal Aviation Agency and/or the National Transportation Safety Board.

The 'Blanket Routine Uses' set forth at the beginning of the Army's compilation of system of record notices apply to this record system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders, notebooks, and selected data automated on computer tapes and discs for management purposes.

RETRIEVABILITY:

Manual records are retrieved by individual surname.

Automated records are retrieved by name, plus any numeric identifier such as date of birth, Social Security Number, or Army serial number.

SAFEGUARDS:

Records are maintained in secure areas available only to designated persons having official need for the record.

Automated systems employ computer hardware/software safeguard features and controls which meet the administrative, physical, and technical safeguards of Army Regulation 380–19, Information Systems Security.

RETENTION AND DISPOSAL:

Active paper records are retained by the Flight Operations Facility until individual is transferred or separated. The records are transferred with the military personnel records jacket or civilian personnel folders, as appropriate.

Upon separation or retirement of individual, the records are retired to the National Personnel Records Center (Civilian Personnel Records), 111 Winnebago Street, St Louis, MO 63118 and U.S. Army Personnel Center (Military Personnel Records), and U.S. Army Reserve Components Personnel and Administration Center (Reserve Personnel), 9700 Page Boulevard, St Louis, MO 63132–5200; retained for 75 years after date of birth or 60 years after date of earliest document in the folder if date of birth cannot be ascertained.

If determined by the contracting officer, contractor flight personnel records with definite legal and administrative value to or required by the Army will be preserved with Army records to which they pertain and destroyed when no longer needed. Automated management information et system locations is retained until no longer needed for current operations.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, U.S. Army Training and Doctrine Command, ATTN: ATIM-SR, Fort Monroe, VA 23651–5000.

NOTIFICATION PROCEDURE:

Individuals seeking to determine if information about themselves is contained in this record system should address written inquiries to the Flight Operations Section of their current unit or contractor facility; if not on active duty, send written inquiries to addresses listed in 'system location' or to Commander, U.S. Army Aviation Center, ATTN: ATZQ-ESO, Fort Rucker, AL 36362–5000.

Individual should provide the full name, Social Security Number, details which will help locate the records, current address, and signature.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this record system may visit or address written inquiries to the Flight Operations Section of their current unit or contractor facility; if not on active duty, furnishing full name and Social Security Number; if not on active duty, send written inquiries to addresses listed in 'system location' or to Commander, U.S. Army Aviation Center, ATTN: ATZQ-ESO, Fort Rucker, AL 36362–5000.

Individual should provide the full name, Social Security Number, details which will help locate the records, current address, and signature.

CONTESTING RECORD PROCEDURES:

The Army's rules for accessing records, contesting contents, and appealing initial determinations are contained in Army Regulation 340–21; 32 CFR part 505; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

From the individual, Federal Aviation Administration, flight surgeons, evaluation reports, proficiency and readiness tests, and other relevant records and reports.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

A0095–2dTRADOC-ATC

SYSTEM NAME:

Air Traffic Controller Records *(February 22, 1993, 58 FR 10074).*

CHANGES:

SYSTEM NAME:

Delete entry and replace with 'Air Traffic Controller/Maintenance Technician Records'.

* * * * *

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Delete entry and replace with 'Air Traffic Controllers and Air Traffic Control Maintenance Technicians employed by the Department of the Army.'

CATEGORIES OF RECORDS IN THE SYSTEM:

Delete entry and replace with 'Name, Social Security Number, Air Traffic Controller and Maintenance Technician qualifications and certifications, training, proficiency data and ratings, date assigned to current facility, and similar relevant documents.'

* * * * *

PURPOSE(S):

Delete entry and replace with 'To determine proficiency of Air Traffic Controllers and Air Traffic Control Maintenance Technicians and the reliability of the Air Traffic Control system operations within the Department of the Army.'

* * * * *

STORAGE:

Delete entry and replace with 'Paper records in file folders and on cards. Selected data is automated on tapes and discs for management purposes.'

* * * * *

SAFEGUARDS:

Delete entry and replace with 'Records are maintained in secure areas available only to designated persons having official need for the record. Automated systems employ computer hardware/software safeguard features and control which meet the administrative, physical, and technical safeguards of Army Regulation 380–19, Information Systems Security.'

RETENTION AND DISPOSAL:

Delete entry and replace with 'Active paper records are retained by the Air Traffic Control facility until individual is transferred. The records are transferred with the military personnel records jacket (MPRJ) or civilian personnel folders, as appropriate.

Upon separation or retirement of individual, the records are retired to the National Personnel Records Center (Civilian Personnel Records), 111 Winnebago Street, St Louis, MO 63118 and U.S. Army Personnel Center, and U.S. Army Reserve Components Personnel and Administration Center, 9700 Page Boulevard, St. Louis, MO 63132–5200; retain for 75 years after date of birth or 60 years after date of earliest document in the folder if date of birth cannot be ascertained. Automated management information at the primary location is retained until no longer needed for current operations.'

* * * * *

RECORD SOURCE CATEGORIES:

Delete entry and replace with 'From the individual, individual's supervisor, Army and Federal Aviation Administration physicians, Air Traffic Control Facility Personnel Status Report (DA Form 3479–6–R), and Air Traffic Control Maintenance Personnel Certification Record.'

* * * * *

A0095–2dTRADOC-ATC

SYSTEM NAME:

Air Traffic Controller/Maintenance Technician Records.

SYSTEM LOCATION:

Primary system is at U.S. Army Aviation Center, Fort Rucker, AL 36362–5000.

Segments are located at Army Air Traffic Control facilities at fixed Army airfields and other aviation units

VOL 58 ISS 80 AP 28 1993 UMI

requiring Air Traffic Control personnel. Official mailing addresses are published as an appendix to the Army's compilation of record systems notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Air Traffic Controllers and Air Traffic Control Maintenance Technicians employed by the Department of the Army.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, Social Security Number, Air Traffic Controller and Maintenance Technician qualifications and certifications, training and proficiency data and ratings, date assigned to current facility, and similar relevant documents.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Aviation Act of 1958, 49 U.S.C. 313, 601, 1354, and 1421; and E.O. 9397.

PURPOSE(S):

To determine proficiency of Air Traffic Controllers and Air Traffic Control Maintenance Technicians and the reliability of the Air Traffic Control system operations within the Department of the Army.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information may be disclosed to the Federal Aviation Administration, the National Transportation Safety Board, and similar authorities in connection with aircraft accidents, incidents, or traffic violations.

The 'Blanket Routine Uses' published at the beginning of the Army's compilation of system of record notices also apply to this record system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders and on cards. Selected data is automated on tapes and discs for management purposes.

RETRIEVABILITY:

Manually by individual surname; automated records are retrieved by name, plus any numeric identifier such as date of birth, Social Security Number, or Army serial number.

SAFEGUARDS:

Records are maintained in secure areas available only to designated persons having official need for the record. Automated systems employ computer hardware/software safeguard features and controls which meet the administrative, physical, and technical safeguards of Army Regulation 380–19, Information Systems Security.

RETENTION AND DISPOSAL:

Active paper records are retained by the Air Traffic Control facility until individual is transferred. The records are transferred with the military personnel records jacket or civilian personnel folders, as appropriate.

Upon separation or retirement of individual, the records are retired to the National Personnel Records Center (Civilian Personnel Records), 111 Winnebago Street, St Louis, MO 63118 and U.S. Army Personnel Center, and U.S. Army Reserve Components Personnel and Administration Center, 9700 Page Boulevard, St Louis, MO 63132–5200; retained for 75 years after date of birth or 60 years after date of earliest document in the folder if date of birth cannot be ascertained. Automated management information at the primary location is retained until no longer needed for current operations.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, U.S. Army Training and Doctrine Command, ATTN: ATIM-SR, Fort Monroe, VA 23651–5000.

NOTIFICATION PROCEDURE:

Individuals seeking to determine if information about themselves is contained in this record system should address written inquiries to the Air Traffic Control facility where assigned or to Commander, U.S. Army Aviation Center, Fort Rucker, AL 36362–5000.

Individual should provide the full name, Social Security Number, details which will facilitate locating the records, current address and signature.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this record system should address written inquiries to the Air Traffic Control facility where assigned or to Commander, U.S. Army Aviation Center, Fort Rucker, AL 36362–5000.

Individual should provide the full name, Social Security Number, details which will help locate the records, current address, and signature.

CONTESTING RECORD PROCEDURES:

The Army's rules for accessing records, contesting contents, and appealing initial determinations are contained in Army Regulation 340–21; 32 CFR part 505; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

From the individual, individual's supervisor, Army or Federal Aviation Administration physicians, Air Traffic Control Facility Personnel Status Reports (DA Form 3479–6–R), and Air Traffic Control Maintenance Personnel Certification Record.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

A0405–10bCE

SYSTEM NAME:

Homeowners Assistance Case Files *(February 22, 1993, 58 FR 10130).*

CHANGES:

SYSTEM IDENTIFIER:

Change system identifier to read 'A0405–10qCE'.

SYSTEM LOCATION:

Delete entry and replace with 'Chief of Engineers, Headquarters U.S. Army Corps of Engineers, ATTN: CERE-R, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.

Segments of this system are also at Corps of Engineers Major Subordinate Commands and District Commands. Official mailing addresses are published as an appendix to the Army's compilation of systems of records notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Delete entry and replace with 'Eligible federal civilian employees and military personnel who submit personal and financial information to apply for homeowners assistance benefits.'

CATEGORIES OF RECORDS IN THE SYSTEM:

Line 4, after i.e., add 'applicant's name; Social Security Number; property address;'.

Line 19, after appraisal reports, add 'appraisal price, purchase price, benefits,'.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Add two new paragraphs 'Internal Revenue Service (IRS) to determine tax liability for sale of property to the Government.

The 'Blanket Routine Uses' set forth at the beginning of the Army's compilation of systems of records notices apply to this record system.'

STORAGE:

At the end of the entry, add 'and weekly print outs.'

RETRIEVABILITY:

Delete entry and replace with 'By applicant's name; Social Security Number; application number; street address; service and type of employment i.e. civilian or armed services member and installation name.'

* * * * *

SYSTEM MANAGER(S) AND ADDRESS:

Delete entry and replace with 'Chief of Engineers, Headquarters U.S. Army Corps of Engineers, ATTN: CERE-R, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.'

NOTIFICATION PROCEDURE:

Delete the first sentence and replace with 'Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Chief of Engineers, Headquarters U.S. Army Corps of Engineers, ATTN: CERE-R, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.'

* * * * *

A0405–10qCE

SYSTEM NAME:

Homeowners Assistance Case Files.

SYSTEM LOCATION:

Chief of Engineers, Headquarters U.S. Army Corps of Engineers, ATTN: CERE-R, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.

Segments of this system are also at Corps of Engineers Major Subordinate Commands and District Commands. Official mailing addresses are published as an appendix to the Army's compilation of systems of records notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Eligible federal civilian employees and military personnel who submit personal and financial information to apply for homeowners assistance benefits

CATEGORIES OF RECORDS IN THE SYSTEM:

Documents relating to the application of persons sustaining losses in real estate because of closure or reduction of military bases; e.g., applicant's name; Social Security Number; property address; employment verification; income and expense figures; information concerning offer to sell real property or similar written offer; negotiator's report; title evidence and opinions; surveys, leases; Certificate of Inspection and Possession; Payment and Closing Sheet and Receipt for US Treasurer's check; market impact data; insurance and tax data; Disclaimer by Person of Possession; DD Form 1607 (Application for Homeowners' Assistance); FHA Form 1174 (Transmittal of Recorded Deed and Title Assembly-Military Acquisition); appraisal reports, appraisal price, purchase price, benefits, docket sheets, questionnaires, copies of deeds and mortgages, mortgage settlement data, evidence of proof of ownership and occupancy of residence, applicant appeals and final decisions thereon, comparable forms and related correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 1013, Demonstration Cities and Metropolitan Development Act of 1966, Pub. L. 89–754, 80 Stat. 1290 (1966), (42 U.S.C. 3374), as amended; and E.O. 9397.

PURPOSE(S):

To process applications for homeowners assistance benefits and consider appeals; to review market studies and appraisals; to review final title assemblies of deeds of conveyance to the Government for properties acquired under the program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Department of Housing and Urban Development/FHA when assuming custody of acquired homes, to manage and dispose of such properties on behalf of the Secretary of Defense.

FHA/Department of Veterans Affairs in accepting subsequent purchaser in private sales when property is encumbered by a mortgage loan guaranteed or insured by them.

Department of Justice to review final title and deeds of conveyance to the Government for properties acquired under the program, pursuant to their responsibilities under Pub L. 91–393.

Internal Revenue Service (IRS) to determine tax liability for sale of property to the Government.

The 'Blanket Routine Uses' set forth at the beginning of the Army's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders; magnetic tapes/disks; cards and weekly print outs.

RETRIEVABILITY:

By applicant's name; Social Security Number; application number; street address; type of employment i.e. civilian or armed services member; and installation name.

SAFEGUARDS:

All information is protected by physical security devices which include guards to the buildings and limited access only to authorized personnel having official need therefor. Access or update of information in automated media is by a system of passwords, thereby preserving integrity of the data.

RETENTION AND DISPOSAL:

Files are destroyed 10 years after final action or decision on appeals, as applicable.

SYSTEM MANAGER(S) AND ADDRESS:

Chief of Engineers, Headquarters U.S. Army Corps of Engineers, ATTN: CERE-R, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Chief of Engineers, Headquarters U.S. Army Corps of Engineers, ATTN: CERE-R, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.

Individuals must provide their full name, current address and telephone number, Social Security Number, name and location of the installation closed or announced for closure, and signature.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information about themselves contained in this system should address written inquiries to the Chief of Engineers, Headquarters U.S. Army Corps of Engineers, ATTN: CERE-R, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000.

Individuals must provide their full name, current address and telephone number, Social Security Number, name and location of the installation closed or announced for closure, and signature.

CONTESTING RECORD PROCEDURES:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340–21; 32 CFR part 505; or may be obtained from the systems manager.

RECORD SOURCE CATEGORIES:

From the individual.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

[FR Doc. 93–9849 Filed 4–27–93; 8:45 am]

BILLING CODE 5000–04–F

Defense Logistics Agency

Privacy Act of 1974; Amend a Record System

AGENCY: Defense Logistics Agency, DOD

VOL
58
ISS
80
AP
28
19 93
UMI

ACTION: Amend a record system.

SUMMARY: The Defense Logistics Agency proposes to amend an existing system of records in the DLA inventory of systems of records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: This action will be effective without further notice on May 28, 1993, unless comments are received that would result in a contrary determination.

ADDRESSES: Send comments to the Privacy Act Officer, Administrative Management Branch, Planning and Resource Management Division, Defense Logistics Agency, Room 5A120, Cameron Station, Alexandria, VA 11304–6100.

FOR FURTHER INFORMATION CONTACT: Ms. Susan Salus at (703) 617–7583.

SUPPLEMENTARY INFORMATION: The complete inventory of Defense Logistics Agency record system notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, can be obtained from the address listed above.

The amendments are not within the purview of subsection (r) of the Privacy Act (5 U.S.C. 552a), as amended, which requires the submission of an altered system report. The specific changes to the record system being amended are set forth below followed by the system notice as amended, in its entirety.

Dated: April 21, 1993.

L. M. Bynum,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

Amendment

S322.01 DMDC

SYSTEM NAME:

Defense Outreach Referral System (DORS) *(February 22, 1993, 58 FR 10870).*

CHANGES:

• • • • •

CATEGORIES OF INDIVIDUALS COVERED:

Add a new paragraph 'Individuals covered under Pub. L. 102-484, who have applied for public employment.'

• • • • •

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Add 'Pub. L. 102-484' to entry.

PURPOSE(S):

Change first paragraph, fourth line 'Federal' to 'public'. Delete second paragraph.

Add a new paragraph 'For former military members covered under Pub. L. 102-484, the information will be used to track the participants public employment and to verify the participant's public employment history for DoD retirement and pay eligibility.'

• • • • •

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Delete entry and replace with 'The 'Blanket Routine Uses' set forth at the beginning of DLA's compilation of systems of records notices apply to this system.'

• • • • •

RETENTION AND DISPOSAL:

Change 'one year' to 'five years'.

• • • • •

S322.01 DMDC

SYSTEM NAME:

Defense Outreach Referral System (DORS).

SYSTEM LOCATION:

W.R. Church Computer Center, Naval Postgraduate School, Monterey, CA 93940–5000.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Defense military and civilian personnel and their spouses, who have applied for participation in the job placement program.

Individuals covered under Pub. L. 102-484, who have applied for public employment.

CATEGORIES OF RECORDS IN THE SYSTEM:

Computerized records consisting of name, Social Security Number, correspondence address, branch of service, date of birth, separation status, travel availability, U.S. citizenship, occupational interests, geographic location work preferences, pay grade, rank, last unit of assignment, educational levels, dates of military or civilian service, language skills, flying status, security clearances, civilian and military occupation codes, and self reported personal comments for the purpose of providing prospective employers with a centralized system for locating potential employees.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 136, 1143, 1144, 2358; Pub. L. 102-484; and E.O. 9397.

PURPOSE(S):

The purpose of this system is to facilitate the transition of military and civilian Defense personnel, and their spouses, to private industry and public employment in the event of a downsizing of the Department of Defense.

For former military members covered under Pub. L. 102-484, the information will be used to track the participants public employment and to verify the participant's public employment history for DoD retirement and pay eligibility.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The 'Blanket Routine Uses' set forth at the beginning of DLA's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES OF STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Electronic storage.

RETRIEVABILITY:

Retrieved by Social Security Number or occupational or geographic preference of the individual.

SAFEGUARDS:

Computerized records are maintained in a controlled area accessible only to authorized personnel. Entry to these areas is restricted to those personnel with a valid requirement and authorization to enter. Physical entry is restricted by the use of locks, guards, administrative procedures (e.g., fire protection regulations).

Access to personal information is restricted to those who require the records in the performance of their official duties, and to the individuals who are the subject of the record or their authorized representative. Access to personal information is further restricted by the use of passwords which are changed periodically.

RETENTION AND DISPOSAL:

Records are maintained on-line for five years and then are archived as an historical data base.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Defense Manpower Data Center, 1600 Wilson Boulevard, Suite 400, Arlington, VA 22209–2593.

NOTIFICATION PROCEDURE:

Individuals seeking to determine if information about themselves is contained in this record system should address written inquiries to the Director, Defense Manpower Data Center, 1600 Wilson Boulevard, Suite 400, Arlington, VA 22209–2593.

RECORD ACCESS PROCEDURES:

Individuals seeking access to information about themselves contained in this record system should address written inquiries to the Director, Defense Manpower Data Center, 1600 Wilson Boulevard, Suite 400, Arlington, VA 22209–2593.

Written requests for information should contain the full name, Social Security Number, date of birth, and current address and telephone number of the individual.

For personal visits, the individual should be able to provide some acceptable identification such as driver's license, or military or other identification card.

CONTESTING RECORD PROCEDURES:

The DLA rules for access to records and for contesting contents and appealing initial determination are contained in DLA Regulation 5400.21; 32 CFR part 323; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

The Military Services, DOD Components, and from the subject individual via application into the program.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

[FR Doc. 93–9848 Filed 4–27–93; 8:45 am]

BILLING CODE 5000–04–F

DEPARTMENT OF EDUCATION

[CFDA No. 84.116J]

Fund for the Improvement of Postsecondary Education—Special Focus Competition (Invitational Priority: Higher Education Collaboration and Exchange Between the United States and the European Community); Notice Inviting Applications for New Awards for Fiscal Year (FY) 1993

Purpose of Program: To provide grants or enter into cooperative agreements to improve postsecondary education opportunities.

Eligible Applicants: Institutions of higher education or combinations of such institutions and other public and private nonprofit institutions and agencies.

Deadline for Transmittal of Applications: July 20, 1993.

Deadline for Intergovernmental Review: September 18, 1993.

Applications Available: May 20, 1993.

Available Funds: It is estimated that approximately $1,500,000 will be available for an estimated 30 new awards under this competition.

Estimated Range of Awards: $42,000 to $51,000.

Estimated Average Size of Awards: $50,000.

Estimated Number of Awards: 30.

Note: The Department is not bound by any estimates in this notice.

Project Period: 24 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 82, 85, and 86, with the exceptions noted in 34 CFR 630.4(b); and (b) the regulations for this program in 34 CFR part 630.

Priorities

Absolute Priority: Under 34 CFR 75.105(c)(3) and 34 CFR 630.11(b)(1) the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Projects addressing a particular problem area or improvement approach in postsecondary education.

Invitational Priority: Within the absolute priority specified in this notice, the Secretary is particularly interested in applications that meet the following invitational priority. Under 34 CFR 75.105(c)(1), however, an application that meets this invitational priority does not receive competitive or absolute preference over other applications:

Projects to develop new types of collaboration and exchange between institutions of higher education in the United States and their counterparts in the 12 member states of the European Community.

Selection Criteria

In evaluating applications for grants under this program competition, the Secretary uses the following selection criteria chosen from those listed in 34 CFR 630.32:

(a) *Significance for Postsecondary Education.* The Secretary reviews each proposed project for its significance in improving postsecondary education by determining the extent to which it would—

(1) Address an important problem or need;

(2) Represent an improvement upon, or important departure from, existing practice;

(3) Involve learner-centered improvements;

(4) Achieve far-reaching impact through improvements that will be useful in a variety of ways and in a variety of settings; and

(5) Increase the cost-effectiveness of services.

(b) *Feasibility.* The Secretary reviews each proposed project for its feasibility by determining the extent to which—

(1) The proposed project represents an appropriate response to the problem or need addressed;

(2) The applicant is capable of carrying out the proposed project, as evidenced by, for example—

(i) The applicant's understanding of the problem or need;

(ii) The quality of the project design, including objectives, approaches, and evaluation plan;

(iii) The adequacy of resources, including money, personnel, facilities, equipment, and supplies;

(iv) The qualifications of key personnel who would conduct the project; and

(v) The applicant's relevant prior experience;

(3) The applicant and any other participating organizations are committed to the success of the proposed project, as evidenced by, for example—

(i) Contribution of resources by the applicant and by participating organizations;

(ii) Their prior work in the area; and

(iii) The potential for continuation of the proposed project beyond the period of funding (unless the project would be self-terminating); and

(4) The proposed project demonstrates potential for dissemination to or adaptation by other organizations, and shows evidence of interest by potential users.

(c) *Appropriateness of funding projects.* The Secretary reviews each application to determine whether support of the proposed project by the Secretary is appropriate in terms of availability of other funding sources for the proposed activities.

The Secretary gives equal weight to the selection criteria on significance, feasibility, and appropriateness. Within each of these criteria, the Secretary gives equal weight to each of the subcriteria listed above. In applying the criteria, the Secretary first analyzes an application in terms of each individual criterion and subcriterion. The Secretary then bases the final judgment of an application on an overall assessment of the degree to which the applicant addresses all selection criteria.

FOR APPLICATIONS OR INFORMATION CONTACT: Fund for the Improvement of Postsecondary Education (FIPSE), U.S. Department of Education, 400 Maryland Avenue, SW., room 3100, ROB–3, Washington, DC 20202–5175. Telephone: (202) 205–0082 to order applications; or (202) 708–5750 for information. Hearing-impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339

VOL 58 ISS 80 AP 28 1993 UMI

(in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 1135–1135a–11.

Dated: April 20, 1993.

Maureen A. McLaughlin,

Acting Assistant Secretary for Postsecondary Education.

BILLING CODE 4000–01–U

National Education Commission on Time and Learning; Meeting

AGENCY: National Education Commission on Time and Learning, Education.

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming public Meeting of the National Education Commission on Time and Learning. This notice also describes the functions of the Commission. Notice of this Meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATE, TIME AND LOCATION: May 13, 1993 from 1 p.m. to 4:30 p.m. Washington Marriott Hotel, 1221 22nd Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Julia Anna Anderson, Deputy Executive Director, 1255 22nd Street, NW., suite 502, Washington, DC 20202–7591. Telephone: (202) 653–5063.

SUPPLEMENTARY INFORMATION: The National Education Commission on Time and Learning is established under section 102 of the Education Council Act of 1991 (20 U.S.C. 1221–1). The Commission is established to examine the quality and adequacy of the study and learning time of elementary and secondary students in the United States, including issues regarding the length of the school day and year, how time is being used for academic subjects, the use of incentives, how time is used outside of school, the extent and role of homework, year-round professional opportunities for teachers, the use of school facilities for extended learning programs, a model for adopting a longer day or year (if appropriate), suggested changes for state laws and regulations, and an analysis and estimate of the additional costs.

The Meeting of the Commission is open to the public. The proposed agenda for May 13 includes: Presentations by and discussions with representatives of curriculum standard-setting organizations. Records are kept of all Commission proceedings, and are available for public inspection at the Office of the Commission at 1255 22nd Street, NW., suite 502, Washington, DC 20202–7591 from the hours of 9 a.m. to 5:30 p.m.

Dated: April 22, 1993.

John Hodge Jones,

Chairman, National Education Commission on Time and Learning.

[FR Doc. 93–9941 Filed 4–27–93; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Office of Environmental Restoration and Waste Management

Interim Mixed Waste Inventory Report: Waste Streams, Treatment Capacities and Technologies

AGENCY: Office of Environmental Restoration and Waste Management, DOE.

ACTION: Notice of availability.

SUMMARY: The Department of Energy (DOE) has prepared an Interim Mixed Waste Inventory Report on Waste Streams, Treatment Capacities and Technologies (Report). The Report responds to the requirement of section 105(a) of the Federal Facility Compliance Act of 1992 (Pub. L. 102–386) (the Act) that the Department prepare a mixed waste inventory report within 180 days of enactment.

The Act requires that this report be submitted to the Administrator of the Environmental Protection Agency and the Governor of each State in which the DOE stores or generates mixed waste. There are currently 50 sites in 22 States that store, generate, or are expected to generate in the next five years, DOE-managed mixed wastes covered by the Act. Mixed wastes are wastes that contain both hazardous waste, regulated by the Resource Conservation and Recovery Act, and source, special nuclear or by-product material subject to the Atomic Energy Act of 1954.

Comments on the content of the Report will be considered from interested persons, organizations, and agencies in the development of the final Report.

DATES: Written comments to DOE should be received by July 26, 1993.

ADDRESSES: The report will be available to the public in late April in the following DOE Reading Rooms:

Albuquerque Operations Office, U.S. Department of Energy, National Atomic Museum, Building 20358, Wyoming Blvd, PO Box 5400, Albuquerque, New Mexico 87115

Boston Support Office, Chicago Operations Office, U.S. Department of Energy, 10 Causeway Street, Room 1197, Boston, MA 02222–1035

Headquarters, U.S. Department of Energy, Room 1E–190, 1000 Independence Avenue, SW, Washington, DC 20585

Bartlesville Project, Office/National, Institute for Petroleum and Energy Research (NIPER) Library, U.S. Department of Energy, 220 N. Virginia Avenue, PO Box 2128, Bartlesville, OK 74003

Chicago Operations Office, 9800 South Cass Avenue, Argonne, IL 60439

INEL Technical Library, 1776 Science Center Drive, PO Box 1625, Idaho Falls, ID 83415–2300.

Morgantown Energy Tech Ctr Library, 3610 Collins Ferry Road, PO Box 880, Morgantown, WV 26507-0880

Oak Ridge Operations Office, U.S. Department of Energy, Office of Chief Counsel, 200 Administration Road, PO Box 2001, Oak Ridge, TN 37831-8510

Public Reading Room, U.S. Department of Energy, 1333 Broadway Wells Fargo Bldg, Oakland, California 94612

Nevada Operations Office, U.S. Department of Energy, 2753 South Highland Drive, PO Box 98518, Las Vegas, Nevada 98518

Pittsburgh Energy Tech Ctr, U.S. Department of Energy, Cochran Mill Road, Bldg 95, PO Box 10940, Pittsburgh, PA 15236-0940

Rocky Flats Area Office, c/o Front Range Community College, 3645 West 112 Avenue, Westminster, Colorado 80030

Gregg-Granite Library, Savannah River Operations Office, University of South Carolina-Aiken, 171 University Parkway, Aiken, South Carolina 29801

Southeastern Power Administration, U.S. Department of Energy, Legal Library, Samuel Elbert Building, Public Square, Elberton, Georgia 30635

The Report can also be obtained from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161. The Executive Summary of the report and other summary information can be requested by calling (301) 903–7488.

Comments should be sent to: U.S. Department of Energy, Director, Office of Technical Support, EM–35, ATTN: Inventory Report, Trevion II Building, Washington, DC 20585-0002.

FOR FURTHER INFORMATION CONTACT: The Office of Technical Support (301) 903–7488.

SUPPLEMENTARY INFORMATION: As specifically required by section 105(a) of the Act, the Report contains the following information: (1) A national inventory of all mixed wastes in the DOE system, including waste currently in storage and wastes expected to be generated over the next five years; and (2) a national inventory of mixed waste treatment capacities and technologies.

The Act requires that the Administrator of the Environmental Protection Agency and the States provide any comments they might have within 90 days of issuance of the Report.

The Act also requires that DOE publish a schedule for submitting site treatment plans for the development of treatment technologies and capacities. This schedule was published in the **Federal Register** on April 6, 1993 (58 FR 17875).

The mixed waste inventory contains specific waste stream information by State for each of the sites, in the form of waste profile sheets (WPS) for each mixed waste stream in storage or expected to be generated over the next five years. The mixed waste treatment capacity inventory contains descriptions and locations of existing and proposed treatment facilities, an estimate of the available treatment capacity for each waste described in the report, and a description of the technological approaches the DOE anticipates will need to be developed for wastes with no existing treatment technology.

The Report is comprised of several volumes, including an overview volume, four State and site-specific volumes, and an Appendix volume. Volume I contains a discussion of the Report's scope and organization; an overview of DOE-managed mixed wastes and treatment facilities, existing and planned; and an overview of the technology development program for the management of these wastes. The overview also provides a guide to State and site-specific information, including waste profile sheets (WPS). Volumes II–V contain specific information for each site in the 22 States in which DOE stores or generates mixed wastes. Information in these volumes is organized alphabetically by State. Volume II contains site-specific information for California through Iowa; Volume III for Kentucky through New York; Volume IV for Ohio through South Carolina; and Volume V for Tennessee through Washington. The Appendix contains the text of the Act; detailed information on the technology development program; a description of materials not characterized as mixed waste by sampling and analysis, including radioactive low-level waste and spent nuclear fuel; and a glossary of terms.

The Report provides specific information on the following 50 sites which are located in 22 States:

California
- Energy Technology Engineering Center (ETEC)
- General Atomics
- General Electric Vallecitos Nuclear Center
- Lawrence Berkeley Laboratory
- Lawrence Livermore National Laboratory
- Laboratory for Energy-Related Health Research
- Mare Island Naval Shipyard
- Sandia National Laboratories—California

Colorado
- Grand Junction Project Office
- Rocky Flats Plant

Connecticut
- Knolls Atomic Power Laboratory—Windsor

Florida
- Pinellas Plant

Hawaii
- Pearl Harbor Naval Shipyard

Idaho
- Argonne National Laboratory-West
- Idaho National Engineering Laboratory

Illinois
- Argonne National Laboratory-East
- Site A/Plot M Palos Forest Preserve

Iowa
- Ames Labortory

Kentucky
- Paducah Gaseous Diffusion Plant

Maine
- Portsmouth Naval Shipyard

Missouri
- Kansas City Plant
- University of Missouri
- Weldon Spring Site Remedial Action Project

Nevada
- Nevada Test Site

New Jersey
- Middlesex Sampling Plant
- Princeton Plasma Physics Laboratory

New Mexico
- Inhalation Toxicology Research Institute
- Los Alamos National Laboratory
- Sandia National Laboratories—New Mexico
- Waste Isolation Pilot Plant (WIPP)

New York
- Brookhaven National Laboratory
- Colonie Interim Storage Site
- Knolls Atomic Power Laboratory
- Knolls Atomic Power Laboratory—Kesselring
- West Valley Demonstration Project

Ohio
- Battelle Columbus Laboratories Decommissioning Project
- Fernald Environmental Management Project
- Mound Plant
- Portsmouth Gaseous Diffusion Plant
- RMI Titanium Incorporated

Pennsylvania
- Bettis Atomic Power Laboratory

South Carolina
- Charleston Naval Shipyard
- Savannah River Site

Tennessee
- Oak Ridge K–25 Site
- Oak Ridge National Laboratory
- Oak Ridge Y–12 Plant

Texas
- Pantex Plant

Virginia
- Norfolk Naval Shipyard

Washington
- Hanford
- Puget Sound Naval Shipyard

The Report is approximately 4,000 pages in length. Due to the distribution complexity and high reproduction and postage costs associated with providing the Report in its entirely, DOE is encouraging interested persons, organizations, and agencies to either review the report at DOE Reading Rooms, purchase a copy of the Report through NTIS, or utilize the summary information which can be provided through the Inventory Report Information telephone number listed above.

Issued in Washington, DC, on April 22, 1993.

Paul D. Grimm,

Acting Assistant Secretary for Environmental Restoration and Waste Management.

BILLING CODE 6450–01–M

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Application for Unlisted Trading Privileges and of Opportunity for Hearing; Philadelphia Stock Exchange, Inc.

April 22, 1993.

The above named national securities exchange has filed an application with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder for unlisted trading privileges in the following security:

TIG Holding Inc.
Common Stock, $.01 Par Value (File No. 10506)

This security is listed and registered on one or more other national securities exchange and is reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 17, 1993, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

BILLING CODE 8010-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER93-157-000, et al.]

Puget Sound Power & Light Co., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

1. Puget Sound Power & Light Company

[Docket No. ER93-157-000]

April 20, 1993.

Take notice that on April 12, 1993, Puget Sound Power & Light Company (Puget) tendered for filing a Certificate of Concurrence and Cost Support Information related to the sale of the output of the Skookumchuck Hydroelectric Project to Puget Sound Power and Light.

Copies of this agreement have been served on the distribution list, as included in the filing.

Comment date: May 4, 1993, in accordance with Standard Paragraph E at the end of this notice.

2. Puget Sound Power & Light Company

[Docket No. ER93-183-000]

April 20, 1993.

Take notice that on April 12, 1993, Puget Sound Power & Light Company (Puget) tendered for filing an amendment in the above-referenced docket.

Comment date: May 4, 1993, in accordance with Standard Paragraph E at the end of this notice.

3. West Penn Power Company

[Docket No. ER93-515-000]

April 20, 1993.

Take notice that on April 9, 1993, West Penn Power Company tendered for filing an amendment to its original filing filed in this docket on March 31, 1993.

Comment date: May 4, 1993, in accordance with Standard Paragraph E at the end of this notice.

4. Central Louisiana Electric Company

[Docket No. ER93-498-000]

April 20, 1993.

Take notice that on April 2, 1993, Central Louisiana Electric Company tendered for filing an amendment in the above-referenced docket.

Comment date: May 4, 1993, in accordance with Standard Paragraph E at the end of this notice.

5. Union Electric Company

[Docket No. ER93-420-000]

April 20, 1993.

Take notice that on April 9, 1993, Union Electric Company (UE) tendered for filing Amendment—Certificate of Concurrence to filing of the Service Area Boundary Agreement dated March 12, 1991 and Amendment—Certificate of Concurrence to filing of the Interchange Agreement dated August 2, 1990 both between Arkansas Power and Light Company and UE. UE asserts that the purpose of the amendments is to allow for assignment of rate schedule designations.

Comment date: May 3, 1993, in accordance with Standard Paragraph E at the end of this notice.

6. Consumers Power Company

[Docket No. ER93-481-000]

April 20, 1993.

Take notice that on March 22, 1993, Consumers Power Company (Consumers) tendered for filing a Notice of Termination of Consumers' Rate Schedule FERC Nos. 64 and 65 and a Notice of Termination of PSI Energy, Inc.'s Rate Schedule FERC Nos. 243 and 244.

Comment date: May 4, 1993, in accordance with Standard Paragraph E at the end of this notice.

7. Electric Energy, Inc.

[Docket No. ER93-236-001]

April 20, 1993.

Take notice that on March 30, 1993, Electric Energy, Inc. (EEInc.) tendered for filing its compliance refund report in the above-referenced docket.

Comment date: May 4, 1993, in accordance with Standard Paragraph E at the end of this notice.

8. The Montana Power Company

[Docket No. ER93-207-000]

April 20, 1993.

Take notice that on April 14, 1993, The Montana Power Company (Montana) tendered for filing with the Federal Energy Regulatory Commission pursuant to 18 CFR 35.13 a supplement to its original filing of Amendments No. 1 and No. 2, as well as various Revised Exhibits, to Rate Schedule FERC No. 148, a Contract for Interconnections, Transmission Service and Inter-Utility Operations Between The Montana Power Company and the Western Area Power Administration. This supplemental filing provides additional information requested through a deficiency letter issued under this docket.

Copies of the filing were served upon the Western Area Power Administration.

Comment date: May 4, 1993, in accordance with Standard Paragraph E at the end of this notice.

9. Consolidated Edison Company of New York, Inc.

[Docket No. ER93-349-000]

April 20, 1993.

Take notice that on April 12, 1993, Consolidated Edison Company of New York, Inc. (Con Edison) tendered for filing revised proposed supplements to its Rate Schedule FERC No. 96 and FERC No. 92.

The revised proposed supplement No. 7 to Rate Schedule FERC No. 96 increases the rates and charges for electric delivery service furnished to public customers of the New York Power Authority (NYPA) by $24,495,000 annually based on the 12-month period ending March 31, 1994.

The revised proposed supplement No. 8 to Rate Schedule FERC No. 96, applicable to electric delivery service to NYPA's non-public, economic development customers, and the revised proposed supplement No. 4 to Rate Schedule FERC No. 92, applicable to electric delivery service to commercial and industrial economic development customers of the County of Westchester Public Service Agency (COWPUSA) and the New York City Public Utility Service (NYCPUS), increase the rates and charges for the service by $582,000 annually based on the 12-month period ending March 31, 1994.

These supplements would supersede proposed supplements No. 7 and 8 to Rate Schedule FERC No. 96 and proposes supplement No. 4 to Rate Schedule FERC No. 92 which Con Edison tendered to the Commission on January 29, 1993. These supplements have never been made effective and should be deemed superseded upon grant of the relief requested in the present filing.

Con Edison seeks permission to make the rate increases to NYPA, COWPUSA and NYCPUS effective as of April 1, 1993.

A copy of this filing has been served on NYPA, COWPUSA, NYCPUS, and the New York Public Service Commission.

Comment date: May 4, 1993, in accordance with Standard Paragraph E at the end of this notice.

10. Consumers Power Company

[Docket Nos. ER92-331-000 and ER92-332-001]

April 21, 1993.

Take notice that on April 8, 1993, Consumers Power Company (Consumers) tendered for filing a supplemental filing in the above-referenced dockets.

Comment date: May 5, 1993, in accordance with Standard Paragraph E at the end of this notice.

11. Central Power and Light Company

[Docket No. ER93-562-000]

April 21, 1993.

Take notice that on April 13, 1993, Central Power and Light Company (CPL) tendered for filing a Letter Agreement dated March 12, 1993 between CPL and Magic Valley Electric Cooperative, Inc. (MVEC). Under the Letter Agreement CPL egreed to install temporary metering facilities in order to assist MVEC in providing continuous service to its customers while it completed a transmission construction project.

CPL requests that the Commission waive its notice requirements and permit the Letter Agreement to become effective as of March 22, 1993, the date on which the temporary metering point was installed at MVEC's request.

Copies of the filing have been sent MVEC and the Public Utility Commission of Texas, which regulates MVEC's rates for retail sales. Copies of this transmittal letter only have been sent to CPL's other wholesale requirements customers to advise them of the present for waiver of the notice requirements.

Comment date: May 5, 1993, in accordance with Standard Paragraph E at the end of this notice.

12. Louisiana Energy and Power Authority v. Central Louisiana Electric Company, Inc.

[Docket No. EL93-33-000]

April 21, 1993.

Take notice that on April 16, 1993, the Louisiana Energy and Power Authority (LEPA), on behalf of the Cities of Boyce and Elizabeth, Louisiana, tendered for filing a complaint against Central Louisiana Electric Company, Inc. (CLECO) requesting the initiation of an investigetion to determine whether CLECO's present rates for wholesale firm power to Boyce and Elizabeth, contained in CLECO's FERC Rate Schedule Nos. 22 and 23, respectively, are unjust, unreasonable and unduly discriminatory and, if so, to modify those rates to a just, reasonable and non-unduly discriminatory level. LEPA also requests that the Commission set a refund effective date of not more than 60 days after the filing of the complaint and to consolidate this docket with Docket No. ER93-498-000.

Comment date: May 21, 1993, in accordance with Standard Paragraph E at the end of this notice.

13. Louis A. Simpson

[Docket No. ID-2780-000]

April 21, 1993.

Take notice that on March 25, 1993, Louis A. Simpson (Applicant) tendered for filing an application under Section 305(b) of the Federal Power Act to hold the following positions:

Director—Potomac Electric Power Company
Director—Salomon Inc.

Comment date: May 5, 1993, in accordance with Standard Paragraph E at the end of this notice.

14. Southern California Edison Company

[Docket No. ER93-552-000]

April 21, 1993.

Take notice that on April 8, 1993, Southern California Edison Company (Edison) tendered for filing the following agreements between Edison and the State of California Department of Water Resources (CDWR) which have been executed concurrently on February 24, 1993:

Amendment No. 2 (Amendment) to the Power Contract Between Southern California Edison Company and State of California, Department of Water Resources
Devil Canyon, Additional Facilities and Firm Transmission Service Agreement (Agreement) Between Southern California Edison Company and State of California, Department of Water Resources

Comment date: May 5, 1993, in accordance with Standard Paragraph E at the end of this notice.

15. Central Illinois Public Service Company

[Docket No. ER93-418-000]

April 21, 1993.

Take notice that on April 18, 1993, Central Illinois Public Service Company (CIPS) tendered for filing an amendment to its March 2, 1993 filing in this docket.

Comment date: May 5, 1993, in accordance with Standard Paragraph E at the end of this notice.

16. Louisville Gas and Electric Company

[Docket No. ER92-533-001]

April 21, 1993.

Take notice that Louisville Gas and Electric Company (LG&E), tendered for filing on April 7, 1993 the following revised rate schedules: (1) Generation Sales Service (Rate Schedule GSS) and (2) Coordination Transmission Service (Rate Schedule CT).

In the filing, Rate Schedule GSS is modified to make the interest rate used for the determination of late payment charges (paragraph 6.1) consistent with Rate Schedules CT and T, pursuant to the Commission's Order dated January 14, 1993, and Rate Schedule CT is modified to clarify the use of an umbrella agreement.

A copy of the filing was served upon the Kentucky Public Service Commission and the Indiana Utility Regulatory Commission.

Comment date: May 5, 1993, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. PL92-1-001]

Incentive Ratemaking for Interstate Natural Gas Pipelines, Oil Pipelines, and Electric Utilities; Order Denying Rehearing

Issued April 22, 1993.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order denying rehearing.

SUMMARY: The Commission issued a policy statement in this proceeding on October 30, 1992, addressing incentive regulation as an alternative to traditional cost-of-service regulation for companies with market power. A number of parties filed requests for

VOL 58 ISS 80 AP 28 19 93 UMI

rehearing and clarification of the policy statement. This order denies the requests for rehearing and clarification.

EFFECTIVE DATE: This order will become effective on the date of issuance, April 22, 1993.

FOR FURTHER INFORMATION CONTACT: Mary E. Benge, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 (202) 208–1214.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect or copy the contents of this document during normal business hours in room 3104, 941 North Capitol Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the texts of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 208–1397. To access CIPS, set your communications software to use 300, 1200, or 2400 bps, full duplex, no parity, 8 data bits, and 1 stop bit. CIPS can also be accessed at 9600 bps by dialing (202) 208–1781. The full text of this rule will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, La Dorn Systems Corporation, also located in room 3104, 941 North Capitol Street, NE., Washington, DC 20426.

Order Denying Rehearing

Before Commissioners: Elizabeth Anne Moler, Chair; Jerry J. Langdon and Branko Terzic.

On October 30, 1992, the Commission issued a policy statement in the instant docket, which defined the essential elements of an incentive ratemaking policy and set guidelines for experimental incentive rate proposals for natural gas and oil pipelines and investor-owned electric utilities.[1] In the policy statement, the Commission did not prescribe any particular incentive rate mechanism that should be implemented by utilities wishing to propose an incentive plan; rather, the Commission suggested a range of mechanisms so that specific proposals can be flexibly adjusted to address the particular circumstances of particular utilities. The Commission stated that it would consider proposals for an experimental period, during which the Commission would consider and evaluate the success of incentive rate proposals on a case-by-case basis.

A number of parties have filed comments requesting either rehearing or clarification of the Commission's October 30, 1992 policy statement. Rather than address these requests at this time, the Commission deems it more appropriate to develop and refine its policies concerning incentive regulation in individual cases, based on the records in those cases, rather than further addressing these issues in this policy statement proceeding. This approach will provide the Commission the most latitude to assess both the merits of incentive rate proposals in the context of the facts of a specific case and the Commission's ongoing effort to streamline its regulatory oversight.

As a policy statement, this proceeding did not establish any binding norms, but merely announced the Commission's tentative intentions for future consideration of rate proposals.[2] An agency cannot apply or rely on a general statement of policy as law, but must justify its actions in individual cases based on the records in those cases. Thus, when, as here, the Commission acts through a policy statement, its contemplation is that it will develop and refine its policies on a case-by-case basis. That is particularly true in this instance, since the purpose of the policy statement was not to establish any generic incentive rate mechanism, but to encourage utilities to develop and propose incentive plans tailored to the needs of individual utilities. The Commission believes that its new policies concerning incentive regulation are best developed and refined in individual cases, where the Commission can consider the various issues in light of concrete factual circumstances.

The Commission orders: The requests for rehearing are denied.

By the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[1] 61 FERC ¶ 61,168 (1992); 57 FR 55231, November 24, 1992.

[2] *Pacific Gas & Electric Co. v. FPC*, 506 F.2d 33, 38 (D.C. Cir. 1974).

[Docket Nos. CP93–301–000, et al.]

United Gas Pipe Line Co., et al.; Natural Gas Certificate Filings

April 20, 1993.

Take notice that the following filings have been made with the Commission:

1. United Gas Pipe Line Company

[Docket No. CP93–301–000]

Take notice that on April 16, 1993, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP93–301–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205), for authorization to install 206 feet of 4-inch pipeline, and to construct and operate a sales tap which includes a 4-inch meter station, a 2-inch regulator station and flow computer to enable United to transport natural gas to serve United Gas Services Company (UGS) in St. James Parish, Louisiana, under the certificate issued to United in Docket No. CP82–430–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is stated that United is authorized to provide natural gas transportation service, on an interruptible basis, to UGS under a transportation agreement dated December 19, 1990. It is further stated that the proposed facilities are required to comply with the terms of the interruptible transportation agreement to enable United to deliver 60,000 MMBtu per day of natural gas to UGS to serve Occidental's Convent Chemical Plant in St. James Parish, Louisiana. United estimates the cost of the facilities to be $105,220, which will be reimbursed by UGS.

Comment date: June 4, 1993, in accordance with Standard Paragraph F at the end of this notice.

2. Arkla Energy Resources Company

[Docket No. CP93–298–000]

Take notice that on April 15, 1993, Arkla Energy Resources Company (AER), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP93–298–000 a request pursuant to §§ 157.205, 157.211 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.211, 157.212) for authorization to construct and operate certain facilities under AER's blanket certificate issued in Docket No. CP82–384–000, et al. pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

AER proposes to upgrade an existing meter station to facilitate increased deliveries of natural gas to Arkansas Louisiana Gas Company (ALG) for resale to domestic customers. AER states that the existing 1-inch meter station on Line S, originally installed to serve ALG's domestic customer, J.A. Lowe in Bossier Parish, Louisiana, would be upgraded to a 1-inch U-Shape meter station to serve domestic customers on ALG's new Rural Extension No. 1318. AER advises that the annual and peak day volumes of delivered gas would be about 1,700 Mcf and 30 Mcf, respectively. AER states that ALG would reimburse it for all construction costs, estimated to be $11,000.

Comment date: June 4, 1993, in accordance with Standard Paragraph F at the end of this notice.

3. United Gas Pipe Line Company

[Docket No. CP93–300–000]

Take notice that on April 15, 1993, United Gas Pipe Line Company (United), Post Office Box 1478, Houston, Texas 77251–1478, filed a prior notice request with the Commission in Docket No. CP93–300–000 pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to install pipeline, metering and regulating facilities, and communications equipment for an interruptible transportation service to United Gas Services Company (UGS), under United's blanket certificates issued in Docket Nos. CP82–430–000 and CP88–6–000, all as more fully set forth in the application which is open to public inspection.

United proposes to install approximately 90 feet of 6-inch pipe, a four-inch tap, a four-inch meter station, a three-inch regulator station, and a flow computer to provide interruptible transportation service to UGS on its existing 20-inch City Service pipeline in Calcasieu Parish, Louisiana, in order to deliver 20,000 MMBtu of natural gas per day for UGS' account to the Occidental Chemical Company's Lake Charles Chemical Plant. UGS would reimburse United for the $154,028 estimated construction cost of the proposed facilities. United states that its tariff does not prohibit the proposed modification of facilities. United also states that it would transport gas for UGS under United's FERC Rate Schedule ITS.

Comment date: June 4, 1993, in accordance with Standard Paragraph F at the end of this notice.

4. United Gas Pipe Line Company

[Docket No. CP93–299–000]

Take notice that on April 15, 1993, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP93–299–000 a request pursuant to §§ 157.205 and 157.211(a)(2) of the Regulations under the Natural Gas Act for authorization to construct and install a one-inch sales tap through which United will make natural gas deliveries in Copiah County, Mississippi to Entex, Inc. (Entex) a jurisdictional sales customer under United's DG Rate Schedule, pursuant to United's blanket certificate issued in Docket No. CP82–430–000. United makes such request, all as more fully set forth in its request which is on file with the Commission and open to public inspection.

United states that it currently makes natural gas sales to Entex in its Brookhaven billing area pursuant to a service agreement dated October 1, 1991. United states that it is authorized in Docket Nos. CP91–1669–000 and RP91–126–000 to provide Entex's natural gas requirements for resale and distribution through its Brookhaven billing area. United further states that the volumes proposed to be delivered to Entex at the new tap would be within the currently effective entitlements of 20,501 MMBtu per day for the Brookhaven billing area.

United further states it would revise, construct and operate the proposed facilities in compliance with 18 CFR, part 157, subpart F, and that the proposed activities would not affect United's ability to serve its other existing customers.

Comment date: June 4, 1993, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. JD93–02860T Wyoming–39]

State of Wyoming; NGPA Amended Notice of Determination by Jurisdictional Agency Designating Tight Formation

April 22, 1993.

Take notice that on April 19, 1993, the Wyoming Oil and Gas Conservation Commission (Wyoming) amended its notice of determination that was filed in the above-referenced proceedings on January 8, 1993 pursuant to § 271.703(c)(3) of the Commission's regulations. The January 8, 1993 notice determined that the Lance Formation underlying a portion of Sublette County, Wyoming, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978.

The amended notice of determination reduces the geographical area recommended for tight formation designation to 46,080 acres. The amended area covers only Townships 28 and 29 North, Range 108 West.

The notice of determination also contains Wyoming's and the Bureau of Land Management's findings that the referenced portion of the Lance Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18

VOL 58 ISS 80 AP 28 1993 UMI

CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RS93–2–000]

Algonquin LNG, Inc.; Change in FERC Docket Number and Compliance Filing With Order No. 636

April 23, 1993.

Take notice that on February 1, 1993, Algonquin LNG, Inc. (ALNG) tendered for filing the following proposed tariff sheets to its FERC Gas Tariff:

First Revised Volume No. 1:
Original Sheet No. 1 through Original Sheet No. 200
Fourth Revised Volume No. 2:
Original Sheet No. 1 through Original Sheet No. 103

This filing was previously noticed on February 11, 1993, under Docket Nos. CP92–166–002 and CP92–166–001. The notice appeared in the **Federal Register** on February 17, 1993 (58 FR 8938). Details of this filing may be found in that notice. This filing has now been redocketed under Docket No. RS93–2–000.

Copies of the filing were served upon the company's jurisdictional customers and interested state commissions. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before April 30, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP92–45–003]

ANR Pipeline Co.; Proposed Changes in FERC Gas Tariff

April 22, 1993.

Take notice that on April 16, 1993, ANR Pipeline Company ("ANR") tendered for filing with the Federal Energy Regulatory Commission ("Commission") Second Substitute Eighth Revised Sheet No. 570 under Rate Schedule X–64 of Original Volume No. 2 of its FERC Gas Tariff to be effective for refund purposes for the period January 1, 1992 through December 31, 1992.

ANR states that this compliance filing is being made to reduce the monthly charge under Rate Schedule X–64 to reflect the final depreciation rate in HIOS Docket No. RP92–50. The reduction to the monthly charge is in accordance with the Commission's Letter Orders dated October 26, 1992 and January 8, 1993 in Docket Nos. RP92–45–001 and RP92–45–002, respectively.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before April 29, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. EG93–45–000]

Belize Electric Co. Ltd.; Application for Commission Determination of Exempt Wholesale Generator Status

April 21, 1993.

On April 14, 1993, Belize Electric Company Limited ("BECOL") filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to part 365 of the Commission's regulations.

BECOL, a Belizean corporation, is owned in part by Dominion Energy Central America, Inc., a Belizean corporation and a wholly-owned subsidiary of Dominion Energy, Inc. ("DEI"), which is a wholly-owned subsidiary of Dominion Resources, Inc. ("Dominion"). DEI and Dominion are Virginia corporations.

BECOL is constructing and will own a 24 MW hydroelectric eligible facility on the Mecal River in Cayo District, Belize, Central America.

Any person desiring to be heard concerning the application for exempt wholesale generator status should file a motion to intervene or comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application. All such motions and comments should be filed on or before May 7, 1993 and must be served on the applicant (c/o Michael W. Maupin, Esq., Hunton & Williams, Riverfront Plaza, East Tower, 951 East Byrd Street, Richmond, Virginia 23219). Any person wishing to become a party must file a motion to intervene. BILLING CODE 6717–01–M

[Docket No. RP93–103–000]

National Fuel Gas Supply Corp.; Proposed Changes in FERC Gas Tariff

April 22, 1993.

Take notice that on April 19, 1993, National Fuel Gas Supply Corporation (National) tendered for filing, as a rate decrease, Third Revised Volume No. 1, First Revised Sheet Nos. 5 and 6, to be effective on the date National's restructuring filing at Docket No. RS92–21–000 is made effective.

National states that the purpose of these tariff sheets is to decrease National's rates to the limited extent necessary to reflect the end of National's gas acquisition function. National states that as a consequence of National's implementation of Order No. 636 and the resulting elimination of the gas acquisition function within National, this function will be transferred on the effective date of National's restructuring to National's affiliate, National Fuel Gas Distribution Corporation.

National states that copies of the letter are being mailed to each of National's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before April 29, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. PR93–9–000]

Seagull Shoreline System; Petition for Rate Approval

April 23, 1993.

Take notice that on April 13, 1993, Seagull Shoreline System filed pursuant to § 284.123(b)(2) of the Commission's regulations, a petition for rate approval requesting that the Commission approve as fair and equitable a maximum rate of 9.06 cents per MMBtu for transportation of natural gas under section 311(a)(2) of the Natural Gas Policy Act of 1978 (NGPA).

Seagull Shoreline's petition states that it owns an intrastate pipeline extending approximately fifty-three miles from state tract MAT Block 624 to a Texas onshore interconnection with Houston Pipe Line Company and then extending thirteen miles to interconnections with Valero Transmission, L.P. and Texas Eastern Transmission Corporation. Seagull Shoreline's previous rate was 7.5 cents per MMBtu and was approved by the Commission in Docket No. PR90–5–000 on January 23, 1991.

Pursuant to § 284.123(b)(2)(ii), if the Commission does not act within 150 days of the filing date, the rate will be deemed to be fair and equitable and not in excess of an amount which interstate pipelines would be permitted to charge for similar transportation service. The Commission may, prior to the expiration of the 150 day period, extend the time for action or institute a proceeding to afford parties an opportunity for written comments and for the oral presentation of views, data and arguments.

Any person desiring to participate in this rate proceeding must file a motion to intervene in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedures. All motions must be filed with the Secretary of the Commission on or before May 11, 1993. The petition for rate approval is on file with the Commission and is available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER93–492–000]

South Carolina Electric & Gas Co.; Filing

April 23, 1993.

Take notice that on March 23, 1993, South Carolina Electric & Gas Company (SCEG) tendered for filing an amendment to its original filing filed in this docket on March 5, 1993.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before May 4, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP92–162–006]

Superior Offshore Pipeline Co.; Compliance Filing

April 23, 1993.

Take notice that Superior Offshore Pipeline Company (SOPCO) on March 9, 1993, tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following revised tariff sheets reflecting the new rates for Firm and Interruptible transportation services Upstream and Downstream of the Lowry Gas Plant:

Second Revised Sheet No. 5
Second Revised Sheet No. 6

SOPCO states that the revised tariff sheets are being filed pursuant to the Stipulation and Agreement as filed on December 29, 1992 and approved by Commission's letter order issued February 24, 1993.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before April 30, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 93–9910 Filed 4–27–93; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. RP86–119–028, RP92–220–004, RP86–119–031, and RP92–220–000]

Tennessee Gas Pipeline Co.; Compliance Filing

April 22, 1993.

Take notice that on April 15, 1993, Tennessee Gas Pipeline Company ("Tennessee"), P.O. Box 2511, Houston, Texas 77252, filed the following tariff sheets:

VOL 58 ISS 80 AP 28 1993 UMI

To be effective July 1, 1992

Substitute Original Sheet No. 94
Substitute Original Sheet No. 103
Substitute Original Sheet No. 111
First Revised Sheet No. 142
First Revised Sheet No. 147
2nd Substitute Original Sheet No. 293

To be effective October 1, 1992

Substitute First Revised Sheet No. 94
Substitute First Revised Sheet No. 103
Substitute First Revised Sheet No. 111

The purpose of this filing is to comply with the Commission's Order on Compliance Filing in this docket issued on March 17, 1993. The Commission ordered Tennessee to file revised tariff sheets to: (1) Include the methodology used to determine the applicable fuel rate for Tennessee's storage rate schedules, (2) revise the interruption provision of its Rate Schedule FSST to be consistent with the revisions made to Rate Schedule SST, and (3) revise the Excuse of Performance provision of its tariff to eliminate certain language that created ambiguity.

Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commission.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before April 29, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 93–9876 Filed 4–27–93; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. RP93–56–001 and RP93–86–001]

Transwestern Pipeline Co.; Compliance Filing

April 22, 1993.

Take notice that Transwestern Pipeline Company (Transwestern) on April 15, 1993, tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Effective April 1, 1993

Substitute Alternate 100th Revised Sheet No. 5
Substitute 6th Revised Sheet No. 5A
Substitute 2nd Revised Sheet No. 5A.01
Substitute 2nd Revised Sheet No. 5A.02
Substitute 2nd Revised Sheet No. 5A.03
Substitute 2nd Revised Sheet No. 5A.04
Substitute 7th Revised Sheet No. 87
Substitute 8th Revised Sheet No. 87

Transwestern states that the above-referenced tariff sheets and the Mcf-miles allocation methodology information are being filed to comply with the Commission's Order issued March 31, 1993 in Docket Nos. RP93–56–000 and RP93–86–000. The Order required Transwestern to refile revised tariff sheets within fifteen (15) days of the date of the order to state in § 25.1(b) of the General Terms and Conditions that Section 25.9 applies to the described TCR mechanism. Transwestern states it is also submitting corrected rate sheets which reflect Transwestern's transportation rates filed on January 29, 1993 and approved in Docket No. RS92–87.

The Order also directed Transwestern to provide its customers with all information necessary to allow those customers to assess the impact of its change in allocation methodology from Mcf-miles to an exit-point volumetric surcharge. Transwestern further states that it is submitting a study which calculates the TCR C surcharge rates using the Mcf-miles allocation methodology. The Order permitted parties to file comments with the Commission within 45 days of the date of the order.

Transwestern states that copies of the filing were served on its jurisdictional customers, interested state commissions, and all parties to this proceeding.

Any person desiring to file comments on the filing or protest said filing should file comments and/or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such comments and/or protests should be filed on or before May 17, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TQ93–2–43–000]

Williams Natural Gas Co.; Proposed Changes in FERC Gas Tariff

April 22, 1993.

Take notice that Williams Natural Gas Company (WNG) on April 19, 1993 tendered for filing the following tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1:

Second Revised Fourteenth Revised Sheet No. 6
Second Revised Fifteenth Revised Sheet No. 6A
First Revised Fifteenth Revised Sheet No. 9

WNG states that it is filing an Out-of-Cycle Purchased Gas Adjustment filing to increase its rates effective April 1, 1993 to reflect an increase of $.2157 in the Cumulative Adjustment consistent with its revised service agreements approved July 17, 1992 in Docket No. GT92–21–000.

WNG states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before April 29, 1993. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL 4618–8]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before May 28, 1993.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260–2740.

SUPPLEMENTARY INFORMATION:

Office of Solid Waste and Emergency Response

Title: Response Action Contractor Indemnification; EPA ICR #1595.02. This ICR requests approval of a new collection.

Abstract: Section 119(c) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA, 1980 and 1986) provides that the Federal Government may indemnify Response Action Contractors (RACs) for negligent actions that cause the release of a hazardous substance, pollutant or contaminant from a Superfund site. Before government indemnificaton, the government must determine that the liability coverage in an indemnification agreement exceeds or is not covered by insurance available at a fair and reasonable price.

This ICR identifies the minimum information needed for the government to determine that a RAC has made a diligent effort to locate pollution liability insurance to cover third-party liability. The information collected also forms the basis for the government's determination of whether or not the insurance is adequate and whether or not the premium is fair and reasonable.

The following information must be submitted to EPA in writing before the government will consider providing indemnification under CERCLA section 119:

(1) A copy of the declaration page from a current pollution liability insurance policy; or

(2) Letters from three pollution liability insurance vendors indicating that such pollution liability insurance is not available and why; or

(3) A written quotation for pollution liability insurance. The quotation must be in the form of a letter from an insurance broker indicating that the broker contacted three different insurance companies. The quotation should include the following information: Name of insurer, type of policy, policy period, premium, projected annual receipts, retroactive date, limits, deductibles, major exclusions, services covered, and expiration date of contract.

Burden Statement: The estimated annual reporting burden for this collection of information is estimated to average between 275 hours and 591 hours per response, and to require three hours of recordkeeping. This includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the needed data, and completing and reviewing the collection of information. The burden for providing this information will vary, depending on whether the RAC already has a pollution liability insurance policy in place, the RAC works through an insurance broker, or the RAC submits separate insurance applications to three different insurance vendors.

Estimated No. of Respondents: 312 prime or subcontractors.

Estimated Total Annual Burden on Respondents: 130,776 hours.

Frequency of Collection: varies; RACs with site-specific contracts will only have to locate pollution liability insurance once; RACs with multi-site contracts may be required to make an effort to locate insurance on an annual basis, and every time remedial action work begins at a new site.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM–223Y), 401 M Street, SW., Washington, DC 20460,
and
Tim Hunt, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, DC 20530.

Dated: April 22, 1993.

Paul Lapsley,

Director, Regulatory Management Division.

BILLING CODE 6560–60–M

[FRL–4618–4]

Science Advisory Board, Ecological Processes and Effects Committee, Biological Criteria Subcommittee; Open Meeting

May 13–14, 1993.

Pursuant to the Federal Advisory Committee Act, Public Law 92–463, notice is hereby given that the Biological Criteria Subcommittee (the Subcommittee) of the Ecological Processes and Effects Committee of the Science Advisory Board will meet on May 13–14, 1993, at the Quality Inn Capitol Hill, 415 New Jersey Avenue, NW., Washington, DC 20001. The meeting is open to the public, and will begin on both days at 8:30 a.m. and end no later than 4:30 p.m. on May 14. Seating at the meeting will be on a first come basis.

Background

The Subcommittee will meet to review the draft document "Biological Criteria: Technical Guidance for Streams and Small Rivers." As part of the Charge to the Subcommittee, the Agency has requested the SAB to evaluate the adequacy of the proposed methodology in four areas:

1. Will the recommended multimetric approach to evaluating aquatic communities adequately characterize the resource?

2. Does the recommended approach to sampling frequency adequately account for seasonal variability?

3. Are the options presented for selecting reference conditions scientifically sound?

4. Does the recommended approach to selection and aggregation of biological information provide a sound basis for the development of biological criteria?

Availability of Documents and Information

Single copies of the draft guidance document and background materials provided to the Subcommittee for this review are available from Dr. George Gibson, U.S. EPA, Office of Science and Technology, Health and Ecological Criteria Division, 401 M Street, SW. (WH–586), telephone (202) 260–7580. For additional information concerning this meeting or to obtain a draft agenda, please contact Ms. Stephanie Sanzone, Designated Federal Official, or Mrs. Marcia Jolly, Staff Secretary, at (202) 260–6552, Ecological Processes and Effects Committee, Science Advisory Board (A–101F), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Anyone wishing to make a presentation at the meeting must notify Mrs. Jolly and forward twenty-five copies of a written statement to her no later than May 3, 1993. Oral comments to the Subcommittee will be limited to five minutes per individual, and should not be repetitive of previously submitted written statements.

Dated: April 15, 1993.

A.R. Flaak,

Acting Staff Director, Science Advisory Board.

Ciba-Geigy Corp.; Approval of Pesticide Product Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of applications submitted by Ciba-Geigy Corporation to conditionally register the pesticide products Primo and Cimectacarb Technical containing a new active ingredient not included in any previously registered products pursuant to the provisions of section 3(c)(7)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT: By mail: Joanne I. Miller, Product Manager (PM) 23, Registration Division (H7505C), Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 237, CM #2, Environmental Protection Agency, 1921 Jefferson Davis Hwy, Arlington, VA 22202, (703-305-7850).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of May 29, 1992 (57 FR 22749), which announced that Ciba-Geigy Corp., PO Box 18300, Greensboro, NC 27419, had submitted an application to register the pesticide product Primo (EPA File Symbol 100-TEO) containing 12 percent of the active ingredient cimectacarb 4-(cyclopropyl-alpha-hydroxy-methylene)-3,5-dioxo-cyclohexanecarboxylic acid ethyl ester, an active ingredient not included in any previously registered product.

EPA also received an application from Ciba-Geigy to register the product *Cimectacarb Technical* (EPA File Symbol 100-TET), which was inadvertently omitted from the notice that published in the **Federal Register** of May 29, 1992. The product contains 92 percent of the same active ingredient as listed above. However, since the notice of receipt of application for *Cimectacarb Technical* was not published in the **Federal Register**, as required by section 3(c)(4) of FIFRA, as amended, interested parties may submit written comments within 30 days from the date of publication of this notice for this product only.

These applications were approved on February 11, 1993 as Primo (EPA Registration Number 100-729) for managing growth, improving quality, and edging of warm and cool season turfgrasses and Cimectacarb Technical (EPA Registration Number 100-727) for formulating into end use turf growth regulators intended for use in managing growth of warm and cool season turfgrasses.

A conditional registration may be granted under section 3(c)(7)(C) of FIFRA for a new active ingredient where certain data are lacking because a period reasonably sufficient for generation of the data has not elapsed since the Administrator first imposed the data requirements, on condition that such data are received by the end of the conditional registration period and do not meet or exceed the risk criteria set forth in 40 CFR 154.7; that use of the pesticide during the conditional registration period will not cause unreasonable adverse effects on the environment; and that use of the pesticide is in the public interest.

The Agency has considered the available data on the risks associated with the proposed use of cimectacarb 4-(cyclopropyl-alpha-hydroxy-methylene)-3,5-dioxo-cyclohexanecarboxylic acid ethyl ester, and information on social, economic, and environmental benefits to be derived from such use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of cimectacarb 4-(cyclopropyl-alpha-hydroxy-methylene)-3,5-dioxo-cyclohexanecarboxylic acid ethyl ester during the period of conditional registration is not expected to cause any unreasonable adverse effect on the environment, and that use of the pesticide is in the public interest.

Consistent with section 3(c)(7)(C), the Agency has determined that these conditional registrations are in the public interest. Use of the pesticides are of significance to the user community, and appropriate labeling, use directions, and other measures have been taken to ensure that use of the pesticides will not result in unreasonable adverse effects to man and the environment.

More detailed information on these conditional registrations is contained in the EPA Pesticide Fact Sheet, Number 239, for cimectacarb 4-(cyclopropyl-alpha-hydroxy-methylene)-3,5-dioxo-cyclohexanecarboxylic acid ethyl ester.

A copy of the fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, rm. 1128, CM #2, Arlington, VA 22202 (703-305-5805). Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), 401 M St., SW., Washington, DC 20460. Such requests should: (1) Identify the product name and registration number and (2) specify the data or information desired.

Authority: 7 U.S.C. 136.

Dated: April 19, 1993.

Douglas D. Campt,

Director, Office of Pesticide Programs.

BILLING CODE 6560-50-F

[OPP-30328A; FRL-4580-5]

Sandoz Agro, Inc.; Approval of Pesticide Product Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of applications submitted by Sandoz Agro, Inc., to conditionally register the pesticide products Frontier Herbicide and San 582H, containing a new active ingredient not included in any previously registered products pursuant to the provisions of section 3(c)(7)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT: By mail: Cynthia Giles-Parker, Product Manager (PM) 22, Registration Division (H7505C), Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 229, CM #2, Environmental Protection Agency, 1921 Jefferson Davis Hwy, Arlington, VA 22202, (703-305-5540).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of December 11, 1991 (56 FR 64624), which announced that Sandoz Crop Protection Corp., 1300 East Touhy Avenue, Des Plaines, IL 60018, had submitted applications to register the pesticide products San 582 7.5L Herbicide and San 582H (EPA File Symbols 55947-RUN and 55947-RUR) containing the active ingredient 2-chloro-*N*-[(1-methyl-2-methoxy)ethyl]-*N*-(2,4-dimethyl-thien-3-yl)acetamide at 78.5 and 94 percent respectively, an active ingredient not included in any previously registered products.

These applications were approved on March 5, 1993, as Frontier Herbicide (formerly San 582H 7.5L Herbicide), for weed control in field corn (EPA Registration Number 55947-140) and San 582H for manufacturing use only (EPA Registration Number 55947-141).

A conditional registration may be granted under section 3(c)(7)(C) of FIFRA for a new active ingredient where certain data are lacking because a period reasonably sufficient for generation of the data has not elapsed since the Administrator first imposed the data requirements, on condition that such data are received by the end of the conditional registration period and do not meet or exceed the risk criteria set forth in 40 CFR 154.7; that use of the pesticide during the conditional registration period will not cause unreasonable adverse effects on the environment; and that use of the pesticide is in the public interest.

The Agency has considered the available data on the risks associated with the proposed use of dimethenamid 2-chloro-*N*-[(1-methyl-2-methoxy)ethyl]-*N*-(2,4-dimethyl-thien-3-yl)-acetamide, and information on social, economic, and environmental benefits to be derived from such use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of dimethenamid 2-chloro-*N*-[(1-methyl-2-methoxy)ethyl]-*N*-(2,4-dimethyl-thien-3-yl)-acetamide during the period of conditional registration is not expected to cause any unreasonable adverse effect on the environment, and that use of the pesticide is in the public interest.

Consistent with section 3(c)(7)(C), the Agency has determined that these conditional registrations are in the public interest. Use of the pesticides are of significance to the user community, and appropriate labeling, use directions, and other measures have been taken to ensure that use of the pesticides will not result in unreasonable adverse effects to man and the environment.

More detailed information on these conditional registrations is contained on an EPA Pesticide Fact Sheet for dimethenamid 2-chloro-*N*-[(1-methyl-2-methoxy)ethyl]-*N*-(2,4-dimethyl-thien-3-yl)-acetamide.

A copy of the fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, rm. 1128, CM #2, Arlington, VA 22202 (703-305-5805). Receipt of Application for Emergency Exemption to Use Tebuconazole; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the South Carolina Department of Fertilizer and Pesticide Control, Clemson University (hereafter referred to as the "Applicant") for use of the pesticide tebuconazole (CAS No. 107534-96-3) to control Rhizoctonia limb rot and Southern stem rot on up to 14,000 acres of peanuts in South Carolina. In accordance with 40 CFR 166.24, EPA is soliciting public comment before making the decision whether or not to grant the exemption.

DATES: Comments must be received on or before May 12, 1993.

ADDRESSES: Three copies of written comments, bearing the identification notation "OPP-180891," should be submitted by mail to: Public Response and Human Resource Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in rm. 1128, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Susan Stanton, Registration Division (H7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: 6th Floor, Crystal Station I, 2800 Jefferson Davis Highway, Arlington, VA 22202 (703-308-8327).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption. The Applicant has requested the Administrator to issue a specific exemption for the use of the fungicide, tebuconazole, available as Folicur 3.6F from Miles, Inc., to control Southern stem rot and Rhizoctonia limb rot on up to 14,000 acres of peanuts in South Carolina. Information in accordance with 40 CFR part 166 was submitted as part of this request.

According to the Applicant, Southern stem rot, caused by the fungus, *Sclerotium rolfsii*, is responsible for statewide yield losses of between 3 and 10 percent in South Carolina peanut

VOL

AP
28
1993
UMI

fields, with losses of 50 to 60 percent in some fields. Rhizoctonia limb rot, caused by the fungus, *Rhizoctonia solani*, has emerged as another important disease of peanuts in the southeastern U.S., causing statewide yield losses in South Carolina of 1.5 percent annually, with losses of up to 40 percent in some field tests in recent years. According to the Applicant, no registered pesticides or alternative practices are available that will adequately control these two diseases. If tebuconazole is not available for use, economic losses of more than $4 million are expected due to stem rot and limb rot.

Under the proposed exemption, up to 4 ground applications of Folicur 3.6F would be made at 0.5 pint of product (0.225 pounds a.i.) per acre. A maximum of 2.0 pints of product (0.9 pounds a.i.) would be applied per acre per season. No applications would be made within 14 days of harvest. A maximum of 3,500 gallons of product (12,600 pounds a.i.) would be needed to treat up to 14,000 acres of peanuts.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require that the Agency publish notice of receipt in the **Federal Register** and solicit public comment on an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in any currently registered pesticide) (40 CFR 166.24 (a)(1)). Tebuconazole is a new chemical. Accordingly, interested persons may submit written views on this subject to the Field Operations Division at the address above. The Agency will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the South Carolina Department of Fertilizer and Pesticide Control.

Dated: April 14, 1993.

Lawrence E. Culleen,

Acting Director, Registration Division, Office of Pesticide Programs.

[FRL–4616–7]

Labat-Anderson, Inc.; Access to Trade Secret Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized Labat-Anderson, Incorporated of Arlington, Virginia, for access to information submitted to EPA pursuant to sections 303, 311, 312, 313, and 322 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), also known as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA). Specifically, access concerns trade secrecy claims by industry under sections 303, 311, 312, and 313.

DATES: Access to the trade secret information submitted to EPA will occur on May 6, 1993.

FOR FURTHER INFORMATION CONTACT: Dorothy McManus, Chemical Emergency Preparedness and Prevention Office (CEPPO), Office of Solid Waste and Emergency Response, OS–120, Environmental Protection Agency, Rm. 3101B, 401 M St., SW., Washington, DC 20460, Telephone: 202–260–8606.

SUPPLEMENTARY INFORMATION: Under Title III, facilities must send trade secrecy claims regarding their Section 303, 311, 312, and 313 submittals to EPA.

Under contract number 68–WO–0022, awarded to ICF Incorporated, Labat-Anderson, Incorporated under Subcontract No. EPA–99–03 will continue to assist the Chemical Emergency Preparedness and Prevention Office (Office of Solid Waste and Emergency Response) in receiving and processing the information submitted by industry. EPA has determined that Labat-Anderson, Incorporated will require access to trade secret information, and in so doing, Labat-Anderson, Incorporated will follow all required security procedures.

EPA is issuing this notice to inform all submitters of trade secret information under the aforementioned Title III sections that EPA will provide Labat-Anderson, Incorporated access to these trade secret materials. Upon termination of their contract, or prior to termination of their contract at EPA's request, Labat-Anderson, Incorporated will return all material to EPA.

EPA announced clearance to access to EPCRA trade secret information by Labat-Anderson, Incorporated in a notice published in the **Federal Register** of August 8, 1988 (53 FR No. 152). Pursuant to this notice, access to clearance to EPCRA trade secret information under this contract is extended and expected to expire on September 30, 1993.

Dated: April 21, 1993.

Richard J. Guimond,

Assistant Surgeon General, USPHS, Acting Assistant Administrator.

Notice of Proposed Administration Settlement Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as Amended by the Superfund Amendments and Reauthorization Act

AGENCY: Environmental Protection Agency.

ACTION: Notice; request for public comment.

SUMMARY: In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986 ("CERCLA"), 42 U.S.C. 9622(i), notice is hereby given that a proposed administrative cost recovery settlement concerning the Old City of York Site, York County, PA was issued by the Agency on April 12, 1993. The settlement resolves an EPA claim under section 107 of CERCLA, 42 U.S.C. 9607, against the City of York, PA. The settlement requires the City of York to pay a principal payment of $615,000 over a five year period, and an interest payment of $137,942.02 to the Hazardous Substances Superfund.

For thirty (30) days following the date of publication of this notice, the Agency will receive written comments relating to the settlement. The Agency's response to any comments received will be available for public inspection at the U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107.

DATES: Comments must be submitted on or before May 28, 1993.

Availability

The proposed settlement and additional background information relating to the settlement are available for public inspection at the U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107. A copy of the proposed settlement may be obtained from Susanne Canning, U.S. Environmental Protection Agency, Regional Docket Clerk (3RC00), 841 Chestnut Building, Philadelphia, PA 19107. Comments should reference the "Old City of York Site" and "EPA Docket No. III–92–37 DC" and should be forwarded to Suzanne Canning at the above address.

FOR FURTHER INFORMATION CONTACT: Patricia C. Miller (3RC22), Assistant Regional Counsel, U.S. Environmental Protection Agency, 841 Chestnut Building, Philadelphia, PA 19107, (215) 597–3440.

Dated: April 20, 1993.

Stanley L. Laskowski,

Acting Regional Administrator, U.S. Environmental Protection Agency, Region III.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

April 22, 1993.

The Federal Communications Commission has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, International Transcription Service, Inc., 2100 M Street, NW., Suite 140, Washington, DC 20037, (202) 857–3800. For further information on this submission contact Judy Boley, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on this information collection should contact Jonas Neihardt, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395–4814.

OMB Number: 3060–0009.

Title: Application for Consent to Assignment of Broadcast Station Construction Permit or License or Transfer of Control of Corporation Holding Broadcast Station Construction Permit or License.

Form Number: FCC Form 316.

Action: Revision of a currently approved collection.

Respondents: State or local governments, non-profit institutions, and businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting.

Estimated Annual Burden: 920 responses; 3.25 hours average burden per response; 2,990 hours total annual burden.

Needs and Uses: Filing of FCC Form 316 is required when applying for authority for assignment of a radio broadcast station construction permit or license, or for consent to transfer control of corporation holding radio broadcast station construction permit or license where there is a little change in the relative interest or disposition of its interests; where transfer of interest is not a controlling one; where there is no substantial change in the beneficial ownership of the corporation; where the assignment is less than a controlling interest in a partnership; and where there is an appointment of an entity qualified to succeed to the interest of a deceased or legally incapacitated individual permittee, license or controlling stockholder. The data is used by FCC staff to determine if the applicant is qualified to become a Commission licensee or permittee of a commercial or noncommercial broadcast station.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

SeaWay Forwarding Corp. and Danzas Seaway; Correction

By notice published in the **Federal Register** on Wednesday, February 17, 1993 (58 FR 8761) Seaway Forwarding Corporation and Danzas Seaway, Division of Seaway Forwarding Corporation was listed as having its ocean freight forwarder license (No. 1185) revoked because of a failure to furnish a valid bond. This is incorrect. Seaway Forwarding Corporation and Danzas Seaway, Division of Seaway Forwarding Corporation did not have its license revoked due to its failure to furnish a bond. Rather, Seaway Forwarding Corporation and Danzas Seaway, Division of Seaway Forwarding Corporation voluntarily surrendered its license for revocation.

Dated: April 23, 1993.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 92N–0139]

Food Labeling; Foods Derived From New Plant Varieties

AGENCY: Food and Drug Administration, HHS.

ACTION: Request for data and information.

SUMMARY: The Food and Drug Administration (FDA) is announcing a request for data and information on certain labeling issues pertaining to the agency's recent statement of policy concerning foods derived from new plant varieties that appeared in the **Federal Register** of May 29, 1992 (57 FR 22984). This request will provide an opportunity for interested persons to present data and other information on these specific issues.

DATES: Written comments by July 27, 1993.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: James H. Maryanski, Center for Food Safety and Applied Nutrition (HFS–13), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–205–4359.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of May 29, 1992 (57 FR 22984), FDA published a document entitled "Statement of Policy: Foods Derived from New Plant Varieties" that clarifies the agency's interpretation of the Federal Food, Drug, and Cosmetic Act (the act) with respect to foods derived from new plant varieties. This policy statement was issued to ensure that relevant scientific, safety, and regulatory issues are resolved prior to the introduction of such foods into the marketplace. In that notice, FDA invited interested persons to submit written comments on or before August 27, 1992. In response to a request, FDA reopened the comment period for an additional 30 days (to October 15, 1992) by a notice in the **Federal Register** of September 15, 1992 (57 FR 42588).

FDA's preliminary review of the comments reflects that several issues were raised frequently with respect to the policy statement, such as: (1) Appropriate labeling of foods derived from new plant varieties developed using "genetic engineering" techniques; (2) the potential allergenicity of foods derived from "genetically engineered" plants; (3) the need for premarket notification to FDA, or agency approval, of all new plant varieties developed using "genetic engineering" techniques; and (4) appropriate testing of foods derived from new plant varieties developed using "genetic engineering" techniques.

FDA seeks to foster public dialogue on issues related to the policy statement so that any needed refinement in the policy can be based on all relevant information and views. One set of issues raised by the comments concerns how foods derived from plants developed via "genetic engineering" should be labeled; FDA believes that this set of issues warrants further dialogue. Because this set of issues raises complex scientific and legal questions, FDA is

VOL
58
ISS
80
AP
28
1993
UMI

announcing this request for additional data and factual information relative to the labeling of foods derived from "genetically engineered" plants. FDA intends to evaluate the data and information received in response to this request to identify specific issues to be discussed at a public forum to be announced in a future issue of the **Federal Register**. FDA's goal is to foster substantive dialogue on how the legal principles under the act apply to the complex issues raised by the comments.

In the near future, FDA intends to engage the scientific community on the question of the potential for food allergy raised by foods derived from new plant varieties, and the agency will announce its plans regarding this question in a future issue of the **Federal Register**. If, upon further review of the comments and other relevant information, FDA determines that the resolution of other issues raised by the comments on the policy statement would benefit from additional information and public discussion, FDA will initiate appropriate proceedings to resolve those issues.

II. Requirements for Labeling

The act provides FDA with the authority to regulate the labeling of foods, including foods derived from new plant varieties. It is in the context of this legal authority that the labeling issues set out below in section III. of this document should be addressed. Here, FDA discusses the labeling requirements of the act and provides some examples to illustrate how the legal principles have been applied to require the disclosure of certain information in labeling for a food.

The requirements for food labeling are in section 403 of the act (21 U.S.C. 343). Under section 403(a)(1) of the act, a food is misbranded if its labeling is false or misleading. Under section 201(n) of the act (21 U.S.C. 321(n)), labeling is misleading if it fails to reveal all facts that are "material in light of • • • representations or material with respect to consequences which may result from the use of the article to which the labeling • • • relates under the conditions of use prescribed in the labeling • • • or under such conditions of use as are customary or usual."

Section 403(i) of the act and regulations promulgated thereunder require that a food product be described by its common or usual name or, in the absence thereof, an appropriately descriptive term (21 CFR 101.3). Section 403(i) of the act also requires that, in the case of foods fabricated from two or more ingredients, a food product bear on the label the common or usual name of each ingredient.

Many consumers commented that they had a right or desire to know that a food had been derived from a plant developed by "genetic engineering." Comments also requested that multi-ingredient foods that contain one or more ingredients developed by "genetic engineering" be so labeled. The principal legal theory that might support such a requirement is that such information is material within the meaning of section 201(n) of the act. In support of these requests, comments cited language in the final rule on food irradiation (April 18, 1986, 51 FR 13376), in which FDA stated:

> Whether information is material under section 201(n) of the act depends not on the abstract worth of the information but on whether consumers view such information as important and whether the omission of label information may mislead a consumer.

Historically, FDA has generally limited the scope of the materiality concept in section 201(n) of the act to information about the attributes of the food itself. With respect to the process of irradiation, FDA concluded that irradiation could cause changes in organoleptic properties of the finished food and that, without special labeling, consumers might assume that such foods were unprocessed (51 FR 13376, April 18, 1986). The fact that a food had been irradiated was, therefore, deemed to be material information that under section 201(n) of the act was required to be in labeling for the food. Importantly, however, FDA concluded (December 30, 1988, 53 FR 53176 at 53205) that the fact that an ingredient of a food had been irradiated was not material information required on the label of foods that contain such ingredient because:

> [T]he act does not require that the label declare details of processing for each ingredient. • • • FDA had no evidence that irradiation of an ingredient would affect the characteristics of a multiple ingredient food in any significant way. Therefore, the agency concluded that the labeling requirements for irradiated ingredients should be the same as for any other processed ingredients, namely, to declare them by their common or usual name without any requirement for stating whether they were processed • • •.

Proposed and final labeling requirements for protein hydrolysates also illustrate how the agency has applied section 201(n) of the act in conjunction with the requirement in section 403(i) of the act that each ingredient in a food be listed by its common or usual name. The agency recently promulgated a final rule requiring the common or usual name of a protein hydrolysate to include the identity of the food source from which the protein was derived (§ 102.22 (21 CFR 102.22)). The agency determined that, because the source of a protein hydrolysate has a significant effect on the product's composition and function, it must be identified in the common or usual name to describe adequately the basic nature of the ingredient, as required by § 102.5(a) (21 CFR 102.5(a)). (See the proposed rule on declaration of ingredients (56 FR 28592 at 28599, June 21, 1991) and the final rule on declaration of ingredients (58 FR 2850 at 2867, January 6, 1993)). For example, "hydrolyzed soy protein" is an acceptable name, but "hydrolyzed vegetable protein" is not (21 CFR 102.22(a)).

The agency also recognized that, for religious or cultural reasons, consumers are interested in being able to identify the source of a protein hydrolysate and determined that for these consumers the protein source of a protein hydrolysate is a material fact (56 FR 28592 at 28600; 58 FR 2850 at 2866). The agency determined, however, that more detailed source declarations, such as the identification of hydrolyzed casein as a milk-derived ingredient, were not necessary to inform consumers about the nature of the protein hydrolysate, although consumers requested the information based in part on religious or cultural dietary concerns (58 FR 2850 at 2867; 56 FR 28592 at 28600). The agency also rejected the suggestion that limiting the required declaration to "animal" or "vegetable" would be sufficient to address religious or cultural concerns, because such generic source labeling would not describe the basic nature of the protein hydrolysate and so would not fully comply with § 102.5(a) (58 FR 2850 at 2867).

At the same time as it issued the final rule requiring protein source declarations, the agency proposed to require the phrase "(contains glutamate)" to be part of the common or usual name of certain protein hydrolysates (58 FR 2950, January 6, 1993). Although consumers had expressed interest in this information for health reasons, the agency determined that no public health basis existed for imposing the requirement, and stated that its tentative decision to require the declaration was not based on any failure of labeling to reveal material facts regarding consequences that may result from the customary or usual use of the hydrolyzed protein (58 FR 2950 at 2951). Rather, the agency tentatively concluded that existing labeling of protein hydrolysates was not sufficiently informative and that the phrase "(contains glutamate)" is

necessary to describe adequately the basic nature or characterizing properties of certain protein hydrolysates and should therefore be part of their common or usual name under section 403(i)(1) of the act.

The agency's conclusion that the food source of a protein hydrolysate is information that must be revealed in labeling was reached in the context of the addition to food of food ingredients directly derived from animal or microbial sources (such as an animal protein hydrolysate or autolyzed yeast extract). That situation is different from the biotechnology context, which involves the presence in a plant chromosome of deoxyribonucleic acid (DNA) that was originally derived from an animal or microorganism but is now an inherent constituent of a plant. When using recombinant DNA techniques, scientists do not infuse the plant with the original genes that were removed from the animal. The animal genes are used to produce copies in the laboratory. Once the copies are transferred to the plant, they become an integral part of its genetic information, just like thousands of other genes that are present in the plant chromosome. There is a scientific basis to conclude that such genetic alterations do not change the essential nature of the plant, nor do they confer "animal-like" characteristics to the plant. For example, a tomato does not become "fish-like" following the addition of a copy of a fish gene that causes the production of a freeze-tolerant protein. This difference in context may bear directly on whether special labeling should be required for such "genetically engineered" products. Thus, in section III. of this document, FDA requests specific data and information that bear on these issues.

In developing the May 1992 policy statement, FDA was not aware of any information to suggest that the application of recombinant DNA techniques, commonly referred to as "genetic engineering," to the development of new plant varieties would result in foods which, as a class, exhibit attributes different from foods derived by other methods of plant breeding. Further, FDA notes that plant breeding methods are applied in the earliest stages of development of new plant varieties and are not processes applied to the finished food. Thus, in the May 1992 policy statement, FDA stated that the method of development of a new plant variety, including plants developed via "genetic engineering," is not information that is material under section 201(n) of the act and would not be required in labeling for the food (57 FR 22984 at 22991). This conclusion is consistent with the agency's historic interpretation of section 201(n) of the act, in that the method of plant breeding is not required to be disclosed in labeling.

III. Data and Information Requested

The subject of this request for data and information is limited to the labeling of foods derived from "genetically engineered" plants. While most of the comments on the policy statement raised the issue of labeling of foods derived from "genetically engineered" plants, most comments did not define "genetic engineering" or discuss characteristics that would distinguish a food derived from a "genetically engineered" plant from another food and, thus, might warrant labeling. Thus, FDA is soliciting additional data and factual information to define further "genetic engineering" as used in the comments; to clarify under what circumstances such labeling is believed to be necessary; to address how foods derived from "genetically engineered" plants differ from plants developed by other methods of plant breeding; to specify how such labeling, if required, would be accomplished as a practical matter; and other issues discussed in this notice.

FDA requests data and factual information that bear on whether certain labeling should be required under the act in the areas identified in sections III.A.1. through III.A.5. of this document and on labeling voluntarily placed on a food in the areas identified in section III.B. of this document. In addition, FDA invites data and information on other labeling issues for foods derived from "genetically engineered" plants that would be appropriate topics for the agency's consideration. Material submitted previously as comments on the policy statement will be reviewed by FDA in its deliberation on this topic. Therefore, FDA requests that such material not be resubmitted in response to this notice.

A. Required Labeling

1. Should All Foods Derived From New Plant Varieties Developed Using "Genetic Engineering" Techniques be Required to be Labeled as Such?

To explore this issue, FDA specifically seeks data and factual information on the following questions:

(a) How should "genetic engineering" be defined? For example, should "genetic engineering" be restricted to recombinant deoxyribonucleic acid (rDNA) techniques, or should the term include a broad range of genetic manipulation techniques, such as cell fusion, somaclonal variation, and embryo rescue?

(b) What specific characteristics of foods derived from "genetically engineered" plants distinguish such foods from other foods, and thus, such foods might warrant special labeling? Are there foods derived from "genetically engineered" plants that are without such characteristics and, thus, would not warrant labeling disclosing the method of production on the food? Does the purpose or intended technical effect of the genetic modification have any bearing on whether such disclosure labeling should be required?

The following are some examples of modifications of foods for which FDA requests additional data and factual information to help distinguish changes in foods derived from plants developed by "genetic engineering" from parallel changes in foods derived from plants developed using other methods of plant breeding:

(1) Foods that contain proteins not previously found in food, even if present in food at minute concentrations;

(2) Foods that contain proteins new to a particular food, but present in other foods;

(3) Foods that contain higher or lower concentrations of proteins native to that food;

(4) Foods that contain newly introduced but unexpressed genetic material;

(5) Foods that have improved nutritional or food processing characteristics;

(6) Food ingredients that are chemically unchanged as a result of the genetic modification of the plant (e.g., vegetable oil or food starch) because the genetic modification does not introduce new substances into the finished ingredient.

(c) What labeling should be required based on the form of the food at the time of sale? For example, is labeling appropriate for fresh produce, processed foods, or both? Why? In the case of processed foods, should labeling be required for all processed food? Why?

(d) What labeling, if any, should be required for a food derived from a plant that contains multiple traits that originated from different lines? What are the reasons for such a requirement?

(e) What labeling, if any, should be required for plant cultivars developed by traditional techniques (such as cross hybridization), when one (or both) parent line(s) was developed using "genetic engineering" techniques, or when one (or both) parent line(s) is derived from a progenitor line that was

VOL 58 ISS 80 AP 28 1993 UMI

developed using "genetic engineering" techniques? What are the reasons for such a requirement?

(f) What is the suggested text of any labeling for "genetically engineered" foods? Should different types of products or different modifications have different labeling texts?

(g) Are test methods available to permit FDA to enforce such labeling requirements?

(h) Can such labeling requirements be enforced, as a practical matter?

2. Should Labeling the Source of Introduced DNA be Required?

Several comments discussed the potential problems posed by fruits and vegetables modified to contain genetic material originally derived from animals, including the potential difficulties in maintaining a diet in accordance with religious, ethical, or health considerations. Some comments cited as reason for concern experiments in which copies of human genes have been introduced into plants and animals. Other comments requested that foods derived from plants using "genetic engineering" techniques be labeled to identify the source of any DNA, e.g., bacterial, viral, or animal, transferred to plants across natural mating barriers.

To explore this issue, FDA specifically seeks data and factual information on the following questions:

(a) What criteria could be used as a basis for source labeling for foods derived from new plant varieties? For example, should source labeling be required if the introduced substance (gene or its product):

(1) Has been taken directly from an animal?

(2) Has been derived originally from an animal, even though it is a bacterial or plant copy of the animal gene?

(3) Confers "animal-like" characteristics on the food?

(b) As a result of evolutionary conservation, plants, animals (including humans), and microorganisms share certain genes in common. Is this relevant to determining whether source labeling should be required?

(c) Should special criteria apply to copies of human genes that are introduced into food source organisms?

(d) What text should be used for source labeling?

(e) What test methods are available to enable enforcement if the source of a transferred gene is required to be disclosed in labeling?

(f) As a practical matter, could FDA enforce a requirement that the source of transferred DNA be disclosed in labeling?

3. Under What Circumstances is Ingredient Labeling Appropriate?

Some comments asserted that substances added to food using "genetic engineering" techniques are ingredients of foods and should be identified on the food's label consistent with section 403(i) of the act. Historically, ingredients are considered to be substances from which a food is fabricated. FDA has not previously considered new constituents of plants introduced via breeding to be ingredients. For example, most commercially produced tomatoes have introduced genetic traits derived from related weedy species which traits are designed to combat fungal disease.

To explore this issue further, FDA specifically seeks data and factual information on the following issues:

(a) Whether there is a basis in science to differentiate between constituents added by one type of genetic technique (such as rDNA) and constituents added by another type of genetic technique (such as cross-hybridization)?

(b) What criteria should be used to classify constituents as native or added, and the types and availability of data bases for various crops needed to evaluate and classify constituents?

(c) Are there circumstances in which a constituent that results from genetic engineering would constitute an ingredient? If so, what are those circumstances?

(d) Should such labeling be required on whole foods? On processed foods? What are the reasons for such a requirement?

4. How Can Required Labeling for Food Allergy be Accomplished?

As discussed above, the agency intends to engage the scientific community on technical issues associated with food allergy. Therefore, FDA intends to defer the discussion of the technical aspects of allergenicity until that time. Some examples of these issues include what foods should be considered "commonly allergenic;" whether testing for the presence and allergenic potential of transferred antigenic determinants is technically feasible; whether the allergenicity of proteins not currently consumed or not derived from a commonly allergenic food can be predicted; and whether data bases of food allergens can and should be established to aid in the identification of proteins that are allergenic.

FDA is aware that there are experimental plants currently under development that contain genes derived from foods known to be commonly allergenic to consumers (e.g., genes from fish and tree nuts). Under FDA's policy, such foods will be required to be labeled to alert consumers to potential allergenic substances derived from commonly allergenic foods, unless the developer can demonstrate scientifically that the introduced substance is not allergenic in the new food. Therefore, FDA requests data and factual information on how labeling to disclose potential allergenicity could be accomplished, when deemed necessary, for whole foods, processed foods, and fabricated foods.

Many consumers who are allergic to a variety of common fruits, vegetables, and grains expressed a concern that point-of-sale labeling would not protect them from allergens "hidden" in food consumed in restaurants or at social functions. FDA specifically seeks information from the food industry that responds or otherwise relates to this concern.

5. What are the Practical Difficulties and Economic Impact of Labeling "Genetically Engineered" Foods?

Representatives of various segments of the food industry such as developers of new plant varieties, distributors of raw agricultural commodities, food processors, grocery and specialty stores, restaurants, and trade associations representing these various segments of the food industry also submitted comments on the policy. Several of these comments described the practical difficulties of labeling foods derived from "genetically engineered" commodities (such as wheat or corn) at every stage of the food chain which extends from the farm to the grocery store. Restaurateurs, among other purveyors of food, expressed concern that inadequate labeling would not allow them to choose the foods that their customers desired, particularly in the case of customers who adhere to certain dietary restrictions.

To explore these issues, FDA specifically seeks information on the following issues:

(a) The feasibility and cost of labeling throughout the food chain "genetically engineered" commodities such as corn, soybeans, and wheat.

(b) The feasibility and cost of labeling throughout the food chain "genetically engineered" vegetables, such as tomatoes and squash, including packaged fresh produce, unpackaged fresh produce, and processed foods.

(c) The feasibility and cost of labeling throughout the food chain food ingredients derived from "genetically engineered" plants, such as vegetable oils and food starch.

B. Voluntary Labeling

FDA expects that in some circumstances producers and distributors of foods derived from "genetically engineered" commodities may decide to apply special labeling to their food on their own initiative. FDA requests information on current industry plans for such labeling.

After the publication of the policy statement, the Office of Technology Assessment of the U.S. Congress published a report (Ref. 1) that discussed options for labeling food products in which new methods of plant breeding, such as rDNA techniques, were used to develop the food crops. One option was that "Congress, through research and extension agencies, could encourage niche markets to be established to satisfy the concerns of those willing to pay high prices for labeled food signifying that it does not contain genetically engineered food." FDA specifically seeks information on the following questions that relate to these "niche" markets:

(1) Could niche markets satisfy consumer needs?

(2) Would such niche markets include fresh produce, processed foods, or both?

(3) What standards should apply to such niche markets, and what technical and monitoring issues would accompany such standards?

(4) What role should FDA, using its authority under the act, have in such a system (e.g., by monitoring for truth in labeling)?

(5) Would such labeling imply that products with such labeling are superior?

IV. Notice of Request

Individuals and organizations submitting data and information in response to this request should submit two copies of the information to the Dockets Management Branch (address above) by July 27, 1993. Each submission should be identified with the docket number found in brackets in the heading of this document. Submissions received may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

V. Reference

The following reference has been placed on display Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

1. U.S. Congress, Office of Technology Assessment, "A New Technological Era for American Agriculture," OTA–F–474, pp. 348–349, U.S. Government Printing Office, Superintendent of Documents, Mail Stop: SSOP, Washington DC 20402–9328, 1992.

Dated: April 22, 1993.

BILLING CODE 4160–01–F

Health Resources and Services Administration

Final Funding Priorities and Special Consideration for Grants for Residency Training in General Internal Medicine and General Pediatrics

The Health Resources and Services Administration (HRSA) announces final funding priorities and special consideration for Grants for Residency Training in General Internal Medicine and General Pediatrics authorized under section 748 (previously section 784), title VII of the Public Health Service (PHS) Act, as amended by the Health Professions Education Extension Amendments of 1992, Public Law 102–408, dated October 13, 1992.

Approximately $12.8 million will be available in FY 1993 for this program. Total continuation support recommended is $6.3 million. It is anticipated that $8.5 million will be available to support 37 competing awards averaging $175,000 each.

Purpose

Section 748 authorizes the award of grants for planning, developing operating or participating in approved professional training programs (including approved residencies or internship programs) in the fields of internal medicine or pediatrics for medical (M.D. or D.O.) students, interns (including interns in internships in osteopathic medicine), residents or practicing physicians, which training program emphasizes training for the practice of general internal medicine or general pediatrics. In addition, section 748 authorizes assistance in meeting the cost of supporting medical students, interns, residents, practicing physicians or other medical personnel, who are participants in any such training program, and who plan to specialize or work in the practice of general internal medicine or general pediatrics. A separate grant program is in effect for the faculty development component of this authority.

Since this program was announced in FY 1992, the Health Professions Education Extension Amendments of 1992, Public Law 102–408, were passed by the Congress and signed by the President. This legislation resulted in the following changes for this program:

Section 784 has been renumbered section 748 of the PHS Act. Support of training in general internal medicine and general pediatrics, which was restricted to residency and faculty training has been broadened to also cover training of undergraduate medical students and practicing physicians.

Section 791(a) of the Act, as amended, includes a general funding preference for selected grant programs under title VII, including section 748, Grants for Residency Training in General Internal Medicine and General Pediatrics. Section 791(b) includes new information requirements for applicants under this program.

Statutory General Funding Preference

Under section 791(a) of the Act, preference will be given to any qualified applicant that: (A) Has a high rate for placing graduates in practice settings having the principal focus of serving residents of medically underserved communities; or (B) during the 2-year period preceding the fiscal year for which such an award is sought, has achieved a significant increase in the rate of placing graduates in such settings.

Preference will be given only for applications ranked above the 20th percentile of applications that have been recommended for approval by the appropriate peer review group. The Secretary may not give an applicant preference if the proposal of the applicant is ranked in or below the 20th percentile of proposals that have been recommended for approval by peer review groups.

Additional information concerning the implementation of this preference has been developed and a separate notice was published in the **Federal Register** dated February 22, 1993, at 58 FR 9570, establishing the final methodology for implementation of this new statutory funding preference, for this program, in FY 1993.

New Information Submission Requirement

Under section 791(b) of the Act, the Secretary may make an award under the Grants for Residency Training in General Internal Medicine and General Pediatrics program only if the applicant for the award submits to the Secretary information regarding the programs of the applicant. The provision for this new requirement was not implemented in FY 1993. Further information will be provided in program materials in any future cycles.

VOL 58 ISS 80 AP 28 1993 UMI

Final Funding Priorities and Special Consideration for FY 1993

Proposed funding priorities and a special consideration were published in the **Federal Register** dated September 21, 1992, 57 FR 43464, for public comment. No comments were received during the 30-day comment period. Therefore, as proposed the final funding priorities and special consideration will be retained as follows:

In making awards for fiscal year 1993, a funding priority will be given to:

1. Education Linkages to Medically Underserved Communities

Applications that propose to provide educational experiences to demonstrate to residents the provision of primary care services to underserved populations. These experiences must include substantial training involving one or more of the following entities:

(A) Underserved Geographical Area

Inpatient or outpatient health care facilities located in a Health Professional Shortage Area (HPSA), PHS Act, section 332, or in a Medically Underserved Area (MUA) designated under provisions of PHS Act, section 330(b)(3);

(B) Facilities Whose Purpose is Care of Underserved

Community Health Centers currently supported under PHS Act, section 330, Medically Underserved Population, defined under PHS Act, section 330(a)(3), Migrant Health Centers currently supported under PHS Act, section 329, Homeless Health Centers supported under PHS Act, section 340, facilities that have formal arrangements to provide primary health services to public housing communities, hospitals or other health care facilities of the Indian Health Service and/or facilities operated by State or local health departments.

(C) Underserved Patient Populations

Facilities which do not qualify under (A) and (B) above can qualify for up to a full priority score based on the percentage of their patient visits/hospital admissions that are uncompensated or are compensated under the State Medicaid Program or local programs designed to reimburse health providers for services to indigent populations.

2. Minorities/Low-Income Populations

Programs which demonstrate either substantial progress over the last 3 years or a significant experience of 10 or more years in enrolling and graduating trainees from those minority or low-income populations identified as at-risk of poor health outcomes.

3. HIV/AIDS/Substance Abuse Activities

Applications that (1) Document collaboration with a Regional HIV/AIDS Educational Training Center and have implemented, or plan to implement no later than academic year 1993–94, a comprehensive training experience for all residents which includes counseling in the prevention of HIV infection, direct patient care and clinical management of HIV-infected individuals, and (2) provide all residents with an organized clinical experience in the diagnosis, counseling, treatment and referral of substance abuser patients/families or present plans for the implementation of such a curriculum no later than academic year 1993–94.

4. Clinical Preventive Services

Applications that demonstrate sufficient curricular time and offerings devoted to teaching all residents about the screening, counseling and immunization services recommended by the U.S. Preventive Services Task Force.

Final Special Consideration

Special consideration will be given to the extent to which applicants enroll and graduate trainees from underserved areas.

Additional Information

If additional programmatic information is required, contact: Ms. Sara Kearney, Residency Training Section, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, Parklawn Building, room 4C–04, Rockville, Maryland 20857, Telephone (301) 443–6820, FAX: (301) 443–8890.

This program is listed at 93.884 in the *Catalog of Federal Domestic Assistance*. Applications submitted in response to this announcement are not subject to the provisions of Executive order 12372, Intergovernmental Review of Federal Programs, (as implemented through 45 CFR part 100).

This program is not subject to the Public Health System Reporting Requirements.

Dated: April 21, 1993.

Robert G. Harmon,

Administrator.

[FR Doc. 93–9929 Filed 4–27–93; 8:45 am]

BILLING CODE 4160–60–P

Final Funding Priorities and Special Consideration for Graduate Training in Family Medicine

The Health Resources and Services Administration (HRSA) announces the final funding priorities and special consideration for Grants for Graduate Training in Family Medicine authorized under section 747, (previously section 786(a)), title VII of the Public Health Service (PHS) Act, as amended by the Health Professions Education Extension Amendments of 1992, Pub. L. 102–408, dated October 13, 1992.

Approximately $12.8 million will be available in FY 1993 for this program. Total continuation support recommended is $10.1 million. It is anticipated that $2.7 million will be available to support 18 competing awards averaging $110,000.

Purpose

Section 747 of the PHS Act authorizes the Secretary to award grants to assist in meeting the costs of planning, developing and operating or participating in approved graduate training programs in the field of family medicine. In addition, section 747 authorizes assistance in meeting the cost of supporting trainees in such programs who plan to specialize or work in the practice of family medicine.

Since this program was announced on September 14, 1992, the Health Professions Education Extension Amendments of 1992, Public Law 102–408, were passed by the Congress and signed by the President.

Public Law 102–408 makes the following revisions to this program. Section 786 has been renumbered section 747 of the PHS Act. The authority for this program, which includes authority for Grants for Faculty Development in Family Medicine and Grants for Predoctoral Training in Family Medicine, has been combined with the authority for section 747(b), Grants for Departments of Family Medicine (previously section 780 of the PHS Act). A new statutory funding preference has been established and is outlined below. Under section 791(b), an information requirement provision has also been established.

Statutory Funding Preference

Preference will be given to qualified applicants that:(1) Have a high rate for placing graduates in practice settings having the principal focus of serving residents of medically underserved communities; or (2) have achieved, during the 2-year period preceding the fiscal year for which such an award is sought, a significant increase in the rate of placing graduates in such settings.

This preference will only be applied to applications that rank above the 20th percentile of applications that have been recommended for approval by peer review groups under section 798(a) of the PHS Act, as amended.

Additional information concerning the implementation of this preference has been published in the **Federal Register** at 58 FR 9570, dated February 22, 1993.

Information Requirements Provision

Under section 791(b) of the Act, the Secretary may make an award under the Grants for Graduate Training in Family Medicine only if the applicant for the award submits to the Secretary information regarding the programs of the applicant. The provision for this new requirement was not implemented in FY 1993. Further information will be provided in program materials in any future cycles.

Final Funding Priorities and Special Consideration for FY 1993

Proposed funding priorities and a special consideration were published in the **Federal Register** dated September 14, 1992, 57 FR 41944, for public comment. No comments were received during the 30-day comment period. Therefore, as proposed, the following final funding priorities and special consideration will be retained:

Funding priority will be given to:

1. Educational Linkages to Medically Underserved Communities

Applications that propose to provide educational experiences to demonstrate to residents the provision of primary care services to underserved populations. These experiences must include substantial training involving one or more of the following eligible entities:

(A) Underserved Geographical Area

Inpatient or outpatient health care facilities located in a Health Professional Shortage Area (HPSA), PHS Act, section 332, or in a Medically Underserved Area (MUA), designated under provisions of the PHS Act, section 330(b)(3);

(B) Facilities Whose Purpose is Care of the Underserved

Community Health Centers currently supported under PHS Act, section 330, Migrant Health Centers currently supported under PHS Act, section 329, Homeless Health Centers supported under PHS Act, section 340, facilities that have formal arrangements to provide primary health services to public housing communities, hospitals or other health care facilities of the Indian Health Service and/or facilities operated by State or local health departments.

(C) Underserved Patient Populations

Facilities which do not qualify under (A) and (B) above can qualify for up to a full priority score based on the percentage of their patient visits/hospital admissions that are uncompensated or are compensated under the State Medicaid Program or local programs designed to reimburse health providers for services to indigent populations.

2. Minorities/Low Income Populations

Programs which demonstrate either substantial progress over the last 3 years or a significant experience of 10 or more years in enrolling and graduating residents from the minority or low-income populations identified as at risk of poor health outcomes. Consideration will also be given to the extent to which enrolled and graduating residents are from underserved areas.

3. HIV/AIDS/Substance Abuse Activities

Applications that (1) Document collaboration with a Regional HIV/AIDS Educational Training Center and have implemented, or plan to implement no later than academic year 1993–94, a comprehensive training experience for all residents which includes counseling in the prevention of HIV infection, direct patient care and clinical management of HIV-infected individuals; and (2) provide all residents with an organized clinical experience in the diagnosis, counseling, treatment and referral of substance abuser patient/families or present plans for the implementation of such a curriculum no later than academic year 1993–94.

4. Clinical Preventive Services

Applications that demonstrate sufficient curricular time and offerings devoted to teaching all residents about the screening counseling and immunization services recommended by the U.S. Preventive Services Task Force.

Special consideration will be given to the extent to which applicants enroll and graduate trainees from underserved areas.

Additional Information

If additional programmatic information is needed, contact: Ms. Elsie Quinones, Program Specialist, Primary Care Medical Education Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, room 4C–04, Parklawn Building, Rockville, Maryland 20782, Telephone: (301) 443–6820, FAX: (301) 443–8890.

This program is listed at 93.379 in the *Catalog of Federal Domestic Assistance*. It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100).

This program is not subject to the Public Health System Reporting Requirements.

Dated: April 22, 1993.

Robert G. Harmon,

Administrator.

[FR Doc. 93–9928 Filed 4–27–93; 8:45 am]

BILLING CODE 4160–15–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Exxon Valdez Oil Spill Public Advisory Group; Meeting

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of meeting.

SUMMARY: The Department of the Interior announces a public meeting of the Exxon Valdez Oil Spill Public Advisory Group to be held on May 25, 1993, at 9 a.m., in the first floor conference room, 645 "G" Street, Anchorage, Alaska.

FOR FURTHER INFORMATION CONTACT: Douglas Mutter, Department of the Interior, Office of Environmental Affairs, 1689 "C" Street, suite 119, Anchorage, Alaska (907) 271–5011.

SUPPLEMENTARY INFORMATION: The Public Advisory Group was created by Paragraph V.A.4 of the Memorandum of Agreement and Consent Decree entered into by the United States of America and the State of Alaska on August 27, 1991, and approved by the United States District Court for the District of Alaska in settlement of *United States of America* v. *State of Alaska*, Civil Action No. A91–081 CV. This meeting will include: (1) A discussion of the continuing role of the Public Advisory Group in advising the Exxon Valdez Oil Spill Trustee Council; (2) a discussion of the draft Restoration Plan alternatives; and (3) a discussion of the 1994 Work Plan.

Dated: April 22, 1993.

Jonathan P. Deason,

Director, Office of Environmental Affairs.

Bureau of Land Management

[OR-135-4191-3; GP3-206; WMP-130-89-019B-3809]

Intent To Prepare an Environmental Impact Statement Supplement to the Kettle River Key Project Expansion FEIS—The Proposed Lamefoot Mine

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare an Environmental Impact Statement Supplement to the Kettle River Key Project Expansion FEIS—The Proposed Lamefoot Mine.

SUMMARY: Pursuant to section 102 (2)(c) of the National Environmental Policy Act of 1969, the Bureau of Land Management Spokane District will be the lead Federal agency and will direct the preparation of an EIS Supplement by a third party contractor. The EIS Supplement will evaluate the impacts of a proposed gold mining and processing operation located on private and public lands in northern Ferry County, Washington. This notice initiates the scoping process for this EIS Supplement.

DATES: Written comments will be accepted until June 7, 1993. A public scoping meeting will be held from 3:30 p.m. to 7:30 p.m. on May 20, 1993, at the Frontier Motel in Republic, Washington. Additional briefing meetings will be considered as appropriate.

ADDRESSES: Comments should be sent to the District Manager, Bureau of Land Management, East 4217 Main Avenue, Spokane, Washington 99202 ATTN: Lamefoot Mine.

FOR FURTHER INFORMATION CONTACT: Ann Aldrich, Border Resource Area Manager, East 4217 Main Avenue, Spokane, Washington 99202 (509) 353-2570.

SUPPLEMENTARY INFORMATION: The Kettle River Project has had a series of environmental reviews. In 1988, a Final Environmental Impact Statement, prepared by the Department of Ecology, was completed for the Overlook and Kettle River underground mines and the Key Mill and tailings storage facilities. This first EIS addressed the total tailings facility, although only one segment has actually been constructed.

In 1992, an Environmental Assessment was completed by the Bureau of Land Management to evaluate the effects of an exploration project on private and public land at the Lamefoot site about four miles northwest of the Overlook and Key Mines. The Lamefoot operations involved surface drilling and development of underground workings for subsurface exploration.

Also in 1992, the Forest Service, BLM, Department of Ecology and Department of Natural Resources completed the Kettle River Key Project Expansion FEIS. This FEIS analyzed the effects of expanding the Project to include development of the two open pit Key Mines. Exploration activities, including the Lamefoot site, were considered in the FEIS as part of the cumulative impacts. The potential for future development of the Lamefoot mine and related mill facilities was addressed as a reasonably foreseeable future action.

However, this speculative future action depended on information that was unknown at the time because exploration was needed to establish the presence and extent of mineralization and the feasibility of mining. Additional environmental review is necessary for an actual mining proposal. Therefore, because the underground Lamefoot Mine would become part of the Kettle River Project mining and processing operations, it was decided to Supplement the existing EIS to address the possible effects.

The mining phase of the Lamefoot Mine would involve excavating ore by a long hole open stoping mining technique, and transporting the ore via State and county roads to the previously permitted Key Mill. About seventy percent of the underground mining would take place on private land and thirty percent would occur on public land administered by the BLM. Total surface disturbance at the Lamefoot Mine would be about 45 acres (38 acres private, 7 acres public). Cumulative disturbance for the Kettle River Project would be about 409 acres (373 acres private (91%), 36 acres Federal (9%)).

The ore would be processed by the conventional carbon in leach method at the Key Mill. After extraction of gold, tailings would be permanently stored in a zero discharge lined tailings facility. The tailings impoundment is located on private land, operating under permits from the State of Washington, and is scheduled for enlargement in 1993 through 1995. Process waters are treated in a cyanide destruction circuit before discharge to the tailings impoundment and recycling for use in the milling circuit.

The Bureau of Land Management's scoping process for the EIS will include: (1) Identification of issues to be addressed; (2) Identification of viable alternatives; and (3) Notifying interested groups, individuals and agencies so that additional information concerning these issues can be obtained.

Joseph Buesing,

District Manager.

BILLING CODE 4310-33-M

[UT-920-93-4120-01]

Utah and Colorado: Uinta Southwestern Utah Regional Coal Team Meeting

AGENCY: Bureau of Land Management, DOI.

ACTION: Notice of Regional Coal Team Meeting.

SUMMARY: In accordance with responsibilities outlined in the Federal Coal Management Regulations (43 CFR part 3400), the Regional Coal Team (RCT) for the decertified Uinta Southwestern Utah Federal Coal Production Region will hold a meeting to discuss and make recommendations concerning coal leasing and development in the Region. The RCT will review pending coal lease applications under the "Leasing by Application" (LBA) program and discuss any additional coal-related activities appropriate at this time. Members of the public, coal companies and interested agencies are invited to make comments at the meeting.

SUPPLEMENTARY INFORMATION: A total of eight coal lease applications are pending in the region, including seven in Utah and one in Western Colorado. The RCT will be reviewing the applications and where appropriate making recommendations to the BLM concerning processing the applications. Pending applications in the Region include:

State	Applicant	Coal field	Est. acreage
Utah			
	Mining & Energy Res. Inc	Wasatch Plateau	3,431
	Coastal States Energy	Wasatch Plateau	2,020

State	Applicant	Coal field	Est. acreage
Colorado	Sage Point Coal Co	Book Cliffs	1,104
	Sage Point Coal Co	Book Cliffs	2,098
	PacifiCorp Electric Oper	Wasatch Plateau	7,865
	Genwal Coal Co	Wasatch Plateau	3,384
	Genwal Coal Co	Wasatch Plateau	4,052
	Mountain Coal	Paonia/Summerset	1,012

DATES: The Regional Coal Team meeting will be May 27, 1993 at 10 a.m.

ADDRESSES: The meeting will be held at Bureau of Land Management, Utah State Office, BLM Conference Room, No. 302, 324 South State Street, Salt Lake City, Utah.

FOR FURTHER INFORMATION CONTACT: Max Nielson, Uinta Southwestern Utah Coal Project Manager, Utah State Office, P.O. Box 45155, Salt Lake City, Utah, 84145-0155. (Telephone 801-539-4038).

Dated: April 16, 1993.

James M. Parker,

State Director, Utah.

BILLING CODE 4310-DQ-M

[ID-010-03-4210-05; IDI-28382]

Sale of Public Land in Owyhee County, ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action—IDI-28382.

SUMMARY: The following described public land has been determined to be suitable for disposal by direct sale pursuant to section 203 of the Federal Land Policy and Management Act (FLPMA) of 1976 (43 U.S.C. 1713) at no less than appraised fair market value. The land will not be offered for sale until at least 60 days after the date of publication of this notice in the **Federal Register.**

Boise Meridian, Idaho

T. 6 S., R. 4 E.
Sec. 4: NE¼SE¼, E½E½NW¼SE¼
Containing 50 acres, more or less, in Owyhee County.

DATES: Interested parties may submit comments to the District Manager, Boise District, Bureau of Land Management, 3948 Development Avenue, Boise, Idaho 83705 on or before June 14, 1993. Objections will be reviewed by the State Director, who may sustain, modify, or vacate this realty action. In the absence of any adverse comments, this realty action will become the final determination of the Department of Interior. Upon publication of this notice in the **Federal Register**, the lands described above will be segregated from appropriation under the public land laws, including the mining laws, except for sale under the provisions of FLPMA. The segregation will end upon issuance of patent or 270 days from the date of publication, whichever occurs first.

FOR FURTHER INFORMATION CONTACT: John Sullivan, Realty Specialist, at the above address or (208) 384-3338.

SUPPLEMENTARY INFORMATION: This land is being offered by direct sale to Owyhee County for construction and use as a refuse transfer station. Acceptance of the sale offer will constitute an application for conveyance of that portion of the mineral estate of no known value. A separate non-returnable fee of $50.00 will be required from the purchaser for conveyance of the mineral interests.

The reservations, terms and conditions of this sale are as follows:

Excepting and Reserving to the United States

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States. Act of August 30, 1890 (43 U.S.C. 945).

2. All oil, gas, and geothermal resources, together with the right to prospect for, mine, and remove the same.

3. A Federal Aid Highway right-of-way granted to the Idaho Transportation Department by right-of-way IDI-03082, under the authority of the Act of November 9, 1921 (42 Stat. 0216).

4. A right-of-way thereon for public access to adjacent public lands.

Subject to

5. Those rights for telephone line purposes granted to Gem State Utilities Corporation, its successors or assigns, by right-of-way no. IDI-15494, under the authority of the Act of October 21, 1976 (43 U.S.C. 1761).

6. Those rights for access road purposes granted to Lincoln C. Mackay, his heirs or assigns, by right-of-way no. IDI-20989, under the authority of the Act of October 21, 1976 (43 U.S.C. 1761).

Dated: April 22, 1993.

Barry C. Cushing,

Acting District Manager.

BILLING CODE 4310-GG-M

[UT-020-93-4210-05; U-70288]

Realty Action; Application to Purchase Federally Owned Mineral Interests

AGENCY: Bureau of Land Management, Salt Lake District Office, Interior.

ACTION: Application to purchase federally owned mineral interest.

SUMMARY: Notice is hereby given that pursuant to section 209 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1719), an application has been filed for the purchase of all federally owned mineral interests, within the following land description:

Salt Lake Meridian, Utah

T. 2 S., R. 4 E.
Section 10, lots 15, 16
Section 11, lot 11
Containing 0.820 acres

The sale is consistent with the Bureau's planning system. It has been determined that there are no known mineral values in the subject lands. The mineral estate will not be offered for sale until 60 days after the date of this notice. The mineral estate is proposed to be offered for sale to the United Park City Mines Company of Park City, Utah.

Publication of this notice in the **Federal Register** segregates the mineral interests owned by the United States from appropriation under the mining and mineral leasing laws. The segregative effect shall terminate 270 days from the publication of this notice or upon final disposition of this action, whichever occurs first.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interest parties may submit comments to the District Manager, Bureau of Land Management, 2370 South 2300 West, Salt Lake City, Utah 84119. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final

VOL 58 ISS 80 AP 28 1993 UMI

determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Janice MaChipiness, Bear River Resource Area Realty Specialist, 2370 South 2300 West, Salt Lake City, Utah 84119, or call at (801) 977–4300.

Dated: April 20, 1993.

Gary Weiser,

Acting District Manager.

National Park Service

Mississippi River Coordinating Commission; Meeting

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets the schedule for a forthcoming meeting of the Mississippi River Coordinating Commission. Notice of this meeting is required under the Federal Advisory Committee Act.

The agenda for the meeting consists of continued Commission review and discussion of the draft comprehensive management plan and draft environmental impact statement for the Mississippi National River and Recreation Area. It is anticipated the commission will vote on a resolution to release the draft plan for public review and comment. Public statements will be heard from 4:00 p.m. to 5:00 p.m., as well as in advance of any commission vote.

DATES: May 22, 1993, 12 p.m. to 5 p.m.

ADDRESSES: Earle Brown Continuing Education Center, University of Minnesota-St. Paul Campus, 1890 Buford Avenue, St. Paul, Minnesota 55108.

FOR FURTHER INFORMATION CONTACT: Superintendent, Mississippi National River and Recreation Area, 175 East Fifth Street, suite 418, St. Paul, MN 55101 (612/290–4160).

SUPPLEMENTARY INFORMATION: The Mississippi River Coordinating Commission was established by Public Law 100–696, November 18, 1988.

Dated: April 16, 1993.

BILLING CODE 4310–70–M

Bureau of Reclamation

Central Valley Project Contracting Program, California

AGENCY: Bureau of Reclamation (Interior).

ACTION: Notice of cancellation of draft environmental impact statements.

SUMMARY: The Bureau of Reclamation (Reclamation) is canceling three draft environmental impact statements (DEIS's) for the Central Valley Project (CVP), California: Sacramento River Service Area (SRSA) Water Contracting Program, American River Service Area (ARSA) Water Contracting Program, and Delta Export Service Area (DESA) Water Contracting Program. These DEIS's were filed with the Environmental Protection Agency (EPA) on December 29, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Doug Kleinsmith, Bureau of Reclamation, Mid-Pacific Region, 2800 Cottage Way, Sacramento CA 95825–1898; telephone: (916) 978–5121; or Mr. Darrell Cauley, Bureau of Reclamation, Denver Federal Center, Denver CO 80225; telephone: (303) 236–0511.

SUPPLEMENTARY INFORMATION: Reclamation published a notice of intent (NOI) to prepare an environmental impact statement (EIS) for the SRSA Contracting Program in the **Federal Register** (50 FR 19495), dated May 8, 1985. The DEIS for the SRSA was filed with the EPA on December 29, 1988, and the notice of availability (NOA) was published in the **Federal Register** (54 FR 197), dated January 4, 1989.

Reclamation published a NOI to prepare an EIS for the ARSA Water Contracting Program in the **Federal Register** (51 FR 41544), dated November 17, 1987. The DEIS for the ARSA was filed with EPA on December 29, 1988, and the NOA was published in the **Federal Register** (54 FR 195), dated January 4, 1989.

Reclamation published a NOI to prepare an EIS for the DESA Water Contracting Program in the **Federal Register** (52 FR 19599), dated May 26, 1987. The DEIS for the DESA was filed with EPA on December 29, 1988, and the NOA was published in the **Federal Register** (54 FR 196), dated January 4, 1989.

The purpose of the SRSA, ARSA, and DESA Water Contracting Programs was to resume long-term contracting of what was considered at that time to be available and uncommitted water from the CVP. Reclamation is canceling the SRSA, ARSA, and DESA Water Contracting Program DEIS's because the basic assumptions of the amount of available and uncommitted CVP water are no longer valid and because of requirements of Public Law 102–575, the Central Valley Project Improvement Act.

Since the DEIS's were filed, there have been significant changes in the allocation of the water supply from the CVP in California. The most significant change in the allocation was the enactment of Public Law 102–575 in 1992. This law prohibits, with a few exemptions, Reclamation from entering into any new short-term, temporary, or long-term contracts for CVP water for any purpose, except for fish and wildlife, until a series of environmental restoration and enhancement measures are implemented for the Central Valley and Trinity River basins. The law commits 800,000 acre-feet of annual CVP yield for these restoration measures. Public Law 102–575 also requires a programmatic EIS to be prepared within 3 years that will address its implementation.

A more accurate calculation of the yield of the CVP, and expected restrictions on CVP water operations from the State Water Resources Control Board, have reduced the possible amount of water which Reclamation anticipated contracting in 1988.

Dated: April 22, 1993.

J. William McDonald,

Assistant Commissioner Resources Management.

[FR Doc. 93–9895 Filed 4–27–93; 8:45 am]

BILLING CODE 4310–09–M

Proposed Water Service Contract, Sacramento County and San Juan Suburban Water District, Sacramento County, CA

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of scoping meeting and notice of intent to prepare a draft environmental impact statement/environmental impact report for proposed water service contracts to Sacramento County Water Agency and San Juan Suburban Water District from the Central Valley Project, California.

SUMMARY: Pursuant to Public Law 101–514 (104 Stat. 2087), and section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969 (as amended), and section 21002 of the California Environmental Quality Act (CEQA), the Bureau of Reclamation (Reclamation), the Sacramento County Water Agency (Agency), and San Juan Suburban Water District (SJSWD) intend to prepare a joint environmental impact statement/environmental impact report (EIS/EIR) for a water service contract from the Central Valley Project (CVP), California.

The proposed project consists of water supply contracts for agencies within Sacramento County. The Agency, in conjunction with the city of Folsom, and SJSWD have entered into discussions with Reclamation to negotiate long-term water supply contracts from the American River Division, CVP.

DATES: Comments are requested on this notice concerning the scope of analysis of the draft EIS/EIR. Input concerning issues related to the proposed water service contracts should be received by May 28, 1993.

Two public scoping meetings for this project will be held:

May 18, 1993, 7 p.m., Sacramento County Board of Supervisors Hearing Room, 700 H Street, Sacramento, California.

May 19, 1993, 1 p.m., Sacramento County Board of Supervisors Hearing Room, 700 H Street, Sacramento, California.

FOR FURTHER INFORMATION CONTACT: Please address scoping comments or information requests to Donna Dean, Senior Civil Engineer, Sacramento County Water Agency, Sacramento County Public Works Department, 827 7th Street, room 301, Sacramento, CA 95814; telephone: (916) 440–6851. Reclamation's environmental representative is James Frederick, Environmental Specialist, Bureau of Reclamation, Mid-Pacific Region, 2800 Cottage Way, Sacramento, CA 95825–1898; telephone: (916) 978–5134.

SUPPLEMENTARY INFORMATION: The contracts to be negotiated have been authorized and directed by the United States Congress as part of Public Law 101–514. These contracts have been excluded from the prohibition on new contracting found in Public Law 102–575.

Public Law 101–514 directs the Secretary of the Interior to enter into long-term municipal and industrial water supply contracts to meet the immediate water needs of Sacramento and El Dorado Counties. The law directs the Secretary of the Interior to enter into contracts for up to 22,000 acre-feet annually with the Agency, 13,000 acre-feet annually with SJSWD, and 15,000 acre-feet annually with El Dorado County Water Agency. These water service contracts are intended as the first phase of a contracting program to meet the long-term water supply needs of Sacramento and El Dorado Counties.

El Dorado County Water Agency and Reclamation have initiated negotiations on a water service contract under Public Law 101–514 and are preparing NEPA/CEQA environmental documentation under a separate notice of intent. The El Dorado County Water Agency water service contract is not part of the Sacramento County water service contract project.

The Sacramento County Water Agency may enter into a subcontract with the city of Folsom for delivery of up to 7,000 acre-feet annually to the city of Folsom from the water allocated to the Agency. The city of Folsom water supply subcontract, if executed, will be pursuant to the general authority and purposes of the Sacramento County Water Agency.

Public Law 101–514 directs that water taken by SJSWD and the city of Folsom be diverted from the American River at Folsom Dam. The law also requires that water diverted by the Agency be taken at or near the confluence of the American and the Sacramento Rivers.

Sacramento County Water Agency plans on using the acquired surface water in the south county area known as the Near Term Zone 40 Service Area and within areas immediately adjacent to Zone 40 that are under consideration as new development areas in Sacramento County's 1992 draft General Plan. These areas are located 12 miles south of downtown. The surface water will replace groundwater as the primary water source for the Zone 40 Area.

SJSWD plans on using the surface water acquired for municipal and industrial use in the portion of their

VOL 58 ISS 80 AP 28 1993 UMI

service area located within Sacramento County. The SJSWD's major source of water is Folsom Lake.

The city of Folsom plans on using the acquired surface water to serve presently approved developments within the existing city limits. The city of Folsom is primarily residential, with an increasing amount of industry. The existing water supply to the city of Folsom is entirely surface water from Folsom Lake.

The EIS/EIR will focus on impacts to the physical environment from diversion, distribution, and use of the contracted water. The documentation will include analysis of the potential impacts to the natural environment; i.e., aquatic, wetland, and riparian communities including any effect on special status species. Secondary growth impacts associated with the water delivery and secondary impacts associated with the construction of water delivery facilities used to divert, treat, and distribute the contracted water will be investigated. The draft EIS/EIR is expected to be completed and available for review and comment in winter of 1994.

Scoping

One element of the EIS/EIR process is scoping. Scoping activities are initiated early in the process to: Identify reasonable alternatives that should be evaluated in the draft EIS/EIR, identify significant environmental issues related to the proposed projects, determine the depth of analysis for issues addressed in the documentation, and identify resource issues that are not important and that do not require detailed study. Scoping meetings have been scheduled to solicit public input to help identify issues and possible alternative actions within the framework for delivery and use of the contracted water.

Note: Disabled persons requiring special services should contact Reclamation's Equal Employment Office at (916) 978–4311. Please notify this office as far in advance of the meetings as possible and no later than May 11, 1993, to enable Reclamation to secure the needed services. If a request cannot be honored, the requester will be notified. A telephone device for the hearing impaired (TDD) is not available.

Dated: April 22, 1993.

J. William McDonald,

Assistant Commissioner, Resources Management.

BILLING CODE 4310–09–M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32248]

Hanson Natural Resources Co.; Non-Common Carrier Status; Petition for a Declaratory Order

AGENCY: Interstate Commerce Commission.

ACTION: Extension of comment due date.

SUMMARY: By decision served March 1, 1993 (58 FR 12052, March 2, 1993), the Commission sought public comment by March 22, 1993, on a petition for declaratory order filed by Hanson Natural Resources Company (HNRC), that HNRC will not, upon consummation of certain anticipated transactions, become a common carrier by railroad. By subsequent decisions of which the latest was served April 20, 1993 (58 FR 21595, April 22, 1993), the Commission extended the comment due date to April 23, 1993. By motion filed April 22, 1993, HNRC requests a further extension of the comment due date to April 30, 1993. HNRC states the extension is needed to finalize discussions with Chaco Energy Company (Chaco) and to continue drafting certain documents in order to finalize an agreement. HNRC states that Santa Fe Entities joins in this request. HNRC maintains an extension will prejudice no one. The request will be granted.

DATES: Comments must be filed by April 30, 1993.

ADDRESSES: Send an original and 15 copies of comments, referring to Finance Docket No. 32248 to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

In addition, send one copy to HNRC's representative: C. Michael Loftus, Slover & Loftus, 1224 Seventeenth St., NW., Washington, DC 20036. (202) 374–7170.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660. [TDD for hearing impaired: (202) 927–5721].

Decided: April 23, 1993.

By the Commission, Sidney L. Strickland, Jr., Secretary.

Sidney L. Strickland, Jr.,

Secretary.

Drug Enforcement Administration

Manufacturer of Controlled Substances; Application

Pursuant to § 1301.43(a) of title 21 of the Code of Federal Regulations (CFR), this is notice that on March 5, 1993, Johnson Matthey Inc., Custom Pharmaceuticals Department, 2002 Nolte Drive, West Deptford, New Jersey 08066, made written request to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Hydromorphone (9150)	II
Morphine (9300)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections, or requests for a hearing may be addressed to the Director, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative (CCR) and must be filed no later than 30 days from publication.

Dated: April 15, 1993.

Gene R. Haislip,

Director, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 93–9947 Filed 4–27–93; 8:45 am]

BILLING CODE 4410–09–M

Importation of Controlled Substances; Application

Pursuant to section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(i)), the Attorney General shall, prior to issuing a registration under this Section to a bulk manufacturer of a controlled substance in Schedule I or II and prior to issuing a regulation under section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with § 1311.42 of title 21, Code of Federal Regulations (CFR), notice is hereby given that on February 20, 1993, James Prust, 5900 31st Avenue, Kenosha, Wisconsin 53144, made application to the Drug Enforcement Administration to be registered as an importer of marihuana (7360) a basic class of controlled substance listed Schedule I. This application is exclusively for the importation of marihuana seed which will be rendered non-viable and used as bird seed.

Any manufacturer holding, or applying for, registration as a bulk manufacturer of this basic class of controlled substance may file written comments on or objections to the application described above and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47.

Any such comments, objections, or requests for a hearing may be addressed to the Director, Office of Diversion Control, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative (CCR), and must be filed no later than 30 days from publication.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1311.42(b), (c), (d), (e), and (f). As noted in a previous notice at 40 FR 43745–46 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Director of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1311.42(a), (b), (c), (d), (e), and (f) are satisfied.

Dated: April 15, 1993.

Gene R. Haislip,

Director, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 93–9948 Filed 4–27–93; 8:45 am]

BILLING CODE 4410–09–M

MARTIN LUTHER KING, JR., FEDERAL HOLIDAY COMMISSION

Meeting

AGENCY: Martin Luther King, Jr., Federal Holiday Commission.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Act, Public Law 92–463, as amended, the Martin Luther King, Jr. Federal Holiday Commission announces a forthcoming meeting of the Commission.

DATES: May 3, 1993.

TIME: 10:30 a.m.–12 noon.

LOCATION: U.S. House of Representatives, Cannon House Office Building, room 311, Washington, DC. The public is invited.

FOR FURTHER INFORMATION CONTACT: Al Boutin, Director of Operations, telephone 404–730–3155 (Atlanta, GA).

Dated: April 21, 1993.

Al Boutin,

Director of Operations.

[FR Doc. 93–9894 Filed 4–27–93; 8:45 am]

BILLING CODE 4210–01–M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 93–032]

Advisory Committee on the Redesign of the Space Station; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the Advisory Committee on the Redesign of the Space Station (hereinafter referred to as the "Advisory Committee").

DATES: May 3, 1993, 12:30 p.m. to 6 p.m.

ADDRESSES: Crystal Gateway Marriot, Arlington Ballroom Number 3, 1700 Jefferson Davis Highway, Arlington, VA 22203.

FOR FURTHER INFORMATION CONTACT: Mr. John McCarthy, Code R, National Aeronautics and Space Administration, Washington, DC 20546, 202/358–4599.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public on May 3 up to the seating capacity of the room, which is approximately 430 persons including Advisory Committee members and other participants. The agenda for the meeting is as follows:

—Requirements Assessment Process Update
—Option Development Status and Plans
—Preliminary Schedule and Cost Assessment
—Briefings as Appropriate

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants, and in order for the Committee to complete its report by June.

Dated: April 26, 1993.

Danalee Green,

Chief, Management Controls Office, National Aeronautics and Space Administration.

BILLING CODE 7510–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS) and Advisory Committee on Nuclear Waste (ACNW); Notice of Proposed Meetings

In order to provide advance information regarding proposed public meetings of the ACRS Subcommittees and meetings of the ACRS full Committee, of the ACNW, and the ACNW Working Groups the following preliminary schedule is published to reflect the current situation, taking into account additional meetings that have been scheduled and meetings that have been postponed or cancelled since the last list of proposed meetings was published March 25, 1993 (58 FR 16214). Those meetings that are firmly scheduled have had, or will have, an individual notice published in the **Federal Register** approximately 15 days (or more) prior to the meeting. It is expected that sessions of ACRS and ACNW full Committee meetings designated by an asterisk (*) will be closed in whole or in part to the public. The ACRS and ACNW full Committee meetings begin at 8:30 a.m. and ACRS Subcommittee and ACNW Working Group meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during ACRS and ACNW full Committee meetings, and when ACRS Subcommittee and ACNW Working Group meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the May 1993 ACRS and ACNW full Committee meetings can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committees (telephone: 301/492–4600 (recording) or 301/492–7288, Attn: Barbara Jo White) between 7:30 a.m. and 4:15 p.m., (EDT).

ACRS Subcommittee Meetings

Probabilistic Risk Assessment, May 11, 1993, Bethesda, MD. The Subcommittee will discuss the report of the PRA Working Group that summarizes activities of this Group and provides guidance for the staff regarding the application of PRA.

VOL 58 ISS 80 AP 28 1993 UMI

Joint Thermal Hydraulic Phenomena/ Core Performance, May 12, 1993, Bethesda, MD. The Subcommittees will continue their review of the issues pertaining to BWR core power stability. Also, they will discuss the status of issues associated with BWR vessel water level instrumentation.

Planning and Procedures, May 12, 1993, Bethesda, MD (3 p.m.–5:30 p.m.). The Subcommittee will discuss proposed ACRS activities and related matters. Qualifications of candidates nominated for appointment to the ACRS will also be discussed. Portions of this meeting will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

Planning and Procedures, June 9, 1993, Bethesda, MD (3 p.m.–5:30 p.m.). The Subcommittee will discuss proposed ACRS activities and related matters. Qualifications of candidates nominated for appointment to the ACRS will also be discussed. Portions of this meeting will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

Advanced Boiling Water Reactors, June 17, 1993, San Jose, CA. The Subcommittee will review matters related to the General Electric Nuclear Energy Standard Safety Analysis Report related to the ABWR design.

Regulatory Policies and Practices, July 7, 1993, Bethesda, MD (1 p.m.–5 p.m.). The Subcommittee will discuss the report of the NRC Regulatory Review Group.

Planning and Procedures, July 7, 1993, Bethesda, MD (3 p.m.–5:30 p.m.). The Subcommittee will discuss proposed ACRS activities and related matters. Qualifications of candidates nominated for appointment to the ACRS will also be discussed. Portions of this meeting will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

Thermal Hydraulic Phenomena, July 22–23, 1993, Bethesda, MD. The Subcommittee will begin its review of both the Westinghouse analytical and separate effects programs being conducted in support of the AP600 design certification effort.

Advanced Boiling Water Reactors, October 26–27, 1993, Bethesda, MD. The Subcommittee will continue its review of the GE ABWR Standard Safety Analysis Report and the associated NRC staff's Final Safety Evaluation Report.

Advanced Boiling Water Reactors, November 16–17, 1993, Bethesda, MD. The Subcommittee will continue its review of the GE ABWR Standard Safety Analysis Report and the associated NRC staff's Final Safety Evaluation Report.

ACRS Full Committee Meetings

397th ACRS Meeting, May 13–15, 1993, Bethesda, MD. During this meeting, the Committee plans to consider the following:

A. *Proposed Resolution of Generic Issue 105, "Interfacing Systems LOCA in LWRs"*—Review and comment on the NRC staff's proposed resolution of Generic Issue 105. Representatives of the NRC staff and the industry will participate, as appropriate.

B. *PRA Working Groups Activities*—Review and comment on a draft report on the proposed application of PRA prepared by the PRA Working Group. Representatives of the NRC staff and the industry will participate, as appropriate.

C. *Proposed NRC Staff Plan for Comparing Safety Goals with Regulations*—Review and comment on a proposed NRC Staff Plan for using the Safety Goal Policy to judge the effectiveness of the NRC regulations. Representatives of the NRC staff and the industry will participate, as appropriate.

D. *Boiling Water Reactor Core Power Stability*—Review and comment on the NRC staff's review of the approaches proposed by the BWR Owners Group for resolving the issue of BWR core power stability. Representatives of the NRC staff and the industry will participate, as appropriate.

E. *SECY–93–067, Final Policy Statement on Technical Specifications Improvements*—Review and comment on the staff's proposed final policy statement on technical specifications improvements. Representatives of the NRC staff and the industry will participate, as appropriate.

F. *Advanced Reactor Schedules*—Hear a briefing by and hold discussions with representatives of the NRC staff on the schedules for the NRC review of advanced reactor designs.

G. *Form and Content of Combined Operating License*—Hear a briefing by and hold discussions with representatives of the NRC staff regarding requirements for preparation and submittal of documents with regard to a Combined Operating License. Representatives of the industry will participate, as appropriate.

H. *Need for Amending the Backfit Rule (Tentative)*—Discuss the need for the NRC to amend the Backfit Rule. Representatives of the NRC staff and the industry will participate, as appropriate.

I. *Meeting the NRC Commissioners*—Meet with the NRC Commissioners to discuss items of mutual interest.

J. *Meeting with the Director of the Office of Nuclear Reactor Regulation*—Meet with the Director of the Office of Nuclear Reactor Regulation to discuss items of mutual interest.

K. *Future ACRS Activities*—Discuss topics proposed for consideration by the full Committee.

L. *Resolution of ACRS Recommendations*—Discuss responses from the NRC Executive Director for Operations to recent ACRS comments and recommendations.

M. *ACRS Subcommittee Activities*—Hear reports and hold discussions regarding the status of ACRS subcommittee activities, including status of issues associated with the BWR vessel water level instrumentation and use of advanced computer graphics in nuclear power plant design process.

*N. *Appointment of ACRS Members*—Discuss qualifications of candidates proposed for appointment as ACRS members. Portions of this session will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

O. *Miscellaneous*—Discuss miscellaneous matters related to the conduct of Committee activities and complete discussion of topics that were not completed during previous meetings as time and availability of information permit.

398th ACRS Meeting, June 10–12, 1993, Bethesda, MD. Agenda to be announced.

399th ACRS Meeting, July 8–10, 1993, Bethesda, MD. Agenda to be announced.

400th ACRS Meeting, August 5–7, 1993, Bethesda, MD. Agenda to be announced.

401st ACRS Meeting, September 9–11, 1993, Bethesda, MD. Agenda to be announced.

402nd ACRS Meeting, October 7–9, 1993, Bethesda, MD. Agenda to be announced.

403rd ACRS Meeting, November 4–6, 1993, Bethesda, MD. Agenda to be announced.

404th ACRS Meeting, December 9–11, 1993, Bethesda, MD. Agenda to be announced.

ACNW Full Committee and Working Group Meetings

53rd ACNW Meeting, May 19–20, 1993, Bethesda, MD. During this meeting, the Committee plans to consider the following:

A. *Revised Draft HLW Research Program Plan*—Review and comment on the revised Draft HLW Research Program Plan, NUREG–1406, and associated technical assistance. Representatives of the NRC staff will participate.

*Closed

B. *Standard Review Plan for the Review of Remedial Action of Inactive Mill Tailings Sites*—Review and comment on Revision 1 of the Standard Review Plan for use in reviewing the Remedial Action of Inactive Mill Tailings Sites Under Title I of the Uranium Mill Tailings Radiation Control Act. Representatives of the NRC staff will participate.

C. *DOE Site Characterization Progress Reports*—Hear briefings by and hold discussions with representatives of the NRC staff on NRC's responses and follow-up to the DOE Site Characterization Progress Reports for the Proposed Yucca Mountain repository. Also, discuss the revised procedures for evaluating the DOE study plans. Representatives of DOE will participate, as appropriate.

D. *Systematic Regulatory Analysis*—Hear briefings by and hold discussions with representatives of the NRC staff and the Center for Nuclear Waste Regulatory Analyses (CNWRA) on the current status of the Systematic Regulatory Analysis, conducted by CNWRA, and products resulting from this initiative, including technical assistance efforts and the development of the License Application Review Plan.

E. *Standard Review Plan*—Hear a briefing by and hold discussions with representatives of the NRC regarding a proposed NRC staff Standard Review Plan for use in reviewing the DOE Study Plans.

F. *Committee Activities*—Discuss anticipated and proposed Committee activities, future meeting agenda, and organizational matters, as appropriate.

G. *Miscellaneous*—Discuss miscellaneous matters related to the conduct of Committee activities and complete discussion of topics that were not completed during previous meetings as time and availability of information permit.

54th ACNW Meeting July 21–22, 1993, Bethesda, MD. Agenda to be announced.

55th ACNW Meeting August 25–26, 1993, Bethesda, MD. Agenda to be announced.

56th ACNW Meeting September 22–23, 1993, Bethesda, MD. Agenda to be announced.

57th ACNW Meeting October 27–28, 1993, Bethesda, MD. Agenda to be announced.

58th ACNW Meeting November 22–23, 1993, Bethesda, MD. Agenda to be announced.

59th ACNW Meeting December 15–16, 1993, Bethesda, MD. Agenda to be announced.

Dated: April 22, 1993.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

UNITED STATES NUCLEAR REGULATORY COMMISSION

Biweekly Notice

Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law 97-415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Public Law 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from April 5, 1993, through April 16, 1993. The last biweekly notice was published on April 14, 1993.

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for a hearing and petitions for leave to intervene is discussed below.

By May 28, 1993, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room for the particular

VOL 58 ISS 80 AP 28 1993 UMI

facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington DC 20555, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 248-5100 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to **(Project Director)**: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for a hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room for the particular facility involved.

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendments request: April 1, 1993

Description of amendments request: The proposed amendments would revise Technical Specification (TS) 3/4.1.2 "Boration Systems." The proposed changes will separate the requirements for mitigating small break loss-of-coolant accidents (SBLOCA) from the requirements for providing emergency boration. The requested changes are administrative in nature in that they do not add, revise, or delete any of the existing TS requirements. The changes provide needed clarification to ensure that the appropriate boration lineups are operable during the applicable mode of operation. The TS Bases Section, 3/4.1 "Reactivity Control Systems," will also be revised to support the proposed amendments.

The specific changes and clarification proposed to separate the requirements for mitigating a SBLOCA from the requirements for providing emergency boration are:

TS 3.1.2.6 Boric Acid Pumps - Operating, Limiting Condition for Operation (LCO), will be changed to include a reference to TS 3.1.2.8 Charging Pump Emergency Core Cooling (ECCS) Subsystems:

TS 3.1.2.8 Charging Pump ECCS Subsystems will be changed to only contain the requirements which need to be met to mitigate a SBLOCA. This LCO will continue to be applicable to Mode 1 when greater than 80% of rated thermal power. The previous requirements for providing emergency boration capability are moved to TS 3.1.2.9 Borated Water Sources - Operating.

The footnote on TS 3.1.2.9, Borated Water Sources - Operating, which makes the LCO applicable to Mode 1 when greater than or equal to 80% of rated thermal power is removed. The LCO, as changed, will be applicable in Modes 1 through 4 to assure the requirements needed for emergency boration are available.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The Boration System provides borated water to the Reactor Coolant System to ensure that negative reactivity control is available during each Mode of Operation and during transient conditions. The current Technical Specifications combine the requirements for providing emergency boration and for mitigating a small break loss-of-coolant (SBLOCA). The proposed change will separate the requirements for emergency boration from those for a SBLOCA. The change does not add, revise, or delete any of the existing requirements, nor does it affect the safety function of the Boration System.

Separating the Boration System Technical Specifications to distinguish between the requirements for emergency boration purposes and the requirements to mitigate a SBLOCA will have no effect on the probability of an accident previously evaluated. These changes are administrative in nature and only clarify the existing requirements.

The proposed changes to the Boration System Technical Specifications will have no effect on the consequences of an accident previously evaluated. They will clarify the alignment of systems currently required to be operable. Therefore, this change will not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Would not create the possibility of a new or different type of accident from any accident previously evaluated.

The proposed changes to the Boration System Technical Specifications are administrative in nature and, therefore, do not represent a significant change in the configuration or operation of the plant. Specifically, no new hardware is being added to the plant as part of the proposed change, no existing equipment is being modified, nor are any different types of operations being introduced. The proposed change will only clarify existing Technical Specifications. Therefore, this change would not create the possibility of a new or different type of accident from any accident previously evaluated.

3. Would not involve a significant reduction in the margin of safety.

The proposed changes to the Boration System Technical Specifications are administrative in nature and, as such, will maintain the existing margin of safety. Clarifying these Technical Specifications will distinguish between what borated water sources and flowpaths are required for emergency boration purposes and which ones are required to mitigate a SBLOCA. Therefore, the proposed change would not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involves no significant hazards consideration.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland 20678.

Attorney for licensee: Jay E. Silbert, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Robert A. Capra

Commonwealth Edison Company, Docket Nos. 50-295 and 50-304, Zion Nuclear Power Station, Units 1 and 2, Lake County, Illinois

Date of application for amendment: March 11, 1993

Description of amendments request: The proposed amendments would revise the Technical Specifications by relocating the procedural details of the radiological effluent/radiological environmental monitoring program and solid waste program to the Offsite Dose Calculation Manual (ODCM) and the Process Control Program (PCP).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed changes only alter the format and location of procedural details and administrative controls of the radioactive effluents, radiological environmental monitoring and solid radioactive waste programs. The changes are administrative in nature and do not involve any change to the configuration or operation of plant equipment. The Radiological Effluent Technical Specifications (RETS) procedural details are being moved to the Offsite Dose Calculation Manual (ODCM), and the Process Control Program (PCP). However, the contents of the RETS are not being changed. The purpose of the RETS is to assure that the proper controls for the radiological effluent system are in place. The programs containing the procedural details of RETS will continue to perform the same functions. Any future changes to the programs containing the RETS procedural details would require an onsite review and approval. Therefore, the RETS will continue to receive a high level of consideration even though they will no longer be part of the Technical Specifications. All the current provisions of the RETS are being retained, so none of the assumptions used in the accident analysis will be affected. Based on this evaluation, it has been determined that the changes do not affect the probability or consequences of a previously evaluated accident.

2. The procedural requirements of the RETS will be maintained in the ODCM and the PCP. Operation of the plant will not be altered by the changes proposed to the administration of the RETS. This change will not place the plant in any new condition or introduce any mode of operation not previously analyzed. Therefore, this change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed changes relocate the procedural details and bases of RETS from the Technical Specifications to the ODCM or PCP. The RETS procedural details and bases will be maintained by these programs. Changes to these programs will require an onsite review. In addition, new administrative controls have been added to the Technical Specifications which assure the proper control and maintenance of these documents and provide an equivalent level of assurance that activities involving radioactive effluents, solid radioactive waste, and radiological environmental monitoring are conducted in full compliance with regulatory requirements. Therefore, there is no reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Waukegan Public Library, 128 N. County Street, Waukegan, Illinois 60085

Attorney for licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60690

NRC Project Director: James E. Dyer

Detroit Edison Company, Docket No. 50-341, Fermi-2, Monroe County, Michigan

Date of amendment request: January 29, 1992

Description of amendment request: The proposed amendment would modify the Fermi 2 Technical Specifications for surveillance testing of activated charcoal samples from the Control Room Emergency Filtration System (CREFS) and the Standby Gas Treatment System (SGTS). Specifically, laboratory analysis of a representative charcoal sample from the CREFS and SGTS are required at least every 18 months, after 720 hours of operation, following structural maintenance on filter or charcoal adsorber housings, and following painting, fire or chemical release in any ventilation zone communicating with the CREFS or SGTS. The licensee proposes to update the standards used to evaluate the

VOL 58 ISS 80 AP 28 1993 UMI

surveillances in accordance with previous commitments to the NRC.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated.

By providing an improved procedure for charcoal analysis the proposal provides greater assurance that the installed charcoal can perform its design function and, thus, the consequences of evaluated accidents are valid. The method of laboratory analysis has no effect upon how the plant is operated, including the method of sample removal. Therefore, the probability of any evaluated accident is unchanged.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated.

As described in 1) above, the proposal has no effect on the manner of plant operation. The proposal does not involve any change to the plant design. Therefore, the change creates no new accident modes.

(3) Involve a significant reduction in a margin of safety.

By providing an improved procedure for charcoal analysis the proposal acts to maintain existing safety margins.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161

Attorney for licensee: John Flynn, Esq., Detroit Edison Company, 2000 Second Avenue, Detroit, Michigan 48226

NRC Project Director: L. B. Marsh

Duquesne Light Company, et al., Docket Nos. 50-334 and 50-412, Beaver Valley Power Station, Unit Nos. 1 and 2, Shippingport, Pennsylvania

Date of amendment request: February 19, 1993

Description of amendment request: The proposed amendment would modify Specifications 3.4.9.1, 3.4.9.2 and 4.4.9.2. The changes would specify a 72-hour time limit for an engineering evaluation if an out-of-limit condition is reached, compared to no time limit currently existing. The changes also reformat the action statement into a list of actions. Pressurizer differential spray temperature would be monitored every 30 minutes instead of every 12 hours. In addition, for Unit 2 only, the pressurizer spray water differential temperature limit would be reduced to 320°F (from 625°F), and an auxiliary spray water differential temperature limit of 380°F would be specified.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the change involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed amendment modifies Specifications 3.4.9.1 and 3.4.9.2 by incorporating the STS [Standard Technical Specifications] action requirements in addition to clarification of the limiting condition for operation and surveillance requirements. This change was first initiated to revise the BV-2 pressurizer spray differential temperature limit by replacing the 625°F limit with the 320°F limit. The pressurizer spray differential temperature limit was identified as a concern during investigation into the BV-2 pressurizer surge line thermal stratification issue and the leak-before-break analysis associated with the large bore snubber removal. Additional changes were also included following review of the STS for clarification of the action statements for Specifications 3.4.9.1 and 3.4.9.2.

The current BV-2 auxiliary spray differential temperature limit was incorporated in Specification 3.4.9.2 to provide the maximum value consistent with the pressurizer equipment specification. The fatigue analysis for the pressurizer surge line provides for a limited number of cycles above 320°F, however, the design analysis has been verified to account for auxiliary spray operation with a differential temperature limit of 380°F. Therefore, to ensure the equipment meets the acceptance criteria for the design life of the plant, the normal spray differential temperature limit has been reduced to 320°F and an auxiliary spray differential temperature limit of 380°F has been added. The BV-2 piping adjacent to the pressurizer spray nozzle is equipped with a thermal sleeve which allows the higher limit. BV-1 doesn't have this design, therefore, the 380°F differential temperature doesn't apply for BV-1. The proposed change establishes a more conservative limit and does not affect the [Updated Final Safety Analysis Report] UFSAR, therefore, this change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The action statements for these specifications have been revised to incorporate the STS requirements in intent, but the format has been changed to separate each of the individual actions and to incorporate a 72 hour action time to perform the engineering evaluation. The current action statements are consistent with the original STS.

Later revisions to the STS modified the wording to more clearly define the type of review required (engineering evaluation) and to ensure the correct subject is evaluated (structural integrity). Reformatting the action statements was done to more clearly present the action requirements and to provide a time period in which to perform the engineering evaluation since none is specified in the STS. The 72 hours is based on typical technical specification action times for performing certain actions prior to beginning a plant shutdown. These are administrative changes that are reasonable, safe and do not affect the UFSAR, therefore, these changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The format of Surveillance Requirement 4.4.9.2.2 has been revised for both units into separate surveillance 4.4.9.2.1 and 4.4.9.2.2 to provide the surveillance in a clear format and add surveillance 4.4.9.2.3 for auxiliary spray water differential temperature. Normal pressurizer spray is supplied from the RCS and is not expected to exceed the maximum spray water differential temperature limit during power operation, but during heatup and cooldown operations the differential temperature may approach the limit at low RCS temperatures. Therefore, Surveillance Requirement 4.4.9.2.2 is applied to normal spray and requires verifying the differential temperature is within the limit at least once per 30 minutes during heatup and cooldown operations. This frequency is consistent with 4.4.9.2.1 for verification of the pressurizer temperature also required during heatup and cooldown operations. Surveillance Requirement 4.4.9.2.3 is applied to auxiliary spray operation with verification of the differential temperature at least once per 30 minutes when auxiliary spray is used. Since auxiliary spray may be used at times other than during heatup and cooldown operations, it has been separated from normal spray. These changes reflect the analysis assumptions and are consistent with the operation of the pressurizer sprays, therefore, these changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the change create the possibility of a new or different kind of accident from any accident previously evaluated?

The requirements of BV-2 Specification 3.4.9.2 will continue to govern the operability of the pressurizer and incorporates more conservative spray water differential temperature limits that are consistent with the analysis. The proposed change does not introduce any new mode of plant operation or require any physical modification to the plant, therefore, this change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

The revised action statement for Specifications 3.4.9.1 and 3.4.9.2 is consistent with the intent of the STS and will ensure an engineering evaluation is performed when required to ensure the structural integrity of the RCS and the pressurizer is acceptable for continued plant operation. Changing the format separates the individual action requirements into individual actions. Adding the 72 hour action time to perform the engineering evaluation is consistent with other action requirements which provide a typical action time to perform an action function prior to plant shutdown. These changes do not reduce the limiting condition for operation or action requirements, therefore, these changes will not create the possibility of a new or different kind of accident from any accident previously evaluated in the UFSAR.

Surveillance Requirement 4.4.9.2 for both units has been separated into individual surveillances 4.4.9.2.1 and 4.4.9.2.2. Surveillance Requirement 4.4.9.2.1 requires verification of the pressurizer temperatures at least once per 30 minutes during system heatup and cooldown operations. This is consistent with the current surveillance requirement. Surveillance Requirement 4.4.9.2.2 requires verification of the normal spray water temperature differential at least once per 30 minutes during system heatup and cooldown operations. This includes changing the surveillance requirement to apply to normal spray, replaces the 12 hour frequency with 30 minutes, and changes the application of this surveillance requirement to system heatup or cooldown operations. Surveillance Requirement 4.4.9.2.3 has been added for verification of the auxiliary spray water temperature differential at least once per 30 minutes during auxiliary spray operation. These changes specify frequency and application requirements similar to Specification 4.4.9.2.1 where a parameter is verified under the conditions when that parameter may approach the limit. These changes provide for reasonable verification of the required parameters at a consistent frequency and are applied when required to verify system operability, therefore, these changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the change involve a significant reduction in a margin of safety?

The BV-2 625°F auxiliary spray differential temperature limit was incorporated in Specification 3.4.9.2 to provide the maximum value consistent with the pressurizer equipment specification, however, this only provided for a limited number of cycles. By incorporating a conservative reduction in the limit to 320°F for normal spray and 380°F for auxiliary spray the analysis assumptions are satisfied and the equipment meets the acceptance criteria for the design life of the plant. Therefore, overall plant safety is enhanced and the margin of safety is not reduced.

Changing the action statements to specify an engineering evaluation in lieu of an analysis is acceptable since the engineering evaluation can be performed in a reasonable period of time to ensure those parameters that may be affected are consistent with the analysis assumptions. The engineering evaluation provides adequate assurance that the structural integrity of the RCS and pressurizer are acceptable for continued operation and is consistent with the STS, therefore, these changes will not reduce the margin of safety.

Normal pressurizer spray during heatup and cooldown operations and auxiliary spray operation when using auxiliary spray are the limiting conditions for the use of these systems, therefore, the changes to Surveillance Requirement 4.4.9.2 emphasize verification of the differential temperature when these conditions apply. Reducing the frequency to once per 30 minutes provides additional assurance that the differential temperature is adequately monitored and maintained within the specified limits. These changes ensure the required parameters are verified during the applicable conditions and on a consistent frequency, therefore, these changes will not reduce the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Attorney for licensee: Gerald Charnoff, Esquire, Jay E. Silberg, Esquire, Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: Walter R. Butler

Florida Power and Light Company, et al., Docket No. 50-335 St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of amendment request: March 19, 1993

Description of amendment request: The proposed amendment allows a reduction in Reactor Coolant System (RDS) design flowrate from the current value of 370,000 gpm to 355,000 gpm in Technical Specifications (TS) Figure 2.1-1, and Tables 2.2-1 and 3.2-1.

The purpose of the proposed change is to accommodate future steam generator tube plugging (SGTP) up to 25% (average). Though not expected, it is possible that SGTP performed during the upcoming refueling outages may eliminate any remaining margin between the actual number of plugged tubes and that used in existing safety analyses assumptions.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Pursuant to 10 CFR 50.92, a determination may be made that a proposed license amendment involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. Each standard is discussed as follows:

(1) Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed amendment would permit full power operation of St. Lucie Unit 1 with a decreased value of design reactor coolant flow. It is postulated that this steady state RCS flow decrease would occur as a result of an increased level of steam generator tube plugging. No increase in the probability of any accident previously analyzed is likely to occur because no changes are being made to the plant's required mode of operation or to any active plant component. By their nature, steam generator tube plugs are passive components and this amendment does not change the nature or type of plugs which may be used.

Florida Power and Light Company (FPL) has submitted the results of a safety evaluation which concludes that potential radiological consequences of previously analyzed accidents remain within their established acceptance criteria when including the values of increased steam generator tube plugging or reduced RCS flow consistent with this proposed amendment. This conclusion is supported by reanalysis of relevant limiting events in several accident categories, as appropriate.

Therefore, operation of the facility in accordance with this amendment would not involve a signficant increase in the probability or consequences of any accident previously evaluated.

(2) Operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated.

This amendment does not result in a change to any active plant component or in the mode of operation of the plant. The design function of the Reactor Coolant System, Steam Generators, Emergency Core Cooling System and other systems will not change. The designed excess capacity of the steam generators can accommodate the potential reduction in primary to secondary heat transfer area caused by increased tube plugging without significantly impacting the plant's dynamic behavior. The presence of plugged steam generator tubes is not changed by this proposed amendment. Therefore, operation of the facility in accordance with the proposed amendment will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) Operation of the facility in accordance with the proposed amendment would not involve a significant reduction in a margin of safety.

The impact of the proposed change on available margin to the acceptance criteria for Specified Acceptable Fuel Design Limits (SAFDL), primary and secondary overpressurization transients, 10 CFR 50.46(b) criteria, peak containment pressure, potential radioactive dose releases and to existing Limiting Conditions for Operation has been examined as part of the safety

VOL 58 ISS 80 AP 28 1993 UMI

evaluation submitted by FPL in support of this amendment. After considering the proposed steam generator tube plugging level and resultant RCS flow, a comparison of limiting events to the acceptance criteria listed above shows that a conservative safety margin to the acceptable limits remains available. For this reason, FPL has concluded that there is no significant reduction in a margin of safety as a result of this proposed license amendment.

Based on the discussions presented above and on the supporting technical justifications, FPL has concluded that this proposed license amendment involves no significant hazards consideration.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 34954-9003

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holtzinger, 1615 L Street, NW., Washington, DC 20036

NRC Project Director: Herbert N. Berkow

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50-424 and 50-425, Vogtle Electric Generating Plant, Units 1 and 2, Burke County, Georgia

Date of amendment request: April 8, 1993

Description of amendment request: The proposed amendments would revise the Technical Specifications (TSs) to change the value of the peak containment pressure (P_a) calculated for design basis accidents. The value would be changed from 45 psig to 37 psig in TSs 4.6.1.1.c, 3.6.1.2.a, 3.6.1.2.b, 4.6.1.2.a, 4.6.1.2.d, 3.6.1.3.b, 4.6.1.3.a, and 4.6.1.3.b.

Basis for proposed no significant hazards consideration determination: On March 22, 1993, the NRC issued Amendments 60 (Unit 1) and 39 (Unit 2) which modified the Vogtle Licenses and TSs by increasing maximum core power level from 3411 megawatts thermal to 3565 megawatts thermal. To support these previous amendments, the licensee provided revised analyses of design basis loss-of-coolant accidents (LOCAs) and main steam line break (MSLB) accidents. The revised analyses benefited from several changes, including a more accurate accounting of heat sinks inside containment, an improved mass and energy evaluation model (WCAP-10325-P-A), credit for the full number of containment coolers required to be available by TSs (4 of 8), and an initial containment pressure of 3.0 psig required by TSs rather than 0.3 psig. The results showed that the highest P_a would occur for a LOCA rather than a MSLB and reach a maximum value of 36.5 psig. The NRC staff found the revised analyses acceptable in the Safety Evaluation accompanying Amendments 60 and 39.

The calculated peak containment pressure is used for leak testing the containment, containment isolation valves, and containment penetrations, including the containment airlock, in accordance with 10 CFR 50 Appendix J. The proposed amendments would recognize the revised, accepted value of 36.5 psig, rounded up to 37 psig, as the basis for these tests.

As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The revision of pressure for containment leak testing does not involve a significant increase in the probability or consequences of an accident previously evaluated. Utilization of the revised pressure will not cause any design or analysis acceptance criteria to be exceeded because the containment will continue to be tested at a pressure greater than or equal to the highest pressure associated with any design basis accident. The structural and functional integrity of plant systems is unaffected. Furthermore, this change does not affect the initiators for any transient. Therefore, the probability of occurrence is not affected.

The change to the pressure for containment leak testing does not affect the integrity of the fission product barriers utilized for mitigation of radiological dose consequences as a result of an accident. In addition, the offsite mass releases used as input to the dose calculations are unchanged from those previously assumed. Therefore, the offsite dose predictions remain within the acceptance criteria for each of the transients affected. Since it has been determined that the transient results are unaffected by the change in pressure for containment leak testing it is concluded that the consequences of an accident previously evaluated are not increased.

2. The change in pressure for containment leak testing does not create the possibility of a new or different kind of accident from any accident previously evaluated. The change in pressure does not affect accident initiation sequences. No new operating configuration is being imposed by the reduction in pressure that would create a new failure scenario. In addition, no new failure modes are being created for any plant equipment. Therefore, the types of accidents defined in the Final Safety Analysis Report (FSAR) continue to represent the credible spectrum of events to be analyzed which determine safe plant operation.

3. The margin of safety associated with the change in the pressure for containment leak testing has been demonstrated by the results of the accident analyses. The analyses confirm that the peak containment pressure calculated as a result of LOCA and steam line break does not challenge the containment design pressure of 52 psig. The relationship of the test pressure to the peak calculated pressure remains the same; therefore, the required margin of safety regulated for each affected safety analysis is maintained. Since the revised Technical Specification value continues to be less than the containment design pressure and greater than or equal to the peak calculated containment pressure, the change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Burke County Public Library, 412 Fourth Street, Waynesboro, Georgia 30830.

Attorney for licensee: Mr. Arthur H. Domby, Troutman Sanders, NationsBank Plaza, Suite 5200, 600 Peachtree Street, NE., Atlanta, Georgia 30308

NRC Project Director: David B. Matthews

Illinois Power Company and Soyland Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: April 16, 1992

Description of amendment request: The proposed amendment would change Clinton Power Station Technical Specification Figure 3.1.5-1, "Weight Percent Sodium Pentaborate Solution as a Function of Net Tank Volume," to show the reduction in net tank volume that results from raising the Standby Liquid Control System storage tank level instrument zero to prevent potential air entrainment in the pump suction piping due to vortexing. Additionally the Technical Specification Bases which describe this curve would be revised to reflect the changes.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

(1) As discussed previously, increasing the instrument zero elevation reduces the total available volume of sodium pentaborate solution above the revised instrument zero. However, the low-level and high-level alarm setpoints were also revised to account for the revised instrument zero such that the net volume of sodium pentaborate solution corresponding to each of these setpoints does not change. As a result, sufficient sodium pentaborate solution will continue to be available to shut down the reactor in the event of an ATWS event. In addition, revisions have been made to the figure to provide additional understanding and less confusion in the use of the figure. Since these changes do not impact the ability of the system to perform its function, this request does not result in a significant increase in the consequences of any accident previously evaluated. With respect to the probability of occurrence of any accident previously evaluated, the [standby liquid control] SLC system is designed to mitigate the consequences of transients/accidents in the event of a failure to scram. Operation of the SLC system and the impact of the proposed changes on the SLC system have no impact on the probability of occurrence of those transients/accidents.

(2) This request does not result in any change to the plant design or operation beyond the change to the instrument zero for the SLC storage tank level instrumentation. The proposed change does not involve any changes to the plant design other than that specifically described and impacts no other systems or components. In fact, the proposed changes ensure the design requirements of the system are achieved. As a result, no new failure modes are introduced, and the request will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The proposed request does not adversely impact the reliability of the SLC system as the reliability of the SLC system operation is in fact increased by preventing potential air entrainment in the pump suction piping due to vortexing. Since this request does not involve an adverse impact to system operation or reliability, and since SLC system reactivity control capability is not affected by the proposed change, this request does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

NRC Project Director: James E. Dyer

Maine Yankee Atomic Power Company, Docket No. 50-309, Maine Yankee Atomic Power Station, Lincoln County, Maine

Date of amendment request: February 17, 1993

Description of amendment request: The proposed amendment would 1) increase the minimum fuel storage requirements for the emergency diesel generators, 2) revise alternate train testing requirements for the emergency diesel generators, 3) revise the monthly emergency diesel generator load testing requirement, 4) add a requirement to perform a semi-annual demonstration of the emergency load capability test of the emergency diesel generators, 5) revise the Remedial Actions to be taken if more than one of the required electrical sources becomes unavailable when the reactor is critical, 6) remove a restriction placed on 115 kV power to the station by a previous Amendment, 7) revise or add the Basis associated with each item, 1 through 6, above, and 8) make minor editorial changes.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The staff's review is presented below:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes to Technical Specifications (TS) 3.12.A and B neither alter plant systems or components, nor directly affect system or component maintenance. The proposed changes would improve safe operation of the plant.

Increasing minimum diesel fuel storage requirements ensures compliance with American National Standards Institute (ANSI) N195-1976, which specifies that stored fuel oil be sufficient to supply the emergency diesel generators for 7 continuous days of operation.

Removing the operational restriction on the 115 kV Surowiec line reflects the increased reliability of this source due to the operability of the associated capacitor bank.

Remedial Action 2 to TS 3.12.B is revised to prevent loss of the second (alternate train) emergency diesel generator during testing, when one train becomes inoperable and the cause of the inoperabililty is not due to a common mode failure.

Remedial Action 3 to TS 3.12.B provides a reasonable time to restore the required 115 kV incoming line and an inoperable emergency diesel generator--including the emergency buses and dc distribution cabinets associated with the emergency diesel generator--should these sources become inoperable.

The change to TS 4.5.A revises the monthly surveillance requirement for the emergency diesel generators by specifying the loading range and power factor to be used during the test. (An editorial change makes it clear that during the test, operation of the fuel oil transfer pump for the running emergency diesel generator must be verified). In addition, a new, semi-annual test of the emergency diesel generators will demonstrate their ability to start and deliver power at the maximum expected emergency loading.

Technical Specification 4.5.B, Station Batteries, is revised by dividing it into three separate requirements, based on frequency of performance. The change is editorial. There is no change to technical requirements.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any previously evaluated.

The proposed amendment makes no hardware modifications or creates any unique operating conditions. Technical Specification 3.12 wouldincrease the diesel fuel oil storage requirement, remove a now unnecessary restriction on use of the 115 kV Surowiec supply line, prevent the loss of both emergency diesel generators through unnecessary testing when only one is operable, and provide a reasonable time to restore the required 115 kV incoming line and an inoperable emergency diesel generator--including the emergency buses and dc distribution cabinets associated with the emergency diesel generator.

Technical Specification 4.5.A would specify the load range and power factor to be used during the monthly emergency diesel generator surveillance test; establish a new, semi-annual emergency diesel generator surveillance test; and make two clarifying editorial changes. The change to TS 4.5.B reorganizes battery testing requirements; no technical changes are made.

3. The proposed change does not involve a significant reduction in a margin of safety.

The proposed change to TS 3.12 would make this specification consistent with current administrative controls, which are more restrictive than the present requirements of TS 3.12. The proposed monthly surveillance requirement of TS 4.5.A.1 would clearly specify the load to which the emergency diesel generators are to be tested (90 to 100% of their continuous rating), while TS 4.5.A.3 adds a semi-annual load test at the maximum expected emergency loading values. The change to TS 4.5.B is editorial only; no technical changes are made.

VOL 58 ISS 80 AP 28 1993 UMI

Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Wiscasset Public Library, High Street, P.O. Box 367, Wiscasset, Maine 04578.

Attorney for licensee: Mary Ann Lynch, Esquire, Maine Yankee Atomic Power Company, 83 Edison Drive, Augusta, Maine 04336

NRC Project Director: Walter R. Butler

Niagara Mohawk Power Corporation, Docket No. 50-410, Nine Mile Point Nuclear Station, Unit 2, Oswego County, New York

Date of amendment request: April 7, 1993

Description of amendment request: The proposed Technical Specification (TS) changes would revise TS Section 3/4.1.3.5, "Control Rod Scram Accumulators." Action a.2.a for Limiting Condition for Operation 3.1.3.5 would be revised to allow the reactor operator 20 minutes to restart at least one control rod drive pump if more than one accumulator is inoperable, the control rod associated with any inoperable accumulator is withdrawn, and reactor pressure is greater than or equal to 900 psig. If reactor pressure is less than 900 psig, the operator would be required to place the reactor mode switch in the shutdown position. The proposed changes would also delete the surveillance requirement of TS 4.1.3.5.b.2, which requires scram accumulator check valve testing at least once per 18 months. Testing of the scram accumulator check valves would continue to be demonstrated during each refueling outage in accordance with TS 4.0.5, which requires inservice testing of ASME Code Class 1, 2, and 3 components.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes to Action a.2.a of LCO [Limiting Condition for Operation] 3.1.3.5 provide additional operating flexibility where plant safety is not an immediate concern and prevent plant operation in a condition when the accumulators are required to support the scram function. Removal of the 18 month leak test specified by SR [Surveillance Requirement] 4.1.3.5.b.2 does not affect the reliability of the check valves because operability of the scram accumulator check valves is assured by TS Section 4.0.5 which requires that inservice testing of the check valves comply with ASME Code, Section XI. In addition, the proposed changes will not affect nor change any plant hardware, plant design or plant system operation from that already described in the USAR [Updated Safety Analysis Report]. Therefore, the proposed changes do not modify or add any initiating parameters that would significantly increase the probability or consequences of any accident previously analyzed.

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not create the possibility of a new or different kind of accident from any accident previously evaluated.

The safety function of the scram accumulator is to assist in control rod insertion when reactor pressure alone is insufficient. Prompt operator action is still required to prevent circumstances where more than one scram accumulator is inoperable and reactor pressure might be insufficient to scram the plant. The capability of the control rods to perform their safety function and provide proper reactivity insertion within the required time will not be affected by the proposed changes.

The proposed additions to the LCO 3.1.3.5 action statement will assure the scram capability of all control rods and reduce the probability of unnecessary forced shutdowns and the associated demands on safety systems. The additional LCO Action proposed (i.e., shutdown if reactor pressure is less than 900 psig) provides for prompt operator action to prevent reactor operation in a condition where the accumulators are required to support the scram function. Removal of SR 4.1.3.5.b.2 does not eliminate testing and maintenance of the scram accumulator check valves. Testing and operation of the scram accumulator check valves will continue to be demonstrated by the TS required IST [Inservice Testing] Program.

In addition, the proposed changes do not represent a change in the plant or the design bases as described in the NMP2 [Nine Mile Point Nuclear Station, Unit 2] USAR. The proposed changes do not modify any equipment nor do they create any potential initiating events that would create any new or different kind of accident. As such, the plant initial conditions utilized for the design basis accident analyses are still valid. The current USAR will remain accurate with respect to its discussion of the licensing basis events and its analysis of plant response and consequences. Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant reduction in a margin of safety.

At normal reactor pressure (i.e., greater than 900 psig), reactor pressure alone is sufficient to scram the control rods. The proposed TS changes allow the plant operator 20 minutes to restart at least one CRD [Control Rod Drive] pump if there is more than one inoperable scram accumulator and reactor pressure is equal to or greater than 900 psig. Control rod scram accumulators and accumulator check valves are required to support the scram function only at reactor pressures less than 600 psig. To prevent approaching the 600 psig limit, the proposed TS requires plant operators to immediately scram the reactor if there is more than one inoperable scram accumulator and there is not a CRD pump operating when reactor pressure is less than 900 psig. The proposed removal of SR 4.1.3.5.b.2 does not affect the reliability of the scram accumulator check valves because operability of these valves is assured by TS 4.0.5 which requires inservice testing per Section XI of the ASME Code.

The control rod system is designed to bring the reactor subcritical at a rate fast enough to prevent fuel thermal parameters from exceeding their respective safety limits during limiting plant events. The safety function of the scram accumulators is to assist in control rod insertion when reactor pressure alone is insufficient. The proposed changes do not affect the capability of the control rods to perform their safety function and provide proper reactivity insertion within the required time. Therefore, the fuel cladding integrity safety limit will not be affected as the MCPR [Minimum Critical Power Ratio] limit will continue to be met.

For the reasons stated above, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied.

Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Mark J. Wetterhahn, Esquire, Winston & Strawn, 1400 L Street, NW., Washington, DC 20005-3502.

NRC Project Director: Robert A. Capra

Niagara Mohawk Power Corporation, Docket No. 50-410, Nine Mile Point Nuclear Station, Unit 2, Oswego County, New York

Date of amendment request: March 22, 1993

Description of amendment request: The proposed amendment would revise Section 6.9.1.9, "Core Operating Limits Report," of the Technical Specifications (TS) to permit use of the SAFER/GESTR-LOCA methodology which has been approved by the NRC staff for accident analyses. TS Bases Section 3/4.2 would also be revised to reflect the addition of the SAFER/GESTR-LOCA

methodology as well as several editorial changes.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant increase in the probability or consequences of an accident previously evaluated.

SAFER/GESTR-LOCA uses a realistic approach to calculate peak cladding temperatures with margin substantiated by statistical considerations. The use of SAFER/GESTR-LOCA methodology was approved by the Staff in their Safety Evaluation on Amendment 13 to GESTAR II. In the Safety Evaluation, the Staff concluded that SAFER/GESTR-LOCA satisfies the requirements of 10CFR 50.46 and Appendix K. The Staff stated that SAFER/GESTR-LOCA is acceptable as a basis for and reference in license applications so long as the material contained in SAFER/GESTR-LOCA is applicable to the specific plant involved. Niagara Mohawk has confirmed the applicability of SAFER/GESTR-LOCA to NMP2 [Nine Mile Point Nuclear Station, Unit 2]. The SAFER/GESTR-LOCA methodology conservatively calculates peak cladding temperatures such that USAR [Updated Safety Analysis Report] accident analyses remain bounding for the new methodology. Therefore, operation of Nine Mile Point Unit 2, in accordance with this proposed change, will not involve a significant increase in the probability or consequences of any accident previously evaluated.

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not create the possibility of a new or different kind of accident from any accident previously evaluated.

SAFER/GESTR-LOCA uses a realistic application approach to calculate peak cladding temperatures with margin substantiated by statistical considerations. The peak cladding temperatures calculated with SAFER/GESTR-LOCA are in accordance with Appendix K and remain bounding for all operating conditions and evolutions. The use of SAFER/GESTR-LOCA methodology was approved by the Staff in their Safety Evaluation on Amendment 13 to GESTAR II. Incorporation of SAFER/GESTR-LOCA is only a change to analytical techniques and does not affect plant operating modes or any system operation. Thus, the proposed change does not adversely affect the response of any component or system to previously analyzed accidents. The response to previously evaluated accidents remains within previously assessed limits of temperature and pressure. Further, all safety-related systems and components remain within their applicable design limits. Thus, system and component performance is not adversely affected by this change, thereby assuring that the design capabilities of those systems and components are not challenged in a manner not previously assessed so as to create the possibility of a new or different kind of accident.

Therefore, operation of Nine Mile Point Unit 2, in accordance with the proposed change, will not create the possibility of a new or different kind of accident from any previously assessed.

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant reduction in a margin of safety.

SAFER/GESTR-LOCA is an improved ECCS [emergency core cooling system] evaluation methodology which uses a realistic approach to calculate peak cladding temperatures. LOCA events are analyzed with nominal values for inputs and correlations. The Staff has previously determined that SAFER/GESTR-LOCA methodology conforms to 10CFR 50.46 and Appendix K and may be used in lieu of the currently referenced SAFE/REFLOOD methodology. Therefore, the peak cladding temperatures calculated with SAFER/GESTR-LOCA are applicable. The Staff stated that SAFER/GESTR-LOCA is acceptable so long as the material contained in SAFER/GESTR-LOCA is applicable to the specific plant involved.

Niagara Mohawk has reviewed GESTAR II and confirmed the applicability of SAFER/GESTR-LOCA to NMP2. Thus, the proposed changes do not affect the basis for any Technical Specification and previously established safety limits remain valid. Therefore, the operation of Nine Mile Point Unit 2, in accordance with the proposed change, will not involve a significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Mark J. Wetterhahn, Esquire, Winston & Strawn, 1400 L Street, NW., Washington, DC 20005-3502.

NRC Project Director: Robert A. Capra

Niagara Mohawk Power Corporation, Docket No. 50-410, Nine Mile Point Nuclear Station, Unit 2, Oswego County, New York

Date of amendment request: April 7, 1993

Description of amendment request: The proposed Technical Specification (TS) changes would revise TS Section 3.1.5, "Standby Liquid Control System," to remove the requirement for the Standby Liquid Control System to be operable in Operational Condition 5 (Refueling) with any control rod withdrawn. The proposed TS changes are consistent with the requirements of NUREG-1434, "Standard Technical Specifications - General Electric Plants, BWR/6."

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The purpose of the SLC [Standby Liquid Control] System is to bring the reactor to and maintain it in a cold shutdown condition from normal power operations following failure to scram with the control rods event. Initiation of the SLC System is not a precursor to any accident. Therefore, inoperability of the SLC System cannot increase the probability of an accident previously evaluated. The SLC System was not designed to provide shutdown capability during OPERATIONAL CONDITION 5. Since the SLC System's purpose is to shut the reactor down following a failure to scram during power operation, the USAR [Updated Safety Analysis Report] takes no credit for the operability of the SLC System in OPERATIONAL CONDITION 5. Therefore, the SLC System not being operable in OPERATIONAL CONDITION 5 will not involve a significant increase in the consequences of an accident previously evaluated.

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not create the possibility of a new or different kind of accident from any accident previously evaluated.

This request does not involve a physical change in any system's configuration and no new modes of operation are introduced. The SLC System's only purpose is to mitigate the consequences of a failure to scram during power operation; it neither causes nor prevents an accident from occurring. Furthermore, in OPERATIONAL CONDITION 5 the SLC System has no analyzed function. Therefore, this change will not create the possibility of a new or different kind of accident from any previously evaluated.

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant reduction in a margin of safety.

The purpose of the SLC System is to bring the reactor to and maintain it in a cold shutdown condition from normal power operations following a failure to scram during power operations. Initiation of the SLC System is not designed to terminate an inadvertent criticality during OPERATIONAL CONDITION 5. SDM [Shutdown Margin], either demonstrated or analytically determined, in conjunction with Technical Specifications and procedural controls, will assure that an inadvertent criticality event will not occur during refueling operations. In addition, the RPS [Reactor Protection

VOL 58 ISS 80 AP 28 1993 UMI

System] and Control Rod System, which are extremely reliable, will provide protection in the unlikely event that an inadvertent criticality does occur. Therefore, this change will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Mark J. Wetterhahn, Esquire, Winston & Strawn, 1400 L Street, NW., Washington, DC 20005-3502.

NRC Project Director: Robert A. Capra

Niagara Mohawk Power Corporation, Docket No. 50-410, Nine Mile Point Nuclear Station, Unit 2, Oswego County, New York

Date of amendment request: March 30, 1993

Description of amendment request: The proposed Technical Specifications (TS) changes would revise TS 4.8.1.1.2.e.4 and 4.8.1.1.2.e.8, "AC Sources - Operating." The current TS require that a simulated loss of offsite power (LOOP) test be performed within 5 minutes of completing a 24-hour full load emergency diesel generator test run. The proposed TS changes would separate the requirements for the 24-hour run from the LOOP test.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant increase in the probability or consequences of an accident previously evaluated.

As stated in Regulatory Guide 1.108, the performance of the LOOP test of Technical Specification 4.8.1.1.2.e.4.a) and .b) immediately following the 24-hour load test demonstrates that the diesel generator can start and accept the required loads in the prescribed time when the diesel generator is at its full load operating temperature. This provides assurance that the diesel generator is capable of responding to a Loss-of-Off-Site Power as assumed in the accident analysis. Because the purpose of performing the LOOP test immediately following the 24-hour run is to demonstrate the functional capability of the diesel generator at full load temperature conditions, establishing full load temperature conditions with other than a 24-hour run provides the necessary initial conditions for the LOOP testing. Diesel generator design and function remain as previously analyzed. Diesel generator response during accident conditions are not affected by these changes. Therefore, no significant increase in the probability or consequences of an accident previously evaluated results from these changes.

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not create the possibility of a new or different kind of accident from any accident previously evaluated.

This request does not involve a physical change in any system's configuration and no new modes of operation are introduced. These changes will not reduce any required testing and will not affect diesel generator reliability. Additionally, the surveillances proposed will establish the same initial conditions as those required by the current Technical Specification. Testing of the diesel generators in accordance with these changes will assure that diesel generator responses remain as previously analyzed for all required conditions. Therefore, these changes do not create the possibility of a new or different kind of accident from any previously evaluated.

The operation of Nine Mile Point Unit 2, in accordance with the proposed amendment, will not involve a significant reduction in a margin of safety.

Allowing the diesel generators to reach full temperature conditions by other than the 24-hour load test required by Technical Specification 4.8.1.1.2.e.8.a and .b will satisfy the intent of conducting the test following the 24-hour load test. These changes will not result in any reduction in testing and will not affect diesel generator reliability. As proposed, the changes will adequately demonstrate the diesel generator's functional capability at full load temperature conditions, thus ensuring the design margin of safety in the diesel generator's ability to start and accept the required loads in the prescribed time. Therefore, these changes will not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Mark J. Wetterhahn, Esquire, Winston & Strawn, 1400 L Street, NW., Washington, DC 20005-3502.

NRC Project Director: Robert A. Capra

North Atlantic Energy Service Corporation, Docket No. 50-443, Seabrook Station, Unit No. 1, Rockingham County, New Hampshire

Date of amendment request: February 26, 1993

Description of amendment request: The proposed amendment would modify Technical Specification (TS) 3/4 7.3 applicable to the primary component cooling water system. Limiting Condition for Operation (LCO) 3/4.7.3 would be revised to require one operable pump in each primary component cooling water (PCCW) loop vice two pumps. The amendment also would delete Actions b. and c., and Surveillance Requirement 4.7.3 b.2 which would no longer be applicable with the requirement for one operable pump per loop.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's review is presented below.

A. The changes do not involve a significant increase in the probability or consequences of an accident previously evaluated (10 CFR 50.92(c)(1)) because even with the proposed LCO change, two operable PCCW loops would be required and the single failure criterion still would be met. The PCCW system is designed to perform its safety functions assuming a single failure of any component. This is accomplished with two independent redundant loops. Each of the PCCW loops contains two 100% capacity pumps. The required safety functions can be accomplished with one pump operating in one PCCW loop. The second operable loop with at least one operable pump provides the redundancy necessary to meet the single failure criterion. The proposed changes to the action statement and the surveillance requirements merely reflect the proposed change to the LCO.

B. The changes do not create the possibility of a new or different kind of accident from any accident previously evaluated (10 CFR 50.92(c)(2)) because the PCCW system would continue to meet the single failure criterion. The proposed changes do not affect the manner by which the facility is operated or involve equipment or features which affect the operational characteristics of the facility.

C. The changes do not involve a significant reduction in a margin of safety (10 CFR 50.92(c)(3)) because the proposed changes do not affect the

manner by which the facility is operated or involve equipment or features which affect the operational characteristics of the facility. Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Exeter Public Library, 47 Front Street, Exeter, New Hampshire 03833.

Attorney for licensee: Thomas Dignan, Esquire, Ropes & Grey, One International Place, Boston Massachusetts 02110-2624.

NRC Project Director: John F. Stolz

Northeast Nuclear Energy Company, et al., Docket No. 50-423, Millstone Nuclear Power Station, Unit No. 3, New London County, Connecticut

Date of amendment request: April 1, 1993

Description of amendment request: The licensee has requested that technical specifications be changed to permit prelubrication and warmup of emergency diesel generators before surveillance testing.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed changes do not involve a significant hazards consideration based on the following:

1. The relocation of the footnote to encompass all aspects of diesel surveillance requirements will not increase the probability or consequences of an accident previously evaluated.

Each diesel's primary function is to provide power to mitigate the consequences of an accident when offsite power is lost. Therefore, the probability of an accident is not affected. Prelubing is performed to decrease engine wear which will extend diesel life. Ultimately, prelubing reduces the number of maintenance intervals, thereby increasing the availability of the diesels.

2. The proposed changes do not create the possibility of a new or different kind of accident from any previously evaluated.

There are no new failure modes associated with the proposed change. Since the plant will continue to operate as designed, the proposed changes will not modify the plant response and is not considered a new accident.

3. The proposed changes do not involve a significant reduction in the margin of safety.

The proposed changes do not have any adverse impact on the margin of safety afforded the diesel generators. This change will prevent engine wear and ultimately extend the life of the diesels. The operability of the diesels is not dependent upon the prelube system and therefore, the margin of safety is not affected.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Learning Resources Center, Thames Valley State Technical College, 574 New London Turnpike, Norwich, Connecticut 06360.

NRC Project Director: John F. Stolz

Northern States Power Company, Docket No. 50-263, Monticello Nuclear Generating Plant, Wright County, Minnesota

Date of amendment request: December 31, 1992

Description of amendment request: The proposed amendment would revise Surveillance Requirement 4.13.B.1.e, "Fire Suppression Water System," by changing the American Society for Testing and Materials (ASTM) specification which is followed when performing required sampling of the diesel fire pump fuel oil supply.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

a. The proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The diesel fire pump sampling specification to be used is not a factor in any accident analysis and this change is primarily administrative in nature. Use of the proposed ASTM specifications will provide the same level of assurance of diesel fire pump fuel oil quality as the old ASTM specifications. Diesel fire pump reliability and operability will not be degraded. Therefore, this amendment does not involve an increase in the probability or consequences of any previously analyzed accident.

b. The proposed amendment will not create the possibility of a new or different kind of accident from any accident previously analyzed.

No safety-related equipment, safety function, or plant operations (other than the methodology for drawing the fuel oil sample) will be altered as a result of the proposed amendment. Therefore, the proposed amendment does not in any way create the possibility of a new or different kind of accident from any accident previously evaluated.

c. The proposed amendment will not involve a significant reduction in the margin of safety.

Use of the proposed ASTM specifications will provide the same level of assurance of diesel fire pump fuel oil quality as the old ASTM specifications. Diesel fire pump reliability and operability will not be degraded. Therefore, the proposed amendment does not involve any reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: L. B. Marsh

Pennsylvania Power and Light Company, Docket No. 50-388, Susquehanna Steam Electric Station, Unit 2, Luzerne County, Pennsylvania

Date of amendment request: April 5, 1993

Description of amendment request: The proposed amendment would revise the Susquehanna Steam Electric Station (SSES), Unit 1, Technical Specifications to change the isolation signal for suppression pool cleanup line valves HV-15766 and HV-15768 from reactor vessel low water level 3 (+13") or high drywell pressure to reactor vessel low water level 2 (-38") or high drywell pressure. The same change was approved for SSES, Unit 2, by Amendment No. 92, issued on October 29, 1992.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed change does not:

1. Involve an increase in the probability of occurrence or the consequences of an accident or malfunction of equipment important to safety as previously evaluated.

This conclusion is based on the consideration that the isolation signal change from level 3 to 2 does not degrade the operation of any equipment or system. Furthermore, the Agastat relays and level switches to be used for the level 2 isolation signals are identical in design, material, and construction to those currently used for level 3.

The modification does not alter or degrade the ability of the two cleanup line valves to isolate the cleanup line following those LOCAs inside containment that require isolation. The isolation system design will always result in its actuation at level 2. The design requirement for isolation at level 2 remains satisfied, and in compliance with NUREG-0800 (Standard Review Plan) and NUREG-0776 (Safety Evaluation Report, SSES).

During transients that result in reactor vessel water levels between 2 & 3, the modification will permit the cleanup line to be used, if necessary, to lower the suppression pool water level. Manual control the filter pump has not been changed. Operation of the cleanup line following these transients is permissible because a LOCA inside containment has not occurred.

Since the cleanup line isolation signal remains in compliance with the design requirements established by General Electric, it is concluded that the consequences of an accident have not been increased.

The probability of a malfunction of equipment important to safety has not been increased by the modification. The relay room panels, where both the level 2 & 3 relays are located, will have minor changes to the internal wiring. Seismic qualification of the equipment will be unaltered. Valve operation remains unchanged, except for the level of reactor vessel water that initiates a containment isolation signal.

The loading on the suppression pool structure, and submerged components in the pool, following safety/relief valve operation, has not been increased. Since higher water levels result in higher loads, the loading following the modification would either be less than or equal to the existing loading depending on whether the filter pump is operating.

The modification does not result in an increase in consequences assuming a malfunction of equipment important to safety. The consequences of failing to isolate containment following a LOCA inside containment or preventing the suppression pool from performing its function are not influenced by the modification.

2. Create the possibility of a new or different kind of accident from any previously evaluated.

The modification uses spare terminals on existing relays to receive an input from a level 2 switch. These relays are identical to those used to receive the level 3 input signal. The actuation logic remains single failure proof. A new possibility has not been created for those LOCAs inside containment that require isolation to occur without isolation of the cleanup line.

The modification does not create the possibility of a malfunction of the suppression pool structure and submerged components in the pool. The use of the cleanup line serves to lower the pool water level which decreases the loading during a LOCA or safety/relief valve operation.

3. Involve a reduction in the margin of safety.

The NRC provided their review of containment isolation signals in Section 6.2.4 of the Safety Evaluation Report (NUREG-0776). Reactor vessel water level 2 was found to be acceptable and therefore defines the basis for the margin of safety.

It is therefore concluded that since the proposed modification changes a containment isolation setpoint to a previously accepted value, a reduction in the margin of safety will not occur.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701

NRC Project Director: Charles L. Miller

Power Authority of The State of New York, Docket No. 50-286, Indian Point Nuclear Generating Unit No. 3, Westchester County, New York

Date of amendment request: March 12, 1993

Description of amendment request: The licensee commenced operating on a 24-month fuel cycle, instead of the previous 18-month fuel cycle, with fuel cycle 9. Fuel cycle 9 started in August 1992. In order to accommodate operation on a 24-month cycle, the licensee requested a Technical Specifications (TS) amendment to incorporate the changes listed below:

(1) The licensee proposed changing the frequency of high pressure water fire protection system testing (specified in TS Section 4.12.A.1) to accommodate operation on a 24-month cycle.

(2) The licensee proposed changing the frequency of fire pump diesel engine testing (specified in TS Section 4.12.A.2) to accommodate operation on a 24-month cycle.

(3) The licensee proposed changing the frequency of electrical tunnel, diesel generator building, and containment fan cooler fire protection spray and/or sprinkler system testing (specified in TS Section 4.12.B.1) to accommodate operation on a 24-month cycle.

(4) The licensee proposed changing the frequency of fire detection system testing (specified in TS Section 4.12.D.1) to accommodate operation on a 24month cycle.

(5) The licensee proposed changing the frequency of fire hose station testing (specified in TS Section 4.12.E.1) to accommodate operation on a 24-month cycle.

(6) The licensee proposed changing the frequency of CO_2 fire protection system testing (specified in TS Section 4.12.G.1) to accommodate operation on a 24-month cycle.

(7) The licensee proposed changing the frequency of fire barrier penetration seal inspection (specified in TS Section 4.12.C.1) to accommodate operation on a 24-month cycle.

These proposed changes follow the guidance provided in Generic Letter 91-04, "Changes in Technical Specification Surveillance Intervals to Accommodate a 24-Month Fuel Cycle," as applicable.

In addition, the licensee proposed reformatting TS Section 4.12 in its entirety and proposed several administrative changes for clarity.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Consistent with the criteria of 10 CFR 50.92, the enclosed application is judged to involve no significant hazards based on the following information:

(1) Does the proposed license amendment involve a significant increase in the probability or consequences of any accident previously evaluated?

Response:

Since the proposed change to extend the surveillance test intervals for High Pressure Water Fire Protection System, Fire Pump Diesel Engine, Electrical Tunnel, Diesel Generator Building and Fan Cooler Fire Protection Spray and/or Sprinkler System, Fire Detection System, Fire Hose Station, CO_2 Fire Protection System and Fire Barrier Penetration Seal inspection does not involve changes in equipment/system functions and does not adversely affect system operability, the proposed change does not involve a significant increase in the probability or consequences of any accident previously evaluated.

(2) Does the proposed license amendment create the possibility of a new or different kind of accident from any previously evaluated?

Response:

Since the proposed changes [to extend the surveillance test intervals for High Pressure Water Fire Protection System, Fire Pump Diesel Engine, Electrical Tunnel, Diesel Generator Building and Fan Cooler Fire Protection Spray and/or Sprinkler System, Fire Detection System, Fire Hose Station, CO_2 Fire Protection System and Fire Barrier Penetration Seal inspection] only increase the surveillance interval to be consistent with the operating cycle and do not involve changes in equipment/system functions or adversely affect system operability, the proposed changes do not create the possibility of a new or different kind of accident from any previously analyzed.

(3) Does the proposed amendment involve a significant reduction in the margin of safety?

Response:

The proposed changes [to extend the surveillance test intervals for High Pressure Water Fire Protection System, Fire Pump Diesel Engine, Electrical Tunnel, Diesel Generator Building and Fan Cooler Fire Protection Spray and/or Sprinkler System, Fire Detection System, Fire Hose Station, CO_2 Fire Protection System and Fire Barrier Penetration Seal inspection] only extend the surveillance interval. Evaluation of the past performance of the equipment indicates that the effects of extending the surveillance test intervals would not involve a significant reduction in the margin of safety. Therefore, the proposed changes do not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

Attorney for licensee: Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

NRC Project Director: Robert A. Capra

Power Authority of The State of New York, Docket No. 50-286, Indian Point Nuclear Generating Unit No. 3, Westchester County, New York

Date of amendment request: April 5, 1993

Description of amendment request: The licensee has requested an amendment to the Technical Specifications (TS) to revise Section 6.0 (Administrative Controls). Specifically, the plant staff requirement (specified in TS 6.2.2.i) would be revised to remove the condition that the operations manager must hold a senior reactor operator (SRO) license and replace it with the requirements that the assistant operations manager must hold an SRO license and that the operations manager must hold or have held an SRO license at the facility. In addition, the plant staff qualifications requirement (specified in TS 6.3.1) would be modified to reflect that the operations manager shall meet or exceed the qualification requirements of ANSI N18.1-1971 (Selection and Training of Nuclear Plant Personnel) except for the SRO license requirement.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Consistent with the criteria of 10 CFR 50.92, the enclosed application is judged to involve no significant hazards based on the following information:

(1) Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response:

The proposed changes do not involve an increase in the probability or consequences of a previously analyzed accident because Shift Supervisors and Reactor Operators will still be required to maintain a current SRO [senior reactor operator] license. This ensures that shift activities are directed by persons holding SRO licenses. The Shift Supervisors will report directly to an individual with an SRO license and qualifications of an "Operations Manager" per ANSI N18.1-1971. The Operations Manager will continue to be a knowledgeable and qualified individual.

(2) Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response:

The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated because they do not affect plant configuration or plant design. Senior Reactor Operators and Shift Supervisors are still required to maintain a knowledge of current plant configuration and operation through SRO license requalification training. This ensures that shift activities will be directed by persons holding SRO licenses. Additionally, the Shift Supervisors will report directly to an individual with an SRO license and qualifications of an "Operations Manager" per ANSI N18.1-1971 and the Operations Manager will continue to be a knowledgeable and qualified individual.

(3) Does the proposed amendment involve a significant reduction in a margin of safety?

Response:

The proposed amendment does not involve a significant reduction in a margin of safety because Shift Supervisors and Senior Reactor Operators will still be required to maintain a current SRO license. This ensures that shift activities are directed by persons holding SRO licenses. Additionally, the Shift Supervisors will report directly to an individual with an SRO license and qualifications of an "Operations Manager" per ANSI N18.1-1971 and the Operations Manager will continue to be a knowledgeable and qualified individual. These changes are expected to enhance the Operations Manager's ability to effectively carry out the primary responsibilities of that position, and to have an overall positive effect on the safe and efficient operation of Indian Point 3.

The NRC staff has reviewed the licensee's analysis and, based on this

VOL 58 ISS 80 AP 28 1993 UMI

review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

Attorney for licensee: Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

NRC Project Director: Robert A. Capra

Public Service Electric & Gas Company, Docket Nos. 50-272 and 50-311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: February 5, 1993

Description of amendment request: The proposed amendment revises Salem Nuclear Generating Station, Units 1 and 2 Technical Specifications 2.2 Limiting Safety System settings and 3/4.1.1 Reactor Trip System Instrumentation. The proposed changes eliminates the Steam/Feedwater Flow Mismatch and Low Steam Generator Water Level Reactor Trip due to the installation of the digital feedwater control system incorporating a median signal selector.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's review is presented below:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

Removing the steam flow/feed flow mismatch and low steam generator level reactor trip does not increase the probability of an accident previously evaluated because the trip does not cause an accident: therefore, the trip can not effect the probability of an accident. The consequences are not effected because no credit is taken for the trip when the accidents are evaluated. Therefore, the proposed amendment will not increase the probability or consequences of any accident.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated.

Removal of the steam flow/feed flow mismatch and low steam generator level trip does not create the possibility of a new or different kind of accident than previously evaluated because the trip cannot create an accident. Therefore, the proposed amendment cannot create the possibility of any accident.

3. Involve a significant reduction in a margin of safety.

The circuitry can only create an inadvertent trip which is bounded by a required trip or failure to trip which is acceptable because no credit is taken for the trip in accident evaluation. Therefore, the proposed amendment will not reduce the margin of safety.

Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Salem Free Public library, 112 West Broadway, Salem, New Jersey 08079

NRC Project Director: Charles L. Miller

Public Service Electric & Gas Company, Docket No. 50-354, Hope Creek Generating Station, Salem County, New Jersey

Date of amendment request: April 1, 1993

Description of amendment request: The licensee's proposed amendment would extend the surveillance test intervals and allowed out-of-service times for the emergency core cooling system (ECCS) and reactor core isolation cooling (RCIC) system actuation instrumentation. This change is based on the technical information contained in the General Electric Company (GE) Licensing Topical Report (LTR) NEDC-30936P-A, Parts 1 and 2 (December, 1988) and GE LTR GENE-770-06-2-A (December 1992).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

PSE&G has, pursuant to 10 CFR 50.92, reviewed the proposed amendment to determine whether the request involves a significant hazards consideration. We have determined that operation of the Hope Creek Generating Station in accordance with the proposed changes:

1. Will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes to the ECCS and RCIC actuation instrumentation were judged to potentially affect core damage frequency through their impact on the water injection function (WIF) failure frequency. The generic analyses contained in Licensing Topical Report (LTR) NEDC-30936P-A and LTR GENE-770-06-2-A assessed the impact of changing ECCS and RCIC surveillance test intervals (STIs) and allowed out-of-service times (AOTs) on the WIF failure frequency. The analyses contained in these LTRs demonstrate that the proposed changes have an insignificant effect on the WIF failure frequency, and when all contributing factors are considered, the net impact of the proposed changes is to improve plant safety. These generic analyses have been shown to be applicable to the HCGS as indicated in Section III [of the licensee's April 1, 1993 submittal]. Since the proposed changes do not significantly affect the WIF failure frequency and have a beneficial impact on plant safety when all factors are considered, the proposed changes will not significantly increase the probability or consequences of a previously analyzed accident.

2. Will not create the possibility of a new or different kind of accident from any accident previously evaluated.

Increasing the AOTs and STIs for the ECCS and RCIC instrumentation does not alter the function of the emergency core cooling system (ECCS) or reactor core isolation cooling system (RCIC) nor involve any type of plant modification. Additionally, no new modes of plant operation are involved with these changes. The proposed changes therefore will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Will not involve a significant reduction in a margin of safety.

The proposed changes to the ECCS and RCIC actuation instrumentation were judged to potentially affect core damage frequency through their impact on the WIF failure frequency. As requested by the BWR Owners' Group, GE performed analyses to evaluate the effect of the proposed changes on the WIF failure frequency. The NRC staff has reviewed and approved the generic study contained in LTRs NEDC-30936P-A and GENE-770-06-2-A and has concurred with the BWR Owners' Group that the proposed changes do not significantly affect the WIF failure frequency. Furthermore, the overall level of plant safety will be improved by the proposed changes as indicated in Section II [of the licensee's April 1, 1993 submittal]. A plant specific evaluation was conducted for HCGS, as indicated in Section III [of the licensee's April 1, 1993 submittal] which demonstrated applicability of the generic conclusions to HCGS. It can therefore be concluded that the proposed changes will not significantly reduce a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Pennsville Public Library, 190 S. Broadway, Pennsville, New Jersey 08070

Attorney for licensee: M. J. Wetterhahn, Esquire, Winston and Strawn, 1400 L Street, NW., Washington, DC 20005-3502

NRC Project Director: Charles L. Miller

Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Unit Nos. 2 and 3, San Diego County, California

Date of amendment requests: April 13, 1993

Description of amendment requests: The licensee proposes to revise Technical Specification (TS) 3/4.8.1, "A. C. Sources." This proposed change will provide a one-time exception to TS 4.8.1.1.1.a to allow replacement of the 480V transformers B04X and B06X during the Units 2 and 3 Cycle 7 refueling outages.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Will operation of the facility in accordance with this proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No

The purpose of maintaining redundant offsite power sources is to prevent a loss of offsite power. This proposed change allows a one-time exception to Technical Specification 4.8.1.1.1.a to allow the tie-breakers to the opposite unit cross-tie to be OPERABLE while the associated load centers B04 and B06 are INOPERABLE. This will allow replacement of the 480V transformers. While the replacement is performed, a charger will be attached to the associated battery bank and will be connected to the temporary non-class 1E power sources. The associated battery bank will be maintained OPERABLE by performance of TS 3/4.8.2.2 ACTION b. The cross-tie will remain OPERABLE and able to perform its function of providing a second source of A. C. power to the companion Unit. Therefore, there is no increase in probability or consequences of a loss of offsite power or any other accident previously evaluated.

2. Will operation of the facility in accordance with this proposed change create the possibility of a new or different type of accident from any previously evaluated?

Response: No

This proposed change allows a one-time exception to Technical Specification 4.8.1.1.1.a to allow the tie breakers to the opposite unit cross-tie to be OPERABLE while the associated load centers B04 and B06 are INOPERABLE. This will allow replacement of the 480V transformers. While the replacement is performed, a charger will be attached to the associated battery bank and will be connected to the temporary non-class 1E power sources. The associated battery bank will be maintained OPERABLE by performance of TS 3/4.8.2.2 ACTION b. The cross-tie will remain OPERABLE and able to perform its function of providing a second source of A. C. power to the companion Unit. Therefore, there is no significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.

Local Public Document Room location: Main Library, University of California, P.O. Box 19557, Irvine, California 92713

Attorney for licensee: James A. Beoletto, Esquire, Southern California Edison Company, P. O. Box 800, Rosemead, California 91770

NRC Project Director: Theodore R. Quay

TU Electric Company, Docket Nos. 50-445 and 50-446, Comanche Peak Steam Electric Station, Unit Nos. 1 and 2, Somervell County, Texas

Date of amendment request: October 19, 1992, as supplemented by letter dated March 17, 1993.

Description of amendment request: The proposed amendment would revise Technical Specification 3/4.1.2.5, 3/4.1.2.6, 3/4.5.1, and 3/4.5.4 by increasing the boron concentrations for the refueling water storage tank (RWST) and the emergency core cooling system (ECCS) accumulators. These changes enable the use of extended reload cycles.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's review is presented below:

1. The proposed change would not increase the probability or consequences of a previously evaluated accident.

The proposed changes are related to the boron concentration in the RWST and ECCS accumulators. This increased concentration does not constitute a change expected to increase the probability of a previously evaluated accident. The means by which the proposed changes might result in increased radiological consequences of various accidents are discussed below.

The higher boron concentrations may result in increased probability of equipment failure due to in-containment or in-process equipment being exposed to an environment more severe than that to which it is qualified. A review of the general chemistry properties of the slightly higher boron concentration fluid indicates no mechanism that would result in an appreciable increase in the in-line component failure rate. While the corrosive nature of the fluid will increase, this increase will be only minimal. Thus, there is no significant increase in the consequences of any accident due to an increase in the probability of equipment failure.

The changes in containment spray and sump solution pH may change the radioisotope removal and partition characteristics. A review indicates that while the relevant characteristics are affected, the resulting limiting coefficient values associated with the pH changes are bounded by the values used in Comanche Peak design calculations. Thus, no adverse impact on the radiological consequences arising from this mechanism has been identified.

The impact of the containment spray, with a lower pH, upon the combustible gas production rate was also evaluated. No mechanism for increased combustible gas production was identified.

The higher boron concentration could have an adverse impact on the inadvertent actuation of the ECCS event. Although the timing of the sequence of events may be affected, the departure from nucleate boiling ratio continues to increase from its initial value throughout the event. Based on a review of this event, no changes in the event probability or consequences are anticipated; however, the continued validity of this conclusion will be reconfirmed on a cycle-specific basis.

2. The proposed change would not create the possibility of a new or different kind of accident from any previously evaluated.

VOL 58 ISS 80 AP 28 1993 UMI

The proposed change is a passive change associated with fluid boron concentration. No new or different accident sequences have been identified. Furthermore, a review of heat tracing requirements indicates that there are no additional requirements resulting from the boron concentration increase. There are no previously unconsidered failure mechanisms.

3. The proposed change would not involve a significant reduction in the margin of safety.

The decrease in the containment spray and sump solution pH could be expected to result in higher airborne iodine concentrations. The accident source terms could be impacted by variations in the iodine spray removal and partition factors. A comparison of the coefficients for the minimum equilibrium containment sump solution pH to those used in the CPSES design analyses, indicated that the expected coefficient values would remain bounded by the values in the previous analyses. Thus, no significant reduction in the margin of safety has been identified as associated with this phenomena.

Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: George L. Edgar, Esq., Newman and Holtzinger, 1615 L Street, N.W., Suite 1000, Washington, D.C. 20036

NRC Project Director: Suzanne C. Black

Vermont Yankee Nuclear Power Corporation, Docket No. 50-271, Vermont Yankee Nuclear Power Station, Vernon, Vermont

Date of amendment request: March 26, 1993

Description of amendment request: The proposed amendment would update Technical Specification (TS) Section 6.0 to add and revise NRC-approved methodologies which will be used to generate the cycle-specific limits in the Vermont Yankee Core Operating Limits Report (COLR) for Cycle 17.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change will not involve any significant increase in the probability or consequences of an accident because the change only updates a table in the Technical Specifications to include previously approved methods and, therefore, is administrative in nature. It also does not affect plant operation and will not weaken or degrade the facility.

2. The proposed change will not create the possibility of a new or different kind of accident because the change is administrative in nature and no physical alterations of any plant configuration, changes to setpoints, or operating parameters are proposed.

3. The proposed change will not involve a significant reduction in a margin of safety because the change involves an update to Section 6.0, "Administrative Controls," of the Technical Specifications and does not affect any operating practices, limits, or safety-related equipment, and, therefore, is administrative. The NRC-approved [Yankee Atomic Electric Company] YAEC methodologies will be used to perform a [Loss of Coolant Accident] LOCA analysis for Vermont Yankee in accordance with 10 CFR [Part] 50, Appendix K and to demonstrate compliance with the [Emergency Core Cooling Systems] ECCS limits specified in 10 CFR 50.46.

The NRC staff has reviewed the licensee's analysis, and based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Brooks Memorial Library, 224 Main Street, Brattleboro, Vermont 05301

Attorney for licensee: John A. Ritsher, Esquire, Ropes and Gray, One International Place, Boston, Massachusetts 02110-2624

NRC Project Director: Walter R. Butler

Washington Public Power Supply System, Docket No. 50-397, Nuclear Project No. 2, Benton County, Washington

Date of amendment request: March 10, 1993

Description of amendment request: The proposed amendment would modify the Technical Specifications (TS) to implement replacement of the existing grab sampler and noble gas monitor for Reactor Building post-accident sampling with an on-line monitor that would sample stack effluents directly. In addition, the proposed change would include a one time exclusion from TS 3.0.4 that would allow startup from the 1993 refueling outage with the on-line monitor inoperable to allow calibration of the monitor.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The staff's evaluation of the licensee's analysis for the change to the effluent grab sample and noble gas monitoring capability is presented below:

1. Does the amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed amendment would replace the current grab sample and noble gas radiation monitor with a single system capable of continuous monitoring and analysis of all currently analyzed radioactive iodines and particulates in plant gaseous effluents following an accident. The intent of the monitoring and analysis functions is to evaluate the radioactive releases following an accident to guide mitigative and emergency response actions. The accident is assumed to have already occurred before the samples affected by this TS change request are required. As such, the monitor is not an accident initiator and is not likely to contribute to the probability of an accident previously evaluated. The in-line, continuous monitor provides at least equivalent, and in the case of the grab sample, enhanced analysis capability, and will provide a more immediate indication of the release of effluents following an accident through the reactor building elevated release. Further, it will provide a more timely indication of a release impact over a period of time. More timely input of such data will allow a more deliberate and accurate response to plant events. Mitigation actions can then be based on a better knowledge of the release. A better knowledge base from which to direct accident mitigation and emergency response efforts should lead to more effective response to accidents, which should lead to a decrease in the consequences of an accident.

The one time exception to TS 3.0.4., which would allow startup with the new effluent monitoring system inoperable, provides the means to align and calibrate the system under actual operating conditions. During this maximum of a 30 day period during which the new effluent monitoring system will be considered inoperable until the calibration is complete, the licensee will use a pre-planned alternative method of monitoring off-site releases that uses in-containment monitors and off-site dose assessment procedures. This alternate method is currently used during emergency conditions to determine mitigative and emergency response actions, since the grab sampler would be inaccessable post-accident. This alternate method is intended for use post-accident, and does not affect the probability of any accidents previously evaluated, since the accident is assumed to have already occurred before the samples are required. There will be no impact on the consequences of an accident, since the alternate method is the method currently used under emergency conditions.

Based on this analysis, the staff concludes that the changes proposed by the licensee will not significantly increase the probability or consequences of an accident previously evaluated.

2. Does the amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

The monitor performs a passive function that follows and monitors plant events after an accident is assumed to have occurred. The requested exception to TS 3.0.4. would use the existing pre-planned alternate method of determining effluents, again after an accident is assumed to have occurred. These proposed changes have no automatic control function, and thus do not affect accident initiation. The proposed amendment does not, therefore, create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the amendment involve a significant reduction in a margin of safety?

The existing grab-sample method provided time-delayed results that identified specific isotopes off-line. The current noble gas monitor only provides indication of gross gamma radiation. The new monitor provides information on actual concentrations of specific isotopes in the reactor building effluent on a real time basis, which will provide more timely information from which to base mitigative and emergency response actions on than that presently provided by the grab sample system. Therefore, the margin of safety created by the existence and use of the grab sample system is increased by the proposed replacement with the in-line system. Therefore, the in-line system does not reduce any margins of safety.

The NRC staff has determined based on its analysis that it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Previously Published Notices of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Duquesne Light Company, et al., Docket No. 50-334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of amendment request: November 2, 1992

Description of amendment request: The proposed amendment would modify the Appendix A Technical Specifications (TSs) to allow for increasing the number of spent fuel assemblies that may be stored in the spent-fuel pool. The changes would allow for the storage of fuel with U-235 enrichment up to 5.0% (weight). The proposed amendment would effect TS sections 3/4 9.14, 5.6.1, and 5.6.3, and Table 3.9-1.

Date of publication of individual notice in **Federal Register:** February 2, 1993 (58 FR 7161).

Expiration date of individual notice: March 8, 1993

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Florida Power and Light Company, Docket No. 50-335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of application for amendment: November 30, 1992

Brief description of amendment: This amendment revises Technical Specifications Tables 3.3-3, 3.3-4, and 4.3-2 where they apply to the Emergency Bus Undervoltage Protection Devices and will permit improvements to be made in the undervoltage protective relaying scheme.

Date of issuance: April 12, 1993

Effective date: April 12, 1993

Amendment No.: 121

Facility Operating License No. DPR-67: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 21, 1993 (58 FR 5431). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 12, 1993. No significant hazards consideration comments received: No.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 34954-9003

GPU Nuclear Corporation, et al., Docket No. 50-289, Three Mile Island Nuclear Station, Unit 1, Dauphin County, Pennsylvania

Date of application for amendment: May 19, 1992, as supplemented November 30, 1992, January 29, and February 12, 1993.

Brief description of amendment: The amendment deletes portions of the TMI-1 Radiological Environmental Technical Specifications (RETS) and relocates them to controlled programs in accordance with the guidance contained in NRC Generic Letter 89-01, dated January 31, 1989.

Date of issuance: April 5, 1993

Effective date: April 5, 1993

Amendment No.: 173

Facility Operating License No. DPR-50. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 23, 1992 (57 FR 61112) The January 29, and February 12, 1993 letters provided errata pages that did not change the initial no significant hazards consideration determination. The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated April 5, 1993.

No significant hazards consideration comments received: No.

VOL 58 ISS 80 AP 28 1993 UMI

Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

Illinois Power Company and Soyland Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of application for amendment: September 20, 1991 and supplemented by letters dated August 17, 1992, and February 17, 1993

Description of amendment request: The amendment revised both surveillance test intervals and allowed out-of-service times for Reactor Protection System, Emergency Core Cooling System, Control Rod Block System, and Containment and Reactor Vessel Isolation Control System Instrumentation contained in the Clinton Power Station Technical Specifications (TS). In addition, several administrative changes to the TS are contained in this TS change.

Date of issuance: April 9, 1993

Effective date: Immediately, to be implemented within 30 days.

Amendment No.: 71

Facility Operating License No. NPF-62. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 26, 1991 (56 FR 66921) The August 17, 1992, and February 17, 1993, submittals consisted of revisions/clarifications which did not change the staff's initial proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 9, 1993.

No significant hazards consideration comments received: No

Local Public Document Room location: The Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727.

Illinois Power Company and Soyland Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of application for amendment: December 15, 1992

Brief description of amendment: The amendment modifies Technical Specifications 3/4.7.1.1, "Shutdown Service Water System (Loops A, B, C)," and 3/4.7.2, "Control Room Ventilation System," to add exceptions to Technical Specification 3.0.4 to permit tensioning and detensioning of the reactor pressure vessel head with one of the required divisions of the systems addressed by these Technical Specifications inoperable.

Date of issuance: April 9, 1993

Effective date: April 9, 1993

Amendment Nos.: 72

Facility Operating License No. NPF-62. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 3, 1993 (58 FR 6999)

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 9, 1993.

No significant hazards consideration comments received: No

Local Public Document Room location: The Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727.

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy, Center, Linn County, Iowa

Date of application for amendment: December 19, 1991 and supplemented by additional information on August 25, October 8, and November 24, 1992.

Brief description of amendment: The amendment revised the Technical Specifications by incorporating extended allowable out-of-service times and surveillance test intervals for reactor protection system, isolation actuation system, emergency core cooling system and control rod block function instrumentation. Additional changes for clarity and consistency were also made.

Date of issuance: April 14, 1993

Effective date: April 14, 1993

Amendment No.: 193

Facility Operating License No. DPR-49. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 22, 1992 (57 FR32573) The August 25, October 8, and November 24, 1992 letters provided clarifying information only and did not affect the NRC's origianl determination of no significant hazards consideration.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 14, 1993.

No significant hazards consideration comments received: No.

Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S. E., Cedar Rapids, Iowa 52401.

Indiana Michigan Power Company, Docket Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of application for amendments: May 1, 1992

Brief description of amendments: The amendments change the number of containment thermistor fire detectors listed in Table 3.3-10 (Unit 1) and Table 3.3-11 (Unit 2) to reflect as-built conditions.

Date of issuance: April 8, 1993

Effective date: April 8, 1993

Amendment Nos.: 172 and 155

Facility Operating License Nos. DPR-58 and DPR-74. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 8, 1992 (57 FR 30250)

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 8, 1993.

No significant hazards consideration comments received: No.

Local Public Document Room location: Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: February 1, 1993

Brief description of amendment: The amendment revised the Technical Specifications (TS) to (1) incorporate the NRC Staff position on leak detection per the guidance of Generic Letter (GL) 88-01 and its supplement, (2) incorporate the NRC Staff position on inservice inspection schedules, methods, personnel, and sample expansion per the guidance of GL 88-01 and its supplement, and (3) make administrative changes wherein certain system names are replaced by system names which are more consistent with those used in other portions of the TS.

Date of issuance: April 14, 1993

Effective date: April 14, 1993

Amendment No.: 161

Facility Operating License No. DPR-46. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** March 3, 1993 (58 FR 12264)

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 14, 1993.

No significant hazards consideration comments received: No.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebreska 68305.

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station Unit No. 1, Oswego County, New York

Date of application for amendment: November 20, 1990, as superseded February 7, 1992, as supplemented June 22, 1992, January 29, 1993, February 18, 1993, and March 29, 1993.

Brief description of amendment: The amendment revises Technical Specifications (TSs) 3.2.7.1, 3.3.3, 4.3.3, and 3.3.4 and associated Bases to update these TSs to conform to the requirements of 10 CFR Part 50, Appendix J, and NRC Safety Evaluations, dated May 6, 1988, and November 9, 1988.

Date of issuance: April 12, 1993

Effective date: April 12, 1993

Amendment No.: 140

Facility Operating License No. DPR-63: Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** February 6, 1991 (56 FR 4866) and renoticed April 1, 1992 (57 FR 11111)

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 12, 1993.

No significant hazards consideration comments received: No.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

North Atlantic Energy Service Corporation, Docket No. 50-443, Seabrook Station, Unit No. 1, Seabrook, New Hampshire

Date of amendment request: August 17, 1992.

Description of amendment request: The amendment revises the Appendix A Technical Specifications relating to Reactor Coolant System heatup and cooldown limitations. Specifically, Figures 3.4-2 and 3.4-3 are modified to show applicability of the curves up to 11.1 equavalent full-power years (EFPY), to provide revised RT_{NDT} values at 11.1 EFPY at 1/4 and 3/4 thickness, and to indicate the copper content of the controlling material.

Date of issuance: April 7, 1993

Effective date: April 7, 1993

Amendment No.: 19

Facility Operating License No. NPF-86. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 9, 1992 (57 FR 58247).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 7, 1993.

No significant hazards consideration comments received: No.

Local Public Document Room location: Exeter Public Library, 47 Front Street, Exeter, New Hampshire 03833.

Power Authority of The State of New York, Docket No. 50-286, Indian Point Nuclear Generating Unit No. 3, Westchester County, New York

Date of application for amendment: July 17, 1992, as supplemented December 23, 1992

Brief description of amendment: The amendment revised the Technical Specifications to incorporate the following changes:

(1) The containment isolation system automatic actuation testing frequency (specified in TS Table 4.1-3) was revised to accommodate operation on a 24-month fuel cycle.

(2) The containment isolation valve testing frequency (specified in TS Section 4.4.E.1) was revised and the acceptance criteria for the combined containment leakage rate (specified in TS Section 4.4.E.2) was reduced to 0.5 L_a to accommodate operation on a 24-month fuel cycle.

(3) The containment spray system testing frequency (specified in TS Section 4.5.A.2.a) was revised to accommodate operation on a 24-month fuel cycle.

(4) The spray additive valves testing frequency (specified in TS Section 4.5.B.2.a) was revised to accommodate operation on a 24-month fuel cycle.

(5) The sensitive leakage rate testing frequency (specified in TS Section 4.4.C.3) was revised to clarify that the maximum test interval is 3 years.

(6) The Basis of TS Section 4.1 (Operational Safety Review) was revised to specify that the phrase "at least," when referring to surveillance periodicity, does not negate the 25% extension time allowed by TS Definition 1.12.

These changes followed the guidance provided in Generic Letter 91-04, "Changes in Technical Specification Surveillance Intervals to Accommodate a 24-Month Fuel Cycle."

Date of issuance: April 9, 1993

Effective date: April 9, 1993

Amendment No.: 129

Facility Operating License No. DPR-64: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 2, 1992 (57 FR 40219)

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 9, 1993.

No significant hazards consideration comments received: No

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Rochester Gas and Electric Corporation, Docket No. 50-244, R. E. Ginna Nuclear Power Plant, Wayne County, New York

Date of application for amendment: October 8, 1992

Brief description of amendment: Updates the auxiliary electrical systems Technical Specifications with instrument bus operability provisions by adding Specifications, Action Statements, Surveillance Requirements and Basis sections relative to the operation of the vital instrument buses.

Date of issuance: April 13, 1993

Effective date: April 13, 1993

Amendment No.: 51

Facility Operating License No. DPR-18: Amendment revised the Appendix A Technical Specifications.

Date of initial notice in **Federal Register:** December 9, 1992 (57 FR 58251)

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 13, 1993.

No significant hazards consideration comments received: No

Local Public Document Room location: Rochester Public Library, 115 South Avenue, Rochester, New York 14610.

Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Unit Nos. 2 and 3, San Diego County, California

Date of application for amendments: October 2, 1992

Brief description of amendments: The licensee proposes to revise License Condition 2.C.(19)i for San Onofre Unit 2 and License Condition 2.C.(17)d for San Onofre Unit 3, "Post-Accident Sampling System (NUREG-0737 Item II.B.3)," to remove conditions already complied with, and to revise four Post-Accident Sampling System requirements.

Date of issuance: April 6, 1993

Effective date: April 6, 1993

Amendment Nos.: 103 and 92

Facility Operating License Nos. NPF-10 and NPF-15: The amendments revised the Operating Licenses.

Date of initial notice in **Federal Register:** February 17, 1993 (58 FR 8782)

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 6, 1993.

Notice of Issuance of Amendments to Facility Operating Licenses and Final Determination of No Significant Hazards Consideration and Opportunity for a Hearing (Exigent, Public Announcement or Emergency Circumstances)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing.

For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards consideration determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room for the particular facility involved.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendment. By May 28, 1993, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of a hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

VOL 58 ISS 80 AP 28 1993 UMI

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses. Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 248-5100 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to (**Project Director**): petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for a hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Consolidated Edison Company of New York, Inc., Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of application for amendment: April 8, 1993, as supplemented on April 12, 1993, and April 14, 1993.

Brief description of amendment: The amendment revises (Technical Specifications (TS) Section 3.3.D (Weld Channel and Penetration Pressurization System) to permit disconnecting a portion of the weld channel system if that portion became inoperable and repairs to that portion of the system were determined to be not practicable. The amendment also revises the associated TS Bases.

Date of issuance: April 14, 1993

Effective date: April 14, 1993

Amendment No.: 162

Facility Operating License No. DPR-26: Amendment revised the Technical Specifications.Public comments requested as to proposed no significant hazards consideration: No. The Commission's related evaluation of the amendment and final no significant hazards consideration determination are contained in a Safety Evaluation dated April 14, 1993.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Virginia Electric and Power Company, et al., Docket No. 50-339, North Anna Power Station, Unit No. 2, Louisa County, Virginia

Date of application for amendment: March 31, 1993

Brief description of amendment: The amendment suspends the manual engineered safety features functional test of safety injection input to the reactor trip breakers for the remainder of the NA-2 operating Cycle 9.

Date of issuance: April 12, 1993

Effective date: April 12, 1993

Amendment No.: 150

Facility Operating License No. NPF-7: Amendment revised the Technical Specifications.

Public comments requested as to proposed no significant hazards consideration: No. On March 26, 1993, the staff granted an enforcement discretion to be in effect until the amendment was issued.

The Commission's related evaluation of the amendments, consultation with the State of Virginia and final no significant hazards determination are contained in a safety evaluation dated April 12, 1993.

Attorney for licensee: Michael W. Maupin, Esq., Hunton and Williams, Riverfront Plaza, East Tower, 951 E. Byrd Street, Richmond, Virginia 23219.

Local Public Document Room location: The Alderman Library, Special Collections Department, University of Virginia, Charlottesville, Virginia 22903-2498.

Duquesne Light Company, et al., Docket Nos. 50-334 and 50-412, Beaver Valley Power Station, Unit Nos. 1 and 2, Shippingport, Pennsylvania

Date of amendment request: December 30, 1992

Description of amendment request: The proposed amendments would modify the Technical Specifications and Bases to allow sleeving at the steam generator tube support plate and tubesheet regions in accordance with processes performed by the vendors, Babcock & Wilcox and Westinghouse.Date of publication of individual notice in **Federal Register:** April 6, 1993 (58 FR 17912).

Expiration date of individual notice: May 6, 1993

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of amendment request: March 27, 1992, as supplemented May 11, May 28, September 8 and October 8, 1992; February 18 and April 1, 1993.

Description of amendment request: The proposed amendment would increase the storage capacity of the spent fuel pool from its present 1386 storage cells to 2091 storage cells. This would be accomplished by replacing the present medium density fuel racks with 12 free-standing, self-supporting, high density rack modules constructed of stainless steel and a neutron absorber material (boron carbide and aluminum-composite sandwich, product name "boral"). In addition, the proposed amendments would add controls affecting the fuel arrangement and spacing of fuel in the spent fuel pool, revise related surveillance requirements, address controls for fuel movement over the cask loading area of the spent fuel pool, revise the operability requirements of the crane interlocks and physical stops, address additional fuel storage capacity in the cask loading area, and incorporate other related information.

Date of publication of individual notice in **Federal Register:** June 24, 1992 (57 FR 28217)

Expiration date of individual notice: July 24, 1992

Notice of Issuance of Amendments to Facility Operating Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for A Hearing in connection with these actions was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmentel assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendment, (2) the amendment, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document rooms for the particular facilities involved.

Commonwealth Edison Company, Docket Nos. STN 50-454 and STN 50-455, Byron Station, Unit Nos. 1 and 2, Ogle County, IllinoisDocket Nos. STN 50-456 and STN 50-457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois

Date of application for amendments: April 15, 1992, as supplemented November 23, 1992.

Brief description of amendments: The amendments revise the Technical Specifications to incorporate the results of the Setpoint Reconcilation Program.

Date of issuance: April 13, 1993

Effective date: April 13, 1993

Amendment Nos.: 53, 53, 42, and 42

Facility Operating License Nos. NPF-37, NPF-66, NPF-72 and NPF-77: The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 10, 1992 (57 FR 24666) The November 23, 1992, submittal provided additional clarifying information that did not change the initial proposed no significant hazards consideration determination.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 13, 1993.

No significant hazards consideration comments received: No

Local Public Document Room location: For Byron, the Byron Public Library, 109 N. Franklin, P.O. Box 434, Byron, Illinois 61010; for Braidwood, the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Commonwealth Edison Company, Docket Nos. 50-295 and 50-304, Zion Nuclear Power Station Units 1 and 2, Lake County, Illinois

Date of application for amendments: November 5, 1992

Brief description of amendments: The amendments revise the Technical Specifications by deleting the requirements to perform additional surveillance testing when the associated redundant components and/or subsystems have been found to be inoperable.

Date of issuance: April 7, 1993

Effective date: Immediately, to be implemented within 30 days.

Amendment Nos.: 144 and 133

Facility Operating License Nos. DPR-39 and DPR-48. The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** March 3, 1993 (58 FR 12258)

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 7, 1993.

No significant hazards consideration comments received: No

Local Public Document Room location: Waukegan Public Library, 128 N. County Street, Waukegan, Illinois 60085.

Duke Power Company, Docket Nos. 50-269, 50-270 and 50-287, Oconee Nuclear Station, Units 1, 2 and 3, Oconee County, South Carolina

Date of application for amendments: December 8, 1992

Brief description of amendments: The amendments (1) extend the time interval between Reactor Protection System (RPS) instrument channel tests from a month to 45 days on a staggered time basis, (2) define "staggered time basis," and (3) remove the time limitation on placing one RPS channel in bypass and one channel in the tripped condition.

Date of issuance: April 8, 1993

Effective date: April 8, 1993

Amendment Nos.: 199, 199, and 196

Facility Operating License Nos. DPR-38, DPR-47 and DPR-55. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** March 3, 1992 (58 FR 12259)

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 8, 1993.

No significant hazards consideration comments received: No.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-335]

Florida Power and Light Co.; Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Florida Power & Light Company (the licensee) to withdraw its December 17, 1992 application for proposed amendment to Facility Operating License No. DPR-67 for St. Lucie, Unit 1, located in St. Lucie County, Florida.

The proposed amendment would have revised the Technical Specifications to allow certain monitoring functions to be performed with a reduced number of operable incore detector locations.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on January 21, 1993 (58 FR 5432). However, by letter dated March 31, 1993, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated December 17, 1992, and the licensee's letter dated March 31, 1993, which withdrew the application for licensee amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 34954-9003.

Dated at Rockville, Maryland this 20th day of April, 1993.

For the Nuclear Regulatory Commission.

Jan A. Norris,

Project Manager, Project Directorate II-2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

PHYSICIAN PAYMENT REVIEW COMMISSION

Commission Meeting

AGENCY: Physician Payment Review Commission.

ACTION: Notice of public meeting.

SUMMARY: The Commission will hold its next public meeting on May 6, 1993 at the Embassy Suites Hotel—Chevy Chase Pavilion, 4300 Military Road NW., Washington, DC, 202-362-9300, in the Tenley Town Meeting Room (third level). The meeting will begin at 9:30 a.m. The Commission will review its budget recommendations presented to the Congress, its upcoming report and recommendations on setting volume performance standards, and its reports on access and beneficiary financial liability. The Commission may also discuss further work on health system reform.

ADDRESSES: The Commission is located at 2120 L Street, NW., in Suite 510, Washington, DC The telephone number is 202/653-7220.

FOR FURTHER INFORMATION, CONTACT: Annette Hennessey, Executive Assistant or Lauren LaRoy, Deputy Director at 202/653-7220.

SUPPLEMENTARY INFORMATION: Information on the exact agenda for the public meetings can be obtained on Friday, April 30, 1993. Copies of the agenda will be mailed at that time. Please direct all requests for the agenda to the Commission's receptionist.

Paul B. Ginsburg,

Executive Director.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-32190; International Series No. 537 File No. S7-8-90]

Options Price Reporting Authority; Filing of Amendment to the National Market System Plan

April 21, 1993.

Pursuant to Rule 11Aa3-2 under the Securities Exchange Act of 1934 ("Act"), notice is hereby given that on March 18, 1993, the Options Price Reporting authority ("OPRA")[1] submitted to the Securities and Exchange Commission ("Commission") an amendment to its National Market System Plan for the purpose of providing separate "unbundled" last sale and quotation services for foreign currency and index options.[2] The Commission is publishing this notice to solicit comments from interested persons on the amendment.

I. Description and Purpose of the Amendment

The OPRA Plan is being amended to provide for the separation of the OPRA system into three services covering equity options, index options and foreign currency options. As the variety and number of option products traded has increased, so too has the desire of the individual exchanges to exercise more control over the products in which they specialize. To this end, the parties negotiated an agreement which forms the substance of this proposed amendment. The amendment was approved by the parties in accordance with the OPRA Plan at a meeting held by telephone conference on March 17, 1993.

Revenues

The amendment includes revisions to OPRA's fee schedule that provide for separate fees for access to each of these separate services. Foreign currency option fees would be set by those exchanges that trade foreign currency options. Fees for the index option service would be set by those exchanges offering that product but could not be raised above a level equal to two-thirds of the fee for equity options as set by those exchanges trading equity options. For all three services a weighted majority of those exchanges offering the service will be required to approve any changes in fees. The revenues derived from the fees for each service shall be allocated to each exchange that offers that service according to the relative number of compared trades submitted.

Costs

The amendment also provides for the allocation among the three separate services of costs and expenses associated with the receipt, processing and distribution of information relating to the options included in each service, as well as the costs of developing, operating and administering each service.

Specifically, costs directly attributable solely to the development, operation or administration of a single service shall be allocated entirely to that service. Costs and expenses of OPRA's processor, the Securities Industry Automation Corporation ("SIAC"), attributable to more than one service shall be allocated among such services in the same proportion as the processor's line output capacity is available to each such service. Incremental costs associated with the operation of one or more services outside of regular trading hours will also be allocated on the basis of OPRA's line output capacity available to each service at that time. Costs and expenses directly related to billing and collection of OPRA fees (exclusive of bad debt expense, which shall be allocated to the service to which the bad debt is attributed) shall be allocated among all three services in proportion to the relative number of accounts maintained by OPRA in respect of each service. The amendment provides for the further allocation of such costs and expenses according to the relative number of compared trades handled by each exchange offering that service.

Other

Finally, the amendment includes a few nonsubstantive editorial changes to clarify the language of the Plan. In all other respects, action taken by OPRA would continue to be voted upon by all of the parties to the OPRA plan.

II. Implementation of the Plan

These changes will require certain systems modifications by SIAC. It also requires advance notice to OPRA's vendors and subscribers of the changes to OPRA's fees and specifications in accordance with OPRA's agreements with those persons. OPRA will also have to modify its various agreements with vendors and end-users of options information to reflect the unbundling of OPRA's services. Amendments to these agreements will be the subject of one or more separate filings under Rule 11Aa3-2.

In light of the time needed to implement the changes described above, OPRA is planning to implement the proposed amendment in two phases. Separate reporting of foreign currency information will begin on September 1, 1993. Equity and index options will continue to be offered only on a bundled basis until January 1, 1994, after which separate reporting of index and equity options will commence. However, a previously negotiated fee for both services is not due to expire until January 1, 1996. In order to permit the separation of services to go forward on January 1, 1994, the parties have agreed to separate rate structures that will not result in any overall increase in fees during the two year period. After that time, the parties will be free to set their own rates subject only to the two-thirds limitation mentioned above.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Commentators are asked to address whether they believe the proposed amendment is necessary or appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanisms of a national market system, or otherwise in furtherance of the purposes of the Act.

Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing also will be available at the offices of OPRA. All submissions should refer to File No. S7-8-90 and should be submitted by May 19, 1993.

For the Commission by the Division of Market Regulation, by delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 93-9886 Filed 4-27-93; 8:45 am]

BILLING CODE 8010-01-M

[1] OPRA is a National Market System Plan approved by the Commission pursuant to Section 11A of the Act and Rule 11Aa3-2. Securities Exchange Act Release No. 17638 (Mar. 18, 1981). OPRA is a plan for the collection and dissemination of last sale and quotation information on options that are traded on the five member exchanges. The five exchanges which agreed to the OPRA Plan are the Philadelphia Stock Exchange ("PHLX"), the Chicago Board Options Exchange ("CBOE"), the American Stock Exchange ("AMEX"), the Pacific Stock Exchange ("PSE"), and the New York Stock Exchange ("NYSE").

The OPRA plan was agreed to in response to directives of the SEC that provision be made for the consolidated reporting of transactions in eligible options contracts listed and traded on national securities exchanges.

[2] The proposed amendment was approved by OPRA in accordance with the OPRA Plan at a meeting held by conference telephone on March 17, 1993.

Self-Regulatory Organizations; Application for Unlisted Trading Privileges and of Opportunity for Hearing; Pacific Stock Exchange, Inc.

April 22, 1993.

The above-named national securities exchange has filed an application with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder for unlisted trading privileges in the following security:

TIG Holding Inc.
Common Stock, $.01 Par Value (File No. 10507)

This security is listed and registered on one or more other national securities exchange and is reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 17, 1993, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

VOL 58 ISS 80 AP 28 1993 UMI

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-32176; File Nos. SR-PHLX-90-23 and 91-07]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Changes Relating to Dual Affiliations of Floor Members and Other Market Participants

On July 31, 1990 and March 20, 1991, the Philadelphia Stock Exchange, Inc. ("PHLX" or "Exchange") submitted to the Securities and Exchange Commission ("Commission" or "SEC"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] proposed rule changes relating to dual affiliations. Specifically, as discussed in more detail below, in File No. SR-PHLX-90-23, the PHLX proposes to adopt Options Floor Procedure Advice ("OFPA") F-9 ("Advice"), entitled "Dual Affiliations," which relates to the practice of dual or multiple affiliations between Registered Options Traders ("ROTs") and floor brokerage firms. The Exchange is also proposing to add a fine schedule for OFPA F-9 and allow violations to be sanctioned pursuant to the PHLX's Minor Infraction Rule Plan.[3] In addition, in File No. SR-PHLX-91-07, the Exchange proposes an amendment to PHLX Rule 793 which would add dual affiliations of associated persons of PHLX members/participant organizations to the list of dual affiliations that must be disclosed to the Office of the Secretary of the Exchange. In general, the proposed rule changes recognize the practice of ROTs and floor brokers having multiple and/or dual affiliations, thereby requiring compliance with existing PHLX Rules 793, 1014, 1020 and 1064(c). The proposals set forth specific requirements and trading restrictions that must be followed by floor members and other market participants who have dual affiliations.

The proposed rule changes were published for comment in Securities Exchange Act Release Nos. 28838 (January 30, 1991), 56 FR 5044 and 29071 (April 12, 1991), 56 FR 16146, respectively. No comments were received on the proposed rule changes. This order approves the proposals.

Proposed OFPA F-9 contains three parts. First, Part (i) reiterates the requirement contained in PHLX Rule 793 that dual affiliations must be filed in writing with the Exchange's Office of the Secretary.[4] In addition, Part (i) to OFPA F-9 provides that submissions made pursuant to Rule 793 must also disclose all agreed upon forms of compensation between either dual affiliate firm and the individual floor member/participant and between the two firms. In the case of "soft dollar" compensation, the Exchange proposes that a good faith dollar value be estimated. The PHLX has indicated that it will make every effort to determine whether a particular "soft dollar" arrangement constitutes an improper application of the exempt credit treatment for specialists under Regulation T to an off-floor trading entity.[5] Second, Part (ii) of OFPA F-9 prohibits an ROT from receiving communications about trading interests or orders from an affiliated floor broker's customers prior to the respective trading crowd receiving the same information. Part (ii) also prohibits an ROT from answering telephones at an affiliate's post, except an ROT may access a telephone at his affiliate's post to communicate with associates of his ROT firm.[6]

Lastly, Part (iii) of OFPA F-9 provides that the respective trading crowd must be informed of any exchange of interests to trade between an ROT and an affiliated floor brokerage unit. In particular, the proposed OFPA would require the application of PHLX Rule 1064(c) when an exchange of trading interest between an ROT and an affiliated floor brokerage unit occurs.[7] Therefore, the same information that is exchanged between the two participants must also be communicated to the trading crowd. In addition, OFPA F-9 contains a fine schedule for violations of the provisions of the OFPA and will be added to the list of rules that can be sanctioned under Phlx's Minor Infraction Rule Plan.[8] Specifically, a fine of $250 will be assessed for the first occurrence of a violation; $500 for the second occurrence; and a sanction within the discretion of the Exchange's Business Conduct Committee ("BCC") for the third occurrence and any occurrence thereafter.

Finally, the PHLX proposes to amend PHLX Rule 793 to broaden the categories of dual affiliations that must be disclosed and approved by the Exchange to include dual affiliations of associated persons of members/participant organizations. Currently, Rule 793 only requires disclosure of dual affiliations involving general/limited partners, officers, directors and stockholders of members/participant organizations.

The Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5). More specifically, the Commission believes that providing the PHLX with the authority to require associated persons of members/participant organizations to disclose their dual affiliation arrangements will protect investors and the public interest, as well as remove impediments to and perfect the mechanism of a free and open market. Moreover, the Commission believes that this expansion of the scope of Rule 793 will more realistically address the types of dual affiliations that typically occur on the Exchange floor. By requiring disclosure and approval of these types of arrangements, the Commission believes the Exchange will be in a better position to detect collusive trading and minimize potential conflicts of interest, thereby protecting investors in furtherance of the Act.

The Commission further believes that requiring the disclosure of all agreed upon forms of compensation involved in a dual affiliation arrangement, including all "soft dollar" compensation, will enable the Exchange to determine better whether an affiliation is consistent with Exchange standards enumerated in Rule 793.[9] In addition, through the disclosure of all compensation arrangements, the Exchange will be able to determine and detect whether the specialist exempt credit treatment under Regulation T is being improperly applied to an off-floor trading entity and, thereby, will be better able to prevent such improper use of good faith margin.

The Commission also believes that prohibiting ROTs from receiving communications about trading interests or orders from an affiliated floor broker's customers prior to the respective crowd receiving the same information and providing that respective trading crowds must be informed of any exchange of interests to trade between an ROT and an affiliated floor brokerage unit promotes just and equitable principles of trade on the PHLX trading floor. In this regard, the Commission also believes that these restrictions, in addition to the restrictions that an ROT cannot answer the telephone at an affiliated floor broker's post except to contact associates of his ROT firm, will serve as reasonable means to prevent the misuse by ROTs of information concerning orders and trading interests of customers of affiliated floor brokerage units.

Moreover, the Commission believes that it is appropriate for the Exchange to establish a fine schedule consistent with its Minor Infraction Rule Plan for infractions of OFPA F-9.[10] Specifically, the Commission believes that the use of the fine schedule will enable Exchange officials to impose sanctions for minor infractions of the Advice. The Commission also believes that this streamlined disciplinary process will help the Exchange to ensure that PHLX members/participant organizations abide by the Exchange's rule governing dual affiliations. In addition, the Commission further finds that the fine schedule provides for suitable sanctions for violations of the Advice, and is consistent with sections 6(b)(6) and 6(b)(7) of the Act, which requires exchanges to have appropriate sanctions and procedures for the fair disciplining of members for violations of the rules of an exchange.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act,[11] that the proposed rule changes (SR-PHLX-90-23 and 91-07) are approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[12]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 93-9885 Filed 4-27-93; 8:45 am]

BILLING CODE 8010-01-M

---

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1991).

[3] See note 8, *infra*.

[4] Specifically, Part (i) of proposed OFPA F-9 is based on PHLX Rule 793, Commentary .01 to Rule 793 requires a member or participant organization to file with the Office of the Secretary of the Exchange notice of a multiple affiliation detailing the business purpose of this arrangement, the person at each organization who will supervise the conduct of the dually affiliated member/participant for compliance with PHLX by-laws and rules, and sufficient information for the Exchange to determine whether one person has registered with more than one organization. This notice must also contain each organization's written approval of the affiliation.

[5] See letter from Gerald D. O'Connell, Vice President, Market Surveillance, PHLX, to Thomas Gira, Branch Chief, Division of Market Regulation, SEC, dated April 21, 1992.

[6] PHLX Rule 1014(e) prohibits an ROT from initiating an options transaction while on the floor of the Exchange in any account in which he has an interest and at the same time executing as a floor broker an off-floor order in the same option during the same trading session.

[7] PHLX Rule 1064(c) provides that when an order is presented to the trading crowd which arose out of an expression of trading interest between two broker-dealers away from the crowd, the solicited order must be shown to the crowd along with any information given to the solicited member. In addition, participants in the trading crowd must be given a reasonable opportunity to respond to the order.

[8] Phone conversation between Richard Zack, Branch Chief, Options Regulation, SEC, and Edith Hallahan, Market Surveillance, Phlx, on April 16, 1993. Pursuant to paragraph (c)(1) of Rule 19d-1, an SRO is required to file promptly with the Commission notice of any "final" disciplinary action taken by the SRO. Pursuant to paragraph (c)(2) of Rule 19d-1, any disciplinary action taken by the SRO for violation of an SRO rule that has been designated a minor rule violation pursuant to the plan shall not be considered "final" for purposes of section 19(d)(1) of the Act if the sanction imposed consists of a fine not exceeding $2500 and the sanctioned person has not sought an adjudication, including a hearing, or otherwise exhausted his or her administrative remedies. By deeming unadjudicated minor violations as not final, the Commission permits the SRO to report violations on a periodic (quarterly), as opposed to immediate, basis.

[9] Pursuant to PHLX 793, the Exchange may disapprove dual or multiple affiliations which are inconsistent with Exchange standards of financial responsibility, operational capability, or compliance responsibility.

[10] Even though the Exchange intends that violations of the dual affiliation provisions be sanctioned according to the PHLX's Minor Infraction Rule Plan, violations of the Advice do not necessarily have to be subject to the Minor Infraction Rule Plan. For instance, for egregious violations, the Commission would expect that these matters will be handled directly by the Exchange's BCC.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: Equitable Capital Partners, L.P., Equitable Capital Partners (Retirement Fund), L.P. (each a "Partnership," and together the "Partnerships"), Equitable Capital Management Corporation ("Equitable Capital"), and Alliance Corporate Finance Group Incorporated ("Alliance Incorporated").

RELEVANT ACT SECTIONS: Order requested to amend (1) an order under section 6(c) that granted an exemption from sections 2(a)(19) and 2(a)(3)(D) of the Act, and (2) an order under section 57(i) of the Act and rule 17d-1 thereunder that permitted certain joint transactions.

SUMMARY OF APPLICATION: Applicants seek an order that would amend two prior orders. When the prior orders were issued, Equitable Capital served as investment adviser to and managing general partner of the Partnerships. The order would permit the Partnerships to continue to operate under the terms of the prior orders following a corporate reorganization in which Alliance Incorporated would replace Equitable Capital as investment adviser to and managing general partner of the Partnerships.

FILING DATE: The application was filed on March 18, 1993, and amended on April 12, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on May 17, 1993, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants (except for Alliance Incorporated), 1285 Avenue of the Americas, New York, New York 10019; and Alliance Incorporated, 1345 Avenue of the Americas, New York, New York 10105.

FOR FURTHER INFORMATION CONTACT: Robert A. Robertson, Staff Attorney, at (202) 504-2283, or C. David Messman, Branch Chief, at (202) 272-3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. Each Partnership is a Delaware limited partnership that has elected to operate as a business development company under the Act. The Partnerships primarily invest in subordinated debt and related equity securities issued in conjunction with the "mezzanine financing" of privately-structured leveraged buyouts. Equitable Capital, a wholly-owned subsidiary of The Equitable Life Assurance Society of the United States ("Equitable Life"), is the managing general partner of and the

VOL 58 ISS 80 AP 28 1993 UMI

investment adviser to each of the Partnerships.

2. In 1988, the Partnerships and Equitable Capital received an order (the "2(a)(19) Order") under section 6(c) of the Act determining that (i) the independent general partners of a Partnership are not "interested persons" (as defined in section 2(a)(19) of the Act) of the Partnership or Equitable Capital by virtue of being general partners of the Partnerships and co-partners of Equitable Capital, and (ii) limited partners who own a less than a 5% limited partnership interest in a Partnership are not "affiliated persons" (as defined in section 2(a)(3) of the Act) of the Partnership or its partners solely by reason of their status as limited partners.[1]

3. In 1990, the Partnerships and Equitable Capital received an exemptive order (the "17d–1 Order") under section 57(i) of the Act and rule 17d–1 thereunder amending a previous order and (i) permitting purchases of securities by the Partnerships in joint transactions with each other or in transactions in which an affiliate of Equitable Capital is a participant; (ii) permitting certain affiliated persons of Equitable Life or any of its subsidiaries to serve as directors of Equitable Capital notwithstanding a condition to the prior order; (iii) permitting Equitable Life and certain other affiliated persons of Equitable Capital to invest as limited partners in certain limited partnerships that invest in entities in which the partnerships also invest; and (iv) amending and restating the conditions and undertakings contained in the previous order.[2] The 2(a)(19) Order and the 17d–1 Order are referred to as the Existing Orders.

4. Alliance Capital Management L.P. ("Alliance") is a Delaware limited partnership that is registered as an investment adviser. Alliance's sole general partner is Alliance Capital Management Corporation, an indirect wholly-owned subsidiary of Equitable Life. Alliance's partnership interests are represented by units, which are publicly-traded on the New York Stock Exchange. Currently, a wholly-owned subsidiary of Equitable Life owns approximately 54.7% of Alliance's units, public shareholders own approximately 33.8%, and employees of Alliance own approximately 11.5%.

5. On February 23, 1993, Equitable Capital, Alliance and Equitable Investment Corporation[3] entered into a transfer agreement providing for the transfer of substantially all of the assets and liabilities comprising Equitable Capital's business to Alliance and its subsidiaries in exchange for newly issued units representing limited partnership interests in Alliance (the "Combination"). Under the transfer agreement, Equitable Capital may receive additional units as incentive fees. Upon completion of the Combination, Equitable Life will own directly and indirectly up to approximately 63% of the units of Alliance.

6. In connection with the Combination, applicants anticipate that key personnel in Equitable Capital's corporate finance department will become employees of Alliance Incorporated, a registered investment adviser that is an indirect wholly-owned subsidiary of Alliance. The corporate finance department of Equitable Capital has had primary responsibility for providing investment management and other services to the Partnerships.

7. Upon completion of the Combination, which is subject to a number of closing conditions, the Partnerships' existing investment advisory agreements with Equitable Capital will terminate by operation of law. Applicants expect that, subject to approval by each Partnership's independent general partners and limited partners, Alliance Incorporated will become the investment adviser to the Partnerships without any substantive change in the terms and conditions under which Equitable Capital now serves as adviser. Applicants also expect that Equitable Capital will withdraw from the Partnerships and assign its interest as general partner of each Partnership to Alliance Incorporated, and, subject to approval by each Partnership's limited partners, that Alliance Incorporated will succeed Equitable Capital as managing general partner.

8. Applicants request that the Existing Orders be amended to permit the Partnerships to operate under the terms of such orders in the event that Alliance Incorporated replaces Equitable Capital as investment adviser to and managing general partner of the Partnerships. If the transfer agreement is terminated prior to the completion of the Combination, the Combination will not take place, the Equitable Capital personnel that advise the Partnerships will not become employees of Alliance Incorporated and Equitable Capital will remain as investment adviser to and managing general partner of the Partnerships.

9. A joint special meeting of limited partners has been scheduled to consider (i) a proposal to approve as to each Partnership a new investment advisory agreement between the Partnership and Alliance Incorporated; and (ii) a proposal to admit Alliance Incorporated as successor managing general partner of each Partnership. Approval of each proposal is a precondition to the approval of the other. Accordingly, if either proposal is not approved by the limited partners, neither proposal will have been approved. The independent general partners of the Partnership then will make such arrangements for the management of the Partnership and its investments as they believe appropriate and in the best interests of the limited partners.

Applicants' Legal Analysis

1. Applicants believe that the relief requested is reasonable, necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the Act. Alliance Incorporated will comply with the conditions and undertakings in the Existing Orders Currently applicable to Equitable Capital as the investment adviser to and managing general partner of the Partnerships.

2. In particular, the 17d–1 Order is subject to several conditions relating to the operations of the Partnerships and to coinvestments by the Partnerships with each other and with "Equitable Affiliates," which is defined to include Equitable Life (and its subsidiaries other than Equitable Capital); funds with investment objectives similar to the Partnerships that may be sponsored by Equitable Capital; and Equitable Capital advisory accounts that have similar investment objectives. Alliance Incorporated will comply with all such conditions as they currently apply to Equitable Capital. In addition, the proposed amendment provides that, upon consummation of the Combination, the term "Equitable Affiliate" also will include funds with investment objectives similar to the Partnerships that may be sponsored by Alliance Incorporated or Alliance as well as Alliance Incorporated or Alliance advisory accounts that have similar investment objectives, but will not include Alliance Incorporated or Alliance.[4]

[1] Investment Company Act Rel. Nos. 16404 (May 18, 1988) (notice) and 16444 (June 21, 1988) (order).

[2] Investment Company Act Rel. Nos. 17894 (Dec. 5, 1990) (notice) and 17925 (Dec. 31, 1990) (order).

[3] Equitable Investment Corporation is an indirect wholly-owned subsidiary of Equitable Life.

[4] The 17d–1 Order permits the Partnerships to purchase certain securities in joint transactions with each other and with the Equitable Affiliates, which as noted above does not include Equitable Capital. Applicants will continue to comply with this condition. In addition, because Alliance Incorporated is expected to replace Equitable Capital as investment adviser to and managing general partner of the Partnerships, Alliance Incorporated and its parent company, Alliance, will be excluded from the term "Equitable Affiliates"—thereby not permitting them to invest in the joint transactions.

3. The replacement of Equitable Capital with Alliance Incorporated as investment adviser and managing general partner, if approved by the limited partners of the Partnerships, is not expected to result in any significant change in the operations of the Partnerships or in the services provided to the Partnerships.

4. With respect to the 2(a)(19) Order, applicants note that, as a practical matter, the order applies to the independent general partners rather than Equitable Capital and that the individuals presently serving as independent general partners will continue to serve in these roles. Accordingly, the terms of the 2(a)(19) Order will not be affected by the Combination.

5. Applicants believe that it is appropriate to seek amendments to the Existing Orders to ensure that the Existing Orders remain in effect after the consummation of the Combination.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Investment Company Act Rel. No. 19427; 812–8282]

Overland Express Funds, Inc., et al.; Application for Exemption

April 22, 1993.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "Act").

APPLICANTS: Overland Express Funds, Inc. ("Overland"), Stagecoach Funds, Inc. ("Stagecoach"), Cash Investment Trust ("CIT"), WellsFunds Inc. ("WellsFunds"), and all existing and future series thereof (other than the Overland Sweep Fund series of Overland or any other series hereafter established that seeks to accomplish its investment objective by investing all of its assets in the shares of another investment company) (collectively, the "Funds"); Wells Fargo Bank, N.A. ("Wells Fargo"), and any entity controlling, controlled by, or under common control (as defined in section 2(a)(9) of the Act) with Wells Fargo that serves as investment adviser to the Portfolios or to any investment company or portfolio thereof hereinafter referenced (the "Adviser"); and any future investment companies and series thereof that are advised by Wells Fargo or by any entity controlling, controlled by, or under common control (as defined in section 2(a)(9) of the Act), with Wells Fargo (collectively, with the Funds, the "Portfolios").

RELEVANT ACT SECTIONS: Exemptive relief requested pursuant to section 17(d) and rule 17d–1.

SUMMARY OF APPLICATION: Applicants seek a conditional order permitting the Portfolios to pool their uninvested cash balances in one or more joint accounts (the "Account"), and to use the daily balance of the Account to enter into one or more repurchase agreements having a maturity of not more than seven days.

FILING DATE: The application was filed on February 18, 1993 and amended on March 30, 1993 and April 21, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on May 17, 1993, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issue contested. Persons who wish to be notified of a hearing may request such notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Wells Fargo, 111 Sutter Street, 11th Floor, San Francisco, California 94163. Other applicants, 111 Center Street, Little Rock, Arkansas 72201.

FOR FURTHER INFORMATION CONTACT: Courtney S. Thornton, Staff Attorney, at (202) 272–5287, or C. David Messman, Branch Chief, at (202) 272–3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. Overland, Stagecoach and WellFunds are registered, open-end management investment companies, each of which consists of several series. CIT is a registered, open-end management investment company whose shares are not publicly offered or registered under the Securities Act of 1933.

2. Wells Fargo acts as investment adviser to all of the series of Overland, Stagecoach, CIT, and WellsFunds,[1] with the exception of Overland Sweep Fund, which invests all of its assets in CIT and, accordingly, has no direct adviser.[2] Stephens Inc. is the sponsor, distributor, and administrator for all series of Overland, Stagecoach and WellsFunds, and acts as the placement agent for CIT.

3. Each Fund has a custodial relationship with Wells Fargo or Wells Fargo Institutional Trust Company, N.A., but any of the Portfolios may use another custodian or a sub-custodian selected and qualified under section 17(f) of the Act (collectively, the "Custodians") if they deem it in their best interest to do so.

4. On any given day, each of the Portfolios has, or may be expected to have, cash balances held by its Custodian, which otherwise would not be invested in portfolio securities by the Adviser at the end of the trading day. Ordinarily, the Adviser would invest such cash in short-term investments authorized by the Portfolio's investment policy to earn additional income for the Portfolio. Applicants propose to establish with their respective Custodians one or more Accounts, which will be used exclusively to pool excess cash of the Portfolios participating in such Account to purchase one or more repurchase agreements.

5. Under the proposed arrangement, each repurchase transaction would be entered into by the Adviser calling one of the previously approved counterparties of repurchase agreements, indicating the size of the desired repurchase transaction, and negotiating the rate of interest. Master repurchase agreements with the approved counterparties establish minimum collateral levels, the securities eligible to be held as collateral, and the maximum term of a transaction. To facilitate repurchase

[1] Wells Fargo Nikko Investment Advisors, an affiliate of Wells Fargo, serves as investment sub-adviser to several of the series of Stagecoach and WellsFunds. However, Wells Fargo will be responsible for all activities of these series with regard to the Account.

[2] Overland Sweep Fund will not participate directly in the Account.

19 93
UMI

transactions and to help obtain more attractive rates, the Custodian may enter into third-party arrangements for custody of assets and collateral securities with banks that report to the New York Federal Reserve Bank. The term of a repurchase transaction would typically be overnight (or over a holiday or weekend) and in no event more than seven days.

6. After the size of a repurchase transaction has been agreed to, the Custodian would be notified and, prior to releasing funds, would be required to verify that eligible collateral securities of sufficient value had been received. These securities would be either (a) wired to the account of the Custodian (or third-party custodian) at the appropriate Federal Reserve Bank, or (b) physically transferred to a segregated account of the Custodian (or third-party custodian).

7. All joint repurchase transactions would be effected in accordance with the established standards and procedures of the Funds and with the guidelines set forth in Investment Company Act Release No. 13005 (Feb. 2, 1983). If necessary, the Portfolios would modify their systems and standards to comply with any positions the SEC or its staff may take with respect to repurchase agreements by rule, interpretive release, no-action letter, any release adopting any new rule, or any release adopting any amendments to any existing rule.

8. Applicants believe that the proposed Account would have the following benefits for the Portfolios:

(a) The Portfolios would collectively save significant fees and expenses by reducing the number of transactions in which they would engage, compared with the number of transactions the Portfolios would engage in through separate accounts;

(b) Under normal market conditions, it is possible to negotiate a rate on return on large repurchase agreements that is greater than the rate of return that can be negotiated for small repurchase agreements. Thus, the Portfolios would benefit from a greater rate of return than would be available for repurchase agreements negotiated individually by each Portfolio;

(c) The reduction in the number of trade tickets written by each counterparty to a repurchase agreement will simplify the transaction for the parties involved and reduce the opportunities for errors.

Applicants' Legal Conclusions

1. Each Portfolio, by participating in the proposed Account, and the Adviser, by managing the proposed Account, could be deemed to be joint participants in a transaction within the meaning of section 17(d), and the proposed Account could be deemed to constitute a joint enterprise or other type of joint arrangement within the meaning of rule 17d–1. Furthermore, under the definition of "affiliated person" set forth in section 2(a)(3), each of the applicants could be deemed an affiliated person of each other applicant.

2. Applicants represent that the proposed method of operating the Account would not result in any conflicts of interest among any of the Portfolios, or between a Portfolio and an Adviser. Applicants also have determined that there does not appear to be any basis upon which to predicate greater benefits to one Portfolio than to another, because the daily uninvested cash balance of any one Portfolio on any given day is neither a function of the size of the Portfolio nor the particular securities in which it invests, but is rather a function of other factors, such as portfolio management decisions, shareholder purchases and redemptions or the timing of settlement of trades. Although the Adviser would gain some benefit through administrative convenience and some possible reduction in clerical costs, the primary beneficiaries would be the Portfolios and their shareholders, because the Account would provide a more efficient and productive way of administering daily investment transactions.

3. Applicants believe that it would be desirable to permit participation by future Portfolios without the necessity of applying for an amendment to the requested order. Future Portfolios would be required to participate in the Account on the same terms and conditions as the existing Funds.

4. Applicants believe that, because the Account will invest in repurchase agreements that (a) typically will have an overnight, over-the-weekend or holiday duration, and in no event will have a duration in excess of seven days, (b) by their nature are held to maturity, and (c) have no trading market, the value of the repurchase agreements held in the Account would be best reflected by the amortized cost method of valuation.

5. Rule 17d–1(b) under the Act provides that, in passing upon applications under rule 17d–1, the SEC will consider whether each party's participation in the proposed joint arrangement is consistent with the provisions, policies and purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants. Applicants believe that, for the reasons set forth above and in light of the conditions set forth below, the criteria for issuance of an order under section 17(d) of the Act and rule 17d–1 thereunder are met.

Applicants' Conditions

Applicants will operate the Account subject of the following conditions:

1. The Account will be established as one or more separate cash accounts on behalf of the Portfolios at the Custodian. The Portfolios may deposit daily all or a portion of their uninvested net cash balances into the Account.

2. Cash in the Account will be invested solely in repurchase agreements (which typically will have an overnight or over-the-weekend duration, and in no event will have a duration of more than seven days), collateralized by suitable U.S. Government obligations (i.e., obligations issued or guaranteed as to principal or interest by the Government of the United States or by any of its agencies or instrumentalities), and satisfying the uniform standards set by the Portfolios for such investments.

3. All repurchase agreements entered into by the Account will be valued on an amortized cost basis. Each Portfolio that relies upon rule 2a–7 will use the average dollar weighted maturity of such repurchase agreements for the purpose of computing the Portfolio's average portfolio maturity with respect to the portion of its assets held in such Account.

4. In order to ensure that there will be no opportunity for one Portfolio to use any part of a balance of the Account credited to another Portfolio, no Portfolio will be allowed to create a negative balance in the Account for any reason, although each Portfolio will be permitted to draw down its *pro rata* share of the entire balance at any time. Each Portfolio's decision to invest through the Account will be solely at the Portfolio's option, and no Portfolio will be obligated to invest through, or to maintain any minimum balance in, the Account. In addition, each Portfolio will retain the sole rights of ownership of any of its assets, including interest payable on such assets, invested in the Account. Each Portfolio's investment in the Account will be documented daily on the books of the Portfolio as well as on the respective Custodian's books.

5. Each Portfolio will participate in the income earned or accrued in the Account, including all investments held by such Account, on the basis of the percentage of the total amount in such Account on any day represented by its share of such Account.

6. The Adviser will administer, manage and invest the cash balance in the Account in accordance with the terms of its management contracts with the Portfolios, and will not collect any additional or separate fee for the administration of the Account.

7. The Portfolios and the Adviser will enter into an agreement to govern the arrangements in accordance with the foregoing principles.

8. The administration of the Account will be within the fidelity bond coverage required by section 17(g) of the Act and rule 17g–1 thereunder.

9. The board of each Portfolio participating in the Account will evaluate the Account arrangements annually and will authorize the continued participation of the Portfolio in the Account only if it determines that there is a reasonable likelihood that such continued participation will benefit the Portfolio and its shareholders.

10. Substantially all repurchase transactions will have an overnight, over-the-weekend or over a holiday maturity, and in no event will a transaction have a maturity of more than seven days.

11. The Account will not be distinguishable from any other accounts maintained by a Portfolio with its Custodian except that cash from the various Portfolios will be deposited in the Account on a commingled basis. The Account will not have any separate existence with indicia of a separate legal entity. The sole function of the Account will be to provide a convenient way of aggregating individual transactions that would otherwise require daily management and investment by each Portfolio of its cash balances.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–19428; File No. 812–8270]

The Variable Annuity Life Insurance Co. et al.

April 22, 1993.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: The Variable Annuity Life Insurance Company ("VALIC"), The Variable Annuity Life Insurance Company Separate Account A ("Separate Account A"), and The Variable Annuity Marketing Company ("VAMCO") (collectively, the "Applicants").

RELEVANT 1940 ACT SECTIONS: Order requested under section 6(c) of the 1940 Act for exemptions from sections 22(e), 27(c)(1), and 27(d).

SUMMARY OF APPLICATION: Applicants seek an order with respect to certain variable annuity contracts ("Contracts") participating in Separate Account A to the extent necessary to comply with the Optional Retirement Program of the State University System of Florida ("Florida ORP") as administered by the Division of Retirement of the Florida Department of Management Services ("Division").

FILING DATE: The Application was filed on February 12, 1993.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving the Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m., on May 17, 1993, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants, c/o Cynthia A. Toles, Esq., The Variable Annuity Life Insurance Company, 2929 Allen Parkway, Houston, Texas 77019. Copies to Diane E. Ambler, Esq., Freedman, Levy, Kroll & Simonds, 1050 Connecticut Avenue, NW., Suite 825, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Thomas E. Bisset, Senior Attorney, at (202) 272–2058, or Micheal Wible, Special Counsel, on (202) 272–2060, Office of Insurance Products (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the Application. The complete Application is available for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. VALIC is a Texas stock life insurance company, the predecessor of which was organized under the laws of the District of Columbia in 1955. VALIC transacts business in all fifty states and the District of Columbia and has total assets exceeding $17.4 billion. VALIC is the depositor of Separate Account A, which was established by VALIC's Board of Directors on April 18, 1979 in accordance with the Texas Insurance Code. Separate Account A funds variable annuity contracts, including the Contracts, issued by VALIC. VAMCO, a Texas corporation organized in 1970, is the principal underwriter for the variable annuity contracts issued by VALIC and Separate Account A, including the Contracts.

2. Separate Account A is registered as a unit investment trust under the 1940 Act and invests solely in portfolios of the American General Series Portfolio Company. Units of interest under the Contracts are registered under the Securities Act of 1933. The Contracts are also qualified under section 403(b) of the Internal Revenue Code of 1986, as amended ("Code").

3. The Florida ORP is a defined contribution plan designed to provide retirement and death benefits to participants through individual or group annuity contracts, which may be fixed or variable, or combination fixed and variable. The Florida ORP is available to certain faculty members within the State University System of Florida ("Florida University System"), as well as to persons holding certain administrative and professional staff positions within the Florida University System (collectively, "Eligible Employees" or "Participants"). The Florida ORP is an alternative to the Florida Retirement System, a defined benefit retirement plan, and Eligible Employees have the option of participating in the Florida Retirement System or the Florida ORP. A statutory presumption deems any employee who becomes eligible to participate on or after January 1, 1993 to have elected to participate in the Florida ORP, unless such employee specifically elects membership in the Florida Retirement System.

4. Under the Florida ORP, the universities in the Florida University System provide for employee retirement benefits by contributing a percentage of each Participant's gross compensation regardlese of service to purchase an annuity when the employee retires. The Division has designated five companies from which annuity contracts may be purchased under the Florida ORP. In addition to VALIC, these companies include the Teachers Insurance and Annuity Association of America and the College Retirement Equities Fund, Capitol Life Insurance Company, Great American Reserve Insurance Company and The Independent Life and Accident Company.

VOL 58 ISS 80 AP 28 1993 UMI

5. Participants in the Florida ORP may themselves contribute, by way of salary reduction, a percentage of their respective gross compensation (not to exceed the percentage amount contributed by the employer). Payment of Participant contributions are made by the financial officer of the employer to the Division, which in turn forwards the contribution to a designated company or companies contracting for payment of benefits for the Participant under the Florida ORP.

6. In correspondence with VALIC, dated December 9, 1992, the Division informed VALIC that it will require VALIC to withdraw the Contracts from the Florida ORP unless it amends the Contracts to reflect certain restrictions based on the Division's administrative interpretations applicable to employer contributions made pursuant to the Florida ORP. The Division has administratively prohibited distributions of employer contributions under the Florida ORP to a Participant on a lump sum basis (other than upon the Participant's death) or exclusively on the basis of a period certain. These restrictions apply only to employer contributions and do not limit access to Participant contributions. (Participant contributions under the Contracts are, however, subject to the restrictions on distributions under section 403(b)(11) of the Code.) Participants are also free to transfer both employer and Participant contributions among the fixed or variable investment options available under the Contracts and to substitute entirely a qualified contract offered by any of the other companies designated under the Florida ORP.

7. The Division has required VALIC, in order to continue to participate as a designated company under the Florida ORP, to prepare an endorsement to the Contracts (the "Endorsement") applying to accumulations based on employer contributions which provides that: (1) Benefits based on employer contributions are payable only upon the Participant's death, retirement or termination of employment (as defined in section 121.021(39) of the Florida Statutes); (2) benefit payments will not be made based solely on a period certain; (3) accumulations based on employer contributions are not subject to withdrawal or surrender and may not be rolled over other than to a designated company or companies contracting for payment of benefits for the Participant under the Florida ORP; and (4) accumulations are not subject to loan, assignment, execution or attachment.

Applicants' Legal Analysis and Conditions

1. Section 22(e) of the 1940 Act provides that "no registered investment company shall suspend the right of redemption, or postpone the date of payment or satisfaction upon redemption of any redeemable security in accordance with its terms for more than seven days after the tender of such security to the company or its agent designated for that purpose for redemption," except in certain prescribed circumstances. Section 27(c)(1) of the 1940 Act makes it unlawful "for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless such certificate is a redeemable security." Section 27(d) of the 1940 Act makes it unlawful "for any registered investment company issuing periodic payment plan certificates, or for any depositor of or underwriter for such company, to sell any such certificate unless the certificate provides that the holder thereof may surrender the certificate at any time within the first eighteen months after the issuance of the certificate" and receive an amount equal to the account value plus excess sales load.

2. Applicants request exemptions from the provisions of sections 22(e), 27(c)(1) and 27(d) of the 1940 Act to the extent necessary to permit compliance with the Florida ORP, as administered by the Division with respect to the Contracts.

3. Applicants submit that the exemptive relief requested is consistent with Rule 6c–7 under the 1940 Act, which provides exemptions from sections 22(e), 27(c)(1) and 27(d) of the 1940 Act for registered separate accounts, and depositors of or underwriters for such separate accounts, to the extent necessary to permit compliance with certain restrictions on redemptions involving variable annuity contracts issued to certain employees participating in the Texas Optional Retirement Program ("Texas ORP"). The Texas ORP permits distributions to participants only upon death, retirement or termination of employment.

4. applicants further submit that the exemptive relief requested is also consistent with the position taken by the Commission staff in a 1988 letter to the American Council of Life Insurance, in which the staff advised that it would not recommend enforcement action to the Commission if registered separate accounts issuing variable annuity contracts as funding vehicles for retirement plans meeting the requirements of section 403(b) of the Code comply with the restrictions imposed by subsection (11) of that section.[1] In addition, the relief requested is consistent with exemptive relief more recently granted involving the Louisiana Optional Retirement Plan.[2]

5. The Division's administration of the Florida ORP, and its requirement that VALIC amend the Contracts to specifically restrict certain rights of redemption or cease participating in the Florida ORP program, present a direct conflict with the 1940 Act's redemption provisions. The terms of the Endorsement, as required by the Division in its administration of the Florida ORP, clearly permit payment of contract benefits only in the event of death, retirement, or termination of employment and are substantially identical to the Texas ORP limitations.

6. The legislative purpose of the Florida ORP is similar to that of the statutes discussed above. In each case, the constraints or redeemability are designed to ensure that the annuity contract is used for the principal purpose of long-term retirement accumulation.

Moreover, the Division has required VALIC to obtain the relief requested as a condition to continuing as a designated company under the Florida ORP. Thus, persons participating in the Florida ORP could be denied the opportunity to select the Contracts as a funding medium for their retirement benefits.

Furthermore, the limited restrictions on redemption would be voluntarily assumed by Participants (i.e., Eligible Employees may elect not to participate in the Florida ORP), were not formulated or suggested by Applicants, and are reasonable in light of the benefits of participating in the Florida ORP. In addition, consistent with the precedents cited above, Participants are able to transfer their account value among the investment alternatives available under the Contracts (including the fixed alternative funded through the General Account of VALIC) and to qualified contracts of other companies designated under the Florida ORP.

7. As noted above, the requested exemptive relief is substantially identical to that requested and obtained

[1] American Counsel of Life Insurance, [1989 Transfer Binder] Fed. Sec. L. Rep. (CCH) Section 78,904 (November 28, 1988).

[2] Nationwide Life Insurance Company, (File No. 812–7457), Investment Company Act Release No. 17615 (July 25, 1990), 55 Fed. Reg. 31,278 (Aug. 1, 1990) (Notice); Investment Company Act Release No. 17693 (Aug. 22, 1990) (Order).

in connection with similar constraints or redeemability imposed by other governing authorities. Applicants submit that the relief requested raises no novel issues of law or fact.

8. Applicants will ensure that appropriate disclosure is made to Eligible Employees, informing them of the restrictions stated in the Endorsement. Applicants represent that they will:

a. Include appropriate disclosure regarding the restrictions on redemption imposed by the Division in each registration statement, including the prospectus, relating to the Contracts issued in connection with the Florida ORP;

b. Include appropriate disclosure regarding the restrictions on redemption imposed by the Division in any sales literature used in connection with the offer of Contracts to Eligible Employees;

c. Instruct salespeople who solicit Eligible Employees to purchase the Contracts specifically to bring the restrictions on redemption imposed by the Division to the attention of the Eligible Employees;

d. Obtain from each Participant in the Florida ORP who purchases a Contract, prior to or at the time of such purchase, a signed statement acknowledging the Participant's understanding: (i) of the restrictions on redemption imposed by the Division, and (ii) that other investment alternatives are available under the Florida ORP, to which the Participant may elect to transfer his or her Contract values; and

e. Include in any registration statement filed in connection with the Contracts a representation that this exemptive application is being relied upon and that the provisions of sub-paragraphs (a) through (d) above have been complied with.

Conclusion

Applicants submit that the exemptive relief requested is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SMALL BUSINESS ADMINISTRATION

Small Business Innovation Research Program Policy Directive

AGENCY: Small Business Administration.

ACTION: Publication of policy directive.

SUMMARY: On October 28, 1992, Public Law 102–564, 106 Stat. 4249, authorized the Small Business Technology Transfer (STTR) Pilot Program. The Small Business Administration (SBA) is hereby publishing the policy directive for the STTR pilot program. This policy directive provides guidance to the participating Federal agencies for the general conduct of the STTR pilot program. Additional instructions may be issued by the SBA as a result of public comment or experience. Such instructions will be issued as additional or replacement pages for this directive.

DATES: Public comment on this policy directive must be received no later than May 28, 1993.

ADDRESSES: Written comments should be submitted to Richard J. Shane, Assistant Administrator, Office of Innovation, Research and Technology, U.S. Small Business Administration, 409 Third Street, SW., suite 8500, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: Jack Sweeney, Deputy Assistant Administrator, Office of Innovation, Research and Technology, (202) 205–6450.

SUPPLEMENTARY INFORMATION: On October 28, 1992, the Small Business Technology Transfer Act of 1992 (the Act), title II of Public Law 102–564 (106 Stat. 4256), authorized the Small Business Technology Transfer (STTR) Pilot Program. Section 202(b)(3) of the Act defines the term "Small Business Technology Transfer Program" or "STTR" as "a pilot program under which a portion of a Federal agency's extramural research or research and development effort is reserved for award to small business concerns for cooperative research and development through a uniform process having * * * a first phase, * * * a second phase, * * * and where appropriate, a third phase * * *." The term "cooperative research and development" means research or research and development conducted jointly by a small business concern and a research institution.

Under the Act, the first phase of an STTR program is to determine, to the extent possible, the scientific, technical, and commercial merit and feasibility of ideas submitted pursuant to STTR program solicitations. The second phase of an STTR program is to further develop proposed ideas to meet particular program needs, in which awards shall be made based upon the scientific, technical, and commercial merit and feasibility of the idea, as evidenced by the first phase and by other relevant information. Finally, the third phase of an STTR program is to facilitate the funding of commercial applications of STTR-funded R/R&D, by non-Federal sources of capital, or, for products or services intended for use by the Federal Government, by follow-on, non-STTR Federal Funding awards. Additionally, awards from non-STTR Federal funding sources which are used for the continuation of R/R&D that has been competitively selected using peer review or scientific review criteria would be considered in the third phase of an STTR program.

The Act authorizes Federal agencies to establish STTR Pilot Programs if their Fiscal Years 1994, 1995, or 1996 extramural budgets for research or research and development (R/R&D) exceed $1 billion. If a Federal agency's extramural budget for R/R&D meets the threshold requirement, the agency is authorized to expend the following amounts with small business concerns: (a) Not less than 0.05% of such budget in FY 1994; (b) not less than 0.1% in FY 1995; and (c) not less than 0.15% in FY 1996. The Act prohibits the use of a Federal agency's STTR budget for administrative costs of the program, including costs associated with salaries and expenses.

Section 202(c) of the Act charges SBA with the responsibility of issuing a policy directive which provides for the general conduct of the STTR Pilot Program, including six specific areas: (1) Simplified, standardized, and timely STTR solicitations; (2) a simplified, standardized funding process; (3) minimizing regulatory burdens associated with participation in the STTR programs; (4) guidelines for a model agreement, to be used by all agencies for allocating between small business concerns and research institutions, intellectual property rights, and rights, if any, to carry out follow-on research, development, or commercialization; (5) procedures to ensure that recipients of STTR awards meet SBA's definition of a small business concern, as defined in section 3 of the Small Business Act (15 U.S.C. 631 *et seq.*) and the small business concern exercises management and control of the performance of the STTR funding agreement; and (6) procedures to ensure, to the extent practicable, that an agency which intends to pursue research, development, or production of a technology developed by a small

VOL 58 ISS 80 AP 28 1993 UMI

business concern under an STTR program enters into follow-on, non-STTR funding agreements with the small business concern for research, development, or production.

Pursuant to the Act, SBA has developed this policy directive with the above areas of concern in mind, and after consultation with the heads of the Federal agencies required to establish STTR programs, the Commissioner of Patents and Trademarks, and the Director of the Office of Federal Procurement Policy. Those Federal agencies who are required to establish STTR programs are: The Department of Defense, the Department of Energy, the Department of Health and Human Services, the National Aeronautics and Space Administration, and the National Science Foundation.

SBA is issuing this policy directive with a 30 day comment period. SBA will consider all comments carefully before issuing the policy directive in final form, as required by the Act, no later than July 31, 1993.

Richard J. Shane,

Assistant Administrator, SBA Office of Innovation, Research and Technology.

Small Business Technology Transfer Program Policy Directive

To the Heads of Executive Departments and Establishments

Subject: Small Business Research and Development Enhancement Act of 1992 Small Business Technology Transfer (STTR) Pilot Program

1. *Purpose.* To provide a policy directive for the general conduct of the Small Business Technology Transfer (STTR) Pilot Programs within the Federal government.

2. *Authority.* This policy directive is issued pursuant to the authority contained in 15 U.S.C. 638(j)—Small Business Research and Development Enhancement Act of 1992 (Pub. L. 102–564).

3. *Procurement Regulations.* It is recognized that the Federal Acquisition Regulation (FAR) may need to be modified to conform to the requirements of The Small Business Research and Development Enhancement Act of 1992 and this policy directive. Agencies responsible for these procurement regulations are encouraged to initiate such changes. Regulatory provisions pertaining to areas of SBA responsibility, as established by Public Law 102–564, will require approval of the SBA Administrator or designee. The SBA Office of Innovation, Research and Technology is the appropriate office for coordinating such regulatory provisions.

4. *Personnel Concerned.* All Federal government personnel who are involved in the administration, funding agreements and technical process of the Small Business Technology Transfer (STTR) Pilot Program.

5. *Distribution.* Federal government agencies and departments with Small Business Technology Transfer (STTR) Pilot Programs as authorized by Public Law 102–564.

6. *Originator.* U.S. Small Business Administration, Office of Innovation, Research and Technology.

Richard J. Shane,

Assistant Administrator, SBA Office of Innovation, Research and Technology.

Dayton J. Watkins,

Acting Administrator, U.S. Small Business Administration.

Appendix—Instructions for STTR Pilot Solicitation Preparation

1. Purpose

a. Section 9(p) of the Small Business Act (15 U.S.C. 638, as amended by P.L. 102–564) requires that the Small Business Administration issue a policy directive for the general conduct of the STTR Pilot Programs within the Federal government.

b. This policy directive fulfills the statutory obligation of the legislation and provides guidance to the participating Federal agencies for the general conduct of the STTR Pilot Program. Additional instructions may be issued by the Small Business Administration (SBA) as a result of public comment or experience. These instructions will be issued as additional or replacement pages for this directive.

2. Summary of Legislative Provisions

a. *The Small Business Research and Development Enhancement Act of 1992,* Public Law 102–564, that became law on October 28, 1992, amends Section 9 of the Small Business Act (15 U.S.C. 638).

Title II of this legislation is the "Small Business Technology Transfer Act of 1992" (the Act) for the establishment of the Small Business Technology Transfer Pilot Program.

(1) The Act authorizes Federal agencies to establish STTR Pilot Programs if their FY 1994, 1995, or 1996 extramural budgets for research or research and development (R/R&D) exceed stated threshold figures ($1 billion).

(2) The statutory requirements are aimed at assisting small business concerns by establishing a uniform, simplified process for the operation of the STTR Pilot Program while allowing the participating agencies flexibility in the content and operation of their individual STTR Pilot Programs.

(3) The Act authorizes each participating agency to establish an STTR Pilot Program by reserving a statutory percentage of its extramural budget to be awarded to small business concerns for R/R&D through a uniform, three-phase process.

(a) The first two phases will help agencies meet R/R&D and commercialization objectives.

(b) The third phase, where appropriate, is:

(1) To pursue commercial applications from the government-funded R/R&D in order to stimulate technological innovation and provide for the national return on investment from R/R&D and/or

(2) For further contracting or grant activities with Federal agencies through non-STTR funding agreements.

(4) The Act mandates that each agency authorized to have an STTR Pilot Program is to report annually to SBA. The Act also requires agencies with STTR Pilot Programs to report annually to the Office of Science and Technology Policy.

b. On October 28, 1992, the President signed P.L. 102–564 which authorizes the STTR Pilot Program for the fiscal years 1994, 1995, and 1996.

(1) Effective March 31, 1985, section 2732(a) of Title VII of the Competition in Contracting Act of 1984, Public Law 98–369, must be read in conjunction with the procurement notice publication requirements of section 8(e) of the Small Business Act (15 U.S.C. 637(e)).

Therefore, the notice publication requirements of the law apply to agencies participating in the STTR Pilot Program which use contracts as their STTR funding agreements.

(a) Any Federal Executive agency intending to solicit a proposal for contract for property or services valued above $25,000 is required to submit a notice of the impending solicitation for publication in the Commerce Business Daily. No agency shall issue its solicitation for at least 15 days from the date of the publication of the notice. The agency may not establish a deadline for submission of proposals in response to such solicitation that is earlier than 30 days after the date on which the solicitation was issued.

(b) The Competition in Contracting Act also requires that any executive agency awarding a contract for property or services valued at more than $25,000 submit a notice for publication to the Secretary of Commerce announcing such an award for publication if a subcontract is likely to result from such contract.

(2) The following are exemptions from the notice publication requirements:

(a) In the case of agencies intending to solicit Phase I proposals for contracts in excess of $25,000, the head of the agency may exempt a particular solicitation from the notice publication requirements if he/she makes a written determination, with the consultation of the Administrator of the Office of Federal Procurement Policy and the Administrator of the Small Business Administration, that it is inappropriate or unreasonable to publish a notice before issuing a solicitation.

(b) The STTR Phase II awards process is exempted.

3. Minimizing Regulatory Burden

a. Important objectives in implementing STTR Pilot Program procedures are to:

(1) Minimize the creation of new or complex regulations.

(2) Ensure that the program's requirements are met.

(3) Simplify and standardize application of existing regulations related to the program. The explicit nature of the STTR legislation concerning certain recognized acquisition procedures provides a strong base of authority for streamlining the process for obtaining R/R&D from small highly innovative business concerns.

(a) The above includes funding allocations, centralized STTR technology management, and routine operational implementation.

(b) Where not contrary to existing statutory requirements, each agency is authorized to establish financial procedures and financing mechanisms that it deems necessary to properly implement the STTR Pilot Program, including, but not limited to, obligating funds solely on the basis of proposal merit without regard to the purpose for which funds were originally appropriated, and transferring assessed funds to a single account to facilitate financial management, reporting, and oversight.

(c) The participating agencies are encouraged to initiate or continue their development of simplified procedures that may be used on STTR actions and to submit information concerning simplified procedures to the SBA for possible general program improvements.

b. No participating agency may promulgate a rule or regulation that is contrary to or inconsistent with the STTR legislation or this policy directive.

4. Definitions

a. *Small Business Technology Transfer Pilot Program (STTR).* A pilot program under which a portion of a Federal agency's extramural research or research and development effort is reserved for award to small business concerns for cooperative research and development through a uniform process having three phases. The program is described in this directive.

b. *Research or Research and Development (R/R&D).* Any activity that is:

(1) A systematic, intensive study directed toward greater knowledge or understanding of the subject studied.

(2) A systematic study directed specifically toward applying new knowledge to meet a recognized need.

(3) A systematic application of knowledge toward the production of useful materials, devices, and systems or methods, including design, development, and improvement of prototypes and new processes to meet specific requirements.

c. *Cooperative Research and Development.* For the purposes of the STTR Program this means research and development conducted jointly by a small business concern and a research institution in which not less than 40 percent of the work is performed by the small business concern, and not less than 30 percent of the work is performed by the research institution.

d. *Extramural Budget.* The sum of the total obligations for R/R&D minus amounts obligated for R/R&D activities by employees of the agency in or through government-owned, government-operated facilities.

e. *Federal Agency.* An executive agency as defined in 5 U.S.C. 105, or a military department as defined in 5 U.S.C. 102 except that it does not include any agency within the Intelligence Community as defined in Executive Order 12333, section 3.4(f), or its successor orders.

f. *Funding Agreement.* Any contract, grant, or cooperative agreement entered into between any Federal agency and any small business concern for the performance of experimental, developmental, or research work funded in whole or in part by the Federal government.

g. *Research Institution.* A research organization that is:

(1) A contractor-operated federally funded research and development center, as identified by the National Science Foundation in accordance with the government-wide Federal Acquisition Regulation issued in accordance with section 35(c)(1) of the Office of Federal Procurement Policy Act (or any successor legislation thereto), or

(2) A non-profit research institution as defined in section 4(5) of the Stevenson-Wydler Technology Innovation Act of 1980, or,

(3) A non-profit university.

h. *Subcontract.* Any agreement, other than one involving an employer-employee relationship, entered into by a Federal government funding agreement awardee calling for supplies or services required solely for the performance of the original funding agreement.

i. *Socially and Economically Disadvantaged Small Business Concern.* A socially and economically disadvantaged small business concern:

(1) Is one that is at least 51 percent owned by (i) an Indian tribe or a native Hawaiian organization, or (ii) one or more socially and economically disadvantaged individuals, and

(2) Whose management and daily business operations are controlled by one or more socially and economically disadvantaged individuals.

j. *Socially and Economically Disadvantaged Individual.* A member of any of the following groups:

(1) Black Americans
(2) Hispanic Americans
(3) Native Americans
(4) Asian-Pacific Americans
(5) Subcontinent Asian Americans
(6) Other groups designated from time to time by SBA to be socially disadvantaged; or
(7) Any other individual found to be socially and economically disadvantaged by SBA pursuant to section 8(a) of the Small Business Act, 15 U.S.C. 637(a).

k. *Small Business Concern.* A small business concern is one that, at the time

VOL
58
ISS
80
AP
28
19 93
UMI

of award of Phase I and Phase II funding agreements, meets the following criteria:

(1) Is independently owned and operated, is not dominant in the field of operation in which it is proposing, has its principal place of business located in the United States and is organized for profit;

(2) Is at least 51 percent owned, or in the case of a publicly owned business, at least 51 percent of its voting stock is owned by United States citizens or lawfully admitted permanent resident aliens;

(3) Has, including its affiliates, a number of employees not exceeding 500, and meets the other regulatory requirements found in 13 CFR part 121. Business concerns, other than investment companies licensed, or state development companies qualifying under the Small Business Investment Act of 1958, 15 U.S.C. 661, *et seq.*, are affiliates of one another when either directly or indirectly:

(a) One concern controls or has the power to control the other; or

(b) A third party or parties controls or has the power to control both.

Control can be exercised through common ownership, common management, and contractual relationships. The term "affiliates" is defined in greater detail in 13 CFR part 121. The term "number of employees" is also defined in 13 CFR part 121. Business concerns include, but are not limited to, any individual, partnership, corporation, joint venture, association or cooperative.

l. *Women-Owned Small Business Concern.* A small business concern that is at least 51 percent owned by a women or women who also control and operate it. "Control" in this context means exercising the power to make policy decisions. "Operate" in this context means being actively involved in the day-to-day management.

m. *Program Solicitation.* A formal solicitation of proposals whereby a Federal agency notifies the small business community of its R/R&D needs and interests in selected areas and requests proposals in response to these needs from small business concerns. Announcements in the **Federal Register** or the Commerce Business Daily are not to be considered substitutes for an STTR Program solicitation.

n. *United States.* The 50 states, the territories and possessions of the U.S., the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, and the District of Columbia.

o. *Commercialization.* The process of developing markets and producing and delivering products for sale (whether by the origination party or by others); as used here, commercialization includes both government and commercial (private sector) markets.

5. Participating Federal Agency Expenditures for the STTR Program

a. Each Federal agency which has an extramural budget for R/R&D in excess of $1,000,000,000 for FY 1994, 1995, or 1996, is authorized to expend with small business concerns not less than .05% of such budget in fiscal year 1994; not less than .1% of each budget in fiscal year 1995; and not less than .15% of such budget in fiscal year 1996, specifically in connection with STTR Programs which meet the requirements of the Small Business Research and Development Enhancement Act of 1992, this policy directive, and regulations issued thereunder.

b. Funding agreements with small business concerns for research or research and development which result from competitive or sole source selections other than an STTR Program shall not be considered to meet any portion of the percentage required under the STTR Program.

6. Limitations of Participation

a. A Federal agency shall not use any of its STTR budget for the purpose of funding administrative costs of the program including costs associated with budgetary salaries and expenses, or in the case of a small business concern or a research institution, costs associated with salaries, expenses and administrative overhead other than those direct or indirect costs allowable under guidelines of the Office of Management and Budget and the governmentwide Federal Acquisition Regulation issued in accordance with section 25(c)(1) of the Office of Federal Procurement Policy Act.

b. Awards resulting from other than an STTR Program may not be counted toward meeting STTR Program funding levels or achievement.

c. Voluntary participation in the STTR Programs by Federal agencies not otherwise qualified for such participation may be permitted under this policy directive.

Federal agencies seeking to participate in STTR need to submit their requests to SBA. Voluntary participation requires the written approval of the SBA Assistant Administrator for Innovation, Research and Technology subsequent to review of the request.

7. Small Business Technology Transfer Pilot Program

a. The STTR Program is a phased process uniform throughout the Federal government of soliciting proposals and awarding funding agreements for R/R&D to meet stated agency needs or missions.

b. Each participating agency shall at least annually issue an STTR solicitation that sets forth a substantial number of R/R&D topic and subtopic areas consistent with stated agency needs or missions. Both the list of topics and the description of the topics and subtopics shall be sufficiently comprehensive to provide a wide range of opportunity for small business concerns to participate in the agency R/R&D program. Topics and subtopics shall emphasize the need for proposals with advanced concepts to meet specific agency R/R&D needs. Each topic and subtopic shall describe the needs in sufficient detail so as to assist small business concerns in providing on-target responses, but shall not involve detailed specifications to prescribed solutions of the problems.

Unsolicited proposals or proposals not responding to stated topics or subtopics are not eligible for STTR awards.

c. Research or research and development in the STTR Program is to be conducted jointly by a small business concern and a non-profit research institution. Not less than 40 percent of the work conducted under an STTR award is to be performed by the small business concern, and not less than 30 percent of the work is to be performed by the non-profit research institution.

Also, for both Phase I and Phase II, the R/R&D work must be performed by the small business concern in the United States, as defined in paragraph 4.n. of this policy directive.

d. To stimulate and foster scientific and technological innovation, including increasing commercialization of Federal R/R&D, the STTR Program must follow a uniform competitive process of three phases:

(1) *Phase I.* Phase I involves a solicitation of proposals to conduct feasibility related experimental or theoretical R/R&D related to described agency requirements. The object of this phase is to determine the scientific, technical and commercial merit and feasibility of the proposed cooperative effort and the quality of performance of the small business concern with a relatively small agency investment before consideration of further Federal support in Phase II.

(a) Several different proposed solutions to a given problem may be funded.

(b) Proposals will be evaluated on a competitive basis. Agency criteria used to evaluate STTR proposals shall give primary consideration to the scientific and technical merit of the proposal along with its potential for commercialization. Secondary considerations may include program balance or critical agency requirements.

(c) Agencies may include a provision requiring submission of a Phase II proposal as a deliverable item under Phase I.

(d) Efforts shall be taken by agencies to reduce the procurement time frame for Phase II awards. Agencies are encouraged to develop gap-funding methods and to address the duration of Phase II award cycles.

(2) *Phase II.* The object of Phase II is to continue the R/R&D effort from Phase I. Only awardees in Phase I are eligible to participate in Phase II. Phase I awardees are eligible for consideration of Phase II STTR funding agreements only at the Federal participating agency which awarded Phase I of the project. Funding shall be based upon the results of Phase I and the scientific and technical merit and commercial potential of the Phase II proposal. Phase II awards may not necessarily complete the total research and development that may be required to satisfy commercial or Federal needs beyond the STTR Program. Completion of the research and development may be through Phase III. The government is not obligated to fund any specific Phase II proposal. The STTR Phase II award decision process requires, among other things, consideration of a proposal's commercial potential as evidenced by:

(a) The small business concern's record of commercializing STTR or other research,

(b) The existence of second phase funding commitments from private sector or non-STTR funding sources,

(c) The existence of third phase follow-on commitments for the subject of the research, and

(d) The presence of other indicators of commercial potential of the idea.

(3) *Phase III.* The term third phase agreement means a follow-on, non-STTR funded award as described in 1, 2 and 3 below. A Federal agency may enter into a third phase agreement with a small business concern for additional work to be performed during or after the second phase period. The second phase funding agreement with the small business concern may, at the discretion of the agency awarding the agreement, set out the procedures applicable to third phase agreements. The competition for Phase I and Phase II awards satisfies any competition requirement of the Competition in Contracting Act.

(a) Where appropriate, there will be a third phase which is funded by:

1. Non-Federal sources of capital for commercial applications of STTR funded research or research and development,

2. The Federal government by follow-on non-STTR awards for STTR derived products and processes for use by the Federal government,

3. Non-STTR Federal sources for the continuation of research or research and development that has been competitively selected using peer review or scientific review criteria.

(b) Agencies which intend to pursue research, research and development or production of a technology developed by a small business concern under the STTR Program will give special acquisition preference such as sole source awards to the STTR company which developed the technology. The Phase III funding agreement will be with non-STTR funds.

8. Unilateral Actions of Participating Agencies and Departments

a. The Act requires each participating agency to:

(1) Unilaterally determine the categories of projects to be included in its STTR Program.

(2) Release STTR solicitations in accordance with the SBA/STTR master schedule.

(3) Subject to paragraph 12, unilaterally determine research topics within its STTR solicitation(s) giving special consideration to broad research topics and to topics that further one or more critical technologies, as identified by:

(a) The National Critical Technologies Panel (or its successor) in the 1991 report required under section 603 of the National Science and Technology Policy Organization and Priorities Act of 1976, and in subsequent reports issued under that authority, or

(b) The Secretary of Defense in the 1992 report issued in accordance with section 2522 of title 10, United States Code, and in subsequent reports issued under that authority.

(4) Unilaterally receive and evaluate proposals resulting from STTR solicitations and make awards.

(5) Unilaterally select awardees for its STTR funding agreements.

(6) Administer its own STTR funding agreements or delegate such administration to another agency; and inform each awardee under such agreement, to the extent possible, of the costs of the awardee that will be allowable under the funding agreement.

(7) Each funding agreement under the STTR Program shall include provisions setting forth the respective rights of the United States and the small business concern with respect to intellectual property rights and with respect to any right to carry out follow-on research.

(8) Make payments to recipients of STTR funding agreements on the basis of progress toward or completion of the funding agreement requirements and in all cases make payment to recipients under such agreements in full, subject to audit, on or before the last day of the 12-month period beginning on the date of completion of such requirements.

(9) Make an annual report on the STTR Program to SBA and to the Office of Science and Technology Policy.

(10) Develop a model agreement, not later than July 31, 1993, to be approved by SBA, for allocating between small business concerns and research institutions intellectual property rights and rights if any, to carry out follow-on research, development or commercialization.

(11) Develop, in consultation with the Office of Federal Procurement Policy and the Office of Government Ethics, procedures to ensure that federally funded research and development centers that participate in STTR agreements:

(a) Are free from organizational conflicts of interests relative to the STTR Program;

(b) Do not use privileged information gained through work performed for an STTR agency or private access to STTR agency personnel in the development of an STTR proposal; and

(c) Use outside peer review as appropriate.

(12) Develop no later than July 31, 1993, procedures for assessing the commercial merit and feasibility of STTR proposals. These procedures should consider:

(a) The small business concern's record of successfully commercializing STTR or other research;

(b) The existence of second phase funding commitments from private sector or non-STTR funding sources;

(c) The existence of third phase follow-on commitments for the subject of the research; and

(d) The presence of other indicators of the commercial potential of the idea.

9. SBA/STTR Source File

a. *SBA Small Business Technology Transfer (STTR) Program Source File.* The SBA will develop and maintain an STTR mailing list of interested small business concerns. In maintaining this list, SBA will adhere to the provisions of The Freedom of Information Act, The Privacy Act of 1974, 13 CFR 102.20 and 13 CFR 102.3(j). Labels from this list will be available to the Federal participating agencies for STTR

VOL 58 ISS 80 AP 28 1993 UMI

solicitation purposes. Written requests containing justification for the need of labels from this mailing list should be submitted to the Office of Innovation, Research & Technology, U.S. Small Business Administration, 409 Third Street, SW., Washington, DC 20416. A two-week period is required to fill these requests.

b. *SBA Procurement Automated Source System (PASS).* SBA's Office of Procurement Assistance has a Procurement Automated Source System (PASS) that maintains capability profiles of small businesses interested in Federal government procurement opportunities. This system is used by Federal agencies and major prime contractors to identify small business concerns with capabilities needed by the agencies or prime contractors. Agencies interested in accessing PASS should contact their nearest SBA Procurement Assistance Office.

c. *Federal Procurement Data System (FPDS).* Participating agencies should review FPDS data that identify small business awardees of R/R&D contracts as a potential supplement to their existing source data base.

d. *Other Sources.* Agencies may maintain their own mailing lists or use other sources.

10. SBA Coordination of National Critical Technologies

a. SBA will annually obtain information on the current critical technologies from both the National Critical Technologies Panel (or its successor) and the Secretary of Defense and provide such information to the participating Federal agencies and potential STTR participants.

b. The SBA Office of Innovation, Research and Technology will contact the panel and the Department of Defense and request this data in *June* of each year. The data received will then be submitted by letter to each of the participating Federal agencies.

11. SBA Coordination of STTR Solicitation Schedules

a. The Act requires issuance of STTR (Phase I) Program solicitations in accordance with a master schedule coordinated between SPA and the Federal participating agency. The SBA organization responsible for coordination is: Office of Innovation, Research and Technology, U.S. Small Business Administration, 409 Third Street, SW., Washington, DC 20416.

b. For maximum participation by interested small business concerns, it is important that the planning, scheduling and coordination of agency STTR solicitation release dates be completed as early as practicable in order to accommodate the commencement of the fiscal year on October 1. Bunching of agency STTR solicitation release and closing dates may prohibit small business concerns from the preparation and timely submission of proposals for more than one STTR project. SBA's coordination of agency schedules will minimize the bunching of proposed release and closing dates. Participating agencies may elect to publish multiple solicitations within a given fiscal year to facilitate in-house agency proposal review and evaluation scheduling.

c. To accomplish the MASTER SCHEDULE coordination process, the following procedure will be followed:

(1) The SPA may publish STTR Pre-Solicitation Announcements annually. However, the STTR Pre-Solicitation Announcement will not be published for any period in which participating agencies are not soliciting proposals. The STTR solicitation release date shall not be prior to *10 days* after publication of the Pre-Solicitation Announcement (PSA) which contains notice of that specific STTR solicitation.

(2) Each agency representative will notify SBA in writing of its proposed STTR solicitation release and proposal due dates for the next fiscal year on or before *August 1.* The SBA and the agency representatives will coordinate the resolution of any conflicting agency solicitation dates by the second week of August. In all cases, final decisions will be made by SBA's Office of Innovation, Research and Technology.

12. SBA (Phase I) STTR Program Pre-Solicitation Announcements

a. *SBA Publication.* The SBA, as required by public law, shall prepare and publish STTR Phase I Pre-Solicitation Announcements (PSAs) covering all participating Federal agencies. Any agency solicitation announcement changes that occur prior to or after the release of the STTR PSA must immediately be reported in writing to the SBA by the agency STTR representative. If possible, announcement amendments will be released reflecting such changes. Each issue of the STTR PSA will be based upon data received from the participating agencies. However, the agencies are advised that:

(1) The publication of the STTR PSA is not intended to restrict or prohibit application of customary or other internal agency procedures designed to obtain publicity for its R/R&D programs.

(2) The STTR PSA publications by SBA shall not be interpreted as a substitute or relief vehicle for existing statutory and regulatory publication requirements related to individual or specific procurement/grant actions.

b. *STTR Pre-Solicitation Announcement (PSA) Content.* The STTR PSA will include sufficient data to effectively apprise interested small business concerns throughout the Nation of forthcoming STTR Program solicitions—thereby assisting the participating agencies in identifying prospective responsible sources. The agencies shall provide the required information to SBA no later than 30 days prior to the PSA release date in accordance with the master schedule. The following information is required:

(1) The list of topics upon which R/R&D proposals will be sought. Each R/R&D topic shall have up to 10 words in its title.

(2) Agency address and/or phone number from which STTR Program solicitations can be obtained.

(3) Names, addresses, and phone numbers of agency contact points where STTR-related inquires may be directed.

(4) Release date(s) of program solicitation(s).

(5) Closing date(s) for receipt of proposals.

(6) Estimated number and average dollar amounts or level of effort of Phase I awards to be made under the solicitation.

c. For those agencies which use both general topic and more specific subtopic designations in their STTR solicitations, the topic data to be submitted for purposes of the STTR PSA publication should accurately describe the research solicited. Rather than just announcing topic information characterized as "Chemistry" or "Aerodynamics," summarize the subtopic statements and, where appropriate, utilize National Critical Technologies.

d. The STTR PSA will also include notices of STTR conferences and seminars. Only STTR conferences/seminars sponsored by the STTR Federal participating agencies or STTR conferences/seminars sponsored or co-sponsored by the U.S. Small Business Administration will be considered for publication in the STTR Pre-Solicitation Announcement (PSA).

13. Simplified, Standardized and Timely STTR Program Solicitations

a. *Instructions for STTR Program Solicitation Preparation.* The Small Business Act requires "• • • simplified, standardized and timely STTR solicitations" (Section 9(p)(2)(A)). Further, the Act requires the STTR Programs of participating agencies to use a "simplified, standardized funding process" and that the regulatory burden of participating in the STTR Programs be minimized.

b. Therefore, the instructions in the appendix to this policy directive purposely depart from normal government solicitation format and requirements. STTR Program solicitations shall be prepared according to the attached appendix.

c. Agencies shall provide the SBA Office of Innovation, Research and Technology, 5 copies of each solicitation and any modifications thereto no later than the date of release of the solicitation or modification to the public.

d. *Non-STTR R/R&D-Related Actions.* It is not intended that the STTR Program solicitation replace or be used as a substitute for unsolicited proposals or R/R&D awards to small business concerns authorized by existing regulations; or, are the STTR Program solicitation procedures intended to prohibit other agency R/R&D actions with small business concerns that are carried on in accordance with applicable statutory/regulatory authorizations.

14. Simplified and Standardized STTR Funding Process

In its requirement for the establishment of a "simplified, standardized funding process," the STTR legislation requires that specific attention be given to the following areas of STTR Program administration:

a. *Timely Receipt and Review of Proposals.*

(1) Participating agencies shall establish firm schedules and review formats for appropriate distribution of the proposals for reviewing recommendations and submission to the STTR Program manager for award determinations.

(a) All activities related to Phase I proposal reviews shall normally be completed and awards made within 6 months from the closing date of the STTR solicitation.

(b) The STTR Program solicitations for Phase I will establish proposal submission dates. Related to Phase II activity, an agency may establish set proposal submission dates. However, it is anticipated that each agency will negotiate mutually acceptable proposal submission dates with individual Phase I performers, accomplish proposal reviews expeditiously, and proceed with awards.

While it is recognized that Phase II arrangements between the agency and proposer may require more detailed negotiations to establish terms acceptable to both parties, the agencies must not sacrifice the R/R&D momentum created under Phase I by engaging in unnecessarily protracted Phase II proceedings.

(c) It can be anticipated that STTR participants will submit duplicate or similar proposals to more than one soliciting agency when the work projects appear to involve similar topics or requirements which are within the expertise and capability levels of the small business proposer. To the extent reasonably feasible, interagency funding duplications related to acquiring similar technology under the STTR or other Federal programs should not occur.

For this purpose, the standardized STTR Program solicitation will require the proposer to indicate the name and address of the agencies to which duplicate or similar proposals were made and to identify by subject the projects for which the proposal was submitted and the dates submitted. The same information will be required for any previous Federal government awards.

To assist in avoiding duplicate funding, each agency shall provide SBA and each participating STTR agency with a listing of Phase I and Phase II awardees including the complete address and title of the project. This information should be distributed no later than release of contract award information to the public.

b. *Review of STTR Proposals.* Agencies are encouraged to use their normal review process for STTR proposals whether internal or external evaluation is used. A more limited review process may be used for Phase I due to the larger number of proposals anticipated. Where appropriate, "peer" reviews, that are external to the agency, are authorized by the STTR legislation. Participating agencies are cautioned that all review procedures shall be formulated to minimize any possible conflict of interest as it pertains to proposer proprietary data. The standardized STTR solicitation will advise potential proposers that proposals may be subject to an established external review process, but that the proposer may include company designated proprietary information in its proposal.

c. *Proprietary Information Contained in Proposals.* In preparation of the standardized STTR Program solicitation as described in the Appendix of this policy directive, provisions will be included requiring confidential treatment of proprietary information to the extent permitted by law. Offerors will be discouraged from submitting information considered proprietary unless it is deemed essential for proper evaluation of the proposal. The solicitation will require that all proprietary information be clearly identified and marked with a prescribed legend. Agencies may elect to require proposers to limit proprietary information to that essential to the proposal and to have such information submitted on a separate page or pages keyed to the text.

d. *Selection of Awardees.* Participating agencies shall establish a proposal review cycle wherein successful and unsuccessful proposers shall be notified of final award decisions within 6 months of the agency's Phase I proposal closing date.

(1) The standardized STTR Program solicitation shall:

(a) Advise Phase I proposers that additional information may be requested by the awarding agency to evidence awardee responsibility for project completion.

(b) Contain information advising potential offerors of basic proposal evaluation criteria for Phase I and Phase II.

(2) Phase II proposal submissions, review, and selections shall be managed by arrangements between the agency and each Phase I awardee considered for Phase II award.

Within 30 days of the date of award of funding agreements—three copies of the Technical Abstract (containing all information described in the Appendix Paragraph III, C 1–6) for Phase I and Phase II awards shall be submitted to the SBA.

e. *Certification of Size of Firm.* The Act requires that participating agencies ensure that only small business concerns are recipients of STTR awards.

Awarding documents are to include a signed statement by the awardee that the definition of a small business concern as described in Section 4 of this policy directive is met.

f. *Management of the STTR Project.* The small business concern, and not the non-profit research institution, is to provide satisfactory evidence that it will exercise management direction and control of the performance of the STTR funding agreement. Regardless of the proportion of the work or funding of each of the performers under the contract, the small business concern is to be primary contractor or grantee with overall responsibility for its performance.

All agreements between the small business concern and the research institution cooperation in the STTR projects, or any business plans reflecting agreements and responsibilities between the parties during performance of Phase I or II of STTR, or for the commercialization of the resulting

VOL 58 ISS 80 AP 28 1993 UMI

technology, should reflect the controlling position of the small business concern.

g. *Rights in Data Developed Under STTR Funding Agreement.* The STTR legislation provides for "retention of rights in data generated in the performance of the contract by the small business concern".

(1) The intent of the statute is to provide authority for the participating agency to protect technical data generated under the funding agreement, and to refrain from disclosing such data to competitors of the small business concern or from using the information to produce future technical procurement specifications that could harm the small business concern that discovered and developed the innovation until the small business concern has a reasonable chance to seek patent protection, if appropriate.

(2) Therefore, except for program evaluation, participating agencies shall protect such technical data for a period of not less than 4 years from the completion of the project from which the data were generated unless the agencies obtain permission to disclose such data from the contractor or grantee. The government shall retain a royalty-free license for government use of any technical data delivered under an STTR funding agreement whether patented or not.

h. *Allocation of Rights:* A small business concern, before receiving an STTR award, must submit a written agreement between the small business concern and the research institution allocating intellectual property rights and rights, if any, to carry out follow-on research, development, or commercialization. The participating agency may accept an existing agreement between the two parties if it is fair to the small business concern and does not conflict with the interests of the Federal government.

In those instances where a small business concern requests assistance in developing a written agreement, the participating agency will provide a model agreement to be used as guidance by the small business in the development of an agreement.

The model agreement provided to the small business concern should direct the parties, as a minimum, to:

(1) State specially the degree of responsibility, and ownership of any product, process, or other invention or innovation resulting from the cooperative research. The degree of responsibility shall include responsibility for expenses and liability, and the degree of ownership shall also include the specific rights to revenues and profits.

(2) State which party may obtain U.S. or foreign patents or otherwise protect any inventions resulting from the cooperative research.

(3) State which party has the right to any continuation of research including non-STTR follow-on awards.

The Federal government will not normally be a party to any agreement between the small business concern and the research institution. Nothing in the agreement is to conflict with any provisions setting forth the respective rights of the United States and the small business concern with respect to intellectual property rights and with respect to any right to carry out follow-on research.

i. *Title Transfer of Agency Provided Property.* Under STTR legislation, title to equipment purchased in relation to project performance with funds provided under STTR funding agreements may be transferred to the awardee where such transfer would be more cost effective than recovery of the property by the government.

j. *Continued Use of Government Equipment.* STTR legislation directs that a small business concern participating in the third phase of the STTR Program be given continued use, as a directed bailment, of any property transferred by a Federal agency to the small business concern in the second phase of an STTR Program for a period of not less than 2 years, beginning on the initial date of the concern's participation in the third phase of such program.

k. *Cost Sharing.* (1) Cost participation could serve the mutual interest of the participating agencies and certain STTR awardee by helping to assure the efficient use of available resources. Cost-sharing, however, shall not normally be encouraged except where required by other statutes.

(2) Except where required by other statutes, participating agencies shall not, as a general policy, request or require cost sharing on Phase I projects. The standardized STTR Program solicitation (Appendix) will, however, provide information to prospective STTR performers concerning cost-sharing. Cost participation will not be a consideration factor in evaluation of Phase I proposals except where required by other statutes.

l. *Payment Schedules and Cost Principles.*

All STTR funding agreements shall use, as appropriate, current cost principles and procedures authorized for use by the participating agencies. At the time of award, agencies shall inform each STTR awardee, to the extent possible, of the applicable Federal regulations and procedures which refer to the costs that generally will be allowed under funding agreements.

m. *Funding Agreement Types and Fee or Profit.* The legislative requirements for uniformity and standardization require that there be consistency in application of STTR Program provisions among participating agencies. This consistency must consider, however, the need for flexibility by the various agencies in missions and needs as well as the wide variance in funds required to be devoted to STTR Programs in the agencies. The following guidelines are for the purpose of meeting these requirements:

(1) *Funding Agreement.* The choice of type of funding agreement (contract, grant, or cooperative agreement) rests with the awarding agency but must be consistent with the guidelines in Public Law 95–224 (41 U.S.C. 501), as amended by Public Law 97–258 (31 U.S.C. 6301–6308).

(2) *Fee or Profit.* Unless expressly excluded by statute, awarding agencies are to provide for a reasonable fee or profit on STTR funding agreements, including grants, consistent with normal profit margins provided to profit-making firms for R/R&D work.

n. *Periods of Performance and Extensions.*

(1) In keeping with the legislative intent to make a large number of relatively small awards, modification of funding agreements to extend periods of performance, increase the scope of work, or to increase the dollar amount should be minimized, except for options in the original Phase I or Phase II awards.

(2) *Phase I.* Period of performance should normally be approximately 1 year except where agency needs or research plans require otherwise. Exceptions should be minimized.

(3) *Phase II.* Period of performance under Phase II is the subject of negotiations between the selected Phase I recipient and the awarding agency. However, the duration of Phase II should normally be approximately 2 years. Exceptions should be minimized.

o. *Dollar Value of Awards.*

(1) The STTR legislation establishes 1-year awards for the first phase of an STTR program generally not to exceed $100,000, and 2-year awards for the second phase of an STTR program generally not to exceed $500,000.

(2) After award of any funding agreement exceeding $100,000 for Phase I or $500,000 for Phase II, the agency STTR representative shall provide SBA with written justification of such action. The justification shall be submitted with the STTR Annual Report data. Similar justification is required for any dollar increase of a funding agreement which would bring the cumulative dollar amount to a total in excess of the aforestated amounts.

p. *Grant Authority.* The STTR legislation does not, in and of itself, convey grant authority. Each participating agency must secure grant authority in accordance with its normal procedures.

q. *Conflicts of Interest.* Participating agencies are cautioned that awards made to firms owned by or employing current or previous Federal government employees could create conflicts of interest for those employees in violation of the Ethics in Government Act of 1978 (Pub. L. 95–521, as amended). Each participating agency should refer to the standards of conduct review procedures currently in effect for its agency to ensure that such conflicts of interest do not arise.

15. STTR Program Annual Report to SBA

The STTR legislation requires an annual report from the participating agencies in the program. The following paragraphs cite the dates such reports are due, the kinds of information to be included, and the number of copies to be submitted to SBA.

a. *Reporting Dates to SBA.*

Reporting shall be on an annual basis and will be for the period ending September 30 of each fiscal year. The report is due to SBA by December 31 of each year. Example: The report for FY 1994 (October 1, 1993—September 30, 1994) should be submitted to SBA by December 31, 1994.

b. *Small Business Technology Transfer (STTR) Program*

(1) Agency total fiscal year, for FY 1994 and each year thereafter, extramural research and research and development total obligations as reported to the National Science Foundation pursuant to the annual Budget of the United States Government.

(2) STTR Program total fiscal year dollars derived by applying the statute per centum to the agencies' extramural research and research and development total obligations.

(3) STTR Program fiscal year dollars obligated through STTR Program funding agreements for Phase I and Phase II.

(4) Number of STTR individual solicitations released during the fiscal year and the number of topics and subtopics contained in each solicitation.

(5) Number of copies of each STTR solicitation distributed by the participating agency.

(6) Number of proposals received by the agency for each topic and subtopic in each STTR solicitation.

(7) For both Phase I and Phase II, the STTR awardee's name and address, research institution's name and address, dollar and percent of award performed by the small business concern and the research institution, solicitation topic and subtopic, solicitation number, project title, and total dollar amount of funding agreement. Identify minority small business, women-owned small business and Phase II awardees with a follow-on funding commitment.

(8) The names and addresses of small business concerns for whom the Phase I process exceeded the 6-month period from the closing date of the STTR solicitation to award of the funding agreement. (See 14.a.(1)(a) of this policy directive.)

(9) For an agency Phase III award using non-STTR Federal funds, to continue a Phase II project, the agency shall provide the name, address, project title and dollar amount obligated.

(10) Report the number of National Critical Technology topic or subtopic funding agreements, the percentage by number and dollar amount of total STTR awards to such National Critical Technologies.

16. SBA Program to Monitor and Survey STTR Activity

a. *Examples of STTR Areas To Be Monitored by SBA.*

(1) *STTR Funding Allocations.* Of major significance to the success of the STTR Program is the magnitude and nature of the agencies' funding allocations identified for fiscal year STTR applications. The STTR legislation explicitly relates to both the definition of the STTR effort, R/R&D (as defined in the Act and OMB Circular A–11), and the mathematical methodology for determining fiscal year participation levels for all work categorized within the statutory definitions. SBA will monitor these allocations.

(2) *STTR Program Solicitation and Award Status.* The accomplishment of scheduled STTR events, such as the release of STTR Program solicitation and the award of contract, grant, or cooperative agreement award, is critical to meeting statutory mandates and to operating an effective, useful program. SBA plans to monitor these and other operational features of STTR Program implementation including the status of awards taking longer than the 6-month period set forth in 14.a.(1)(a) of this policy directive.

Except in instances where SBA assistance is required related to a specific STTR project, contract, etc., SBA does not intend to monitor administration of the awards.

(3) *Follow-on Funding Commitments.* SBA may monitor whether follow-on non-Federal funding commitments obtained by Phase II awardees for Phase III were considered in the evaluation of Phase II proposals as required by the Act.

(4) *Agency Rules and Regulations.* It is essential that no implementing regulation be promulgated by the participating agencies that is inconsistent with or contradicts either the letter or intent of the legislation and this directive. SBA's monitoring activity will include review of rules and regulations and procedures generated to facilitate intra-agency STTR Program implementation.

17. Socially and Economically Disadvantaged Small Business Concerns and Women-Owned Small Business Concerns

To foster and encourage participation by socially and economically disadvantaged small business concerns in scientific and technological innovation, the legislation establishes as a purpose to improve the Federal government's dissemination of information concerning the Small Business Technology Transfer Program, particularly with regard to program participation by women-owned small business concerns and by socially and economically disadvantaged small business concerns.

a. To carry out this purpose of the statute, SBA and the Federal participating agencies will make outreach efforts to find and place innovative women-owned small business concerns and socially and economically disadvantaged small business concerns in the STTR Program information system.

b. The SBA will develop, participate in, and, when appropriate and feasible, sponsor seminars for innovative women-owned small business concerns and socially and economically disadvantaged small business concerns to inform them of the STTR Program.

c. The SBA will inform women-owned small business concerns and socially and economically disadvantaged small business concerns of Federal and commercial assistance and services available for STTR Program participants.

d. While these small business concerns will be required to compete for STTR awards on the same basis as all

VOL
58
ISS
80
AP
28
1993
UMI

other small business concerns, participating agencies are encouraged to work independently and cooperatively with SBA to develop methods to encourage qualified women-owned small business concerns and socially and economically disadvantaged small business concerns to participate in their STTR Programs.

Appendix—Instructions for STTR Pilot Program Solicitation Preparation

Section 9(p) of the Small Business Act (The Act) (15 U.S.C. 638(p), as amended by Public Law 102–564) requires "• • • simplified, standardized and timely STTR solicitations" (Section 9(p)(2)(A)). Further, the Act requires the STTR Programs of participating agencies to utilize a "uniform process" (15 U.S.C. 638(e)(6), as amended) and that the regulatory burden of participating in the STTR Programs be minimized. Therefore, the following instructions purposely depart from normal government solicitation formats and requirements. STTR solicitations will be prepared and issued a program solicitations in accordance with the following instructions.

Limitation in Size of Solicitation

In the interest of meeting the legislative requirement for simplified and standardized solicitations, the entire STTR solicitation with the exception of section VIII "Research Topics," described below, shall be limited to 23 pages. There is no page limit on Section VIII, "Research Topics."

Format

STTR Program solicitations will be prepared in a simplified, standardized, easily read and understand format including a cover sheet, a table of contents and the following sections in the order listed (content of each section is discussed below):

I. Program Description
II. Definitions
III. Proposal Preparation Instructions and Requirements
IV. Method of Section and Evaluation Criteria
V. Considerations
VI. Submission of Proposals
VII. Scientific and Technical Information Sources
VIII. Research Topics
IX. Submission Forms and Certifications

Cover Sheet

The cover sheet or title page of an STTR Program Solicitation shall clearly identify the solicitation as a Small Business Technology Transfer (STTR) Program Solicitation, identify the agency releasing the solicitation, specify date (or dates) on which proposals are due under the solicitation, and state the solicitation number.

Instructions for Preparation of STTR Program Solicitation Sections I through IX

I. Program Description

A. Summarize in narrative form the invitation to submit proposals and the objectives of the STTR Program.

B. Describe in narrative form the agency's STTR Program including a description of the three phases. Note in your description that the solicitation is for Phase I proposals only.

C. Describe program eligibility, as follows:

Eligibility. Each concern submitting a proposal must qualify as a small business concern for R/R&D purposes at the time of award. The small business concern will submit a proposal for cooperative research and development with a non-profit research institution as defined in section 4(5) of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3701), and which includes Federally Funded Research and Development Centers as identified by the National Science Foundation in accordance with the governmentwide Federal Acquisition Regulations.

For both Phase I and Phase II, the R/R&D work must be performed in the United States.

D. List name, address and telephone number of agency contacts for general information on the STTR Program solicitation.

II. Definitions

Whenever terms are used that are unique to either the STTR Program, a specific STTR solicitation or a portion of a solicitation, they will be defined in a separate section entitled "Definitions." As a minimum, the definitions of "small business concern", "socially and economically disadvantaged small business concern", "cooperative research", "research institution", "women-owned small business concern", and "subcontract" as stated in Paragraph 4 of this policy directive shall be included.

III. Proposal Preparation Instructions and Requirements

The purpose of this section is to inform the proposer on what to include in his or her proposal and to set forth limits on what may be included. It should also provide guidance to assist proposers in improving the quality and acceptance of proposals particularly to firms that may not have previous government experience.

A. *Limitations on Length of Proposal.* Include at least the following information:

1. STTR Phase I proposals shall not exceed a total of 25 pages, including cover page, budget, and all enclosures or attachments. Pages should be of standard size (8½" x 11"; 21.6 cm x 27.9 cm) and should conform to the standard formatting instructions; in particular, 2.5 cm (1 inch) margins and type no smaller than 10 point font size.

2. A notice that no additional attachments, appendices or references beyond the 25-page limitation shall be considered in proposal evaluation and that proposals in excess of the 25-page limitation shall not be considered for review or award.

B. *Proposal Cover Sheet.* Every proposer will be required to include at least the following information on the first page of proposals. Items 9 and 11 are for statistical purposes only.

1. Agency and solicitation number.
2. Topic Number.
3. Subtopic Number.
4. Topic Area.
5. Project Title.
6. Name and Complete Address of Firm.
7. Name and address of research institution.
8. Small Business Certification as follows:

"The above concern certifies it is a small business concern and meets the definition as stated in this solicitation."

9. Socially and Economically Disadvantaged Small Business Concern Certification as follows:

"The above concern certifies that it ____ does ____ does not qualify as a socially and economically disadvantaged small business concern and meets the definition as stated in this solicitation."

10. The small business concern will certify that at least 40 percent of the work is to be performed by the small business concern and at least 30 percent of the work is to be performed by the research institution as follows:

"The above concern certifies that it will perform ____ percent of the work and the research institution will perform ____ percent of the work under this funding agreement."

11. Women-owned Small Business Concern Certification as follows:

The above concern certifies that it ____ does ____ does not qualify as a women-owned small business concern and meets the definition as stated in this solicitation.

12. A disclosure permission statement such as follows may be included at the discretion of the funding agency:

"Will you permit the government to disclose the title and technical abstract page of your proposed project, plus the name, address, and telephone number of the corporate official of your concern, if your proposal does not result in an award, to concerns that may be interested in contacting you for further information?"
Yes ____ No ____

13. Signature of a company official of the proposing small business concern and that individual's typed name, title, address, telephone number, and date of signature.

14. Signature of Principal Investigator or Project Manager and that individual's typed name, organization, title, address, telephone number, and date of signature.

15. Legend for proprietary information as described in the "Considerations" section of this program solicitation if appropriate.

C. *Abstract or Summary.* Proposers will be required to include a one-page project summary of the proposed R/R&D including at least the following:

1. Name and address of small business concern.
2. Name and address of cooperative research institution.
3. Name and title of principal investigator or project manager.
4. Agency name, solicitation number, solicitation topic and subtopic.
5. Title of project.
6. Technical abstract, limited to two hundred words.
7. Summary of the anticipated results and implications of the approach (both Phases I and II).
8. Summary of the potential commercial applications of the research.

D. *Technical Content.* STTR Program solicitations shall require as a minimum the following to be included in proposals submitted thereunder:

1. *Identification and Significance of the Problem or Opportunity.* A clear statement of the specific technical problem or opportunity addressed.

2. *Phase I Technical Objectives.* State the specific objectives of the Phase I research and development effort, including the technical questions it will try to answer to determine the feasibility of the proposed approach.

3. *Phase I Work Plan.* A detailed description of the Phase I R/R&D plan. The plan should indicate what will be done, where it will be done and how the R/R&D will be carried out. Phase I R/R&D should address the objectives and the questions cited in D.2. above. The methods planned to achieve each objective or task should be discussed in detail. The work plan will specifically address the amount and type of work to be performed by the small business concern and by the research institution.

4. *Related Research or Research and Development.* Describe significant R/R&D that is directly related to the proposal including any conducted by the project manager/principal investigator or by the proposing small business concern. Describe how it relates to the proposed effort, and any planned coordination with outside sources. The proposer must persuade reviewers of his or her awareness of key recent R/R&D conducted by others in the specific topic area.

5. *Key Personnel and Bibliography of Directly Related Work.* Identify key personnel involved in Phase I including their directly related education, experience, and bibliographic information. Where vitae are extensive, summaries that focus on the most relevant experience or publications are desired and may be necessary to meet the proposal size limitation.

6. *Relationship with Future Research or Research and Development.*

a. State the anticipated results of the proposed approach if the project is successful (Phase I and II).

b. Discuss the significance of the Phase I effort in providing a foundation for the Phase II R/R&D effort.

7. *Facilities.* A detailed description, availability and location of instrumentation and physical facilities proposed for Phase I should be provided.

8. *Consultants.* Involvement of consultants in the planning and research stages of the project is permitted.

a. If such involvement is intended, it should be described in detail.

9. *Potential Post Applications.* Briefly describe:

a. Whether and by what means the proposed project appears to have potential commercial application.

b. Whether and by what means the proposed project appears to have potential use by the Federal government.

10. *Similar Proposals or Awards.* A firm may elect to submit proposals for essentially equivalent work under other Federal program solicitations, or may have received other Federal awards for essentially equivalent work. In these cases, a statement must be included in each such proposal indicating:

a. The name and address of the agencies to which proposals were submitted or from which awards were received.

b. Date of proposal submission or date of award.

c. Title, number, and date of solicitations under which proposals were submitted or awards received.

d. The specific applicable research topics for each proposal submitted or award received.

e. Titles of research projects.

f. Name and title of project manager or principal investigator for each proposal submitted or award received.

E. *Cost Breakdown/Proposed Budget.* The solicitation will require the submission of simplified cost or budget data.

F. *Allocation of Rights.* The solicitation will require that a small business concern submit a written agreement between the small business concern and the research institution allocating intellectual property rights and rights, if any, to carry out follow-on research, development or commercialization.

G. *Written Cooperative Agreement.* The proposing small business concern is to provide an original of the agreement between the small business concern and the research institution. The agreement is to include the signature of an official of the small business concern and the signature of an official of the research institution.

IV. Method of Selection and Evaluation Criteria

A. *Standard Statement.* Essentially the following statement shall be included in all STTR Program solicitations:

All Phase I and II proposals will be evaluated and judged on a competitive basis. Proposals will be initially screened to determine responsiveness. Proposals passing this initial screening will be technically evaluated by engineers or scientists to determine the most promising technical and scientific approaches. Each proposal will be judged on its own merit. The agency is under no obligation to fund any proposal or any specific number of proposals in a given topic. It also may elect to fund several or none of the proposed approaches to the same topic or subtopic.

Phase II proposals may only be submitted by Phase I award winners within the same agency.

B. *Evaluation Criteria.*

1. The agency in its evaluation process shall develop a standardized method that will consider as a minimum the following factors:

a. The technical approach and the anticipated agency and commercial benefits that may be derived from the research.

b. The adequacy of the proposed effort and its relationship to the fulfillment of requirements of the research topic or subtopics.

VOL 58 ISS 80 AP 28 1993 UMI

c. The soundness and technical merit of the propose approach and its incremental progress toward topic or subtopic solution.

d. Qualifications of the proposed principal/key investigators supporting staff and consultants.

e. In Phase II, evaluations of proposals require, among other things, consideration of a proposal's commercial potential as evidenced by:

(1) The small business concern's record of commercializing STTR or other research,

(2) The existence of second phase funding commitments from private sector or non-STTR funding sources,

(3) The existence of third phase follow-on commitments for the subject of the research, and,

(4) The presence of other indicators of commercial potential of the ideal.

2. The factors in subparagraph B.1. and other approprate evaluation criteria, if any, shall be specified in the "Method of Selection" section of STTR Program solicitations.

C. *Peer Review.* If it is contemplated that as a part of STTR proposal evaluation external peer review will be used, the program solicitation must so indicate.

D. *Release of Proposal Review Information.* After final award decisions have been announced, the technical evaluations of the proposer's proposal may be provided to the proposer. The identify of the reviewer shall not be disclosed.

V. Considerations

This section shall include, as a minimum, the following information:

A. *Awards,* Indicate the estimated number and type of awards anticipated under the particular STTR Program solicitation in question including:

1. Approximate number of Phase I awards expected to be made.

2. Type of funding agreement, i.e., contract, grant or cooperative agreement.

3. Whether fee or profit will be allowed.

4. Cost basis of funding agreement, e.g., grant, firm-fixed-price, cost reimbursement, or cost-plus-fixed fee.

5. Information on the approximate average dollar value of awards for Phase I and Phase II.

B. *Reports.* Describe the frequency and nature of reports that will be required under Phase I funding agreements. Interim reports should be brief letter reports.

C. *Payment Schedule.* Specify the method and frequency of progress and final payment under Phase I and Phase II agreements.

D. *Innovations, Inventions and Patents.*

1. *Limited Rights Information and Data.*

a. *Proprietary Information.* Essentially the following statement shall be included in all STTR solicitations:

Information contained in unsuccessful proposals will remain the property of the proposer. The government may, however, retain copies of all proposals. Public release of information in any proposal submitted will be subject to existing statutory and regulatory requirements.

If proprietary information is provided by a proposer in a proposal which constitutes a trade secret, proprietary commercial or financial information, confidential personal information or data effecting the national security, it will be treated in confidence, to the extent permitted by law, provided this information is clearly marked by the proposer with the term "confidential proprietary information" and provided the following legend appears on the title page of the proposal:

"For any purpose other than to evaluate the proposal, this data shall not be disclosed outside the government and shall not be duplicated, used, or disclosed in whole or in part, provided that if a funding agreement is awarded to this proposer as a result of or in connection with the submission of this data, the government shall have the right to duplicate, use, or disclose the data to the extent provided in the funding agreement. This restriction does not limit the government's right to use information contained in the data if it is obtained from another source without restriction. The data subject to this restriction are contained on pages ____ of this proposal."

Any other legend may be unacceptable to the government and may constitute grounds for removing the proposal from further consideration and without assuming any liability for inadvertent disclosure. The government will limit dissemination of such information to within official channels.

b. *Alternative To Minimize Proprietary Information.* Agencies may elect to instruct proposers to:

(1) Limit proprietary information to only that absolutely essential to their proposal.

(2) Provide proprietary information on a separate page with a numbering system to key it to the appropriate place in the proposal.

c. *Rights in Data Developed Under STTR Funding Agreements.* To notify the small business concern of the policy stated in Para. 14.g. of this policy directive, essentially the following statement will be included in all STTR Program solicitations:

"These STTR data are furnished with STTR rights under Contract No. ____ (and subcontract ____ if appropriate). For a period of 4 years after acceptance of all items to be delivered under this contract, the government agrees to use these data for government purposes only, and they shall not be disclosed outside the government (including disclosure for procurement purposes) during such period without permission of the contractor, except that, subject to the foregoing use and disclosure prohibitions, such data may be disclosed for use by support contractors. After the aforesaid 4-year period the government has a royalty-free license to use, and to authorize others to use on its behalf, these data for government purposes, but is relieved of all disclosure prohibitions and assumes no liability for unauthorized use of these data by third parties. This Notice shall be affixed to any reproductions of these data, in whole or in part."

d. *Copyrights.* Include an appropriate statement concerning copyrights and publications; for example:

"With prior written permission of the contracting officer, the awardee normally may copyright and publish (consistent with appropriate national security considerations, if any) material developed with (agency name) support. (Agency name) receives a royalty-free license for the Federal government and requires that each publication contain an appropriate acknowledgement and disclaimer statement."

e. *Patents.* Include an appropriate statement concerning patents; for example:

"Small business concerns normally may retain the principal worldwide patent rights to any invention developed with government support. The government receives a royalty-free license for Federal government use, reserves the right to require the patentholder to license others in certain circumstances, and requires that anyone exclusively licensed to sell the invention in the United States must normally manufacture it domestically. To the extent authorized by 35 U.S.C. 205, the government will not make public any information disclosing a government-supported invention for a four-year period to allow the awardee a reasonable time to pursue a patent."

E. *Cost-Sharing.* Unless in conflict with another statute, include a statement essentially as follows:

"Cost-sharing is permitted for proposals under this program solicitation; however, cost-sharing is not required. Cost-sharing will not be an evaluation factor in consideration of your Phase I proposal."

Where cost-sharing is required by statute, include an appropriate statement.

F. *Profit or Fee.* Include a statement on the payment of profit or fee on awards made under the STTR Program solicitation.

G. *Joint Ventures or Limited Partnerships.* Include essentially the following language:

"Joint ventures and limited partnerships are eligible to participate provided the entity created qualifies as a small business as defined in this program solicitation."

H. *Research and Analytical Work.* Include essentially the following statement:

"The STTR Pilot program is a cooperative research or research and development effort conducted jointly by a small business concern and a research institution in which not less than 40 percent of the work is performed by the small business concern and not less than 30 percent of the work is performed by the research institution."

I. *Contractor Commitments.* To meet the legislative requirement that STTR solicitations be simplified, standardized and uniform, clauses expected to be in or required to be included in STTR funding agreements shall not be included in full or by reference in STTR Program solicitations. Rather, proposers shall be advised that they will be required to make certain legal commitments at the time of execution of funding agreements resulting from STTR Program solicitations. Essentially, the following statement shall be included in the "Consideration" section of STTR Program solicitations:

"Upon award of a funding agreement, the awardee will be required to make certain legal commitments through acceptance of numerous clauses in Phase I funding agreements. The outline that follows is illustrative of the types of clauses to which the contractor will be committed. This list should not be understood to represent a complete list of clauses to be included in Phase I funding agreements, or to be specific wording of such clauses. Copies of complete terms and conditions are available upon request."

J. *Summary Statements.* The following are illustrative of the type of summary statements to be included immediately following the statement in the subparagraph I. These statements are examples only and may vary depending upon the type of funding agreement.

1. *Standards of Work.* Work performed under the funding agreement must conform to high professional standards.

2. *Inspection.* Work performed under the funding agreement is subject to government inspection and evaluation at all times.

3. *Examination of Records.* The Comptroller General or other Federal auditor organization shall have the right to examine any directly pertinent records of the awardee involving transactions related to this funding egreement.

4. *Default.* The government may terminate the funding agreement if the contractor fails to perform the work contracted.

5. *Termination for Convenience.* The STTR funding agreement may be terminated at any time by the government if it deems termination to be in its best interest, in which case the awardee will be compensated for work performed and for reasonable termination costs.

6. *Disputes.* Any dispute concerning the funding agreement which cannot be resolved by agreement shall be decided by the contracting officer with right of appeal.

7. *Contract Work Hours.* The awardee may not require an employee to work more than eight hours a day or forty hours a week unless the employee is compensated accordingly (e.g., overtime pay).

8. *Equal Opportunity.* The awardee will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin.

9. *Affirmative Action for Veterans.* The awardee will not discriminate against any employee or application for employment because he or she is a disabled veteran or veteran of the Vietnam era.

10. *Affirmative Action for Handicapped.* The awardee will not discriminate against any employee or applicant for employment because he or she is physically or mentally handicapped.

11. *Officials Not To Benefit.* No government official shall benefit personally from the STTR funding agreement.

12. *Covenant Against Contingent Fees.* No person or agency has been employed to solicit or secure the funding agreement upon an understanding for compensation except bonafide employees or commercial agencies maintained by the awardee for the purpose of securing business.

13. *Gratuities.* The funding agreement may be terminated by the government if any gratuities have been offered to any representative of the government to secure the contract.

14. *Patent Infringement.* The awardee shall report each notice or claim of patent infringement based on the performance of the funding agreement.

K. *Additional Information.* Information pertinent to an understanding of the administration requirements of STTR proposals and funding agreements not included elsewhere shall be included in this section. As a minimum, statements essentially as follows shall be included under "Additional Information" in STTR Program solicitations:

1. This program solicitation is intended for informational purposes and reflects current planning. If there is any inconsistency between the information contained herein and the terms of any resulting STTR funding agreement, the terms of the funding agreement are controlling.

2. Before award of an STTR funding agreement, the government may request the proposer to submit certain organizational, management, personnel, and financial information to assure responsibility of the proposer.

3. The government is not responsible for any monies expended by the proposer before award of any funding agreement.

4. This program solicitation is not an offer by the government and does not obligate the government to make any specific number of awards. Also, awards under the STTR Program are contingent upon the availability of funds.

5. The STTR Program is not a substitute for existing unsolicited proposal mechanisms. Unsolicited proposals shall not be accepted under the STTR Program in either Phase I or Phase II.

6. If an award is made pursuant to a proposal submitted under this STTR Program solicitation, the contractor or grantee or party to a cooperative agreement will be required to certify that he or she has not previously been, nor is currently being, paid for essentially equivalent work by any agency of the Federal government.

VI. Submission of Proposals

A. This section shall clearly specify the closing date on which all proposals are due to be received.

B. This section shall specify the number of copies of the proposal that are to be submitted.

C. This section shall clearly set forth the complete mailing and/or delivery address(es) where proposals are to be submitted.

D. This section may include other instructions such as the following:

1. *Bindings.* Please do not use special bindings or covers. Staple the pages in the upper left corner of the cover sheet of each proposal.

2. *Packaging.* All copies of a proposal should be sent in the same package.

VII. Scientific and Technical Information Sources

Wherever descriptions of research topics or subtopics include reference to publications, information on where such publications will normally be available shall be included in a separate

VOL 58 ISS 80 AP 28 1993 UMI

section of the solicitation entitled "Scientific and Technical Information Sources."

VIII. Research Topics

Describe the R/R&D topics and subtopics for which proposals are being solicited sufficiently to inform the proposer of technical details of what is desired while leaving sufficient flexibility in order to obtain the greatest degree of creativity and innovation consistent with the overall objectives of the STTR Programs.

IX. Submission Forms and Certifications

Up to three copies each of proposal preparation forms necessary to the contracting and granting process may be required. This section may include Proposal Summary, Proposal Cover, Budget, Checklist, and other forms the sole purpose of which is to meet the mandate of law or regulation and simplify the submission of proposals.

This section may also include certifying forms required by legislation, regulation or standard operating procedures, to be submitted by the proposer to the contracting or granting agency. This would include certifying forms such as those for the protection of human and animal subjects.

BILLING CODE 8025-01-M

DEPARTMENT OF STATE

(Public Notice 1799)

Advisory Committee on Historical Diplomatic Documentation; Meeting

The Advisory Committee on Historical Diplomatic Documentation will meet May 20-21, 1993, at 9:30 a.m. in the Department of State.

The Committee will meet in open session from 9:30 a.m. on the morning of Thursday, May 20, 1993, until noon of that day, in room 1408, Main State. The remainder of the Committee's sessions, until the end of this meeting on Friday, May 21, at 4 p.m., will be closed to the public in accordance with section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463), and will be held in room 1205, Main State. It has been determined that discussion during these portions of the meeting will involve consideration of matters not subject to public disclosure under 5 U.S.C. 552b (c)(1), and that the public interest requires that such activities will be withheld from disclosure.

Questions concerning the meeting should be directed to William Z. Slany, Executive Secretary, Advisory Committee on Historical Diplomatic Documentation, Department of State, Office of the Historian, Washington, DC, 20520, telephone (202) 663-1123.

Dated: April 22, 1993.

William Z. Slany,

Executive Secretary.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Dated: April 21, 1993.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Bureau of Alcohol, Tobacco and Firearms

OMB Number: 1512-0057
Form Numbers: ATF F 487-B (5107.7)
Type of Review: Extension
Title: Application and Permit to Ship Liquors and Articles of Puerto Rican Manufacture Taxpaid.
Description: ATF F 487-B (5107.7) is used to document the shipment of tax paid Puerto Rican liquors and articles into the United States. The form is verified by Puerto Rican and U.S. Treasury officials to certify that products are either taxpaid or deferred under an appropriate bond. Serves as method of protection of the revenue.
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 20
Estimated Burden Hours Per Respondent: 30 minutes
Frequency of Response: On occasion
Estimated Total Reporting Burden: 100 hours

OMB Number: 1512-0167
Form Number: ATF F 3072 (5210.14)
Type of Review: Extension
Title: Transportation in Bond, and Notice of Release of Puerto Rican Cigars, Cigarette Papers, or Cigarette Tubes.
Description: ATF 3072 (5210.14) is used to document the shipment of taxable tobacco products brought into the United States in bond from Puerto Rico. The form documents certification by ATF to account for the tax liability as well as any adjustments assessed to the bonded licensee. The form also describes the shipment and identification of licensee who receives the products.
Respondents: Businesses or other for-profit
Estimated Number of Respondents: 50
Estimated Burden Hours Per Respondent: 15 minutes
Frequency of Response: On occasion
Estimated Total Reporting Burden: 200 hours

OMB Number: 1512-0171
Form Number: ATF F 3373 (5220.3)
Type of Review: Extension
Title: Inventory—Export Warehouse Proprietor.
Description: This form is necessary to establish the contingent tax liability on tobacco products on the bonded premises of an export tobacco warehouse. The inventory occurs at the beginning and closing of the business and upon the request of ATF.
Respondents: Businesses or other for-profit, Small businesses or organizations
Estimated Number of Respondents: 10
Estimated Burden Hours Per Respondent: 5 hours
Frequency of Response: On occasion
Estimated Total Reporting Burden: 50 hours

OMB Number: 1512-0493
Form Number: ATF F 5300.3
Type of Review: Extension
Title: Letterhead Request for Information in Regard to Federal Firearms Dealer's Records (Dealer's Records of Acquisition, Disposition and Supporting Data).
Description: This letter gives the user a simplified format to list the required information ATF needs to perform its functions in regard to the law. The respondent saves time because the questions are simple and a return address is supplied. The form is used to maintain a current status of firearms licensees.
Respondents: Individuals or households, Businesses or other for-profit, Small businesses or organizations
Estimated Number of Respondents: 28,000
Estimated Burden Hours Per Respondent: 5 minutes
Frequency of Response: On occasion
Estimated Total Reporting Burden: 2,380 hours
Clearance Officer: Robert N. Hogarth, (202) 927-8930, Bureau of Alcohol, Tobacco and Firearms, Room 3200, 650 Massachusetts Avenue, NW., Washington, DC 20226.
OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports, Management Officer.

BILLING CODE 4830-01-M

Public Information Collection Requirements Submitted to OMB for Review

Dated: April 22, 1993.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0004
Form Number: IRS Form SS-8
Type of Review: Revision
Title: Determination of Employee Work Status for Purposes of Federal Employment Taxes and Income Tax Withholding
Description: This form is used by employers and workers to furnish information to IRS in order to obtain a determination as to whether a worker is an employee for purposes of Federal employment taxes and income tax withholding. IRS uses the information on Form SS-8 to make the determination.
Respondents: Individuals or households, State or local governments, Farms, Businesses or other for-profit, Federal agencies or employees, Non-profit institutions, Small businesses or organizations.
Estimated Number of Respondents/ Recordkeepers: 9,730
Estimated Burden Hours Per Respondent/Recordkeeper:
Recordkeeping—34 hours, 41 minutes
Learning about the law or the form—6 minutes
Preparing and sending the form to the IRS—40 minutes
Frequency of Response: On occasion
Estimated Total Reporting Burden: 344,831 hours
Clearance Officer: Garrick Shear, (202) 622-3869, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.
OMB Reviewer: Milo Sunderhauf, (202) 395-6880, Office of Management and Budget, Room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports, Management Officer.

BILLING CODE 4830-01-M

Public Information Collection Requirements Submitted to OMB for Review

Dated: April 21, 1993.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

U.S. Customs Service

OMB Number: 1515-0129
Form Number: None
Type of Review: Extension
Title: Change in Status of Transaction
Description: The person submitting a request for a ruling in connection with a Customs transaction should advise Customs in writing when a transaction described as prospective becomes current. This is essential so that the field office concerned is advised of the fact that the ruling is pending.
Respondents: Businesses or other for-profit, Small businesses or organizations
Estimated Number of Respondents: 40
Estimated Burden Hours Per Respondent: 1 hour
Frequency of Response: On occasion
Estimated Total Reporting Burden: 1 hour
Clearance Officer: Ralph Meyer (202) 927-1552, U.S. Customs Service, Paperwork Management Branch, room 6316, 1301 Constitution Avenue, NW., Washington, DC 20229.
OMB Reviewer: Milo Sunderhauf (202) 395-6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

VOL 58 ISS 80 AP 28 1993 UMI

Sunshine Act Meetings

Federal Register
Vol. 58, No. 80
Wednesday, April 28, 1993

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

DATE: Week of April 26, 1993.

PLACE: Room 600, 1730 K Street, NW., Washington, DC.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Tuesday, April 27, 1993

10:00 a.m., the Commission will hear oral argument on the following in open session:

Air Products & Chemicals, Inc., Docket No. PENN 91-1488-R (Issues include whether Air Product's coal handling facilities at the Cambria Co-Generation Facility are subject to the jurisdiction of the Federal Mine Safety and Health Act of 1977.)

Immediately following oral argument, the Commission will consider and act upon this matter. This meeting will be closed pursuant to 5 U.S.C. § 552b(c)(10).

Wednesday, April 28, 1993

10:00 a.m., the Commission will hear oral argument on the following in open session:

Twentymile Coal Co., Docket No. WEST 91-449 (Issues include whether the judge erred in finding that Twentymile's violation of 30 CFR 70.100(a) was of a significant and substantial nature.)

Immediately following oral argument, the Commission will consider and act upon this matter. This meeting will be closed pursuant to 5 U.S.C. § 552b(c)(10).

Thursday, April 29, 1993

10:00 a.m., the Commission will hear oral argument on the following in open session:

Asarco, Inc., Docket No. WEST 92-624-RM (Issues include whether the judge erred in finding that Asarco violated 30 CFR 57.3360 by failing to provide adequate ground support.)

Immediately following oral argument, the Commission will consider and act upon this matter. This meeting will be closed pursuant to 5 U.S.C. § 552b(c)(10).

Any person wishing to attend any of these oral arguments who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR 2706.150(a)(3) and 2706.160(e).

CONTACT PERSON FOR MORE INFO: Jean Ellen (202) 653-5629/(202) 708-9300 for TDD Relay/1-800-877-8339 for toll free.

Dated: April 19, 1993.

Jean H. Ellen,

Agenda Clerk.

BILLING CODE 6735-01-M

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: 58 FR 19874, April 16, 1993.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: Approximately 11:00 a.m., Wednesday, April 21, 1993, following a recess at the conclusion of the open meeting.

CHANGES IN THE MEETING: Addition of the following closed item(s) to the meeting:

Briefing on bank examination policy.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Dated: April 26, 1993.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 93-10099 Filed 4-26-93; 2:08 pm]

BILLING CODE 6210-01-M

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 11:30 a.m., Monday, May 3, 1993.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: April 23, 1993.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF JUSTICE

UNITED STATES PAROLE COMMISSION

Record of Vote of Meeting Closure

(Public Law 94-409)

(5 U.S.C. Sec. 552b)

I, Edward F. Reilly, Jr., Chairman of the United States Parole Commission, presided at a meeting of said Commission which started at approximately nine-thirty a.m. on Monday, April 19, 1993 at the Commission's Central Office, 5550 Friendship Boulevard, Chevy Chase, Maryland 20815. The purpose of the meeting was to decide fourteen appeals from National Commissioners' decisions pursuant to 28 C.F.R. Section 2.27. Further, also discussed was the approval of parole hearing examiner appointments. Five Commissioners were present, constituting a quorum when the vote to close the meeting was submitted.

Public announcement further describing the subject matter of the meeting and certifications of General Counsel that this meeting may be closed by vote of the Commissioners present were submitted to the Commissioners prior to the conduct of any other business. Upon motion duly made, seconded, and carried, the following Commissioners voted that the meeting be closed: Edward F. Reilly, Jr., Carol Pavilack Getty, Jasper Clay, Jr., Vincent Fechtel, Jr., and John R. Simpson.

IN WITNESS WHEREOF, I make this official record of the vote taken to close this meeting and authorize this record to be made available to the public.

Dated: April 19, 1993.

Edward F. Reilly, Jr.,

Chairman, U.S. Parole Commission.

[FR Doc. 93-10100 Filed 4-26-93; 2:08 pm]

BILLING CODE 4410-01-M

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

Open Forum on Children and Youth Services: Redefining the Federal Role for Libraries

DATE AND TIME: May 4, 1993-1:00-4:30 p.m.; May 5, 9 a.m.-4:30 p.m.

PLACE: Boston Public Library, Rabb Lecture Hall, 666 Boylston Street, Boston, MA 02117.

STATUS: Open.

Purpose: Open forum on the changing role of the Federal government in support of library and information services, and literacy programs for children and youth. The forum provides an opportunity for representatives from school library media centers, public libraries, academic libraries, educational, literacy, and information services organizations, companies, associations, and institutions to offer comments, observations, and suggestions related to Federal roles and responsibilities for library and information services, and literacy programs offered to children and youth.

Parties interested in presenting oral or written statements should notify Kim Miller or Peter Young at NCLIS, 1110 Vermont Avenue, NW., Suite 820, Washington, DC 20005 (202-606-9200) by 30 April 1993. Written statements must be received at the NCLIS office by 15 June 1993.

To request further information or to make special arrangements for physically challenged persons, contact Barbara Whiteleather, NCLIS, no later than one week in advance of the forum.

Dated: April 15, 1993.

Peter R. Young,

Executive Director.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [58 FR 21775 April 26, 1993].

STATUS: Open meeting.

PLACE: 450 Fifth Street, N.W., Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Friday, April 16, 1993.

CHANGE IN THE MEETING: Time/Room change.

An open meeting scheduled for Tuesday, April 27, 1993, at 3:30 p.m. has been changed to 2:30 p.m., in Room 6059.

Commissioner Schapiro, as duty officer, determined that Commission business required the above change and that no earlier notice thereof was possible.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: George Kramer at (202) 272-2000.

Dated: April 26, 1993.

Margaret McFarland,

Deputy Secretary.

[Docket No. 92N–0445]

Gastroenterology-Urology Devices; Effective Date of the Requirement for Premarket Approval of the Penile Inflatable Implant

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule; opportunity to request a change in classification.

SUMMARY: The Food and Drug Administration (FDA) is proposing to require the filing of a premarket approval application (PMA) or a notice of completion of a product development protocol (PDP) for the penile inflatable implant, a medical device. The agency is also summarizing its proposed findings regarding the degree of risk of illness or injury designed to be eliminated or reduced by requiring the device to meet the statute's approval requirements, and the benefits to the public from the use of the device. In addition, FDA is announcing an opportunity for interested persons to request that the agency change the classification of the device based on new information.

DATES: Written comments by June 28, 1993; requests for a change in classification by May 13, 1993. FDA intends that if a final rule is issued, based on this proposed rule, PMA's will be required to be submitted within 90 days of the effective date of the final rule.

ADDRESSES: Written comments or requests for a change in classification to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mark D. Kramer, Center for Devices and Radiological Health (HFZ–470), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301–427–1194.

SUPPLEMENTARY INFORMATION:

I. Background

Section 513 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c) requires the classification of medical devices into one of three regulatory classes: Class I (general controls), class II (special controls), and class III (premarket approval). Generally, devices that were on the market before May 28, 1976, the date of enactment of the Medical Device Amendments of 1976 (the amendments) (Pub. L. 94–295), and devices marketed on or after that date that are substantially equivalent to such devices, have been classified by FDA. For the sake of convenience, this preamble refers to both the devices that were on the market before May 28, 1976, and the substantially equivalent devices that were marketed on or after that date as "preamendments devices."

Section 515(b)(1) of the act (21 U.S.C. 360e(b)(1)) establishes the requirement that a preamendments device that FDA has classified into class III is subject to premarket approval. A preamendments class III device may be commercially distributed without an approved PMA or declared completed PDP until 90 days after FDA's promulgation of a final rule requiring premarket approval for the device, or 30 months after final classification of the device under section 513 of the act, whichever is later. Also, a preamendments device is not required to have an approved investigational device exemption (IDE) (21 CFR part 812) contemporaneous with its interstate distribution until the date identified by FDA in the final rule requiring the submission of a PMA for the device.

Section 515(b)(2)(A) of the act provides that a proceeding to promulgate a final rule to require premarket approval shall be initiated by publication, in the **Federal Register**, of a notice of proposed rulemaking containing:

(1) The proposed rule;

(2) Proposed findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the device to have an approved PMA or declared completed PDP and the benefit to the public from the use of the device;

(3) An opportunity for the submission of comments on the proposed rule and the proposed findings; and

(4) An opportunity to request a change in the classification of the device based on new information relevant to the classification of the device.

Section 515(b)(2)(B) of the act provides that if FDA receives a request for a change in the classification of the device within 15 days of the publication of the notice, FDA shall, within 60 days of the publication of the notice, consult with the appropriate FDA advisory committee and publish a notice denying the request for change of classification or announcing its intent to initiate a proceeding to reclassify the device under section 513(e) of the act. If FDA does not initiate such a proceeding, section 515(b)(3) of the act provides that FDA shall, after the close of the comment period on the proposed rule and consideration of any comments received, promulgate a final rule to require premarket approval, or publish a notice terminating the proceeding. If FDA terminates the proceeding, FDA is required to initiate reclassification of the device under section 513(e) of the act, unless the reason for termination is that the device is a banned device under section 516 of the act (21 U.S.C. 360f).

If a proposed rule to require premarket approval for a preamendments device is made final, section 501(f)(2)(A) of the act (21 U.S.C. 351(f)(2)(A)) requires that a PMA or notice of completion of a PDP for any such device be filed within 90 days of the date of promulgation of the final rule or 30 months after final classification of the device under section 513 of the act, whichever is later. If a PMA or notice of completion of a PDP is not filed by the later of the two dates, commercial distribution of the device is required to cease. The device may, however, be distributed for investigational use if the manufacturer, importer, or other sponsor of the device complies with the IDE regulations. If a PMA or notice of completion of a PDP is not filed by the later of the two dates, and no IDE is in effect, the device is deemed to be adulterated within the meaning of section 501(f)(1)(A) of the act, and subject to seizure and condemnation under section 304 of the act (21 U.S.C. 334) if its distribution continues. Shipment of the device in interstate commerce will be subject to injunction under section 302 of the act (21 U.S.C. 332), and the individuals responsible for such shipment will be subject to prosecution under section 303 of the act (21 U.S.C. 333). FDA has in the past requested that manufacturers take action to prevent the further use of devices for which no PMA or notice of completion of a PDP has been filed and may determine that such a request is appropriate for penile inflatable implants.

The act does not permit an extension of the 90-day period after promulgation of a final rule within which an application or a notice is required to be filed. The House Report on the amendments states that "the thirty month 'grace period' afforded after classification of a device into class III * * * is sufficient time for manufacturers and importers to develop the data and conduct the investigations necessary to support an application for premarket approval." (H. Rept. 94–853, 94th Cong., 2d sess. 42 (1976).)

A. Classification of the Penile Inflatable Implant

In the **Federal Register** of November 23, 1983 (48 FR 53023), FDA issued a final rule classifying the penile inflatable implant into class III (21 CFR 876.3350). The preamble to the proposal to classify the device (46 FR 7577, January 23, 1981) included the recommendation of the Gastroenterology-Urology Devices Advisory Panel (the Panel), an FDA advisory committee, which met on September 26 and 27, 1976, regarding the classification of the device. The Panel recommended that the device be in class III, and identified certain risks to health presented by the device. FDA agreed with the Panel's recommendation and proposed that the penile inflatable implant be classified into class III. The proposal stated that the agency believed that insufficient information existed to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device, or to establish a performance standard to provide this assurance. The proposal stated that premarket approval is necessary for this device because it presents a potential unreasonable risk of injury due to: (1) Additional surgery that might be required as a result of a malfunction of the device; (2) infection resulting from defects in the design, construction, packaging, or processing of the device; and (3) adverse tissue reaction and erosion. In support of its proposal to strengthen regulatory surveillance of the device, FDA cited references supporting the proposed classification.

The preamble to the November 23, 1983 final rule (48 FR 53012) classifying the device into class III advised that the earliest date by which PMA's for the device could be required was June 30, 1986, or 90 days after promulgation of a rule requiring premarket approval for the device, whichever occurs later.

In the **Federal Register** of January 6, 1989 (54 FR 550), FDA published a notice of intent to initiate proceedings to require premarket approval of 31 preamendments class III devices assigned a high priority by FDA for the application of premarket approval requirements. Among other things, the notice described the factors FDA takes into account in establishing priorities for proceedings under section 515(b) of the act for promulgating final rules requiring that preamendments class III devices have approved PMA's. Although the penile inflatable implant was not included in this list of 31 devices, the agency has received more than 6,500 Medical Device Reports (MDR's) for this device since 1984. Additionally, the types of problems identified in these reports are similar to those identified during the classification proceedings of the device. Therefore, FDA has determined that the penile inflatable implant identified in 21 CFR 876.3350 has a high priority for initiating a proceeding to require premarket approval. Accordingly, FDA is commencing a proceeding under section 515(b) of the act to require that the penile inflatable implant has an approved PMA or a declared completed PDP.

B. Dates New Requirements Apply

In accordance with section 515(b) of the act, FDA is proposing to require that a PMA or notice of completion of a PDP be filed with the agency for the penile inflatable implant within 90 days after promulgation of any final rule based on this proposal. An applicant whose device was in commercial distribution before May 28, 1976, or has been found by FDA to be substantially equivalent to such a device, will be permitted to continue marketing the penile inflatable implant during FDA's review of the PMA or notice of completion of the PDP. FDA intends to complete the review of any PMA for the device within 180 days and a notice of completion of a PDP within 90 days. FDA cautions that, under section 515(d)(1)(B)(i) of the act, FDA may not enter into an agreement to extend the review period for a PMA beyond 180 days unless the agency finds that "* * * the continued availability of the device is necessary for the public health."

FDA intends that, under § 812.2(d) (21 CFR 812.2(d)), the preamble to any final rule based on this proposal will state that, as of the date on which a PMA or notice of completion of a PDP is required to be filed, the exemptions in § 812.2 (c)(1) and (c)(2) from the requirements of the IDE regulations for preamendments class III devices will cease to apply to any penile inflatable implant which is: (1) Not legally on the market on or before that date, or (2) legally on the market on or before that date but for which a PMA is not filed by that date, or for which PMA approval has been denied or withdrawn.

If a PMA or notice of completion of a PDP for the penile inflatable implant is not filed with FDA within 90 days after the date of promulgation of any final rule requiring premarket approval for the device, commercial distribution of the device must cease. The device may be distributed for investigational use only if the requirements of the IDE regulations regarding significant risk devices are met. The requirements for significant risk devices include submitting an application to FDA for its review and approval. An approved IDE is required to be in effect before an investigation of the device may be initiated or continued. FDA, therefore, cautions that IDE applications should be submitted to FDA at least 30 days before the end of the 90-day period to avoid interrupting investigations.

C. Description of the Device

A penile inflatable implant is a device that consists of two inflatable cylinders implanted in the penis, connected to a reservoir filled with radiopaque fluid implanted in the abdomen, and a subcutaneous manual pump implanted in the scrotum. These devices may be constructed from silicone or polyurethane elastomers and some models also contain silicone gel. Also included within this device classification are those models of the penile inflatable implant that have the reservoir and the pump combined into one component that is implanted within the scrotum, or that have a reservoir and pump combined within each of the two cylinders. When the cylinders are inflated, they provide rigidity to the penis. These devices are used in the treatment of erectile impotence.

The proposed rule to require premarket approval of penile inflatable implants applies to legally marketed penile inflatable implants identified above that were commercially distributed before May 28, 1976, and to devices introduced into commercial distribution since that date that have been found to be substantially equivalent to such penile inflatable implants.

D. Proposed Findings With Respect to Risks and Benefits

As required by section 515(b) of the act, FDA is publishing its proposed findings regarding: (1) The degree of risk of illness or injury designed to be eliminated or reduced by requiring the penile inflatable implant to have an approved PMA, and (2) the benefits to the public from the use of the device.

E. Degree of Risk

After considering the information discussed by the Panel during the classification proceedings, as well as the published literature and MDR's, FDA has evaluated the risks associated with the penile inflatable implant. FDA now believes that the following are significant risks associated with the use of the penile inflatable implant:

VOL
58
ISS
80
AP
28
19 93
UMI

1. Infection

Infection, a risk of any surgical implant procedure, is associated with the use of penile inflatable implants (Refs. 1 through 7). It is one of the most serious potential complications of implantation and can cause significant patient morbidity (Refs. 3 through 6). Infections usually result in removal of the device and may result in an inability to replace the device due to corporeal fibrosis and cavernositis (Refs. 1 and 6 through 8). Occasionally, infections lead to genital gangrene and extensive tissue loss (Refs. 1 and 9). As in any implantation procedure, compromised device sterility and surgical techniques may be major contributing factors to this risk (Refs. 1 and 2). Additionally, a life-long risk for hematogenously seeded infection probably exists for these patients and antibacterial prophylaxis for subsequent dental and surgical procedures may be needed (Refs. 1, 3, and 7).

2. Migration and Extrusion of the Penile Inflatable Implant

Migration, in general, is the movement of the penile inflatable implant within the body. Extrusion is the specific type of migration where the penile inflatable implant occupies an abnormal external position (Ref. 10). Implant extrusion is usually associated with concurrent wound dehiscence at the incision site (Refs. 2, 4, 7, and 11 through 15), but proximal migration has also been reported (Refs. 2, 7, and 16). Migration of the reservoir intra-abdominally, either shifting to an open space or over an organ; movement of the pump to midscrotum; and movement of the cylinder to the site of perforation (e.g., extrusion in the urethra), posteriorly into the buttocks, and from one corpus cavernosum to the opposite side have all been reported. Component migration increases the risk of pressure necrosis and, in some cases, of erosion (Refs. 2, 14, and 17 through 20). Migration and extrusion of the penile inflatable implant sometimes requires surgical intervention (Refs. 2, 14, 17, 19, and 21).

3. Erosion of the Penile Inflatable Implant

Erosion is the destruction of tissue (Ref. 10) which, with penile inflatable implants, usually occurs distally through the urethra on the glans penis by the cylinders (Refs. 2, 17, 20, 22, and 23). Erosion has also been reported through adjacent visceral structures (bowel, bladder, ileal conduit, etc.) by the reservoir and through the scrotal wall by the pump (Refs. 12, 16, and 22). Erosion through the urethra has been associated primarily with intermittent and/or indwelling catheterization (Ref. 23). In addition, erosion into the tunica albuginea by the cylinders has been noted (Refs. 2, 24, and 25). Skin erosion has been reported following implantation of the penile inflatable implant due to the insertion of an oversized device (Ref. 26), vigorous dilatation of the cavernosa or supporting structures at the time of implantation (Refs. 2 and 7), aggressive dissection of the subdartos pocket (Refs. 2 and 27), or other iatrogenic injury to the urethra. Skin erosion may result in subsequent infection or device extrusion.

4. Fibrous Capsule Formation

Fibrous capsules form around the various components of penile inflatable implants (Refs. 1, 2, and 28 through 30). The formation of fibrous encapsulations around the reservoir and/or pump may prevent complete deflation of the cylinders (Refs. 5, 19, 29, and 31) or cause spontaneous inflation of the cylinders (Ref. 32). If leakage occurs from the reservoir, the fibrous capsule becomes much thicker and, if adhesions form to adjacent structures, rupture of the fibrous capsule during reinflation of the reservoir can cause damage to adjacent structures (Ref. 30). Problems due to encapsulation may sometimes be corrected by device manipulation (Refs. 31 and 32), but corrective surgery may also be required (Refs. 19, 32, and 33). Additionally, the fibrous capsule that forms may cause genital changes which are not reversed by explantation of the device (Ref. 31).

The formation of fibrous capsules has been reported to be related to a foreign body reaction (Refs. 1 and 28) and a reaction to silicone (Ref. 31).

5. Mechanical Malfunctions

Mechanical problems with the cylinders of penile inflatable implants are the most frequently cited cause of device failure (Ref. 34). Cylinder leaks can occur as a result of trauma to the cylinders during implantation (Ref. 35), either at the point of connection with the inflation tubing or as a result of friction when the tubing is positioned against the cylinder (Refs. 35 through 39). Cylinder ruptures (Ref. 41), buckling (Refs. 42 through 44) and aneurysms have various etiologies and result when the cylinders spontaneously inflate (Ref. 42), over-inflate, under-inflate, or when inflation is not uniform (Refs. 7, 35, and 45 through 48). Asymmetrical distention of the cylinders can result in penile angulation and a gradual loss of penile rigidity (Ref. 2).

Tubing leaks and kinks can occur when nonreinforced silicone tubing is used or when the tubes separate from the cylinder (Ref. 4). Positioning of the tubing in the mobile scrotum may increase tubing stress, resulting in premature tubing wear (Ref. 4). Folds and kinks can occur in the tubing from the reservoir to the pump when the pump migrates from the scrotum, causing excess tubing length (Refs. 32, 39, and 49). Connector leaks and separations have also been reported (Refs. 4, 50, and 51).

Hypersensitive valves or valve failures that result in inadequate inflation or premature deflation during sexual activity have been reported in the literature (Refs. 39 and 52). Mechanical problems associated with the pump include pump noise, abnormal pump position (e.g., intussusception (Ref. 5), migration (Refs. 32, 39, and 49), and difficulty with inflation/deflation (Refs. 53 and 54). Fibrous encapsulation of the reservoir, which prevents complete cylinder deflation (Ref. 5), has also been documented (Refs. 41, 55, and 56). Fluid leaks from the reservoir result in fluid loss from the device and may result in the need for reoperation (Refs. 40, 42, and 57). Finally, material fatigue will eventually cause most hydraulic penile inflatable implants to malfunction (Ref. 37).

Device malfunctions may require replacement or revision (Ref. 34). When replacement of a malfunctioning device is required, the complication rate is increased (Ref. 4). Multiple revision procedures significantly increase the risk of irreversible fibrotic complications, such as corporeal fibrosis, which decreases penile length and penile function, and partial or complete denervation, which decreases penile sensation (Refs. 2 and 4).

6. Iatrogenic Disorders

Improper device handling (including cutting or nicking of the device), inadequate or vigorous dilatation (Refs. 2, 4, and 7), aggressive dissection (Refs. 2 and 27), malpositioning of the device (Refs. 2, 58, and 59), cylinder suturing (Ref. 58), cylinder cross-over (Refs. 7 and 20), and cylinder missizing (Refs. 26, 52, and 60) are among the preventable complications caused as a result of surgical technique. Iatrogenic causes may be responsible for various adverse conditions (e.g., product damage or failure, "SST deformity," where the glans forms a ventral chordee-like angulation relative to the shaft of the penis (Ref. 2), aneurysm, perforation, erosion, migration, rupture of the corporeal body, infection, sensory loss, and gangrene (Refs. 1, 2, 4, 7, 9, 24, 26, 45, 55, 59 through 64)), necessitating device removal and/or replacement.

7. Patient Dissatisfaction

Patient dissatisfaction with penile inflatable implants results in a high reoperation rate (Ref. 34). Dissatisfaction occurs due to surgical complications such as infection, unresolved pain or fibrotic changes that can result in sensory loss (Refs. 2 and 4), as well as disappointment in cosmetic appearance (Refs. 5 and 70), concealability, (Refs. 39, 52, and 53), rigidity/firmness (Refs. 53, 54, and 66) and decreased sensation (Refs. 54 and 67). Dissatisfaction can result when the patient and/or his partner have unrealistic expectations about the size of the penis after surgery (Ref. 67) (e.g., inadequate penile length and girth (Refs. 5, 54, and 66)), or are unaware of available alternative treatments (Refs. 53, 54, and 66). Dissatisfaction with the device also occurs when the patient has not had proper training in the use of the device or is unwilling and/or unable to follow proper inflation/deflation procedures (Ref. 18).

8. Human Carcinogenicity

Carcinogenesis has been widely discussed as a reputed risk secondary to implantation of any material. Evidence from the literature indicates that, in animal studies, different forms of silicone have been associated with various types of cancer (Refs. 68 through 72). Cases of several types of cancer in humans have been reported in association with various forms of implanted silicone (Refs. 73 through 76).

9. Human Reproductive and Teratogenic Effects

The effect of certain silicone compounds on the reproductive potential of the male is largely unknown. Le Vier and Jankowiak report that at least one form of organosiloxane, which is known to be present in some silicone gels, mimics estrogens in the male rat, leading to rapid testicular atrophy (Ref. 77).

Teratogenesis includes the origin or mode of production of a malformed fetus and the disturbed growth processes involved in the production of a malformed fetus. Studies using silicone fluid in animals have been minimal, and yield contradictory and inconclusive results (Refs. 78 through 80). Prolonged contact with either silicone elastomer, or silicone gel-filled membrane in devices containing silicone gel, presents a potential risk of teratogenicity in humans. Additionally, the theoretical risk of abnormalities appearing later in life in normally appearing offspring also warrants investigation.

10. Immune Related Connective Tissue Disorders—Immunological Sensitization

Immunological sensitization may be a serious risk associated with the implantation of a penile inflatable implant. Immune related connective tissue disorders have been reported in women who have silicone gel-filled devices or who have had silicone injections in augmentation mammoplasty. There are clinical reports of several patients who have undergone augmentation mammoplasty with silicone gel-filled breast prostheses and later presented with connective tissue disease-like syndromes (Ref. 81). Because penile inflatable implants may consist of similar silicone elastomers and gels, further study of the potential risk of immune related connective tissue disorders in humans with these implants is warranted.

11. Biological Effects of Silica

Amorphous (fumed) silica is bound to the silicone in the elastomer of the penile inflatable implant, and may be fibrogenic and immunogenic. Fumed silica and the silicone elastomer each elicit cellular responses in rats (Ref. 82). The biological effects of silica, particularly the immunologic component of these reactions, present a potential risk and need to be examined.

12. Silicone Particle Shedding, Silicone Gel Leakage and Associated Migration

Silicone particle shedding and subsequent migration have been reported with genitourinary prosthetic devices, including penile inflatable implants (Ref. 28). Silicone gel leakage and migration from the silicone elastomer envelope, either from rupture of the envelope or by leaking of the gel through the envelope (gel "bleed"), are also significant risks of penile inflatable implants containing silicone gel. Rupture of the envelope with gel leakage and subsequent migration may be secondary to surgical technique, or may result from mechanical stresses such as device usage, trauma, and wear on the envelope, and necessitates removal of the implant. In addition, silicone gel-filled breast implants are reported to "bleed" micro amounts of silicone through the intact silicone elastomer shell into the surrounding tissues (Refs. 83 through 92). Although diffusion of silicone gel through the elastomer envelope and silicone particle shedding have not specifically been measured in the penile inflatable implant, particle shedding and gel bleed continue to be potential risks with this device and need to be evaluated. Migration of the particles and gel into the human body presents the potential for development of adverse effects such as granulomas or lymphadenopathy (Refs. 28, 73, and 74). The ultimate fate of migrating silicone particles or silicone gel within the body is currently not well understood.

The following potential risk is associated only with those penile inflatable implants that contain polyurethane elastomer.

13. Degradation of Polyurethane Elastomer

The polyurethane elastomer materials, which have been used to cover some penile inflatable implants, may degrade over time and release degradation products such as methylene diamine or toluene diamine, which are potential carcinogens in animals (Refs. 93 and 94).

14. Other Reported Complications

The following are among the additional risks which have also been reported with penile inflatable implants: Hematomas/seromas (Refs. 2, 8, 15, 25, and 42), discomfort/pain (Refs. 2, 15, 21, 29, 31, 32, 42, 54, and 95), penile and scrotal pain (Refs. 5, 13, and 37), scrotal swelling (Ref. 5), scrotal erythema (Ref. 42), scrotal abscess (Ref. 50), scrotal heaviness (Ref. 13), edema (Refs. 2, 5, and 42), adhesions requiring lysis (Ref. 23), inflammatory hydrocele (Ref. 23), ulceration (Ref. 58), necrosis (Refs. 5 and 42), vascular compromise (Refs. 58 and 96), ventral chordee and penile curvature (Refs. 1, 29, 31, and 97), ventral band formation (Ref. 1), ischemia (with resultant loss of tissue) (Ref. 31), genital change (Ref. 31), scarring (Ref. 29), urinary retention (Refs. 95 and 98), inguinal hernia (Ref. 35), difficulty with ejaculation (Ref. 54), phimosis (Ref. 58), allergic reaction to contrast medium (Ref. 40), and deformity (Ref. 54).

F. Benefits of the Device

The penile inflatable implant is intended to provide rigidity to the penis upon demand to simulate an erection, and is indicated in subjects who have lost the ability to produce or maintain an erection sufficient for intromission. Device implantation is a discretionary surgical procedure performed for reasons related to quality of life, rather than medical reasons.

Implants have been used to treat impotence resulting from diabetes mellitus, spinal cord injury, Peyronie's disease, pelvic surgery, priapism, hypertension, coronary artery disease.

UMI

and other medical conditions. These devices also have been implanted in men with psychological impotence (Ref. 53).

The loss of sexual function can result in social and psychological problems for the impotent male. Feelings of frustration and despair, the loss of self-esteem, and a sense of being unmasculine often accompany the loss of normal sexual function (Refs. 46, 65, and 99). Such psychological problems can also lead to associated physical manifestations such as hypertension, and some men contemplate suicide (Ref. 65). For single men, impotence may cause the subject to cease normal social interactions (Ref. 11). The partner of the impotent male also suffers, and impotence can be damaging to marriages and relationships (Refs. 46, 65, and 100). Some women feel that their partner's condition is due to their lack of femininity or some sexual failing on their part (Ref. 100).

Implantation of a penile inflatable implant can help to alleviate feelings of inadequacy in impotent males, thereby improving their quality of life (Refs. 46, 54, and 65). Published studies indicate that the recipients of penile inflatable implants exhibit a moderately high degree of satisfaction with respect to sexual function and overall quality of life (Refs. 44, 46, 53, 54, 62, 65, 101, and 102). The literature also notes a positive impact on the partners of males who have received penile implants and on the relationship as a whole (Refs. 46, 65, 101, and 102).

In addition, because device implantation allows for improved intromission, natural methods of conception (as opposed to alternate methods such as artificial insemination) can be utilized to father children by the male who has normal ejaculatory function and semen quality prior to and after implantation.

G. Need for Information for Risk/Benefit Assessment of the Device

As the above sections indicate, there is reasonable knowledge of the risks and benefits associated with the penile inflatable implant. There is, however, insufficient valid scientific evidence to permit FDA to perform a risk/benefit analysis. Therefore, FDA is now seeking further information on the following safety and effectiveness issues associated with the penile inflatable implant:

(1) Long-term safety and effectiveness data for the device is needed. The incidence of implant failure and attendant causes, as well as the incidence of reoperations required, have not been clearly identified. Such device failures include, but are not limited to: Cylinder rupture, leakage, and aneurysm; tubing leakage, wear, and kinking; pump and valve failure; reservoir leakage; and implant migration, extrusion, and erosion. Also, the incidence rates of infection, pain/discomfort, hematoma, edema, ulceration, necrosis, scarring, iatrogenic injury, penile curvature, sensory loss, and patient dissatisfaction secondary to implantation of the penile inflatable implant are poorly understood and need to be studied.

(2) It is unknown for which subgroups of the population with erectile dysfunction the benefits of implantation of penile inflatable implants outweigh the attendant risks. Factors which may increase the rate of complications include the etiology and duration of impotence, concomitant medical conditions, various anatomical abnormalities, patient and/or partner manual dexterity, and prior treatments for the disorder, including prior surgery. An appropriate benefit/risk analysis is needed for each subgroup for whom the device will be indicated.

(3) The required presurgical workup of patients prior to device implantation must be clarified. Because the adverse events that may occur following implantation of the device may not be reversible, investigation is needed to determine which prior conservative therapies a patient should have failed before being considered an appropriate candidate for a penile inflatable implant.

(4) The anatomical and physiological effects of implantation of penile inflatable implants need to be examined. Patient dissatisfaction with penile length and/or girth and rigidity/firmness leading to reoperation need to be factored into the benefit/risk analysis. In addition, the ability of the device to provide adequate rigidity to permit coitus must be substantiated.

(5) The immediate postsurgical and long-term psychological benefits of the device, as compared to presurgical levels, need to be examined and quantified. In order to document the benefits of restoration of erectile function with penile inflatable implants, such factors as patient and partner satisfaction, improved self-image, and improved psychological outlook, need to be studied using well-established standardized tests.

(6) The effect of penile inflatable implant use on future male fertility is poorly understood. The benefits of the ability to conceive naturally as a result of improved intromission following device implantation need to be examined and quantified.

(7) The effect of device implantation on future medical diagnoses and treatments needs to be examined. It is not well understood whether the device's presence may interfere with the ability to diagnose and treat disorders affecting organs or structures in proximity to the implant components.

(8) The incidence and types of problems associated with fibrous capsular formation must be clarified. It is not clear what methods are used in the prevention and treatment of problems arising from capsular formation in patients with penile inflatable implants, nor is it clear how these approaches may reduce the risks associated with use of this device.

(9) The potential risks associated with silicone particle shedding and silicone gel leakage and the subsequent migration of the particles and gel need further clarification. This would include consideration of gel cohesiveness, envelope thickness/strength, diffusion of the gel through the envelope (gel "bleed"), and the role that physical, mechanical, and chemical characteristics of silicone elastomers and gels play in the immediate or long-term rupture of penile inflatable implants.

(10) The potential long-term adverse effects of penile inflatable implants, such as cancer, immune related connective tissue disorders, reproductive and teratogenic effects, and later effects in offspring, are unknown. Likewise, in the polyurethane elastomer covered penile inflatable implant, the long-term effects of the degradation of polyurethane elastomer (such as mechanical integrity and carcinogenicity) are also not understood. The agency notes that neither the silicone particles, which may be shed from the device (Refs. 28, 103, and 104), nor the chemical forms of silicone monomers or other additives, which may leach from the device, have been characterized, and their metabolic fates are not known (Ref. 79). Furthermore, no satisfactory independent study has thoroughly evaluated the chronic long-term toxicology of cross-linked silicone polymers of different molecular sizes. Because young adult males are among the potential recipients of these implants, information regarding the chronic toxic effects including possible reproductive and teratogenic effects of silicone could be of substantial importance in determining the risk to these patients and their offspring.

(11) The malfunction rate and longevity reported for penile inflatable implants have generally not reflected the predictions of preclinical testing. Further investigation is warranted to determine how the laboratory and animal studies can be designed to predict more accurately device reliability under actual conditions of use.

FDA believes, therefore, that the penile inflatable implant should undergo premarket approval to obtain valid scientific evidence in order for FDA to determine whether the risks of using the device are adequately balanced by its benefits.

II. PMA Requirements

Any PMA for the device must include the information required by section 515(c)(1) of the act and the implementing provisions under 21 CFR 814.20. Such a PMA shall include a detailed discussion, accompanied by the results of applicable preclinical and clinical studies, of the above identified risks and the effectiveness of the device. In particular, the PMA shall include all known or otherwise available data and other information regarding: (1) Any risks known to the applicant that have not been identified in this document, and (2) the effectiveness of the specific penile inflatable implant that is the subject of the application. Valid scientific evidence, as defined in 21 CFR 860.7, addressing the safety and effectiveness of the device should be presented, evaluated and summarized in a section or sections of the PMA separate from known or otherwise available safety and effectiveness information that does not constitute valid scientific evidence (e.g., isolated case reports, random experiences, etc.).

A. Manufacturing Information

All manufacturing information for the device should be completely described. The information should include, but is not necessarily limited to, the chemical formulation and manufacturing procedures and processes, presented in a step-by-step manner from the starting materials to finished product, including, but not limited to, all nonreactants and reactants (including intermediate precursors) for the cylinders, pumps, reservoirs, tubing, and all internal components, adhesives, colorants, and filling agents (e.g., gel, saline, contrast medium, etc.). A complete master list of the common chemical names and alternate names (manufacturer's trade name or code) for all nonreactants, reactants (including intermediate precursors) and products should be provided. Chemical characterization of the elastomer intermediates, outer shell of the cylinders, pump, and reservoir, and internal gel (if applicable) sufficient to demonstrate control of the chemical processing of the device materials should be provided. This should be based on lot-to-lot comparisons (10 consecutive lot minimum) of the following information: (1) The molecular weight distribution, expressed as weight average molecular weight (Mw), number average molecular weight (Mn), peak molecular weight (Mp), polydispersity (MWD), and viscosity average molecular weight (Mv) of these precursors; (2) the results of analyses for residual levels of volatile and nonvolatile cyclic compounds (where applicable); (3) a comparison of viscosity, number average molecular weight, and percent volatiles on a single graph (where applicable); and (4) isocyanate content, acidity, isomer ratios, hydroxyl number, water content, acid number, and peroxide content (where applicable). Documentation establishing the extent of cross-linking (where applicable) in the materials of the cylinders, pumps, reservoirs, tubing, and all internal components and filling agents, or the silicone-hydride and vinyl content of cross-linked materials of the cylinders, pumps, reservoirs, tubing, and all internal components and filling agents, as well as the particle size and surface area of the silica if present in the cylinders, pumps, reservoirs, tubing, and all internal components and filling agents, or gel should be provided. A complete description of the medium used to inflate the device (saline, contrast medium, etc.) and whether and how the implant will be prefilled must also be provided.

The standard operating procedures for sterility and materials qualifications must be provided. Sterilization information should include the method of sterilization; the detailed sterilization validation protocol and results; the sterility assurance level; the type of packaging; the packaging validation protocol and results; residual levels of ethylene oxide, ethylene glycol, and ethylene chlorohydrin remaining on the device after the sterilization quarantine period, if applicable; and the radiation dose, if applicable. Because the penile inflatable implant comes into contact with the bloodstream, procedures for routine pyrogen testing also must be provided.

A complete description of the functional testing of subassemblies and finished products performed during the manufacturing process and during quality assurance/quality control (QA/QC) testing must be provided. Functional testing performed during manufacturing and QA/QC procedures should detect any device flaws that could lead to short-term failure and should demonstrate functional integrity of the device. A QA/QC plan that demonstrates how raw materials, components, subassemblies, and any filling agents will be received, stored, and handled in a manner designed to prevent damage, mixup, contamination, and other adverse effects must be provided. This plan shall specifically include, but not necessarily be limited to, a record of raw material, component, subassembly, and filling agent acceptance and rejection, visual examination for damage, and inspection, sampling and testing for conformance to specifications.

Written procedures for finished device inspection to assure that device specifications are met must be provided. These procedures shall include, but are not limited to, the requirement that each production run, lot or batch be evaluated and, where necessary, tested for conformance with device specifications prior to release for distribution. A representative number of samples shall be selected from a production run, lot or batch and tested under simulated use conditions and to any extremes to which the device may be exposed. Appropriate functional testing should also be performed at the component, subassembly, and final assembly levels (e.g., valve checks; valve release limits; joint checks; minimum, nominal and maximum pressure ratings; pressure decay rate; device firmness; leak tests; and any other appropriate tests) to detect any deficiencies that could compromise functional integrity.

Furthermore, the QA/QC procedures must include appropriate visual testing of the packaging, packaging seal, and product. Sampling plans for checking, testing, and release of the device shall be based on an acceptable statistical rationale (21 CFR 820.80 and 820.160).

B. Preclinical Data

Complete identification and quantification of all chemicals, including residual amine containing components, volatile and nonvolatile silicone cyclics and oligomers below a molecular weight of 1,500 exhaustively extracted from each of the individual structural components (cylinders, pump, reservoir, tubing, and any other materials or filling agents) as they are found in the final sterilized device should be reported. The solvents used for extraction should have varying polarities and should include, but not be limited to, ethanol, ethanol/saline (1:9), and dichloromethane. Other, more contemporary extraction techniques, such as analytical-scale supercritical fluid extraction, may also be useful, at least for exhaustive extraction of the

VOL 58 ISS 80 AP 28 1993 UMI

silicone materials. Experimental evidence must be provided establishing that exhaustive extraction is achieved with one of the selected solvents, and the percent recovery, especially for the more volatile components, must be reported. The molecular weight distribution of the extract should also be provided along with the number and weight average molecular weight, and polydispersity. All experimental methodology must be described, and raw data (including instrument reports) must be provided along with all chromatographs, spectrograms, etc. The limit of detection (2X noise level) must be provided when the analyte of interest is not detected. Laboratory test methods and animal experiments used in the characterization of the physical, chemical (other than exhaustive extraction) and mechanical properties of the device should be applicable to the intended use of the device in humans. Data on the distribution and metabolic fate of amine containing components, silicone, and any other materials used in the manufacturing of the device should be supplied.

Biocompatibility testing data must be provided for all materials (cylinder, pump, reservoir, tubing, filling agents, gel, and any other materials) in the penile inflatable implant, including all color additives (ink, dyes, markings, etc.) used to fabricate the penile inflatable implant. FDA guidance on biocompatibility testing is available in the document entitled "Tripartite Biocompatibility Guidance for Medical Devices." A copy may be obtained upon request from the Division of Small Manufacturers Assistance (HFZ–220), Center for Devices and Radiological Health, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Biocompatibility evaluation should follow the methodology of tests for blood contacting, long-term internal devices.

Toxicological effects (e.g., cytotoxicity, mutagenicity, suppression of the immune system, allergenicity, and reproductive and developmental toxicity) and hemocompatibility should be identified. Complete mutagenicity testing of each chemical extracted from the finished, sterilized components of the device should include the following tests: Bacterial mutagenicity, mammalian mutagenicity, DNA damage, and cell transformation assay.
